Preface

After HEINRICH LAUFER's *Beiträge zur Kenntnis der Tibetischen Medizin* (Berlin, 1900) had been for decades the only comprehensive if preliminary work on the topic, the study of Lamaist healing-art has received of late a new and unexpected impulse from three publications, each of which is meritorious in its own individual way: CYRILL VON KORVIN-KRASINSKI's strictly scientific *Tibetische Medizinphilosophie* (Zurich, 1953), THEODOR BURANG's mainly popular *Tibetische Heilkunde* (Zurich, 1957), and ILZA VEITH's richly illustrated *Medizin in Tibet* (Leverkusen, 1960). What is still a desideratum—though it should properly be the starting-point of any such research—is a complete edition and translation of the *rGyud bži*, the standard book of Tibetan medicine, which is supposed to have been adapted from a now lost Sanskrit original by the Kashmirian physician Candranandana about the middle of the 8th century A.D., and which is said to have been written by none other than Kumārajīvaka, the famed contemporary of Buddha Śākyamuni¹. The indispensable condition, however, of a correct understanding of the *rGyud bži* is an intimate knowledge of Tibetan medical terminology, which in its turn can be acquired only by closely comparing an extant medical Sanskrit text of some length with its Tibetan counterpart. No work seems better suited for this purpose than Vāgbhāṭa's *Aṣṭāṅgahrdayasaṃhitā*, the only representative description of Indian medicine incorporated into the Lamaist canon.

The plan to bring out a critical edition of the Tibetan *Aṣṭāṅgahrdayasaṃhitā*, a specimen of which—along with the original Sanskrit, a literal translation, and a running commentary on the translating-technique—is now placed before the learned public, was conceived in the winter of 1958—59, during a prolonged stay at the International Academy of Indian Culture in New Delhi, where the present writer made a complete transcript of the text from the Peking xylograph: a tedious job that was, however, well paid in the end since the Japanese photomechanical reprint, like the Narthang xylograph, turned out to be difficult to read in many places. It is intended to publish all 120 chapters in Sanskrit, Tibetan, and English and to prepare a trilingual glossary of the medical terminology that may serve, as it were, for a master-key to the locked treasures of Lamaist healing-art.

¹ This is not to answer beforehand the question of its true provenance and authorship, on which now see UNKRIG in KORVIN-KRASINSKI's *Medizinphilosophie* p. xviii sq.

In concluding, the author wishes to express his sense of obligation to Prof. Dr. WILHELM RAT for the indefatigable support given at all stages of this work; to Dr. WOLFGANG VOIGT of the State Library, Marburg, and the staff of the India Office Library, London, for the prompt services rendered in the procurement of urgently needed books; and, last but not least, to Mr. WILLIAM FIELDING HATTON for a stylistic check-up on the Introduction.

Marburg, *June 25, 1963*

CLAUS VOGEL

Introduction

1. In the medical literature of the Hindus, three voluminous works generally go by the name of *Vāgbhāṭa*¹; they are the *Aṣṭāṅgahrdaya-saṃhitā* [Ah.] or "Collection of the Essence of the Octopartite (Science)," the *Aṣṭāṅgasamgraha* [As.] or "Compendium of the Octopartite (Science)," and the *Rasaratnasamuccaya* or "Jewel Accumulation of Metallic Preparations²." While the genuineness of the Ah. and As. has never been seriously questioned, the *Rasaratnasamuccaya* is in some manuscripts attributed to one *Nityanātha* or *Aśvinikumāra* and at any rate disagrees so much in content and style from those two works that *Vāgbhāṭa*'s authorship appears rather dubious³.

In return for this, the Ah. and As. pose another problem, namely, whether they originate with one and the same author or with two different authors who are namesakes. For though the colophons of both works give *Vāgbhāṭa*, the son of *Siṃhagupta*, as the author, Indian commentators often refer to the former simply as *Vāgbhāṭa*, but to the latter as *Vṛddha-Vāgbhāṭa*⁴, a term that is usually interpreted as "elder

¹ Other forms are *Bābhāṭa* (Bengal) and *Vāhāṭa* (South India). The Tibetans have reproduced the name with *Pha-gol* or *Pha-khol*, which comes nearest to the Bengali spelling. For details, see notes on Opening Statement.

² *Vāgbhāṭa* is further credited with an autocommentary on his Ah., which is extant only in Tibetan (cf. HUTH, SPAW 1895 p. 270), as well as with the following works: *Bāhaṭanighaṇṭu*, *Bhāvaprakāśa*, *Padārthacandrikā*, *Śāstradarpaṇa*, *Śataśloki*, *Vāgbhāṭīya*, and *Vamanakalpa* (cf. CORDIER, *Vāgbhāṭa* pp. 7 & 16). It is virtually certain, however, that the bulk of these works originate from different authors, the name *Vāgbhāṭa* being fairly common after all (cf. GODE, *Studies* I p. 171 sq.).

³ Cf. CORDIER, *Vāgbhāṭa* p. 7 sqq.; JOLLY, *Medicin* p. 4. The authenticity has recently been defended by BHATTACHARYYA (ABORI xxviii p. 121 sq.), whose argumentation centres around the fact that Candrāṭa in his *Yogaratanasamuccaya* (gadaśāntivarga, fol. 4b) ascribes a passage from the *Rasaratnasamuccaya* (xxi 145–149) to one *Rasa-Vāgbhāṭa*. But how "the inclusion of the *Rasa-Vāgbhāṭa* along with *Vāgbhāṭa* . . . and *Vṛddhavāhāṭa* . . . among the sources of Candrāṭa is a most important discovery on the problem of the identity of the different *Vāgbhāṭas*" in the way BHATTACHARYYA has it remains a complete mystery. Any disinterested person would take it for evidence to the contrary, namely, that the three of them are only namesakes and have actually nothing to do with one another.

⁴ It should be observed, however, as BHATTACHARYYA (ABORI xxviii p. 116 sqq.) rightly points out, that this policy was adopted only by later scholiasts, say from Hemādri onwards, and that Aruṇadatta, Indu, and Candranandana leave

Vāgbhaṭa." This distinction between a junior and senior writer of the same name is at first sight corroborated by a passage from the Ah. (VI 40.79) which expressly states:

*aṣṭāṅgavaidyakamahodadhimanthanena
yo 'ṣṭāṅgasamgrahamahāmrtarāśir āptaḥ |
tasmād analpaphalam alpasamudyamānām
prityartham etad uditam prthag eva tantram ||*

The big nectar heap of the Aṣṭāṅgasamgraha, which (was) obtained by churning the big ocean of the octopartite medicine—from this the present work (was) produced separately, for the joy of those who show (but) little zeal, (being) of no little use.

2. Once the precedence of the As. seemed established, further ostensible evidence was adduced in its favour. CORDIER¹, who was the first to tackle the problem methodically, relied on the following five arguments. (1) The title Aṣṭāṅgasamgraha is identical with the one quoted by ancient Arab sources² as Kitāb Asānkar or Astānkar. (2) The As. is the only work in which the traditional division of medicine into eight parts is fully implemented. (3) The mixture in the As. of prose and verse reminds one of Caraka and Suśruta, while the Ah. consists only of verses. (4) Four stanzas of the As. that do not occur in the Ah. have been included in

no doubt about the fact that they consider the authors of both works identical. A few examples will suffice to prove this.

Arunadatta, in commenting on the cursory treatment which honey is given in Ah. I 5. 51 *sqq.*, remarks: *tathā hy ayam eva tantrakāraḥ samgrāhe madhuno bhedān ākhyat* "thus, for instance, the present writer in his Compendium specified various sorts of honey."

Indu, in pondering over the different effect on digestion which radish is accorded in As. I 17 ~ I p. 128b 3/4 and Ah. I 6. 102, professes: *vṛddhamūlakasya tridoṣakartuḥ kaṭukasya kaphakartṛtve yad ācārya-Vāhaṭena madhuvipākitvaṁ kāraṇam uktam tat svayaṁ hṛdayapaṭhitasyaiva vṛddhamūlakasya kaṭuvipākitvaṁ smṛtam kiṁ rūṇyat kiṁcid iti na jāne* "while (in the present case) of full-grown radish, (which is) productive of (all) three humours (and) pungent because of its productiveness of phlegm, sweetness of digestion (has been) named as (its) action by Master Vāhaṭa, (in the analogous case) of full-grown radish mentioned in his Essence pungency of digestion (has been) recorded by him (as such); if (there is) anything else (to it) I (do) not know [?]."

Candranandana, in comparing the Ah. with the As., often employs phrases like *tathā ca samgrāhe proktam ācāryeṇa* "and so (has been) taught by the Master in his Compendium" (Ah. I 5. 13) or *ity uktam samgrāhe tantrakartrā* "thus (has been) said by the Author in his Compendium" (Ah. I 20. 39).

¹ Données p. ? As this pamphlet is not available to us, we must depend for what follows on JOLLY's abstract (ZDMG liv p. 262).

² Mainly the Fihrist (FLÜGEL, ZDMG xi p. 148 *sqq.*), Mas'ūdī's Golden Meadows, and Ibn Abī Uṣaybi'a's Fountains of Information (DIETZ, Analecta I p. 117 *sqq.*; CRETON, JRAS vi p. 105 *sqq.*; MÜLLER, ZDMG xxxiv p. 465 *sqq.*).

the Mādhavanidāna, in the same way that Vṛnda and Cakradatta have only used the As., not the Ah. (5) The As., despite its greater volume, makes no mention of quicksilver, while the Ah. does.

3. Discussing these arguments, JOLLY¹ called them plausible but not decisive and raised the following objections: (1) The dubious Arabic term *Astānkar* may apply to the As. as well as to the Ah.² (2) The eight-fold division is observed in the Ah. too, though not as strictly as in the As. According to Arunadatta (on Ah. VI 1 *init.*), the first part is treated in the first five sections, whereas the other five parts are dealt with in the sixth section. And by the same scholiast (on Ah. VI 38 & 39 *fin.*), the chapters on poisons and elixirs are both called "treatises" (*tantra*), a term synonymous with "part" (*aṅga*). (3) It is true that a mixture of prose and verse is characteristic of the old sūtra style; but the possibility of a later imitation must be reckoned with, and the earliest datable documents of Indian medicine as preserved in the Bower Manuscript are versified almost throughout. (4) In view of the large number of mnemonic verses that are common to nearly all medical books, no undue emphasis should be placed on some special points of agreement. That both the As. and the Ah. contain rather old material appears from the many prescriptions they share, for instance, with the Bower Manuscript. (5) Quicksilver must have been introduced into Indian pharmacopoeia much earlier than is commonly conceded, because it occurs already in Suśruta³.

Notwithstanding his criticism of CORDIER's views and his additional counter-argument that the Ah. had been circulated in countless manuscripts, expounded in numerous commentaries, and held in high esteem, while the As. remained, as it were, an unnoticed wall-flower, JOLLY stuck to the priority claim of the As., and that mainly for three reasons⁴: (1) the above-quoted statement from the Ah., (2) the archaic mixture of prose and verse in the As., and (3) the Buddhistic tendencies in the

¹ ZDMG liv p. 262 *sq.*

² JOLLY seems to have overlooked that the texts in question actually read *kitāb asānkar* [vv. ll. *asātar*, *astānkar*, *asātkar*] *al-jāmi'* "the summarizing book *Asānkar*," which indeed agrees with *Aṣṭāṅgasamgraha* rather than with *Aṣṭāṅgaḥṛdayasamhitā* (unless one considers the final *r* in *asānkar* a relic of *hrdaya*). But even so, the argument is by no means conclusive, because it only proves that the As. is fairly old, a point that goes undisputed.

The Fihrist describes this work as a translation into Arabic by Ibn Duhn, who appears to have been director of the hospital of the Barmecides (*jl.* 752—803 A. D.). Cf. FLÜGEL, ZDMG xi pp. 149 & 151.

³ IV 25.39, V 3.14, VI 35.7. JOLLY still considered the mention of, or silence on, quicksilver not important for determining the chronology of the Ah. and As. We now know, however, that reference is made to quicksilver in at least two stanzas of the As. (VI 30 ~ III p. 226a 1; VI 49 ~ III p. 446a 2) which word for word agree with their counterparts in the Ah. (VI 25.61, VI 39.162).

⁴ Medicin p. 8.

As., which, though still existent, were largely obscured in the Ah. He was followed without reserve by HOERNLE¹, who introduced the names Vāgbhaṭa I and Vāgbhaṭa II for the authors of the As. and the Ah. respectively, by KEITH² and WINTERNITZ³, who included JOLLY's reasoning in their histories of Indian literature, and by GODE⁴, who recorded the progress of Vāgbhaṭa research until 1938. All these scholars contributed substantially to impressing the antecedence idea on a wider public⁵. The issue seemed definitely settled.

4. However, in a learned introduction to their pioneering translation of the Ah.⁶, HILGENBERG and KIRFEL undertook to closely re-examine the entire problem and arrived at an altogether different conclusion. Because of the prime importance of these findings, their train of thought may here be reproduced at some length.

Starting with those four lines in the epilogue which supposedly prove the Ah. to be a condensed version of the As., it should be observed that they are quite incompatible with a statement in the prologue (I 1.4 sq.), which says:

tebhyo 'tīvīprakīrṇebhyaḥ prāyaḥ sārataroccayaḥ ||
kriyate 'ṣṭāṅgahr̥dayaṁ nātisamkṣepavistaram |

(These) [i.e. the works of Agniveśa etc.] being too widely scattered, there is (now) made from them, as a collection for the most part of very essential (matter), the Aṣṭāṅgahr̥daya, without too much brevity or prolixity.

If the Ah. were regarded as a sort of story within a story, then its head and tail pieces would not fit together. Another inconsistency lies in the fact that in the epilogue (VI 40.59 sqq.) Ātreya's disciples Agniveśa etc. are assumed to have been present at the first recital of the Ah., whereas in the prologue nothing like that is intimated. Furthermore, the whole debate among Agniveśa and his fellow-pupils on the merits of distinguishing between wholesome and unwholesome, which actually only serves the purpose of motivating and praising the new book, would be much more in keeping with the supposed original (the As.), where it is missing though, than with its alleged epitome (the Ah.). Add to this further discrepancies: in v. 62 the name Punarvasu is abruptly substituted for Ātreya without having been introduced so far, neither in the text nor in Arunadatta's commentary⁷; and in v. 59 the sage Bheḍa is thought to be attendant, while in v. 87 the question is raised why his work is neglected. Such absurdities are apt to throw discredit upon the

¹ Osteology p. 6 sq.

² History p. 510.

³ Geschichte III p. 549.

⁴ Studies I p. 171 sqq.

⁵ E.g., MUKHOPADHYAYA, History III p. 790 sqq.; KASHIKAR, ABORI xxxvii p. 338 sq.

⁶ p. xvii sqq.

⁷ It may rightly be argued, however, that the identity of Ātreya and Punarvasu, which is confirmed by Arunadatta (on Ah. VI 40.59), was so familiar to the Indians as not to require special mention.

whole epilogue, and the suspicion suggests itself that we have before us an interpolation. Since the stanzas in question have been translated into Tibetan, however, they must have been added at a comparatively early stage.

Next there is the mixture of prose and verse, the dubious value of which for proving the As. prior to the Ah. JOLLY himself had already conceded. When he nevertheless adhered to this argument, he did so because internal evidence seemed to speak in its favour. But the reasons he advanced do not stand a critical investigation. By comparing line for line the Cikitsāsthānas and Kalpasthānas of both works with each other and then with the relevant passages of the Carakasamhitā [CaS.]¹, HILGENBERG and KIRFEL reached the following conclusions: (1) In the metrical parts, the extra verses of the As. may be isolated almost everywhere without any difficulty or violence to the wording; what is left behind is the text of the Ah. Hence the As. and the Ah. are in the ratio of two different recensions of the same text, one of which appears enlarged or abridged as against the other. (2) Both works show a considerable identity or resemblance of wording with the much earlier CaS., which applies to their common stock as well as to the additional verses of the As., but not to the prose portions. No matter whether Vāgbhaṭa drew on Caraka or whether both authors relied on the same source, it is not the presumed older prose but the supposedly younger verses that form the loan-texts². Now if verses that are found in one text (the Ah.) independently occur in another (the CaS.) in a similar connection, while yet a third (the As.) gives prose instead, then the verses cannot be a transposition from the prose, but the prose must be an adaptation from the verses; and it is indeed possible in the prose portions of the As. to trace not only signs of the original metrical version such as unusual word-order and rhythm, but also vestiges of the gradual transition from verse to prose as preserved in the variants³. Thus JOLLY's second argument is not tenable either.

¹ See Appendix.

² The same situation could be demonstrated by means of the Gāruḍapurāṇa, which almost literally contains the Nidānasthāna of the Ah. (see KIRFEL, Festgabe Garbe p. 102 *sqq.*), provided it can be definitely shown that both texts are not interdependent.

³ That the prosification of the Ah. was not the work of a single man but extended over a longer space of time also appears from the fact that Aruṇadatta (on Ah. I 12.52 *sqq.*) cites 24 ślokas from the As. which in the present text correspond only to prose (I 20 ~ I p. 149b 10 *sqq.*; cf. CORDIER, JA ix 18 p. 152). It is interesting in this connection to learn of the existence of a Madhya- or "middle" Vāgbhaṭa and his Madhyasamhitā or "middle collection" (already see CORDIER, Muséon N.S. iv p. 334) which, though lost as such, is known from many quotations in Nīśālakara's Ratnaprabhā and Śivadattasena's Tattvabodha and, judging by these, represents an intermediate stage in the course of prosification. A number of passages given by Nīśālakara have been analysed by BHATTACHARYYA, ABORI xxviii p. 113 *sqq.*

Finally, as concerns the Buddhistic tendencies prevalent in the As., JOLLY referred in the main to a prayer addressed to Buddha, which he thought was missing in the Ah., and which runs as follows (I 27 ~ I p. 203a5 sqq.):

*om namo bhagavate bhaiṣajyagurave vaiḍūryaprabharājāya tathāgatāyār-
hate samyaksaṃbuddhāya |*

Om! Reverence to the Victorious One, the Medicine Master, the Cat's-eye-splendoured King, the Thus-gone One, the Saint, the Fully Enlightened One!

It was already CORDIER¹ who set him right by tracing this prayer in the Ah. too (I 18.18). On the other hand, it is possible in the As. to find, besides Mahāyānic traits, typical Hinduistic features, such as relating the story of Virabhadra's creation with fever (III 1 *init.*), suggesting the presentation of a Vedic offering against phthisis (IV 7 *fin.*), and praising the Aśvins by adducing all the Vedic and Brahmanic myths connected with them (VI 50 *med.*). So there can be no talk of a specifically Buddhistic character of the As.

After the theory of a senior and junior Vāgbhaṭa has been deprived of its basis, the question remains to be answered how else the term Vṛddha-Vāgbhaṭa can be understood. Here, HILGENBERG and KIRFEL say, analogous cases will help us on. In his Catalogus Catalogorum², AUFRECHT lists, *inter alia*, a Vṛddhāryabhaṭa besides an Āryabhaṭa, the Vṛddhayavanajātaka of a Vṛddhayavanācārya besides the Yavanajātaka of a Yavanācārya, a Vṛddhagārgyasamhitā besides a Gārgyasamhitā, and a Vṛddhayogaśataka besides a Yogaśataka. Turning to indigenous authors, Bhāvamīśra records among his sources not only a Vāgbhaṭa and Vṛddha-vāgbhaṭa, but also a Suśruta and Vṛddhasuśruta³, and Ṭoḍaramalla mentions, apart from these, an Ātreya and Vṛddhātreya, a Hārīta and Vṛddhahārīta, and a Vṛddhabhoja⁴. It stands to reason that in these instances (the number of which can probably be increased) the attribute *vṛddha* signifies, not a senior writer or an older work as opposed to a junior writer or a younger work, but rather the author of an enlarged recension as against that of a shorter original or such books themselves. That this is the only interpretation possible for the aphorisms going by the name of Vṛddha-Cānakya has been irrefutably demonstrated by KRESSLER⁵.

Other evidence points in the same direction. To give only one example, the Ah. (II 1.8 sq.) says that, healthy conditions granted, a woman who has completed her 16th and a man who has completed his 20th year will produce a sturdy child, while younger parents will beget a sick, short-lived, hapless creature at the most. This statement, which is in perfect

¹ JA ix 18 p. 168. ² s. *vv.*

³ Cf. AUFRECHT, Cat. Bodl. viii p. 311 b.

⁴ Cf. WEBER, Verzeichniss I p. 289 sq.

⁵ Stimmen p. 38.

harmony with Indian circumstances, has been amplified in the As. (II 1 *init.*) to the effect that a 21-year-old man shall marry an approximately 12-year-old girl, but will father with her a sturdy child only when he is 25 and she 16. The As. here makes a positive concession to the Hindu point of view that marital cohabitation should take place immediately after the first menses (which start at the age of 12; cf. Ah. II 1.7) at the risk of otherwise committing a serious offence¹. If the Ah. really were an abstract of the As., then it would be quite inconceivable why the epitomizer should have swerved from common opinion in so vital a matter.

Even though the As. has lost all of its originality and much of its importance by what has been said hitherto, it cannot be entirely dismissed as second-hand. On the contrary, the scholiastic exhaustiveness and pedantic consequence with which every subject is treated make it a valuable supplement to the much condensed and often enigmatic Ah.

5. About Vāgbhaṭa's life² nothing else is known than what he himself has handed down in a short autobiographic note (As. VI 50 *fin.*):

*bhiṣagvaro Vāgbhaṭa ity abhūn me
pitāmaho nāmadharo 'smi yasya |
suto 'bhavat tasya ca Sīṃhaguptas
tasyāpy ahaṃ Sindhuṣu labdhajānmā ||
samadhigamya guror Avalokitāt
gurutarāc ca pituḥ pratibhāṃ mayā |
subahubheṣajaśāstravilocanāt
suvihito 'ṅgavibhāgavinirṇayaḥ ||*

My paternal grandfather, whose namesake I am, was the eminent physician Vāgbhaṭa; his son was Sīṃhagupta, and his (son) again (am) I. Among the people of Sind I was born.

Having obtained my knowledge from the venerable Avalokita and my (even) more venerable father, whose eye (represents) medical science in a very high degree³, (there was) well made by me (this)

¹ Cf. JOLLY, Recht p. 55 *sqq.*

² Tradition now takes him for Dhanyantari, the physician of the gods and founder of Āyurveda, identifying him with one of the fourteen gems obtained at the churning of the ocean; then for the great sage of the present Kaliyuga as opposed to Atri (Caraka) and Suśruta, who are related to the past Kṛta- and Dvāparayugas respectively (Hār. VI 2 *fin.*); then for an incarnation of Buddha; and then again for a voluptuous brahmin given to all sorts of revelries and lost in love with a low-caste woman. There is also a story current among the learned pundits of South India that Vāgbhaṭa, formerly a brahmin, was persuaded by a Buddhist priest to adopt his religion, which he embraced in the latter part of his life. Cf. GODE, Studies I pp. 174 & 178.

³ Indu explains: *aśeṣārthaparījñānaheturvād* "on account of its being the cause of the full perception of the entire object." HILGENBERG & KIRFEL, who render this line "nach Prüfung vieler Medizinbücher" (p. xlvii), seem to read *vilokanāt* instead of *vilocanāt*.

complete exposition¹, arranged according to the (eight) parts (of medicine).

That Vāgbhaṭa, as stated in this note, hails from North India² also appears from the fact that he reckons seeing a Draviḍa or Āndhra among the bad omens (Ah. II 6.49; As. II 12 ~ I p. 367b13), and that he regards the earth as chiefly occupied by the Himālaya and Vindhya mountains, taking herbs which grow on the former for soma-like and wholesome, but such as come from the latter for fire-like and unwholesome (Ah. V 6.29; As. V 8 fin.).

6. Vāgbhaṭa's date, however, once the two-author theory is discarded, may be fixed with considerable accuracy³. For the well-known Chinese pilgrim I-ching, who stayed in India from 672 till about 688 A.D., after enumerating in his book of travels "the eight sections of medical science," proceeds as follows⁴:

¹ *vinirṇaya*, by Indu glossed as *vinīscaya*, is given in the dictionaries only as denoting "complete settlement or decision, certainty, a settled rule" (MW p. 970) or the like, which does not make sense here. The above translation rests upon BhP. VI 2.20 where the corresponding *vinirṇī* is used in the meaning of "to explain fully" (SANYAL):

ta evaṃ suvinirṇīya dharmam bhāgavatam nṛpa /
taṃ yāmyapāsān nirmucya vipraṃ mṛtyor amūmucan //

These [i.e., Viṣṇu's emissaries], having thus well and fully explained the divine law [i.e., the Bhāgavata creed], O king, (and) having freed him [i.e., Ajāmila] from Yama's fetters, released the brahmin from death.

² In the colophon of Ja(i)jjaṭa's *Suśrutaṭīkā*, Vāgbhaṭa is given the appellation Mahājahnupati "Lord of Mahājahnu." BHATTACHARYYA (ABORI xxviii p. 122) identifies Mahājahnu with the present Majhanda (spelt Mahajanda by FREEDY, SRBG N.S. xvii p. 673, and Manjhand on BARTHOLOMEW's map), a small township and subdivision of the Karachi district, situated about 50 miles north of Hyderabad on the west bank of the River Indus. It is not altogether impossible that this was Vāgbhaṭa's domicile.

³ Till now it varied between such extremes as the 2nd cent. B.C. (KUNTE, *Introd.* p. 15) and the late 12th cent. A.D. (CORDIER, *Vāgbhaṭa* p. 3; refuted by JOLLY, *ZDMG* liv p. 262), though usually scholars placed the "elder" Vāgbhaṭa in the early 7th and the "younger" one in the 8th cent. A.D. CORDIER founded his chronology on a spurious passage from Kalhana's *Rājatarāṅgiṇī*, which is missing in STEIN's edition and runs as follows: *Siṃhaguptasutaḥ paramabauddho Vāgbhaṭācāryaḥ Kāśmīranarapati-Jayasīṃhasya prajāpālanaśamaye varttamāna āsit* "the prominent Buddhist Vāgbhaṭācārya, the son of Siṃhagupta, lived under the reign of the Kashmirian king Jayasīṃha [1196—1218 A.D.]." When faced with JOLLY's retort, he strove to make good (JA ix 17 p. 183 sq.) by advancing an equally untenable theory based on a rather fantastic narrative in Merutuṅga's *Prabandhaśintāmaṇi* (V 20), which assigns Vāgbhaṭa to the court of King Bhoja of Dhārā (r. 1018—60). It is well known, however, that this quasi-historical work stops at no anachronism and hence commands little if any authority (WINTERNITZ, *Geschichte* II p. 332).

⁴ Nan-hai chi-kuei nei-fa-chuan, ch. 27 ~ Taishō Tripitaka, vol. 54, p. 223, col. 3. The transliteration is owed to Prof. WOLF HAENISCH, Marburg. The English rendering is that of TAKAKUSU (*Record* p. 128).

ssu chih pa shu hsien wei pa pu. chin-jih yu jên lüeh wei i chia. wu-tien chih ti hsien hsi ch'iu hsiu. tan ling chieh chē wu pu shih-lu.

These eight arts formerly existed in eight books, but lately¹ a man epitomized them and made them into one bundle. All physicians in the five parts of India practise according to *this book*, and any physician who is well versed in it never fails to live by the official pay. Though neither name nor title are given, there can be little doubt but that this passage refers to Vāgbhaṭa, the author of the Ah., who must consequently have flourished near the middle of the 7th century².

¹ MUKHOPADHYAYA (History III p. 794), while rightly correlating "lately" (*chin-jih*) with "formerly" (*hsien*), goes so far as to maintain that by "lately" any period subsequent to "formerly" can be understood. But neither the English nor the Chinese admits of such an interpretation, which would amount to a meaning "later, afterwards" untenable for *chin-jih*. (By courtesy of Prof. ALFRED HOFFMANN, Berlin.)

² Some dissentient views must here be touched upon. TAKAKUSU suggests in his additional notes (p. 222) that "this epitomizer may be Suśruta, who calls himself a disciple of Dhanvantari, one of the Nine Gems in the Court of Vikramāditya." It need hardly be mentioned that Suśruta's relation with Dhanvantari (Suśr. I 1.12) and Dhanvantari's relation with Vikramāditya (Pseudo-Kālidāsa, Jyotirvidābharṇa XXII 10) are of a purely legendary nature and of virtually no chronological value (WINTERNITZ, Geschichte III p. 42 sq.), and that Suśruta must have lived far earlier (JOLLY, Medizin p. 9 sq.). In making his suggestion, TAKAKUSU apparently relied on the fact that I-ching recorded the eight branches of medicine in very much the same way that Suśruta did, with only nos 5 & 6 (pediatrics and toxicology) given in reverse order (JOLLY, ZDMG lvi p. 566 and JRAS 1907 p. 173 sq.). On the other hand, Suśruta did not epitomize those eight branches at all. This notwithstanding, JOLLY saw unfit to rule him out altogether, on the ground that I-ching might have read Suśruta's introduction and "looked upon his work as a recent compilation, because it purports to be an extract in eight parts . . . from an earlier work in 100,000 verses." If such were really the case, however, then I-ching would indeed be guilty, as HOERNLE (JRAS 1907 p. 414 sq.) pointed out, not only of lightly brushing aside Indian tradition, which regards Suśruta's work as one of great antiquity (and on which I-ching had to rely in his day), but also of grossly misunderstanding Suśruta's introduction, which puts matters into quite a different perspective, the relevant passage (Suśr. I 1.6) reading as follows:

iha khalv āyurvedam nāmopāṅgam atharvavedasyānūtpādyaiva prajāḥ ślokaśaśaśasram adhyāyasahasram ca kṛtavān Svayambhūh | tato 'pāyusṭvam alpamedhastvam cālokyā narāṇām bhūyo 'śadhā praṇṭavān ||

Now then, the so-called Āyurveda (is) a subsidiary part of the Atharvaveda. Before even creating man, the Self-existent One [i.e., Brahman] composed (it) in a hundred thousand stanzas and a thousand chapters. Afterwards, considering man's shortness of life and narrowness of intellect, he recast (it) into eight divisions. BHATTACHARYYA's opinion (ABORI xxviii p. 127) that I-ching referred to another medical compendium existent at his time (such as Ravigupta's Siddhasāra or Acyuta's Āyurvedasāra), apart from being purely hypothetical and rather far-fetched, is equally unsatisfactory; for a book that once was so popular as to have been read all over India is not very likely afterwards to have fallen into complete oblivion. Besides, Vāgbhaṭa does not mention any such work among his sources, an omission that would be hard to explain in the case of so renowned a predecessor.

I-ching's account fully agrees with the fact that the Persian physician 'Alī ibn Sahl Rabban at-Ṭabarī, who included "a survey of the Indian system of medicine" in his *Firdaus al-Hikma* or "Paradise of Wisdom" (dated 849/50 A.D.), names Āgarak, Susrud, the Aštānqahradī, and the Nidān as his sources¹. If the Ah. was so famous in Persia by that time as to be put on a par with Caraka and Suśruta, it must have been written during the 7th century at the latest².

7. As is also manifest from these testimonies, Vāgbhaṭa enjoyed early and widespread recognition both inside and outside India. Hence it is no wonder that numerous commentaries on the Ah. (as against only three on the As.³), many of them unedited so far, can be traced in manuscript catalogues, publishers' lists, etc. The following have come to our notice (those fully or partly printed are marked by an asterisk)⁴:

¹ VII 4.1 (p. 557 SIDDHIQI; p. 1110 SIGGEL). Cf. MEYERHOF, ZDMG lxxxv p. 63 sq. and Isis xvi p. 12; MÜLLER, JRAS 1932 p. 791 sqq.

² Disregarding this impregnable testimony, which could have easily saved him from a serious misconception, BHATTACHARYYA (ABORI xxviii p. 122 sqq.) assigns our author to the 9th century and identifies him with Vāgbhaṭa, the father of Tisaṭa (who wrote the Cikitsākalikā). After some chronological speculations on the iconolatriy of Parnaśavarī (As. IV 2 fin.) and the twelve-armed Avalokiteśvara (Ah. VI 5.50 ~ As. VI 8 fin.), he refers for the *terminus a quo* to a Vāgbhaṭa quotation in Nīścalakara's Ratnaprabhā, the first line of which is lost (A fol. 117a):

..... //
[bo]dhicaryāvatāroktam kāmāśokādīninditam |
āturaṃ śrāveyed dhīmān bodhayec ca muhur muhuḥ //

That said in the Bodhicaryāvatāra, by which lust, grief, etc. have been censured, a wise (physician) shall let his patient hear and understand time and again. Since Śāntideva's Bodhicaryāvatāra dates from the middle of the 7th century, so he argues, its recognition as a scriptural text places Vāgbhaṭa not before 800 A.D. However, the present stanza is contained neither in the Ah. nor in the As. and, like many similar quotations in Nīścalakara's scholion, apparently originates from the secondary Madhyasamhitā (see above, p. 5 n. 3). What is more, it occurs in only one of the three manuscripts utilized by BH., which does not contribute exactly to its credibility. If anything at all, this śloka simply proves the Madhyasamhitā to be later than 800 A.D. BH. labours under the misconception that the so-called Vṛddha-, Madhya-, and Svalpasamhitās are three separate works of the same author rather than three different recensions of the same text. The revisor of the Madhyasamhitā may well have been a namesake or even descendant of the great Vāgbhaṭa, who, judging by his own words (As. VI 50 fin.), belonged to an old family of physicians. There is no need to go into BH.'s views on the *terminus ante quem* since naturally they do not conflict with the present investigation.

³ Viz., *Indu's Śaśilekhā, the *Arthaprakāśikā (in Hindi), and a fragmentary Vyākhyā (in Canarese script) on which see KUPPUSWAMI, Descriptive Catalogue xxiii no 13071.

- (30) Bṛhadvyākhyāsāra;
- (31) Vyākhyā²;
- (32) Hṛdayabodhikā³;
- (33) Hṛdyā.

¹ Hāṭakāṅka's Sarvāṅgasundarī recorded by BURNELL (Index I p. 65b) looks suspicious. There may be a confusion with Aruṇadatta's commentary at the bottom of it. Cf. CORDIER, Vāgbhaṭa p. 6.

² Behind these titles several commentaries may be concealed.

³ This is perhaps identical with Udayādityabhaṭṭa's or with Śrīdāsapaṇḍita's Hṛdayaprabodhikā.

Among these commentaries, there are four that have reached some fame: Arunadatta's *Sarvāṅgasundarī*, Indu's *Śaśilekhā*, Candranandana's *Padārthacandrikā*, and Hemādri's *Āyurvedarasāyana*. A few facts may here be given on their authors.

8. Arunadatta was the son of Mrgāṅkadatta¹ and probably hailed from North India². Besides the *Sarvāṅgasundarī*³, he appears to have written a commentary on *Suśruta*⁴ and, as will presently be seen, on the *As*. His term of life may be fixed indirectly with some accuracy. For Ḍaḥana, while elaborating on the term *akṣivairāgya* (*Suśr.* V 1.30), records the following alternative:

rūpagrahaṇe 'lasatvam iti Gayi / vigatarāge akṣiṇi bhavata iti Saṃgrahāruṇau /

Inactiveness in the perception of colours: thus Gayi; the eyes become discoloured: thus the *Samgraha* and *Aruṇa*.

Since the parallel passage of the *Ah.* (I 7.15), like *Suśruta*, has nominal *akṣivairāgya*, which Arunadatta glosses by nominal *akṣiviraktatā*, the second reference can only be to the *As*. (I 8 ~ I p. 65a 17/18) and to a lost commentary on it by Arunadatta; for there alone it is said that at the sight of poisoned food *cakorasāyākṣiṇi virajyete* "the eyes of the Greek partridge [*Perdix rufa*] become discoloured," a verbal phrase which may well have been explained as indicated. As Ḍaḥana is assigned, by general consent⁵, to the 12th century⁶, Arunadatta must have lived

¹ Thus the colophons. He himself gives his own name as *Aruṇa* and his father's as *Mrgāṅka* (I 1 *init.*). These short forms are doubtless due to the metre.

² Under the lemma of *anaṅga* "extravaginal congress" (*Ah.* I 7.71), he observes: *dākṣiṇātyā hi mukhena kurvanti* "for Southerners perform (coitus) through the mouth." In BHATTACHARYYA's opinion (IHQ xxiii p. 132), which there is no reason to dispute, only a Northerner could have ventured such a sweeping assertion. At any rate, Arunadatta's remark runs diametrically counter to Vātsyāyana's doctrine (p. 130), repeated by most subsequent authorities (cf. SCHMIDT, *Beiträge* p. 233 *sqq.*), that oral intercourse was typical of the inhabitants of the Punjab. As a Northerner or even a Punjabi he probably took offence and committed a pious fraud, putting the blame for this disdainful practice on some far-away people. Vātsyāyana, on the other hand, was less sensitive about the matter, although he too must have been a Northerner, referring as he does to the southern custom of marrying one's maternal girl-cousin as something unusual (p. 207 *sq.*; cf. SCHMIDT, *ZDMG* lvii p. 706).

DAS GUPTA (IC iii p. 159 *sq.*) reckons the *Sarvāṅgasundarī* among the medical works of Bengal, unfortunately without offering any proof to that effect.

³ Simply styled *Sundarā* by PARADKAR SHASTRI in the N.S.P. edition of 1939.

⁴ Cf. AUFRECHT, *Cat. Cat.* I p. 30a.

⁵ Cf. JOLLY, *Medicin* p. 10; HOERNLE, *Osteology* p. 16; BHATTACHARYYA, IHQ xxiii p. 132.

⁶ He is quoted by Hemādri (according to CORDIER, *Données* p. 3), the archivist and chief minister of the kings Mahādeva (r. 1260—71) and Rāmacandra (r. 1271—1309) of Devagiri (see below, § 11), and in his turn quotes Cakrapāṇidatta

prior to him¹. Whether he is identical with the lexicographer of the same name first mentioned in Vardhamāna's autocommentary on Gaṇar. II 77 (dated 1140) cannot be ascertained².

9. Indu is still a largely unknown quantity as far as the circumstances of his life are concerned. Judging by the fact that he expressly defines Āndhra and Draviḍa as the names of two southern peoples or kingdoms³ and repeatedly mentions Kashmirian terms for particular plants⁴, he is likely to have been a Northerner and a native of Kashmir⁵. Tradition

(on Suśr. VI 49.19), whose father Nārāyaṇa, or (according to a variant reading, on which see BHATTACHARYYA, IHQ xxiii p. 134 sq.) who himself, was the head-cook and minister of King Nayapāla (r. 1038—55) of Bengal (see colophon).

¹ So far it was customary to determine Aruṇadatta's date according to HOERNLE's method (Osteology p. 17), which is as follows. Vijayarakṣita and Śrīkaṇṭhadatta (on Nid. LIX 29) controvert a certain doctrine of Aruṇadatta (on Ah. VI 12.1) regarding the position of the so-called "first" (*prathama*) membrane of the eye, which, in keeping with common opinion, they equate to the "innermost" (*sarvā-bhṛyantara*) membrane, while he takes it for the "outer" (*bāhya*). Since these scholiasts cite Guṇākara (on Nid. V 31), who commented on Nāgārjuna's Yogaratnamālā in 1240 (AUFRECHT, Cat. Cat. I p. 155b), and in their turn are cited by Vācaspati (Ātaṅk. introd. v. 8), whose father Pramoda was the chief court-physician of Hammīra Mahammada (*ibid.* v. 2 sqq.), that is, Amīr Muizzuddīn Muhammad or Muhammad of Ghur (d. 1205), they must have flourished about 1240, and Aruṇadatta must consequently have lived prior to them, probably around 1220.

This ingenious calculation was dealt a serious blow by BHATTACHARYYA (IHQ xxiii p. 130 sqq.), who pointed out that Indu's Śasīlekḥā (on As. VI 15 *init.*) and the anonymous Kairālī (on Ah. VI 12.1) controvert the same doctrine, again without mentioning any name, and that evidently all three scholiasts just refer to a dissentient view common in their day. Further, the identity of the medical author Guṇākara with a Jaina scholar of the same name, who commented upon a work on magic rites, incantations, and sorcery, should by no means be taken for granted.

What, incidentally, is meant by those "membranes" (*paṭala*), of which four are distinguished in Indian ophthalmology, cannot be ascertained for the time being. MAGNUS' view (Augenheilkunde p. 37) that they represent retina, choroid, sclera, and mucosa is categorically rejected by ESSER (Ophthalmologie p. 14). As for the above "outer" membrane, HOERNLE (Osteology p. 17) considers it to be the cornea plus aqueous humour.

² Cf. GODE, Studies I p. 185.

³ On As. II 12 ~ I p. 368 a 20/21.

⁴ E.g. in his notes on the vegetable section (*śākavarga*) Ah. I 6.73—116 and As. I 7 ~ I pp. 50—54.

⁵ Here a conjecture made by BHATTACHARYYA (ABORI xxviii p. 118) deserves special attention. In commenting on Vāgbhaṭa's view that even a brahmin may take garlic if it is through the milk or curd of a cow that has been fed garlic after a three days' fast (As. VI 49 ~ III p. 423 a 4 sq.; cf. Bower Ms. I 34), Indu remarks: *ity ācāryasya deśasiddhāḥ kāśmīrakāḥ | vāyam etan na vidmah* "thus the master's Kashmirian local authorities; we (do) not know this (practice)." Stumbling at the collocation *deśasiddhāḥ kāśmīrakāḥ* "Kashmirian local authorities," BHATTACHARYYA proposes to punctuate not after but before *kāśmīrakāḥ*, so that the passage

makes him a pupil of Vāgbhaṭa¹, and his referring to the author of the Ah. simply as "Master" (*ācārya*)² seems to point in the same direction³. What is more, a contemporary of Vāgbhaṭa by the name of Indu, or rather Indukara, is quite familiar to us; he is the father of Mādhavakara, the renowned author of the Mādhavanidāna, which can hardly have been written later than the 7th century, since in 849/50 it is already quoted by a Persian physician as an authority equal to Caraka, Suśruta, and the Ah.⁴ It must be stressed, however, that this identification is by no means conclusive, based as it is on very shaky evidence⁵.

Another way of fixing Indu's date also leads to nothing definite. Among the medical writers he mentions by name is the Caraka scholiast Bhaṭṭāra Hari(ś)candra⁶, whom Maheśvara⁷ states to be the court physician of King Sāhasāṅka. WILSON⁸ suggests the possibility of Sāhasāṅka being a title of Śricandradeva, who (according to a copper-plate inscription from Nidigal⁹) founded towards the end of the 11th

would run as follows: "Thus the master's local authorities; we Kashmirians (do) not know this (practice)." Attractive though his suggestion is, it must be left alone for the time being. Its tenability hinges on the open question of whether or not Kashmirian brahmins were allowed to take garlic under the above circumstances. BÜHLER, while dealing with the peculiarities of Kashmirian brahmins (Report p. 19 *sqq.*), does not mention anything like that; and of little avail is a reference in Rājat. I 342 to King Gopāditya (r. 370—310 B.C.), "who," it is said, "after having banished garlic eaters to Bhūkṣīravāṭikā, directed brahmins devoid of ordinances of their own to Khāsaṭā" (*bhūkṣīravāṭikāyāṃ yo nirvāsya laśunāśinaḥ / khāsaṭāyāṃ vyadhād viprān nījācāravivarjītaṃ*).

¹ T. RUDRAPĀRĀṢAṢA, in his preface to the Trichur edition of the As. (p. iv), gives the following "meditation stanza" (*dhyānaśloka*), which he says is "universally known" (*loka prasiddha*):

*lambaśmaśrukālāpam ambujanibhacchāyādyutiṃ vaidyākān
antevāsina Indu-Jajjaṭa-mukhān adhyāpayantaṃ sadā /
āḡulphāmalakāñcukāñcitadarūlakṣyopavītojjvalaṃ
kañthasthāgarusāraṃ añjītaḍṣaṃ dhyāye ṛḍhaṃ Vāgbhaṭam //*

I steadily meditate on Vāgbhaṭa: the tassel of his beard-hair dangling (and) the brightness of his complexion resembling a lotus; always instructing his medical pupils Indu, Jajjaṭa, *et al.*; the splendour of his sacred thread being (but) slightly visible, distinguished (as he is) by a spotless coat reaching down to his ankles; aloe-sap being in his throat (and) his eyes bedaubed.

On the coat (*lañcuka*), see BHUSHAN, Costumes p. 20.

² On As. II 4 ~ I p. 304b 13 *sqq. et passim*. The reference is to Ah. II 1.94.

³ Thus GODE, Studies I p. 162 *sq.* But BHATTACHARYYA (ABORI xxviii p. 117 *sq.*) objects that in commentatorial literature the word *ācārya*, if used without preceding *mad* or *asmad*, refers to the author of the text which is explained rather than to the teacher of the scholiast who explains it. ⁴ See above, § 6.

⁵ BHATTACHARYYA (IHQ xxiii p. 139) refutes it on the ground that Indukara, like Mādhavakara, belonged to Eastern India.

⁶ On As. III 2 ~ II p. 12a 14.

⁷ Viśvaprakāśa, introd. v. 5, reproduced by WEBER, Verzeichniss II p. 261.

⁸ Works V p. 215 *sq.*

⁹ Cf. COLEBROOKE, Essays II 1p. 286 (~ 2p. 253).

century the ruling dynasty of Kanauj, which realm he acquired "by his own strength"; but this is, as he himself puts it, nothing else than "a mere etymological speculation" on the phrase "by his own strength," *Sāhasāṅka* being a possessive compound formed of *sāhasa* "strength" and *āṅka* "mark."

Besides his commentary on the Ah., styled *Śaśilekhā*, Indu also wrote a commentary on the As., which bears the same title and follows the wording of the former wherever Ah. and As. agree with each other. As this work is frequently mentioned as "Indumatī" in Nīścalakara's Ratnaprabhā, which was written between 1110 and 1120¹, Indu must have flourished in the 10th century at the very latest. He often adduces anonymous definitions of a pharmacopoeial nature² and evidently commands a thorough knowledge of the medical convertible terminology³; so he may be identical, for all we know, with the author of a medical glossary, also called Indu, who is very frequently cited by Kṣīrasvāmin in his commentary on the Amarakoṣa⁴. Since this commentary dates from the second half of the 11th century⁵, the glossarist Indu must have lived prior to the year 1050⁶.

10. Candranandana (Tib. Zla-ba-la dga-ba), the son of Ratinandana (Tib. Chags-pa-la dga-ba), hailed from Kashmir⁷. His *terminus ad quem* is established by the fact that the Padārthacandrikā (Tib. Thsig-gi don-gyi zla-zer) was translated into Tibetan by Rin-chen-bzañ-po between the years 1013 and 1055⁸. He may or may not be identical with the physician Candrābhinandana (Tib. Zla-ba[-la] mñon-dga), who is

¹ Cf. BHATTACHARYYA, ABORI xxviii p. 118 & IHQ xxiii p. 129 *sqq.* His chronology depends on the reign of Rāmapāla, which he fixes at 1078—1120 (IHQ iii p. 583 *sq.*), not without being contradicted (MAJUMDAR, HB I p. 180 *sq.*). But objections are raised only against his evidence, not against his result, at which others arrived independently of him, and which may now be regarded as common opinion.

² E.g. on Ah. I 3.30—32 & 48.

³ See his notes on Ah. I 6.94 *sqq.*

⁴ Especially in his notes on the tree and herb section (*vanauśadhivarga*, II 4).

⁵ It often refers to Bhoja, the author of a Śābdānuśāsana, who (according to Gaṇar. I 2 schol.) is identical with Bhoja, the king of Malwa (r. 1018—60; cf. OHI³ p. 204) and author of the Sarasvatīkaṇṭhābharāṇa, and is repeatedly quoted by Vardhamāna, the author-cum-scholiast of the Gaṇaratnamahodadhi, which was written in 1140. Cf. AUFRECHT, ZDMG xxviii p. 104. The identity of the grammarian and the writer on poetics is questioned by ZACHARIAE, GGA 1885 p. 377.

⁶ The suggestion that the vyākhyākara Indu and the naighaṇṭuka Indu may be one and the same person was first made by DAS GUPTA (IC iii p. 154). It was repeated, not without reserve, by GODE (Studies I p. 159 *sq.*).

⁷ See Tibetan colophon. HUTH (SPAW 1895 p. 270), evidently depending on the Mongolian, Manchurian, and Chinese indexes, wrongly transcribed the name as Candrānanda. He was followed by UNKRIG (KORVIN-KRASINSKI, Medizinphilosophie p. xix), through CORDIER (JA ix 17 p. 185; BEFEO iii p. 614) had corrected this mistake long before.

⁸ See below, § 19. According to CORDIER, Catalogue iii p. 472, Candranandana was a contemporary of King Abhimanyu II of Kashmir (r. 958—972).

said to have assisted Vairocana in putting the Four Tantras (rGyud bzhi) into Tibetan at the time of King Khri-sroṅ-lde(u)-btsan¹, or with the medical lexicographer Candranandana, who is frequently cited by the Amara scholiast Kṣīrasvāmin in the late 11th century². On at least two occasions, his views seem to have been refuted by Aruṇadatta, though no name is given in either case³.

11. Hemādri is the only one among the scholiasts under discussion who poses no problem as to his identity and chronology. Preluding his Āyurvedarasāyana, he introduces himself as the author of the Caturvargacintāmaṇi (v. 2), a standard encyclopedia on ancient religious rites. For a proper performance of the vows etc. set forth in that work, it is necessary to enjoy good health, and the present commentary has been written with a view to facilitating the attainment of such good health; it follows the doctrines of previous authorities on the subject, such as Caraka and Suśruta (v. 3), without repeating what has been said by their commentators (v. 4). Hemādri was the son of Kāmadeva, grandson of Vāsudeva, and great-grandson of Vāmana. Besides the Caturvargacintāmaṇi and Āyurvedarasāyana, he wrote several other works (Śrāddhapaddhati, Hemādriprayoga, Nānāśāntayaḥ, Tristhalivīdhi) and commentaries (on Vopadeva's Muktāphala and Śaunaka's Pravaṇakalpa)⁴; but he is different from Bhaṭṭa Hemādri, the son of Īśvarasūri and author of the Raghuvamśadarpaṇa⁵. While in the Caturvargacintāmaṇi (I 1.6 & 13) he describes himself as being in charge of the state records of King Mahādeva of Devagiri (r. 1260—71), from the Āyurvedarasāyana (introd. v. 5 sq.) and a contemporary inscription⁶ he appears to have been the archivist and chief minister of his successor Rāmacandra (r. 1271—1309). So Hemādri flourished in the second half of the 13th century, and it is reasonable to assume that he composed the Caturvargacintāmaṇi under the reign of Mahādeva and the Āyurvedarasāyana under that of Rāmacandra⁷.

12. There is one more Vāgbhaṭa scholiast who deserves special mention, although no manuscript of his commentary has yet been traced. He is the Jaina teacher Āśādhara (the son of Sallakṣaṇa and father of Chāhaḍa), who lived about 1236 A.D.⁸ and is said to have written, besides the Uddyota, 17 more books, not all of which, however, are likely to be his⁹. According to a valuable eulogy attached to his Dharmāmṛta,

¹ Cf. CSOMA, JASB iv p. 1. According to the T'ang Annals (BUSHELL's translation, JRAS 1880 pp. 473 sq. & 506), Khri-sroṅ-lde(u)-btsan reigned from 755 to 797 A.D. ² On Ak. II 4.63 *et passim*.

³ On Ah. I 5.17 [15] & I 19.87 [75]. The bracketed verse-numbers refer to RAJ-VAIDYA's edition. ⁴ Cf. AUFRECHT, Cat. Cat. I p. 768, II p. 185, III p. 52.

⁵ Cf. GODE, ABORI xiv p. 126 sqq.

⁶ Cf. BARNETT, EI xiii pp. 202 & 205.

⁷ For the whole paragraph see KANE, History I p. 354 sqq., and GODE, Studies I p. 186 sqq. ⁸ His Triṣaṣṭhismṛtiśāstra dates from that year.

⁹ Cf. PETERSON, Report II p. 86; AUFRECHT, Cat. Cat. I p. 54.

two manuscripts of which are found in the Bhandarkar Oriental Research Institute, Poona, he hailed from Sapādalakṣaya (the vicinity of Jaipur) and, as his country was overrun by a barbarian king, fled to Mālava, taking refuge at Dhārā, where he was enthusiastically received by Bilhaṇa, the chief minister of King Vijayavarman¹. Since Āsādhara was apparently a senior contemporary of Hemādri, the discovery of his commentary would be a notable gain indeed, if only because of its antiquity.

As for the other scholiasts, Toḍaramalla was the Hindu financier of the Emperor Akbar (r. 1556—1605)², while Śivadāśasena was the court physician of Bārbak Shāh of Bengal (*fl.* 16th cent.)³.

13. Of excerpts and summaries, there are found an anonymous Aṣṭāṅghṛdayasamgraha embracing 700 granthas and Govindadeva's Aṣṭāṅghṛdayasamhitā or Yogalīlāvati comprising 300 śloka⁴. How popular the Ah. has remained up to the present day may be seen from the fact that as late as the year 1864 a certain Parameśvara of South India completed an abstract from it entitled Hṛdayapriya, which closely follows the wording of the Ah.

14. Numerous manuscripts (as against but a few of the As.⁵) are extant either of the whole or of parts of the Ah. and its commentaries⁶, some of them being fairly old. The earliest traceable so far was written by one Sāmalabhaṭṭa at Ahmadabad in samvat 1544 (i.e. 1486/87 A.D.);

¹ Cf. GODE, Studies I p. 182.

² Cf. IRVINE, IGI II p. 399.

³ Cf. DAS GUPTA, IC III p. 157. LANE-POOLE, Dynasties p. 307, dates this ruler as early as 1459 A.D. See GODE, Studies I p. 123.

⁴ Cf. SASTRI, Catalogue xvi no 11034; List MSS Benares p. 129.

⁵ G. S. TARTE consulted two MSS for his edition: one owned by G. S. NIRANTAR of Nasik (~BHANDARKAR, Lists I nos 222—27) and dated śāka 1794 (i.e. 1872 A.D.), the other owned by B. S. MATE of Poona (Introd. p. 2). CORDIER's confrontation (JA ix 18 p. 152 *sq.*) of BHANDARKAR's MS. with TARTE's edition is completely illusory, because the former was actually used in the latter (HILGENBERG-KIRFEL, Transl. p. xxii).

T. RUDRAPĀRĀŚAVA gives no information about his sources. He only states (Introd. p. v) that Indu's Śaśilekhā, given along with the text, was reconstructed during several years of extraordinary labour from highly dilapidated palm-leaf MSS in the possession of eight physicians and the royal library in Cochin.

R. S. KINJAWADEKAR based his text on TARTE's and RUDRAPĀRĀŚAVA's editions as well as on two more MSS: one procured by P. K. GODE for the Bhandarkar Oriental Research Institute in Poona, the other owned by G. S. GODBOLE of Bombay. Incidentally, as both these MSS only contain the As. proper, Indu's Śaśilekhā, also given in KINJAWADEKAR's edition, must be a reprint from RUDRAPĀRĀŚAVA's edition. — Finally, there is a fragmentary palm-leaf MS. in Canarese characters, recorded by KUPPUSWAMI, Descriptive Catalogue xxiii no 13070.

⁶ Cf. AUFRECHT, Cat. Cat. I pp. 35 *sq.* & 773, II pp. 7 & 188, III p. 8; KUPPUSWAMI, Descriptive Catalogue xxiii nos 13072—85; RANGACHARYA-KUPPUSWAMI, Triennial Catalogue I *sqq.* (v. indexes); SASTRI, Catalogue xvi nos 11007—33.

two others are dated samvat 1576 (i.e. 1519/20 A.D.) and samvat 1735 (i.e. 1678/79 A.D.)¹.

15. The *editio princeps*, accompanied by a modern commentary (entitled "Bhāskara") and printed in Malayalam characters, is owed to UPPOTTA KANṢAN and appeared 1874—78 in Calicut. Since then countless other editions, with or without scholia, of the Ah. in its entirety as well as of individual sthānas have been published², but nevertheless the text still awaits philological treatment. A first step in this direction was taken only recently by N. S. Mooss, who consulted no less than 11 MSS of the Ah. and 4 MSS of Indu's Śaśilekhā, noting every single variant in the *apparatus criticus* and thereby setting a standard for any future enterprise of this sort³. As in many similar cases, however, it must be seriously doubted if the benefits derived from a critical edition of the Ah. would compensate for the pains taken in preparing it.

16. Mention was made above (§ 4) of Buddhistic tendencies existent in the Ah., and a magic formula directed to Buddha was adduced as evidence. Other characteristic examples are an allusion in I 1.1 to the three moral poisons, which almost certainly shows Buddha to be "the unprecedented physician" in question, an enumeration in I 2.21 *sq.* of the ten commandments, and a reference in I 2.46 *sq.* to the application of awareness. This is not of course the place to decide whether Vāgbhaṭa himself was a Buddhist or whether he only had Buddhistic inclinations; but any future research on the problem⁴ will also have to take cognizance of such typically Hinduistic features as the three objectives of life (I 2.29; cf. I 1.2) and the aversion to Buddhist sanctuaries (I 2.33 & 37). Whatever the final solution may be, there can be no doubt but that it is those Buddhistic tendencies which led the lamas to translate, of all works, the Ah. into Tibetan and to incorporate it into the Tanjur⁵.

17. According to the colophon, which is reproduced below, the translation was made by the Indian pundit Jārandhara and the Tibetan lama Rin-chen-bzañ-po⁶:

¹ Cf. KUNTE, Pref. p. 1.

² See Bibliography.

³ The present work is mainly concerned with establishing and interpreting the Tibetan version. Hence no attempt has been made to produce a critical edition of the original Sanskrit, which could be done only after the wording of those copies used by the Tibetans and all the scholiasts has been ascertained. In fact, the text given is merely that of A. M. KUNTE's second Nirṇaya Sāgara Press edition (marked B for Bombay), with variant readings found in N. S. Mooss' Vaidya Sarathy Press edition (marked K for Kottayam) being listed in the foot-notes.

⁴ Useful preliminary work was already done by CORDIER, JA ix 18 p. 167 *sqq.*

⁵ The medical works contained in the Tanjur and the chronological questions connected with them were first discussed by HUTH, SPAW 1895 pp. 269 *sqq.* & 283 *sq.*, with additions in ZDMG xlix p. 280 *sqq.* A more detailed description was later given by CORDIER, BEFEO iii p. 604 *sqq.*

⁶ (336a 2), ((335a 6)), [337a 6], [[322b 3]]. For the meaning of the abbreviations and brackets, see below § 20.

in Tibetan —

in English —

Of the work *Aṣṭāṅgahṛdaya* by the great physician named Vāgbhaṭa, a son of the master of physicians named Saṅghaguhya⁹, (this) is the sixth (section), being the *Uttarasthāna*.

The medical research-work entitled *Aṣṭāṅgahṛdayasaṃhitā* is (here-with) entirely finished.

By India's Professor Jārandhara¹⁰ and Revising Great Translator Monk Rin-chen-bzan-po it has been [translated], revised, and edited.

18. This translating team worked together on no less than nine canonical texts dealing with such diverse themes as hymnology, mystics, meditation, discipline, medicine, and chemistry. Besides the *Aṣṭāṅgahṛdayasaṃhitā*, their list of publications includes:

- (1) the *Viśeṣastavaṭīkā* or "Commentary on the Hymn on Distinction" by Prajñāvarman;
- (2) the *Devāṭīśayastotraṭīkā* or "Commentary on the Hymn on Pre-eminence to Gods" by the same author;
- (3) the *Tattvasārasaṃgraha* or "Compendium on the Essence of Truth" by Dharmendra;
- (4) the *Yogāvatāropadeśa* or "Guide to the Understanding of Meditation" by the same author;
- (5) the *Prātimokṣabhāṣyāsaṃpramuṣitasmaranānamātralekha* or "Writing on Nothing but the Unlost Memory of the Commentary on the *Prātimokṣasūtra*" by an anonymous author;
- (6) the *Padārthacandrikāprabhāsa* or "Moonshine Splendour of Word Meanings" by Candranandana (a commentary on the *Ah.*)¹¹;

¹ N; no śad CD; simple śad P. ² CD; *gol* NP.

³ NP; double śad C; simple śad D. ⁴ CD; *Dza-randha-ra*NP.

⁵ NP; simple śad CD. ⁶ NP; *tsihsa* CD.

⁷ CD; missing in NP. ⁸ NP; *pa* CD.

⁹ This is the exact retranslation of the Tibetan name. In the Sanskrit colophons of *Ah.* I, II, III & VI and *As.* I & VI, however, Vāgbhaṭa's father is called *Simhagupta*, which would be *Señ-ge-sbas-pa* in Tibetan. Interestingly enough, AUFRECHT (*Cat. Bodl.* viii p. 303a) records *Samghagupta* as the principal spelling of his MSS no 741—42.

¹⁰ Elsewhere the spelling varies among *Janārdana*, *Jarandāna*, *Jārandana*, *Jarandhara*, and *Jārandhara*. ¹¹ See above, §§ 7 & 10.

- (7) the Dhūpayogaratnamālā or “Jewel Garland of Incense Preparations” by Nāgārjuna; and
 (8) the Aṣṭapadikṛtadhūpayoga, a treatise on “Incense Preparations Made into Chess-board Squares” by the same author.

19. While Jārandhara is not otherwise known, Rin-chen-bzañ-po (or Ratnabhadra, as his name would be in Sanskrit) is one of the most outstanding figures of his time, bearing the honorary title of “great translator” (*lo-tsa-ba chen-po*) and holding the notable record of 150-odd translations and revisions—not to mention his many original works, among them a Sanskrit-Tibetan glossary.

Descended from a Kashmirian family, he was born 958 A.D. in the West Tibetan province of mŅa-ris. When he was 13 years old, he received his consecration at the hands of Abbot Ye-śes-bzañ-po. Buddhism then being at a low in his native country, he paid three visits to adjacent Kashmir and there studied Tantrayāna with 75 pundits; the most eminent among them were Śraddhākaravarman, Kamalagupta, and Jinamitra. At the age of 49, he joined the order of Bla-chen, which sought to remedy the abuses of Buddhism that had cropped up after its persecution by King Glan-dar-ma. Some time later, Grand Lama lHa-lde-btsan appointed him “head monk” (*dbui mchod-gnas*) and “diamond professor” (*rdo-rje-slob-dpon*), presenting him with the estate of Žer in the South-West Tibetan province of sPu-hrañs. In this capacity, he erected numerous monasteries, temples, and symbols at Khra-tsa, Roñ, and other places. An adherent of the Mādhyamika school of philosophy founded by Nāgārjuna, he also developed a brisk teaching activity, especially in the field of Prajñāpāramitā and Anuttarayoga literature, and produced many learned disciples, among whom were some ten Sanskritists capable of doing translation work. Besides this, he rendered signal service to the reformation and propagation of Buddhism, known as the “later spread” (*phyi-dar*) of the doctrine. At the age of 85, he met Atiśa, the famous patriarch of Magadha, who had come to mŅa-ris on the repeated entreaties of King Od-lde. Being 26 years his senior, he did not at first bow to him in reverence; but when, on a visit to the Golden Temple at mTho-lđiñ, he found him correctly describing the attributes of, and extemporaneously composing hymns on, every deity he saw, he paid due homage to him and entered into close relations with him. Among other things, he learned from him the method of “propitiation” (*sgrub-pa*), that is, how to coerce the Godhead through profound meditation. Because of his advanced years, he had to decline an offer to accompany the master on his trip to Central Tibet. He died, aged 97, at Khva-tse-viñ-gir on the 17th of Māgha 1055.

Thus far indigenous sources¹, which differ only in small details. What is particularly interesting is Sum-pa-mkhan-po’s remark that

¹ Sum-pa p. 182; gŽon-nu pp. 68 sq., 249 sq., *et passim*. The entire material available on Rin-chen-bzañ-po has been gathered and sifted by Tucci, Indo-Tibetica II & III 1.

“at the age of 55, when the pundits Śraddhākaravarman, Karagupta [?], Buddhaśrīśānti, Buddhapāla, Kamalagupta, *et al.* were invited to Tibet, he copiously translated sūtras (and) mantras such as Prajñāpāramitā, Yoga, and Samāja (scriptures)¹.” From this it would seem that Rinchen-bzañ-po started his translations at a comparatively late date, and that the Tibetan version of the Ah. too was made between the years 1013 and 1055².

20. The Ah. belongs to the mDo or Sūtra section of the Tanjur, four different xylographs of which are available, and occurs at the following places (the abbreviations and brackets are those used in the present edition):

Chone Tanjur	(C), vol. he (119), fol. (44 b 1—336 a 3) ³
Derge Tanjur	(D), vol. he (119), fol. ((44 b 1—335 a 7))
Narthang Tanjur	(N), vol. se (118), fol. [15 b 1—337 a 7]
Peking Tanjur	(P), vol. se (118), fol. [[15 a 5—322 b 5]]

For establishing the Tibetan text, all these xylographs have been consulted, and a short account of them may be given here.

The Chone⁴ Tanjur is extant but in one copy⁵, which was purchased for the Library of Congress, Washington, in 1926 by Rock⁶. It comprises

¹ *ñā-lñai dus-su bod-du pañ-ñi-ta Śrī-dha-ka-* [read *Śrad-dhā-ka-ra-*] *varma dan Ka-ra-gup-ta dan Bud-dha-śrī-śan-* [read *śān-*] *ti dan Bud-dha-pā-la dan Ka-ma-la-gup-ta sogs spyān drañs tñse śer-phyogs* [read *-phyin*] *dan yo-ga dan 'dus-pa sogs mdo snags man-du bsgyur-ñin* (line 11 *sqq.*).

² CORDIER (Vāgbhaṭa p. 11), referring to FOUCAUX (Lalit. ed. II p. ix), still held that the Tibetan translations of Sanskrit works, at least of those pertaining to medicine and magic, were made as late as the 12th or 13th century, at the time they were incorporated into the Tanjur. His view is no longer tenable.

³ In the provisional numbering of the Library of Congress, this is vol. 198.

⁴ Co-ne, less correctly spelt Co-ni, is a village (pop. 2000) and monastery in the A-mdo province of North-East Tibet or, according to another version, in the south-western part of the Kansu province of China. Situated not far from the upper course of the Hwang-ho, it once was the centre of all yellow-cap lamaseries in that region and later came to be a stronghold of the Yellow Church there, housing some 3800 monks under the rule of Yung-lo (1403—25). The wood-blocks of the first Kanjur and Tanjur edition, which along with many others were deposited in the huge archives, are said to have dated from the 15th or 16th century. The library and the printing press were completely destroyed, and the buildings badly damaged, when Mohammadan fanatics under the command of the four brothers Ma devastated the province in the early 1930s. The monastery itself was reconstructed in after years, but its treasures are lost for ever.

⁵ On the distribution of the various Kanjur and Tanjur editions among the libraries of the world, see CH'EN, HJAS ix p. 60 *sqq.*; TUCC, HJAS xii p. 480 *sq.*; MEISEZAH, PG viii 2 p. 27; MAURER, JOIB ix p. 99 *sqq.*

⁶ See his interesting report in NGM liv p. 569 *sqq.*, partly reprinted in The Illustrated London News of September 1929. As the impression was struck in his presence, Rock could supply some valuable details on technical matters. Thus he was told

209 volumes and is being catalogued by MEISEZAHL. The colour of ink is black, the size of the folios c. 60.5 by 15.8 cm., the size of the printed surface 56.5—57.5 by 9 cm.¹, and the number of lines per page 7. The text has been enclosed with a rectangular frame. The left-hand margin of the obverse bears, perpendicularly to the main body, the title of the subdivision, the number of the volume, and the number of the folio (e.g. *gso-ba rig-pa. he. Éc-lña*). The print is easily readable but contains, despite assertions to the contrary by the Chone lamas themselves², not a few mistakes.

The Derge³ Tanjur is available in several libraries, both Oriental and Occidental, and has been catalogued by Japanese scholars of the Tōhoku Imperial University, Sendai⁴. The copy used for the present edition is that of the former Prussian State Library, Berlin, now stored partly in the State Library, Marburg, and partly in the University Library, Tübingen. Details of its procurement could not be learned. It consists of 214 volumes, 14 of which got lost during World War II and were not recovered so far. As a microscopic analysis has shown, its paper was made from fibres of a genus of Thymelaeaceae, probably *Daphne* or *Wikstroemia*⁵. It is struck in black ink. The folios measure 62 by 11.5 cm. The printed surface is 51.5 cm. long and 7.5 cm. wide. The lines number 7 a page. The text is placed in a rectangular box with a 1.5 cm. margin on either side, that on the left giving the number of volume and folio (recto) and the title of the subdivision (verso) respectively, while that on the right remains blank. The print is perfectly legible and virtually free of carver's errors.

that a skilful lama needed 4 days to cut 1 block, and that 16 years were necessary to carve the blocks of the Tanjur alone, the wood used being walnut and a lighter species not identifiable. He also learned that 45 monks required 3 months to print the Kanjur and almost 6 months to strike the Tanjur. The paper was bought at Kunghang in Eastern Kansu, 11 days distant from Chone; it was very thin, and 8 sheets were pasted together to yield 1 leaf. The "wages" of the printers were 250 cash, i.e. 5c, per day, plus rations of barley flour, tea, and yak butter.

¹ Working from a microfilm, we have to rely on the data kindly given us by Dr. WALTER H. MAURER, Washington.

² ROCK, NGM liv p. 581.

³ sDe-dge, also spelt bDe-dge and sDe-deg, is a remote place and principality in Eastern Tibet. It lies on the left bank of the Yang-tse-kiang in the Hsi-K'ang province. Of the several monasteries belonging to this principality, that of Derge itself is the most famous. It is occupied by followers of the Tantric rññn-ma-pa sect, who disavow the reforms of Atiśa and bTson-kha-pa. As late as the 19th century, the Yellow Church had not yet succeeded in getting any hold on the region. The Kanjur and Tanjur editions of this lamasery must therefore be considered heterodox. The Kanjur blocks of the first impression are said to have dated from the 15th or 16th century.

⁴ U¹ [*et al.*], Catalogue p. 181 *sqq.* The Ah. bears the serial number 4310.

⁵ Cf. MEISEZAHL, Libri x p. 292 *sqq.*

The Narthang¹ Tanjur too is accessible in several research centres. An abstract of its contents was given long ago by CSOMA². The xylograph utilized in the present edition was acquired for the Prussian State Library, Berlin, in 1889 by the imperial minister to Peking, Herr von BRANDT. Like the Derge Tanjur, it was transferred to a salt-mine during World War II, where it sustained considerable damage through inadequate keeping, and is now deposited in the State Library, Marburg, with 12 (out of 225) volumes still missing. Its paper exhibits a yellow-brown colour, apparently because it was impregnated with an arsenical lye against destruction by insects³, and consists of Thymelaeacea fibres, probably of the *Daphne* genus⁴. It is entirely done in black ink. Its measurements are 63.5 by 16.5 cm. for the folios and 58 by 8 cm. for the printed surface. Each page bears 7 lines. The text has been put into a rectangular case, with a 1.5 cm. margin on the left of the obverse giving the title of the main division and the number of volume and folio (e.g. *mdo. se. bcu-drug*). The print is to a large extent difficult to decipher on account of blurs⁵. Sometimes resorting to abbreviations⁶, the carvers have made comparatively few mistakes; in fact, LAUFER⁷ was told by several lamas that the Narthang edition was considered by far the best of them all from the point of view of textual criticism.

The Peking⁸ Tanjur, of which apparently only a few impressions were ever struck, is within easy reach of scholars now that the Japanese have

¹ sNar-thaṅ is a small village in Southern Tibet. It is situated about six miles south-west of bKra-sis-lhun-po (Tashilhunpo) in the gTsañ (Tsang) province, and is touched by the road leading from gZi-kha-rtse (Shigatse) to Sa-skya. The monastery is the personal property of the head-lama of Tashilhunpo, who is known as the Tashi Lama. It was founded in 1153 and saw many a great man. Here the reformer bTsoṅ-kha-pa (1357–1419) studied Asaṅga's Yogācāra philosophy and the first Dalai Lama (1391–1475) began his clerical career at the age of 7. The wood-blocks of the Kanjur und Tanjur encyclopedias were prepared under Abbot Rig-pai-ral-gri in the years 1730 to 1742 (cf. Tucci, HJAS xii p. 479 sq.). The edition itself goes back to an order given by the sovereign Pho-lha-nas, also called Pho-lha-nas-mi-dbañ or simply Mi-dbañ. ² AR xx p. 553 sqq.

³ Cf. KIRFEL, LO xlv p. 5.

⁴ Cf. MEISEZAHN, PG viii 2 p. 18 sq.

⁵ The poor state of the Berlin copy gave rise to the opinion that the Narthang edition as such was inferior in get-up. Nothing could be farther from the truth than this. LAUFER (Account p. 7) describes a perfectly clear Narthang Kanjur in the possession of the Newberry Library, Chicago. Obviously the legibility depends on the kind of paper used.

⁶ E.g. *rjesu* for *rjes-su* I 1.31; *yoṅsu* for *yoṅs-su* I 2.12 & 3.55; *soḍ* for *sogs* I 3.19; *groḍ* for *grogs* I 3.22; *snum* for *snum* I 5.39. ⁷ Loc. cit.

⁸ Peking, the capital of China, has been the place of issue of several Kanjur editions conveniently named after the emperors on whose direction they were published. The earliest among these is the Yung-lo edition completed in 1410 (PANDER, ZE xxi p. (201); cf. LAUFER, JRAS 1914 p. 1129 sq.), which is said to be a true copy of the old Narthang edition (CH'EN, HJAS ix p. 58) released under Buyantu Khan (1312–20) (*Jigs-med* p. 105), and which, incidentally, appears to have been the prototype of the Berlin manuscript (LAUFER, JRAS 1914 p. 1129 sqq.). Next came a

finished reproducing it, along with the Kanjur, by photolithography¹. It is made up of 224 volumes. An inventory, prepared from the Paris block-print, is owed to CORDIER². The copy consulted in editing the present text was procured in 1955 for the International Academy of Indian Culture, New Delhi, by RAGHU VIRA. As is the case with all Peking xylographs, it is printed in red throughout³, the paper used being of a stiff, cardboard-like quality. The folios are 70 cm. in length and 19 cm. in width, having 8 lines to the page. The 62 by 13.5 cm. frame encasing the text has a 2 cm. margin on either side: that on the left bears a Tibetan legend stating the title of the subdivision or, in the case of longer works, that of the work itself⁴ (recto only), the number of volume and folio (recto and verso alike), and whether it is the obverse or reverse (e.g. *ylag-brgyad-pa*⁵. *se. bcu-drug. gon* and *se. bcu-drug. og* respectively); that on the right gives a Chinese translation of it (e.g. *tī i-pai shih-pa. i-ching pa chih. shang [hsia]. shih liu*⁶). The print makes easy reading but shows not a few mistakes; what is particularly interesting in this connection is a dittograph of 87 pādas beginning in fol. 25a7.

21. As concerns the interrelationship of these four xylographs, all that is essential has already been said by LAUFER⁷, who took a lifelong

reprint of the Yung-lo edition, made from 1602 to 1605 and called the Wan-li edition. Scarcely a century afterwards, between 1683 and 1700, another reprint was undertaken, known as the K'ang-hsi or first palace edition (LAUFER, BAIS 1909 p. 567 *sqq.*). Some forty years later, in 1737, a thoroughly revised and partly enlarged version of it came out, the Ch'ien-lung or second palace edition, which derives from the redaction of the fifth Dalai Lama (1617–82) (Citr. p. 44) and passes for the Peking edition *par excellence*. In contrast to this, the Tanjur seems to have been issued only once, and that probably after 1742; for details see below, p. 32 n. 2.

¹ Tripitaka, vol. 46 *sqq.* The Ah. is found in vol. 141.

² Catalogue, pt. 2 *sq.* The Ah. is listed in III p. 470.

³ Printing a xylograph in red is considered to be 108 times as meritorious as printing it in black. Similarly, in copying manuscripts and xylographs, the merit of the scribe is raised to the third power of 108 by using various inks, to the fourth power by using silvery ink, and to the fifth power by using golden ink. The figure 108 is sacred; thus the Kanjur usually has 108 volumes, and the lamaist praying string 108 beads. Cf. UNKRIG, Erdball II p. 330.

⁴ which then lends its name to the whole volume; thus *ylag-brgyad(-pa)* occurs throughout the margins of vol. 118, although not only the Ah. but also the Yogaśataka (fol. 1a1–9b5), the Jīvasūtra (fol. 9b5–13b4), the Avabheṣajakalpa (fol. 13b4–15a5), and the first book of the Aṣṭāṅghṛdayanāmavaiḍūryakabhāṣya (fol. 322b5–410a8) are contained in it.

⁵ Abbreviation for *yan-lag-brgyad-pa*, with subjoined *l*, a short form of *yan-lag-brgyad-pai śñiñ-po bsdus-pa* also employed by Bu-ston in his reference to the Tibetan Ah. (cf. gSuñ-'bum, lHa-sa edition, vol. ya, fol. 18b6). Contracted spellings like *ylag* are very popular in marginal legends, especially as far as the pagination is concerned. Cf. MEISEZAHN, Oriens xiii/xiv p. 285 *sqq.*

⁶ i.e. "volume 118, medical sūtra Aṣṭāṅga, recto [verso], 16." (Transliteration and English rendering by courtesy of Prof. ALFRED HOFFMANN, Berlin.)

⁷ Citr. p. 42 *sqq.*

interest in the history and evolution of the Tibetan canon. Thus little remains but to repeat and modify his statements, which are chiefly based on the index volume of the Chone Tanjur, and to make additions wherever this seems desirable.

The codification of the Tibetan Tripiṭaka goes back to the early 14th century¹ when at the instance of the Rev. 'Jams-dbyaṅs, the court chaplain of the Mongol emperor Buyantu Khan (1312—20), a great number of sacred texts still scattered among the country's various hermitages and lamaseries were assembled and incorporated into the old stock of scriptures already existent at the Narthang monastery. This collection, which was in manuscript form, was deposited in the 'Jam Temple and represents the prototype of all subsequent Kanjur and Tanjur editions².

Every available text having been utilized, it is by no means astonishing that the original Narthang copy included a considerable amount of duplicates. To eliminate these as well as to augment, revise, and classify the remaining vast material was the object of research done some years afterwards by Kun-dga-rdo-rje and Bu-ston on the Kanjur and Tanjur respectively³. When completed, their redaction, which was again a manuscript set, received an adequate place in the Golden Hall of Źa-lu, where it is still kept⁴, unless it has fallen a victim to recent developments. In view of its great antiquity and direct relation to the original, the knowledge that it is as good as lost to western scholars is particularly distressing.

Independent of Bu-ston's tradition, there seems to have existed another Tanjur recension, connected with the Central Tibetan district of Chongay ('Phyōn-rgyas)⁵, of which unfortunately no details are known. To this, Saṅs-rgyas-rgya-mthso (1620—1705), from c. 1645 adviser of the 5th Dalai Lama (1617—1682) and from 1679 regent of Lhasa, drew the attention of his spiritual master, who, in order to facilitate his struggle against the heterodox red-caps, promptly undertook to prepare a new edition of it. Though doubtless inferior to Bu-ston's version as far as authenticity is concerned, it had a lasting effect on all later editions. Not only was it made the basis of the Peking Tanjur published under the Emperor Ch'ien-lung; it was also amalgamated with

¹ Not the first part of the 13th century as claimed by CH'EN, HJAS ix p. 53. Cf. Tucci, HJAS xii p. 477.

² Cf. Tucci, Scrolls I p. 107 sq.

³ LAUFER (Citr. p. 53) assigns the Tanjur redaction to the reign of Buyantu Khan (1312—20); but Tucci points out that Bu-ston (1290—1364) was still too young at that time to command the experience necessary for such a difficult task (Scrolls I p. 108), and that he first came to Źa-lu in 1320, under the local rule of Grags-pa-rgyal-mthsan (Indo-Tibetica iv 1 p. 79 sq.), while the revision was made even later, under the auspices of the latter's son Kun-dga-don-grub (Scrolls I p. 258).

⁴ Cf. Tucci, HJAS xii p. 478 sq.

⁵ For the spelling see RICHARDSON, CAJ viii p. 73.

Bu-ston's revision into the Derge Tanjur of 1733—72 and, by the concurrent aid of the original, into the Narthang Tanjur of 1742.

Some extra words must be said about the Chone Tanjur issued in 1772. LAUFER¹, who had no copy of it at his disposal then, took it for a sister contamination of the Derge Tanjur. However, as a mere glance at the *apparatus criticus* of the present edition will show, the harmony of the two is so far-reaching as to virtually preclude this possibility. Irrespective of the almost identical pagination, C agrees with D and differs from N, P, or NP in no less than 504 out of 572 instances (misprints reckoned). For countercheck, here is a list of those 68 cases in which C deviates from D:

- 1.19 *yan-dag-par sbyor-bas* for *yan-dag sbyor-bas*;
- 1.38 *zug-rñu 'byun-bai dpyad* for *zug-rñu dbyun-bai dpyad*;
- 1.46 *rna-nad snad dan kha-nad* for *rna-nad sna dan kha-nad*;
2. 2 *nya-glo-dha* for *nya-gro-dha*;
2. 3 *lud-pai lud* for *lud-pai lu*;
- 2.24 *phan-da-gdags-pa* for *phan-gdags-pa*;
- 2.25 *rgyud* for *rgud*;
- 2.28 *yoñs-su ngu-ba* for *yoñs ngu-ba*;
- 2.30 *dbu-mii lam* for *dbu-mai lam*;
- 2.31 *brus* for *khrus*;
- 2.41 *gtsan-gzan* for *gean-gzan*;
- 2.46 *ñid mthsan-du* for *ñin mthsan-du*;
3. 7 *thsa* for *thse*;
- 3.14 *'di* for *'de*;
- 3.15 *slos* for *spos*;
- 3.17 *dgun-smān* for *dgun-smad*;
- 3.19 *pyi* for *phyi*;
- 3.21 *skom-du sbyor-ba* for *skom-du sbyar-ba*;
- 3.24 *stsogs-ñin* for *sgrogs-ñin*;
- 3.27 *ñi-mai od-zes spañ* for *ñi-mai od-zer spañ*;
- 3.30 *bu-rum* for *bu-ram*;
- 3.35 *'bab* for *'dab*;
- 3.37 *bud-med bces gzugs* for *bud-med bcos gzugs*;
- 3.39 *rdzi-thsar* for *rdzi-char*;
- 3.41 *bde-rtsa* for *pad-rtsa*;
- 3.44 *mi-yi stobs* for *me-yi stobs*;
- 3.48 *sbyor skyo-me* for *sbyar skyo-ma* (2 errors);
- 3.49 *'phrul-du* for *'phral-du*;
- 3.53 *ga-bur* for *ga-pur*;
- 3.53 *'phyens phren* for *'phyans phren*;

¹ Citr. p. 54.

- 3.54 *ñid* for *ñi*;
 4. 6 *'byuñ-po* for *'byuñ-ño*;
 4. 6 *mas-gtor-ba* for *mas-gtoñ-ba*;
 4.10 *mi rmo* for *mi rno*;
 4.13 *de-las zas* for *de-la zas*;
 4.22 *bud-med gžon bston* for *bud-med gžon bsten*;
 4.23 *gsod dpyad* for *gso dpyad*;
 4.27 *srin-kyi* for *srid-kyi*;
 4.28 *dus dus* for *dus*;
 4.29 *śad dan* for *śa dan*;
 4.30 *bsku-ziñ* for *bsku-zañ*;
 4.31 *des ni mi* for *des ni me*;
 4.32 *chags-grugs* for *chag-grugs*;
 4.33 *ñes zi* for *ñer zi*;
 4.36 *brtag-te* for *brtags-te*;
 4fin. *yan-lag-pa* for *yan-lag-brgyad-pa*;
 5. 2 *'gyur-pa* for *gyur-pa*;
 5. 3 *'bras-chen* for *'bras-chan*;
 5. 4 *'byur-ba* for *'gyur-ba*;
 5. 8 *'driś* for *'dres*;
 5. 8 *rgya-mthsar bab* for *rgya-mthsor bab*;
 5.24 *ya* for *yañ*;
 5.28 *sel* for *sal*;
 5.32 *mudgai srin* for *mudgai sran*;
 5.41 *khu-bal* for *khu-ba*;
 5.43 *lan-thsa* for *lan-thsva*;
 5.48 *lal cher* for *phal cher*;
 5.56 *śa 'bri mkhris-par oñ* for *śa 'bri mkhregs-par oñ*;
 5.56 *srid-bu* for *srin-bu*;
 5.57 *rl^{ig} rlugs* for *rlig rlugs*;
 5.59 *du-ba* for *khu-ba*;
 5.62 *rab* for *rañ*;
 5.63 *mdog 'gyur khoñ yuñś-sin* for *mdog 'gyur khoñ yañś-sin*;
 5.71 *srid-bu* for *srin-bu*;
 5.76 *srid* for *srin*;
 5.81 *oñ-nad* for *or-nad*;
 5.82 *rigs rim ji-bžin* for *rags rim ji-bžin*.

Most of these deviations at once appear to be simple blunders that may be classified as follows:

- (1) Dittographs: 4.28;
- (2) Superfluous letters: 1.46, 2.3, 2.24, 3.54, 4.13, 4.23, 4.29, 4.32, 5.2, 5.41;

- (3) Omitted vowel-signs, letters, or words: 3.7, 4.36, 4*fin.*, 5.8, 5.24, 5.43, 5.56b;
- (4) Confused or miscarved letters: 1.38, 2.2, 2.31, 2.41, 2.46, 3.14, 3.15, 3.19, 3.24, 3.35, 3.39, 3.41, 3.53c, 4.6bd, 4.27, 4.33, 5.4, 5.8, 5.48, 5.56c, 5.59, 5.62, 5.71, 5.76, 5.81;
- (5) Levelled¹ vowels or consonants: 2.30, 3.17, 3.21, 3.27, 3.30, 3.37, 3.44, 3.48 (twice), 3.49, 3.53d, 4.10, 4.22, 4.31, 5.32, (5.56b), 5.57, 5.63, 5.82.

There remain only six items that cannot be explained as mechanical errors: they concern the insertion of two hypermetric syllables (1.19, 2.28), the malcorrection of two rare words into commoner ones (2.25, 5.3), and finally the elimination of two evident misprints (4.30, 5.28). None of these variants carry enough weight, however, to justify the assumption of an independent Chone redaction; while the first four show every mark of an arbitrary change by either the scribe or the carver², the last two may well prove non-existent in the end: be it that the missing vowel-signs broke off from the original wood-blocks or that they did not properly come out in the present copy. Going by the material examined, the Chone Tanjur must be regarded as a direct offspring of the Derge Tanjur³.

If this result is correct, it must be possible to find a number of errors that have been passed from the Derge into the Chone xylograph. As it is, however, sometimes difficult in the present state of Tibetology to know corrupt from variant readings, we have given in the following list all cases that appear suspicious either by themselves or from the context:

- 1.28 *sgrim* for *sgrin* [*dakṣa*];
- 2*init.* *dpyad* for *spyad* [*caryā*];
2. 8 *brtan* for *brten* [*śīlayet*];
2. 9 *thsul* for *thsil* [*medas*];
- 2.14 *drags-pas* for *drags-par* [*vi*°];
- 2.37 *riñs* for *riñ* [*cīram*];
3. 3 *las* for *lam* [*mārga*];
3. 6 *steñs* for *steñ* [*tala*];

¹ The term "levelling" has tentatively been chosen for the frequent mistake of replacing a given vowel or consonant with a preceding or following one.

² In making a printing-block, the text is first written on Chinese tissue paper and then pasted face-down, or traced in mirror-writing, on the block; after that, the wood in between the letters is carved off.

³ There is yet another piece of evidence that may be adduced in favour of this conclusion. According to an oral communication by Dr. RICHARD O. MEISEZAHN, Beuel, the Chone Tanjur does not embrace a single work that is not found in the Derge Tanjur, while the Derge Tanjur contains quite a number of works that are missing in the Chone Tanjur.

- 3. 7 *thse* for *che* [*agrya*];
- 3.15 *bdug* for *bdugs*;
- 3.18a *stsogs* for *sogs* [*cita*];
- 3.18c *nas* for *nad* [*roga*];
- 3.34b *ldan dan* for *dan ldan* [*śliṣṭa*];
- 3.34c *khañ-pa* for *kha-ba* [*hīma*];
- 3.35 *kal-lha-ra* for *ka-lha-ra* or *kalha-ra* [*kahlāra*];
- 3.43 *min* for *smin* [*pāka*];
- 3.46 *lña ni* for *lña-yi* or *lñai* [*pañca°*];
- 3.53 *ur-sin* for *u-sir* [*uśira*];
- 3.58 *thog-mai žag bdun* for *thog mthai žag bdun* [*antyādisaptāha*];
- 4. 6 *bcin* for *spyin* [*avaḡāha*];
- 4. 9 *bgag* for *bkag* [*dhāraṇa*];
- 4.19 *bros* for *zos* [*bhuktvā*];
- 4.27 *gzu* for *bzu* [*pācana*];
- 4.29 *dro* for *gro* [*godhūma*];
- 4.32 *dugs* for *dug* [*viṣa*];
- 5. 3 *gañ-žin* for *gañ-žig* [*yena*];
- 5. 8 *bab* for *'bab* [*°ga*];
- 5.38 *rma* for *rmya* [*glapita*];
- 5.57 *skrañ* for *skran* [*gulma*];
- 5.60 *skran skye* for *skra skyed* [*keśya*];
- 5.63 *yañs* for *yañ* [*laghu*];
- 5.66 *yin* for *min* [*na*].

Even if some of these turn out to be genuine variants, they cannot possibly have entered the Chone text otherwise than through the Derge edition.

What has hitherto been said on the transmission of the Tanjur may be illustrated by the pedigree overleaf.

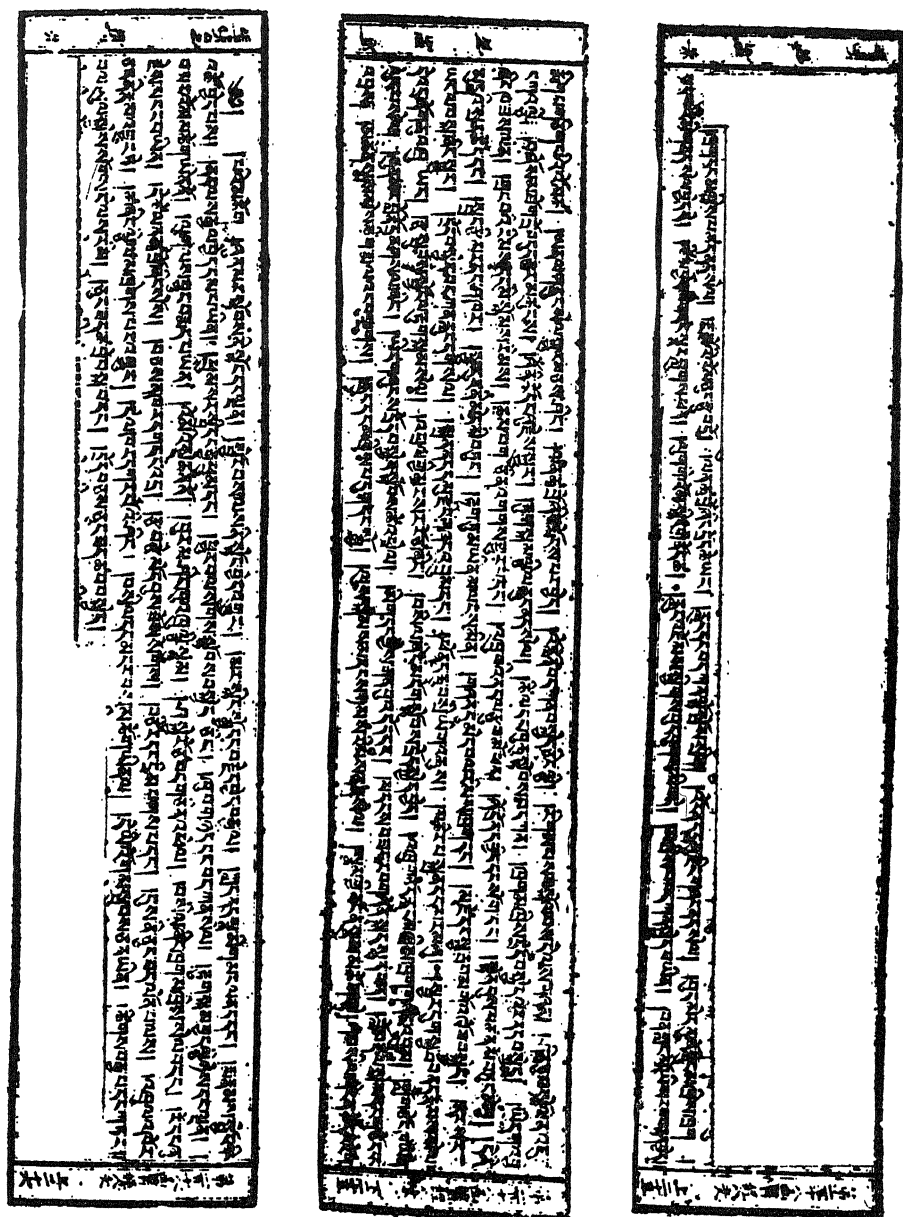

Thus the interrelationship of the several block-prints would be satisfactorily established, were it not for the above-mentioned dittograph in the Peking edition, which requires further investigation. For, strange as it may seem, this dittograph (marked P_2 in contrast to P_1) is not a mere repetition but rather a different recension of what precedes. The matter stands shortly as follows. In 87 dittographed pādas there are found 46 variant readings (errors excluded). In no case does P_2 go with P_1 alone against the other xylographs. In only 7 cases it agrees with NP against CD; but in as many as 21 cases it concurs with CD against NP. In further 9 cases it deviates from all block-prints. The remaining instances show in 4 cases accord with N, in 1 case accord with DN, and in 4 cases accord with CDN.

Considering their length (for P_2 see cut), it is obvious that both P_1 and P_2 make almost precisely one folio, though they do not agree with any of the extant folios. Hence it may be assumed that in preparing the Peking edition a leaf of the lost exemplar (that is, the 5th Dalai Lama's

edition) was inadvertently placed among the leaves of the revised text, from where it got unnoticed into the press copy. The question remains which one is the primary version.

The best way of tackling this problem is to examine those readings which P_1 and P_2 share with none of the other versions. The following list gives the relevant material and its philological evaluation:

Three pages from Peking Tanjur (fol. 25a, 25b, 26a) showing dittograph, with irrelevant passages effaced

(a) Peculiar readings in P₁

- 5.43b *dan* for *yin*: change of words effacing period;
 5.43c *rtse* for *thse* [*agre*]: change of words restoring original;
 5.43d *bcad-na* for *bcas-na* [*pīḍita*]: change of words distorting sense;
 5.44a *'bus* for *dbus* [*jantu*¹]: change of spelling constituting *lectio facili-
 or*;
 5.44b *sbags-pa* for (s)*pags-pa* [*saṃkara*]: change of spelling constituting
*lectio facili-
 or*;
 5.45 *mīar-ba* for *mīar-bas* [*°mādhuryaiḥ*]: neglect of case-ending ob-
 scuring syntactical connection;
 5.46b *skye* for *skyes*: change of tenses not affecting sense, perhaps only
 haplography;
 5.46b *rem* for *rim* [*kramāt*]: error;
 5.46d *dro* for *drod* [*uṣṇa*]: interchange of cognates, perhaps only error.

(b) Peculiar readings in P₂

- 5.30b *bskyed* for *skyed* [*krt*]: change of tenses constituting *lectio diffici-
 lior*, thus also in 5.33 bd, 5.37, 5.41 b;
 5.30c *yid-ga* for *yi-ga*: error;
 5.34 *bsri* for *sri*: change of tenses constituting *lectio diffici-
 lior*;
 5.38 *brdol* for *rdol*: change of tenses constituting *lectio diffici-
 lior*;
 5.40 *sna* for *rna* [*karna*]: change of spelling constituting *lectio diffici-
 lior*, perhaps arbitrary change of words;
 5.41b *phyur-ba* for *chur-ba* [*kilāṭa*]: interchange of synonyms;
 5.42b *rmad* for *smad* [*nindita*]: change of spelling constituting *lectio
 diffici-
 lior*.

Applying to this material the rules of textual criticism, especially that on "trivialization¹," it must be concluded that P₁ was made from P₂, though not without having been heavily edited.

There is one interesting aspect to this situation. If P₂ belongs to the 5th Dalai Lama's edition, then any reading in discord with it (errors and individual changes excluded) must of necessity originate from Bu-ston's recension, which represents the only alternative branch of tradition. Now, as P₁ is independent of Bu-ston's recension but shares with it, on the strength of the above reasoning, no less than 21 variants, we are given no choice but to suppose that P₁ (and hence also P) is directly related to N². Such a connection, which, by the way, would easily account

¹ Cf. MAAS, Criticism p. 13.

² The Peking Tanjur cannot, therefore, have been published "in the 2nd year of Yung-chêng (1724)," as CH'EN is inclined to believe (HJAS ix p. 58 sq.), but must have been prepared after the completion in 1742 of the Narthang Tanjur, that is, under the rule of the Emperor Ch'ien-lung, which is also LAUFER's opinion (Citr. p. 54). It is, consequently, a pendant not of the first but of the second palace edition.

for the many other cases of agreement between N and P¹, is quite in tune with the eminent position assigned to the Narthang xylograph by Tibetan scholars.

22. From our inquiry into the stemmatical relationship of the extant Tanjur editions it appears that, to use the terminology coined by textual critics, three of the witnesses in question (D, N, and P) have been contaminated, while the fourth (C) depends exclusively on a surviving exemplar (D) and must be eliminated as being worthless *qua* witness. That leaves us with no objective principle to follow in establishing the earliest get-at-able version, except where N goes against all other xylographs and hence is likely to reproduce either the original or Bu-ston's edition (peculiar errors and arbitrary changes barred)². We have therefore adopted, as a rule, those readings which are closest to the Sanskrit, which are best in form, style, and matter, or which make it easiest to see how the variants arose. Where two lections of equal value are available, we have given preference to that found in N as the most eminent witness.

23. On the other hand, we have deliberately abstained from altering, however slightly, the transmitted text, though its corruption is sometimes quite obvious, as may be seen from the following instances:

- 1 *init.* °*saṃ-hi-tta* for °*saṃ-hi-tā* [°*saṃhitā*];
 2. 2c *bska dan thsa dan kha-ba-dag* / *rtse 'jam* for *bska dan thsa dan kha-ba dan* / *rtse 'jam* [*mṛdvagraṃ kaśāyakaṭutiktakam*];
 2.22a *de-ltar sdig-pai las-rnams bcu* for *de-ltar sdig-pai las rnam bcu* [*pāpaṃ karmeti daśadhā*];
 2.39cd *chan 'thson-ba dan sbyor-ba-dag* / *sbyin dan len-la spyad mi bya* for *chan 'thson-ba dan sbyor-ba dan* / *sbyin dan len-la spyad mi bya* [*madyavikrayasaṃdhānādānānāni nācāret*];
 3.38d °*dod-pai rgyun* for °*dod-pai rgyud* [*kāmatantra*];
 3.52c *dan-bai dri-med chu zes-pa* for *nan-pai dri-med chu zes-pa* [*śuci haṃsodakam nāma*];
 5.34a *skran-nad* for *skran-nad* [*śopha*];
 5.45c *bsil dan mñar-bas* for *bsil dag mñar-bas* [*śaityaprasādamādhuryaṃ*].

Of these instances the sixth is particularly interesting inasmuch as CD have substituted *dan-s-pai* for *dan-bai*. Evidently the redactors did not recognize the corruption and, instead of eliminating it, perpetrated a malcorrection.

¹ including mistakes like *la* for *nal* [*śrama*] 2.36, *po* for *dban-po* [*indriya*] 4.25, *ñer zin* for *ñer zi* [*upaśama*] 4.33, *gañ* for *gar* [*ghana*] 5.6, and *ro-mi bsal-zin* for *ro-ma bsil-zin* [*vṛsyam himam*] 5.19.

² Obsolete spellings also indicate an early stage of tradition. But as these occur only sporadically in NP and would disturb the otherwise uniform orthography of the Tibetan text, they have been relegated to the *apparatus criticus*. Such cases are, e.g., *rgyun-tu* for *rgyun-du* (1.1), *bṛtan-ciñ* for *bṛtan-zin* (2.26), *dus-du* for *dus-su* (3.17), *mñar-ste* for *mñar-te* (3.56), and *gzan-dag-du* for *gzan-dag-tu* (3.57).

24. More frequent than such cases where the Tibetan text may be corrected after the Sanskrit are those in which a Sanskrit variant can be inferred from the Tibetan. Here are some examples:

2. 1 *sustha* [bde-gnas] for *svastha*;
 2.10 *vṛddho jīrṇas ca* [rgas-siñ 'khogs-pa] for *vṛddho 'jīrṇī ca*;
 2.44 *madyādisaktiṃ* [chan sogs chags] for *madyātisaktiṃ*;
 3.29b *subahuvūri* K [chu mañ bsres-la] for *subahu vūri* B;
 3.29c *śoṣa* [kha bskams] for *śopha*;
 3.39 *jalārdratālavrntāni* [tā-lai bsil-yab spos-chus btab] for *jalārdrās tālavṛntāni*;
 5.30 *śitake viṣame jvare* [grañ-bai rims dañ mi sñoms rims] for *śitake viṣamajvare*;
 5.42/3 *ikṣoḥ saro . . . rasaḥ* K [bu-ram siñ khu 'khru] for *ikṣo raso . . . sarah* B;
 5.52 *meda* [thsil] for *mcha*;
 5.55 *tvagdoṣahr̥t* [pags-pai ñes sel] for *tvagdoṣakṛt*;
 5.70 *śoṣaśopho°* [lus skem skrañ-or] for *śophaśoṣo°*;
 5.77 *kāṇḍa* [sdoñ-bu] for *kanda*.

Elsewhere the conjectural reading is too remote from the transmitted text to be generally acceptable¹, or a satisfactory solution cannot be reached at all².

Two further cases deserve special attention as they throw some light on the technique of revision adopted by the Tibetans. In 5.32 NP have *kha-ra śa*, which implies a variant *sitāpala* "sugar and meat," while CD give *śa-kha-ra*, which agrees with the transmitted *sitopala* "sugar-crystal, sugar." Similarly, in 5.55 NP read *bad-kan bskyed*, which presupposes a variant *kaphahr̥n na* "not eliminative of phlegm," whereas CD offer *bad-kan sel*, which corresponds to the transmitted *kaphahr̥n na* "not generative of phlegm." No matter whether NP or CD furnish the primary version, neither change could possibly have been made without the help of a Sanskrit copy. This is particularly noteworthy in view of the fact that other redactional changes leave a different impression. To cite but one characteristic instance, in 4.1 and (directly connected with it) in 4.17 NP write *mchī-ma* "tear" for the original *aśru* and *bāṣpa*, while CD, irrespective of the basic text, put *mchil-ma* "spittle" in its place, thereby affecting the very substance of the passage³.

¹ E.g. *āmayāñ* [nad] for *āśrayau* (5.58), *pitta* [mkhris-pa] for *kuṣṭha* (5.60), *śukra* or *bija* [khu-chu] for *pitta* (5.61), *khedita* [sun] for *virikta* (5.66).

² E.g. *arucāu*: *kha-zas len* (5.30), *udaram viṣamajvaram*: *lto-nad ldañ rims-nad* (5.57), *amlapākarasam*: *zu rjes skyur-ziñ cuñ-zad 'khru* (5.63), *mṛdu*: *sar-pa* (5.66).

³ Similar distortions are *rdzas ni khu-ba* CD for *rdzas-kyi zu-ba* NP [*vipāko dravyasya*] (1.17), *og dkri* NP for *mgo dkri* CD [*mauli*] (2.32), *ñal-log* NP for *ñal klog* CD [*svapnādhyaṇa*] (2.42), *lud-pa* CD for *lud ñal* NP [*śramaśvāsa*] (4.1), *rmen-bu* CD for *rma-(*)bu* NP [*vrañajantu*] (5.59).

25. In the same manner that variants are deducible from the Tibetan, interpolations may be uncovered with its aid. Generally speaking, any line or verse omitted by the translators is subject to suspicion, regardless of whether or not additional evidence shows it to be spurious. Thus 3.1cd, 4.3, and 4.4cd do not occur in K either, whereas 2.41cd, 4.20ab, 4.22cd, 5.36cd, 5.72cd, and 5.73ab appear in all the copies consulted. Things are different only with 3.35a, which is found in CD but wanting in NP; here we probably have before us an oversight on the part of NP, though nothing definite can be told because of the intricate sentence-construction. It ought, however, to be borne in mind that the Tibetan reflects not the original but only the earliest reachable form of the text, and that inclusion in the Tanjur alone is no sufficient proof for genuineness. This applies, for instance, to the line on belching (I 4.9), which has no counterpart in the preceding argument, to the section on urine (I 5.80 sq.), which is not mentioned in the immediately following summary, and to the epilogue (VI 40.59 sqq.), which HILGENBERG & KIRFEL have demonstrated to be a counterfeit on internal grounds¹.

Lacunae, on the other hand, could not be traced so far. There are a number of surplus lines in the edited portion, to be sure, but these result either from paraphrasing an unusual term (as 3.30e) or from completing an ellipsis (as 5.55b), or else bear the stamp of an insertion (as 2.12cd). The reverse phenomenon that two stanzas have been condensed into one is also met with (cf. 1.37, 4.7 sq.), but cannot satisfactorily be accounted for.

26. When it comes to establishing the sense of a word or group of words, or determining the construction of a sentence, susceptible of more than one possibility, it is only natural that the Tibetans do not always agree with the opinions advanced in Arunadatta's *Sarvāṅga-sundarī* or Indu's *Śaśilekhā*, and followed in our translation of the Sanskrit text. It is, however, noteworthy that they do not as a rule concur with Candranandana's *Padārthacandrikā* either, in spite of this commentary itself being part of the Tanjur². All such discrepancies will be stated at their appropriate places, though, and mention shall be made here only of some particularly remarkable interpretations, eccentric or otherwise.

In 2.3, for example, *dantamāṃsa* "tooth-flesh" [i.e. gums] is regarded as a copulative instead of determinative compound and is translated by *so dañ rñil* "teeth and gums," perhaps with reference to the parallel passage As. I 3.16, which has both *danta* and *dantamāṃsa*. In 2.7 and 5.17 just the opposite has happened: *viṣamūrccā* "poison and stupor" and *āmapīnasa* "rawness [i.e. indigestion] and catarrh" are considered determinative rather than copulative compounds (as is in the last case

¹ See above, § 4.

² Not until our translation was almost complete did we procure a copy of Candranandana's work.

also done by Candranandana) and are rendered *dug-gis brgyal* "fallen in a toxic stupor" and *cham sar* "raw catarrh" respectively, though Vāgbhaṭa does not describe these diseases anywhere. In 3.33 *śītala* "cold" is given the unusual though possible sense of *dkar-ba* "white," probably on account of the preceding *sasita* "sugared" having read *saśita* "cooled" in the translators' copy. In 5.67, lasty, *grahaṇī* "dysentery" is changed into its antonym *rtug skem* "dry stool" [i.e. costiveness], maybe by association with the cognate *grāhin*, which can also mean "constipating."

In 3.24, on the other hand, the compound *maṇikuṭṭimākānti* is explained by all scholiasts as a possessive dependent: *maṇayo vajramara-katādayas tatkr̥tāni kuṭṭimāni taiḥ kāntir yeṣāṃ tāni* "those whose splendour (is produced) by tessellated pavements made of jewels (such as) diamonds, emeralds, etc." (Indu's paraphrase); the Tibetans, however, resolve it as a possessive descriptive or rather appositional possessive: *nor-bu bcag 'drai mdañs ldan-pa* "showing a splendour like (that of) tesseral jewels," thereby avoiding the somewhat fantastic idea of a forest ground laid with gems. In 3.37 *saundhya* generally passes for a substantive synonymous with *harmya* "mansion," whereas the translators understand it in the adjective sense of *rdo-thal byugs* "coated with mortar," thus saving common people from having to sleep on, of all places, a palace-roof garden. In 3.41 the phrase *mṛṇālavālayāḥ kāntāḥ protphullakamalojjvalāḥ* "beautiful women possessed of lotus-fibre bracelets (and) radiant with full-blown lotuses" has been turned *chuñ-ma gdu-bu pad-rtsa 'dra | padma rgyas-pa lta-bur mdzes* "women beautiful as full-blown lotuses in their lotus-fibre-like bracelets," with the simile of the next line having been extended, against tradition but nevertheless convincingly, to the whole stanza. In 5.11 *prācya*, *avanti*, and *aparānta* are interpreted to signify, not the peoples of Gaur, Malwa, and the Konkan, as the commentaries have it, but rather the lands inhabited by these peoples, which is equally correct and, in view of what follows, even more satisfactory (the Tibetan text itself being somewhat at variance with the original Sanskrit). In 5.81, finally, *laghu* is taken, not for a predicate noun ("light"), as the scholiasts suggest, but for an adverb ("quickly"), which, judging from its position, indeed seems to be its true function in the present context.

27. Turning in conclusion to the translating-technique of the Tibetans, a minute description has been given for each individual stanza, so that only the most salient features need be outlined in the present context. Among these is prominent the roundabout fashion of rendering certain terms, especially medical, for which no proper equivalents are at hand¹. Two groups may be distinguished:

¹ Sanskrit words, unless already forming part of the Tibetan language, are used only as a last resort. Those met with in the present text and not yet listed in the dictionaries include *pa-ta-la* [*pāṭala*] 3.32, *kalha-ra* with v.l. *kal-lha-ra* [*kalhāra*] 3.35, *mudga* [*mudga*] 3.51, 4.29, 5.32, *sa-hya* [*sahya*] 5.11, *pa-ri-ya-tra* [*pāriyātra*] 5.12, and *kanta-ra* with v.l. *ka-ta-ra* [*kāntāra*] 5.46.

25. In the same manner that variants are deducible from the Tibetan, interpolations may be uncovered with its aid. Generally speaking, any line or verse omitted by the translators is subject to suspicion, regardless of whether or not additional evidence shows it to be spurious. Thus 3.1cd, 4.3, and 4.4cd do not occur in K either, whereas 2.41cd, 4.20ab, 4.22cd, 5.36cd, 5.72cd, and 5.73ab appear in all the copies consulted. Things are different only with 3.35a, which is found in CD but wanting in NP; here we probably have before us an oversight on the part of NP, though nothing definite can be told because of the intricate sentence-construction. It ought, however, to be borne in mind that the Tibetan reflects not the original but only the earliest reachable form of the text, and that inclusion in the Tanjur alone is no sufficient proof for genuineness. This applies, for instance, to the line on belching (I 4.9), which has no counterpart in the preceding argument, to the section on urine (I 5.80 sq.), which is not mentioned in the immediately following summary, and to the epilogue (VI 40.59 sqq.), which HILGENBERG & KIRFEL have demonstrated to be a counterfeit on internal grounds¹.

Lacunae, on the other hand, could not be traced so far. There are a number of surplus lines in the edited portion, to be sure, but these result either from paraphrasing an unusual term (as 3.30e) or from completing an ellipsis (as 5.55b), or else bear the stamp of an insertion (as 2.12cd). The reverse phenomenon that two stanzas have been condensed into one is also met with (cf. 1.37, 4.7 sq.), but cannot satisfactorily be accounted for.

26. When it comes to establishing the sense of a word or group of words, or determining the construction of a sentence, susceptible of more than one possibility, it is only natural that the Tibetans do not always agree with the opinions advanced in Arunadatta's *Sarvāṅga-sundarī* or Indu's *Śaśilekhā*, and followed in our translation of the Sanskrit text. It is, however, noteworthy that they do not as a rule concur with Candranandana's *Padārthacandrikā* either, in spite of this commentary itself being part of the Tanjur². All such discrepancies will be stated at their appropriate places, though, and mention shall be made here only of some particularly remarkable interpretations, eccentric or otherwise.

In 2.3, for example, *dantamāṃsa* "tooth-flesh" [i.e. gums] is regarded as a copulative instead of determinative compound and is translated by *so dañ rñil* "teeth and gums," perhaps with reference to the parallel passage As. I 3.16, which has both *danta* and *dantamāṃsa*. In 2.7 and 5.17 just the opposite has happened: *viṣamūrccā* "poison and stupor" and *āmapīnasa* "rawness [i.e. indigestion] and catarrh" are considered determinative rather than copulative compounds (as is in the last case

¹ See above, § 4.

² Not until our translation was almost complete did we procure a copy of Candranandana's work.

Above all belongs here the additional translation of Sanskrit prefixes already implied by the Tibetan simplexes, e.g. *yonis-su* (*b*)*rtag* for *parikṣeta* "one shall examine" (1.21), *ñer bsten* for *upaśaya* "reaction" (1.22), *rjes* (*b*)*rtse* for *anurakta* "beloved" (1.28), *rnam 'gyur* for *vikṛti* "alteration" (1.39), and *kun-tu spyod byed-pa* for *samācāraṇ* "practising" (2.47).

- (3) Hendiadyses such as *bku-byug* "besmearing & anointing" for *abhyāṅga* "inunction" (2.7, 2.9, 4.6), *dril-phyis* "rolling & wiping" for *udvartana* "massage" (2.14), *mig nad gyan-pa* "disease & itching [i.e. morbid itching] of the eyes" for *akṣikaṇḍū* "itching of the eyes" (4.18), *chag(s)-grugs* "breaking & crumbling" for *bhaṅga* "fracture" (4.32), and *bkres ñen nad-pa* "pained & diseased [i.e. painfully diseased] with hunger" for *lśudhātura* "pained with hunger" (5.66).

This last mode of expression is employed frequently in rendering action-nouns.

It is well known that, as a basis for the translating committees to rely on, special vocabularies were prepared in which every Sanskrit word had got, as far as possible, only one Tibetan equivalent in order to secure a maximum degree of uniformity. Nevertheless the present text shows a certain fluctuation of terminology not readily understandable from the necessity of suiting the metre. If this reflects an early stage of translating-technique or some kind of poetical license or just the natural unsteadiness of phrase to be expected in all such works, ancient or modern, there is no way of telling. A few examples will suffice to illustrate the point:

atisūra "tropical diarrhea" ~

- (1) *thsad(-pai) nad* "heat disease" 1.40, 5.24 (cf. *thsad* 5.52);
 (2) *thsad(-pas) 'khru* "heat(-caused) diarrhea" 2.17, 5.13.

arśas "hemorrhoids" ~

- (1) *g'zan-'brum* "anus pocks" 1.40, 1.42, 5.13 (cf. *'brum* 5.59);
 (2) *g'zan-nad* "anus disease" 5.25.

grahāṇi, *°gada*, *°doṣa* "dysentery" ~

- (1) *pho-bai drod chuñ* "poor heat of the stomach" 5.14;
 (2) *'khru-bai nad* "dysenteric disease" 5.31;
 (3) *pho-nad* "stomach disease" 5.34, 5.70;
 (4) *rtug skem* "dry excrements" 5.67 (see § 26).

dīpana "digestive" ~

- (1) *drod (b)skyed* "producing (digestive) heat" 2.15, 5.19, *et passim*;
 (2) *drod che* "rich in (digestive) heat" 5.25;
 (3) *drod 'bar* "(digestive) heat being kindled" 5.62.

hṛdya "cardiac" ~

- (1) *yi-gar oñ* "meeting one's appetite" 5.1;
 (2) *yid(-du) oñ* "suiting one's mind" 4.30, 5.48, 68, 76, 79;
 (3) *śñin-la phan* "being wholesome for one's heart" 5.71 (cf. *ahṛdya* ~ *śñin gnod* 5.26).

The last instance deserves special notice inasmuch as it presupposes a differentiation of meaning not immediately deducible either from the context or from the scholia. In 5.1, it is true, Indu glosses *hṛdayasya priyam* "dear to the heart" and Candranandana remarks *hṛdayāya hitam hṛdyam hṛdayasya vā priyam* "hṛdya (means) good for the heart or dear to the heart," whereas Aruṇadatta states *hṛdayāya hitam na tu hṛdayasya priyam iti hṛdyam iti vyākhyeyam* "hṛdya (is) to be explained as wholesome for the heart, but not as dear to the heart¹." On the other cases, however, Indu does not comment at all and Aruṇadatta only at times (*hṛdayāya [a]hita* "[not] good for the heart" 5.26, 48, 68), while Candranandana interprets *hṛdayāya hita* "good for the heart" in 5.68, *hṛdayāya priya* "dear to the heart" in 5.71, and *hṛdayāpriya* "not dear to the heart" in 5.26, which is just the opposite of how the Tibetans have understood these passages.

In the same way that one and the same Sanskrit term is rendered by different Tibetan terms, one and the same Tibetan term may correspond to different Sanskrit terms, thus bringing about a certain ambiguity of nomenclature. The majority of these cases are doubtless due to a lack of proper equivalents, as can be seen from the following examples:

chan "spirits" ~

- (1) *madya* "spirits" 2.44 *et passim*;
- (2) *surā* "arrack" 3.12, 4.21;
- (3) *ariṣṭa* "liqueur" 5.70 (cf. 3.22, 45).

chan *daṁs* "clear spirits" ~

- (1) *acchasurā* "barm" 3.12;
- (2) *vāruṇī* "toddy" 5.68.

lto sbos "inflated belly" ~

- (1) *ādhmāna* "inflation" 2.18, 5.17;
- (2) *ānāha* "constipation" 5.25.

'bras "pimple" ~

- (1) *koṭha* "urticaria" 4.18;
- (2) *parīsarpa* "erysipelas" 5.38.

śa bkra "motley flesh" ~

- (1) *śvitra* "white leprosy" 1.43, 5.81;
- (2) *koṭha* "urticaria" 5.59.

Seeking a way out of the difficulty, the translators merely substituted general terms for specific ones.

On much the same level are a number of other cases in which, for no apparent reason, the Tibetan is slightly out of keeping with the original, implying either (1) more, (2) less, or (3) something else than is expressed

¹ It may be noted *en passant* that according to Pāṇini's Grammar the *taddhita* suffix *ya* means "wholesome" in general (*tasmai hitam* V 1.5), but "dear" after *hṛdaya* (*hṛdayasya priyaḥ* IV 4.95). The problem with which the scholiasts struggle in the present context seems to be whether rule V 1.5 is annulled or supplemented by rule IV 4.95.

by the Sanskrit. Though no serious distortions result, the matter seems important enough to justify a few examples for each category:

- (1) *śarīracintā* "care of the body" ~ *lus-kyi bya-ba* "affairs of the body" 2.1; *vāta* or *anila* "wind" ~ (b) *ser-bu* "fresh breeze" 2.40, 3.23, 3.55; *hṛllāsa* "palpitation of the heart" ~ *ro-stod mi bde* "indisposed upper part of the body" 4.18; *lūtāditantu* "webs of spiders etc." ~ *srog-chags gdug dan-ba s(ts)ogs* "webs etc. of poisonous insects" 5.8; *bastīsodhana* "purgative of the bladder" ~ *gcin-nad sel* "removing urinary diseases" 5.16.
- (2) *daṁṣṭrin* "tusked or fanged animal" ~ *sbrul gdug* "venomous snake" 2.41; *snigdha* "fat" ~ *snum-bag* "slightly fat" 2.11, 3.26; *guhyaavedanā* "pubic pain" ~ *pho-mthsan na* "penile disease" 4.20; *dravadravya* "liquid substance" ~ *chu sna-thsogs(-pa)-la s(ts)ogs-pa* "all sorts of water etc." 5 *init.*; *grāhin* "injurious" ~ *mi bzod-pa* "unbearable" 5.7.
- (3) *garbhavēśman* "inside room" ~ *khañ-pa ñis-rim byas* "ground floor" 3.16; *drava* "liquid" ~ *sla-ba* "thin" 3.28; *kṣata* "rupture" ~ *mthson-rmas* [v.l. -*smas*] "knife-(inflicted) wound" 4.32; *lekhana* "stimulative" ~ *nad sbyon* "curing diseases" 5.71; *klama* "weariness" ~ *rmya* "exhaustion" 5.79.

An interesting counterpart of the last category form those comparatively rare cases in which the translators, having regard to the changed circumstances, replace obviously unsuited words by substantially different ones. In 2.23, e.g., devout people are required to treat a cow (*go*) with deference; cow worship, however, being unknown in Tibet, *dge-slon* "monk" has been written instead of *go*. In 2.38 decent folks are warned against coming near a cremation ground (*śmaśāna*); but since bodies are either buried, embalmed, burned, or cut in pieces and fed to animals by the Tibetans¹, *dur-khrod* "funeral place" has been substituted for *śmaśāna*. In 3.48, lastly, health-conscious persons are advised to stay on sheltered roof-gardens free from vapour (*vāṣpa*) during the rainy season; moisture issuing from the ground, however, being more likely to freeze than evaporate in the rough climate of Tibet, *ba-mo* "hoar-frost" has taken the place of *vāṣpa*.

Another trait, one that is more or less contingent on the nature of the Tibetan language, is the practice of verbalizing the nominal style of the original Sanskrit. This policy often goes beyond the customary substituting of full verbs for predicate nouns whose copulas are missing, as may be seen from the following confrontation (4.11 *sq.*):

in Sanskrit —

śoṣāṅgasādabādhīryasam̐mohabhramahṛdgadāḥ ||
tr̥ṣṇāyā nigrahāt tatra śītaḥ sarvo vidhir hitaḥ |
anagbhaṅgāruciglānikārsyaśūlabhramāḥ kṣudhāḥ ||

¹ Cf. KOEFFEN, Religion II p. 322 *sq.*

Xerostomia, flaccidity of limbs, deafness, stupor, giddiness, and heart disease (result) from the restraint of thirst. In this case every cold application (is) wholesome. Racking in the limbs, anorexia, lassitude, emaciation, stitches, and giddiness (result from the restraint) of hunger.

in Tibetan —

skom-pa bsgags-pas kha skams-śiñ /
yan-lag mi bde rna mi gsañ ||
mgo 'khor myos-śiñ sñiñ-nad 'byuñ /
der bsil cho-ga thams-cad phan /
bkres-pas lus žig yi-ga 'chus /
lus sñoms ñam chuñ gzer mgo 'khor ||

Through restrained thirst one's mouth is dry, one's limbs are not well, one's ears are not quick, one's head spins, one is stuporous, and heart diseases arise. In this case every cold application is wholesome. By hunger one's body is ruined, one's appetite disturbed, one's body lazy, one's strength poor, one feels pain, (and) one's head spins.

Then there is the peculiar manner of handling the original word-order, which, on the ground of idiom and metre, often runs directly counter to the fixed rules of Tibetan syntax. Two opposite courses are taken by the Lamaist translators in tackling this problem. Either the sentence-construction is preserved and the word- (or pāda-) order changed or, less frequently but all the more remarkably, the word-order is retained and the sentence-construction altered, irrespective of any distortion that may result. Here is one such case by way of example (3.42):

in Sanskrit —

ādānaglānavapuṣām agniḥ sanno 'pi sīdati /
varṣāsu doṣaiḥ ||

The (gastric) fire of those whose body has been emaciated by (the period of) absorption, though (being already) weak, is (further) weakened during the rains by the humours . . .

in Tibetan —

mthu 'phrogs-pas ni na-bai lus /
dman-par-las kyañ dman gyur-te /
dbyar ni gnod-pas gnod 'gyur-te /
. ||

The body (which is already) sick by the absorption of strength, after having become even weaker than weak, gets (further) affected by the humours in the rainy season . . .

Last but not least a phenomenon belongs here that is somewhat alien from the nature of Tibetan and, therefore, may well be characterized as a sort of Sanskritism. It concerns the proleptic use of the governing verb and its resumption by an auxiliary as met with, for instance, in the following stanza (5.66):

in Sanskrit —

peyaṃ noṣṇopacāreṇa na viriktakṣudhāturaiḥ |
nūtyarthatikṣṇamṛdvalpasambhāraṃ kaluṣaṃ na ca ||

(Alcohol is) to be drunk neither by one who is engaged in warming activities, nor by those who have been purged and who are pained with hunger, nor (when it is) exceedingly fierce and mild and made of inferior material, nor (when it is) turbid.

in Tibetan —

thsa-bai spyod-par ldan mi btuñ |
sun-ciñ bkres ñen nad-pas min |
šin-tu rno min sar-pa dañ |
legs-par ma bslañs rñog-can min ||

(Alcohol) shall not be drunk by one who is engaged in warming activities, nor by one who is tired and pained & diseased with hunger, nor (when it is) exceedingly fierce, nor (when it is) fresh, not properly prepared, (and) turbid.

Syntactically, the appended clause may be taken for an ellipsis to be completed by repeating the principal verb, say like this: *btuñ-bar bya-ba min*. Judging from similar cases such as 2.37 *sq.* and 5.32, it would seem that this construction is preferred in negative sentences. But sometimes it occurs in affirmative sentences as well, so in 1.3:

in Sanskrit —

Brahmā smṛtvāyuso vedaṃ Prajāpatiṃ ajigrahat |
so 'śvīnau tau Sahasrākṣaṃ so 'triputrādikān munīn ||

Brahman, having recalled medical science, taught (it) to Prajāpati; he, to the two Aśvins; they, to the Thousand-eyed One; he, to the sages Atriputra etc.

in Tibetan —

Thsañs-pas thse-yi rig-byed dran |
sKye-dgui-bdag-la bsad-pa yin |
de-yis Tha-skar des brGya-byin |
des rGyun-śes stsogs dran-sroñ-lao ||

Brahman, having recalled medical science, told (it) to Prajāpati; he, to (the two) Aśvinī(putras); they, to the Hundred-powered One; he, to the sages Atri(putra) etc.

Here the auxiliary is even missing, and its office is taken by the final *o*.

Time and again Tibetan versions have been praised for their almost proverbial faithfulness, especially when compared to their Chinese counterparts, and repeated attempts have been made even to reconstruct the wording of lost originals with their help. Justified though such a policy may seem in the case of prose compositions, it is certainly out of the question as far as metrical works are concerned. Here the fixed number of syllables and lines allotted to each line and stanza¹ calls for many changes, both slight and drastic, not to speak of those numerous instances where the text is altered for no apparent reason whatsoever. In fact, as the following analysis of the first five chapters of Vāgbhaṭa's *Aṣṭāṅgahrdayasamhitā* will show, hardly a single stanza can be traced that is exactly alike in Sanskrit and in Tibetan.

¹ On Tibetan metrics see BECKH, *Beiträge* p. 53 *sqq.*

First Chapter

Opening Statement

In Tibetan —

[15b1] [[15a5]] *yan-lag-brgyad-pai sñiñ-po bsdus-pa slob-dpon Pha-gol-gyis mdzad-pa bzugs-so* || ||¹
(44b1)((44b1)) *rgya-gar skad-du* / [[6]] *aṣṭāṃ²-ga-hri-da-ya³-saṃ-hi-tta nā-ma* | *bod skad-du* | *yan-lag-brgyad-pai sñiñ-po bsdus-pa zes bya-ba* | *bcom*[2]-*ldan⁴-das de-bzin-gsegs-pa sman-gyi bla bai-ḍūrya od-kyi rgyal-po-la phyag⁴-thsal-lo* ||

¹ N; double śad P; passage missing in CD.

² NP; *aṣṭa-am* CD.

³ CD insert a simple śad here.

⁴ N adds 'phyag.

In English —

The Collected Essence of the Octopartite (Science), composed by Master Vāgbhaṭa, is contained (in what follows).

In Sanskrit (it is entitled) *Aṣṭāṅgahrdayasamhitā nāma*; in Tibetan, *Yan-lag-brgyad-pai sñiñ-po bsdus-pa zes bya-ba*.

Reverence to the Victorious One, the Thus-gone One, the Medicine Master, the Cat's-eye-splendoured King!

Remarks

In their opening statement, the translators announce the new work and its author (this part is wanting in CD), record its full title in Sanskrit and Tibetan, and pay homage to Buddha as the lord of medicine (on this aspect see WADDELL, Buddhism p. 353 sq.). Some points of interest may here be raised.

The Sanskrit title, to begin with, admits of two interpretations, both equally common in the existent literature, according as its initial member (*aṣṭāṅga*) is considered a determinative or a possessive compound; in the first case it would read, "collection of the essence of the eight parts (of medicine)," in the second, "collection of the essence of the eight-membered (science)." The Tibetan title, on the other hand, bears only one interpretation, namely, "collected essence of the eight-membered (science)," the words *yan-lag-brgyad-pa* having a possessive meaning because of the suffix *pa* and ranking equal with terms like *yi-ge-drug-pa* "six-letter (sequence)" for the famous formula *oṃ ma-ṇi pa-dme hūṃ* or *sum-cu-pa* "thirty(-letter sequence)" for the Tibetan alphabet (cf. JÄSCHKE, Grammar p. 33). Besides, it should be noted that the final member, *hrdayasamhitā* "collection of essence," has been denominalized into *sñiñ-po bsdus-pa* "collected essence." This phenomenon, which occurs very frequently, is explained by the fact that in Tibetan verbal nouns and adjectives cannot be substantivated to such a degree as to assume nominal construction.

The author's name, *Vāgbhaṭa* (i.e. "slave of speech"), has been translated instead of transliterated, which is in keeping with common Tibetan usage. Its present equivalent, *Pha-gol*, is an inaccurate form of *Pha-khol* (Mongolian *Eḍige-yin boyol*, i.e. "slave of one's father"), which recurs in the colophon but has there been amended by CD. While the second members are thus brought into full harmony with each other, the first components remain at a sharp variance. It ought, however, to be noted that instead of *Vāgbhaṭa* the Prabandhac. V 20 (p. 314 DĪNĀNĀTHA, p. 199 TAWNEY) twice gives *Bāhaḍa*, whereas Bengali and South Indian manuscripts often read *Bābhaṭa* and *Vāhaṭa* respectively. This leads one to assume that *Vāgbhaṭa* is nothing but a subsequent Sanskritization of an original Prakrit name, and that the translators had such a vernacular spelling before them (cf. Hindi & Bengali *bāp*, Kashmiri *bab*, Nepali *bā*, "father").—In Svapnac. II 160, our author is called *Vācaspati* (i.e. "lord of speech"), which presupposes a variant *Vāgbhaṭṭa*; but that seems to be an etymological pun rather than a serious attempt at explaining the formation of the word.

The salutation, lastly, reminds one of a passage in I 18.18 which forms part of a spell (*mantra*) and runs as follows:

om namo bhagavate bhaiṣaṣyagurave vaiḍūryaprabhārājāya¹ tathāgatāyārhatē
samyaksambuddhāya |

Om! Reverence to the Victorious One, the Medicine Master, the Cat's-eye²-splendoured King, the Thus-gone One, the Saint, the Fully Enlightened One! Interestingly enough, the Tibetans have retained here the original Sanskrit, transliterating it in the manner of a mystic formula (*dhāraṇī*):³

om (3) na-mo bha-ga-ba⁴((3))-te | bhai-ṣa-dzya⁵-gu-ru bai-ḍūrya⁶-pra-bha-rā-dzā-
ya | ta-thā-ga-tā-ya⁷ | arha⁸-te | sam-myak⁹-sam¹⁰-buddhā-ya |

This is not, however, to say that both salutations are directly related to each other; on the contrary, they doubtless derive from a current Buddhist pattern.

As concerns the variant readings, CD have resolved the sandhi of *aṣṭām-ga* into *aṣṭa-am-ga*, while N has inserted an erroneous *phyag* after *phyag*. It may also be observed that all xylographs print *saṃ-hi-ta*, which appears to be an old corruption of *saṃ-hi-tā*.

Salutatory Stanza (1)

Sanskrit Text

rūgādirogān satatānuṣaktān
aśeṣakāyaprasrītān aśeṣān |
autsukyamohāratidāñ jaghāna
yo 'pūrvavaiḍyāya namo 'stu tasmai ||

Reverence be (paid) to him, the unprecedented physician, who destroyed all diseases—(such as) lust etc.—perpetually clinging to (and) spreading over all bodies [the whole body], causing desire, ignorance, and ill-will.

Tibetan Version

'dod(2)[[7]]-chags-la ((2)) sogs ma-lus-pa-yi nad |
 rgyun-du¹ 'brel-bas lus kun ma-lus khyab |
 'dod dan gti-mug khro²-ba sel-ba-yi |
 sman-pa shon-med de-la phyag[3]-'thsal-lo ||

¹ CD; tu NP.

² CDP; dro N.

Reverence to him, the unprecedented physician, removing all diseases—(such as) lust etc.—perpetually clinging to and spreading over each and every body [the whole and entire body], (namely), desire, ignorance, (and) hatred.

Remarks

The salutatory stanza, composed in the Upajāti metre, begins the Sanskrit text of the Ah. Like the final portion of the opening statement, it is addressed to Buddha in his capacity as lord of medicine; for though no name is mentioned and the terminology is slightly different, an allusion appears to be made here to the three moral poisons (*viṣa*, *dug*) in Buddhist philosophy. These are known as lust (*rāga*, 'dod-chags), hatred (*dveṣa*, 'ze-sdan), and ignorance (*moha*, gti-mug) and are symbolized by a dove, serpent, and pig respectively in the nave of the wheel of life (for details see WADDELL, Buddhism p. 105 sqq.).

As regards the Tibetan version of this stanza, the following may be noted (the lemmata are arranged according to the Sanskrit text):

'dod-chags, the common equivalent of *rāga* "lust," is, properly speaking, a hendiadys signifying "love and desire," that is, "amorous desire."

sogs is given here by all block-prints alike. As will later be seen, CD often write *stsogs* instead, both forms being approximately in the ratio of three to seven. Though nothing definite can be told yet, *stsogs* seems to be an orthographic peculiarity rather than an antiquated spelling.

For *rgyun-du* NP have an obsolete *rgyun-tu*.

āśeṣakāyaprasṛta "spreading over all bodies" [or "spreading over the whole body," as this compound may alternatively be resolved according to Aruṇadatta] has been translated tautologically by *lus kun ma-lus khyab* "spreading over each and every body" [or "spreading over the whole and entire body"]. Both *āśeṣa* and *ma-lus* literally mean "without exception, without remainder."

āśeṣa, separated from its governing noun by two intervening appositions, has been transferred to its proper place before *roga*, the rhetorical figure of hyperbaton being incompatible with Tibetan syntax.

For *khro-ba* N has a miscarved *dro-ba*.

After *autsukyamohārati* the root-suffix *da* "causing" has been omitted, which makes it necessary to interpret the remaining words as a specification of *rāgādi*. This would also accord with the fact that *rāga* and *autsukya* have been rendered by similar terms, namely, 'dod-chags and 'dod.

The relative clause *jaghāna yaḥ* "who destroyed" has been expressed by a participial clause, with the original perfect having been replaced by a present: *sel-ba* "removing."

The predicate *astu* "be (paid)" has been dropped and its office taken by the final *o* of *phyag-'thsal-lo*.

tasmāi, lastly, has been interchanged with *namas* on grounds of syntax.

I 1

Introductory Line

Sanskrit Text

*athāta āyusṣkāmyam¹ adhyāyaṃ vyākhyāsyāmaḥ | iti ha smāhur Ātre-
yādayo maharṣayaḥ ||*

¹ K adds *nāma*.

Now we shall set forth the chapter concerning the wish for long life. Thus spoke the great sages Ātreya etc.

Tibetan Version

*de-nas thse riñ-bar 'dod-pai leu bśad[[8]]-par byao | rGyun-śes-kyi-bu-la (3)
sogs-pa dran-sron chen-po((3))-rnams-kyis 'di-ltar bśad-do ||*

Now will be set forth the chapter on wishing life to be long. Thus was spoken by the great sages Ātreya etc.

Remarks

āyusṣkāmya “concerning the wish for long life” has been turned *thse riñ-bar 'dod-pai* “on wishing life to be long.” Putting nominal phrases verbal and expressing suffixes of appurtenance by objective genitives is typical of the Tibetan translating-technique.

vyākhyāsyāmaḥ “we shall set forth” has been rendered *bśad-par byao* “will be set forth,” with the agent left unnamed, so that the passive construction in English comes closest to the original.

iti “thus” usually refers not to what follows but to what precedes. Arunadatta, however, takes it here to stand for *evam*, which has both meanings. Hence its translation into Tibetan by *'di-ltar*.

Ātreya has, in accordance with Mvy. 3461, been Tibetanized as *rGyun-śes-kyi-bu* “son of the always knowing one.” While *bu* clearly represents the patronymic suffix *eya*, the correlation between *rGyun-śes* and *Atri* remains obscure, the latter being usually etymologized as the “devourer” (*attri*). There is a remote possibility that *Atri* has been associated with *Agni*, who is known in Vedic literature both as “omnivorous” (*viśvād* RV. VIII 44.26 etc.) and as “omniscient” (*viśvavedas* RV. I 128.8 etc.).

I 1. 2

Sanskrit Text

*āyusḥ kāmayaṃnena dharmārthasukhasādhanam |
āyurvedopadeśeṣu vidheyāḥ paramādarāḥ ||*

By him who wishes a long life leading to virtue, wealth, and happiness, the utmost attention (is) to be paid to the precepts of medical science.

Tibetan Version

*thse ni riñ-bar 'dod-pa-yis |
chos dan nor dan bde-ba sgrub¹ |
thse-yi rig-byed lun bśad[4]-pa |
rab-tu gus-par [[15b1]] bya-bar gyis ||*

¹ NP; *bsgrub* CD.

By him who wishes life to be long (the mind) shall be made deeply intent on what is set forth (in) the precepts (of) medical science, (which) leads to virtue, wealth, and happiness.

Remarks

In contrast to the salutatory stanza, which alludes to the Buddhist roots of vice, the present stanza refers, if covertly, to the Hindu aims of life. But this seems to be a commonplace of Indian medicine rather than a clue to the author's faith. Caraka already observes that "health is the supreme foundation of virtue, wealth, love, and release" (*dharmārthakāmamokṣāṇām ārogyaṃ mūlam uttamam* I 1.15), whereas the As. speaks of "diseases causing the obstruction of virtue, wealth, love, and release" (*dharmārthakāmamokṣāṇām vighnakāribhīr āmayaiḥ* I 1 *init.*).

Going into particulars, *āyukḥ kāmayaṃāna* "he who wishes a long life" has been translated *thse ni riñ-bar 'dod-pa* "he who wishes life to be long."

dharmārthasukhasādhana "leading to virtue, wealth, and happiness" has been connected not with *āyus* "long life," to which it belongs grammatically, but with *āyurvedopadeśa* "precepts of medical science." This change of construction became necessary once the original word-order was retained.

For *sgrub* CD have substituted the corresponding future stem *bsgrub*, which comes to the same.

āyurvedopadeśa "precepts of medical science" has been paraphrased as *thse-yi rig-byed lun bśad-pa* "what is set forth (in) the precepts (of) medical science."

vidheyayā paramūdarayā "utmost attention (is) to be paid" has been verbalized into *rab-tu gus-par bya-bar gyis* "shall be made deeply intent."

I 1. 3

Sanskrit Text

Brahmā smṛtvāyuṣo vedaṃ Prajāpatiṃ ajigrahat |
so 'śvinau tau Sahasrākṣaṃ so 'triputrādīkān munīn ||

Brahman, having recalled medical science, taught (it) to Prajāpati; he, to the two Aśvins; they, to the Thousand-eyed One; he, to the sages Atri(putra) etc.;

Tibetan Version

Thsañs-pas thse-yi rig-byed dran |
sKye-dgui(4)-bdag-la bśad-pa yin |
de-yis Tha-skar ((4)) des brGya-byin |
des rGyun-śes stsogs¹ dran-sroñ-lao ||

¹ CD; *de-yis rGyun-śes* NP.

Brahman, having recalled medical science, told (it) to Prajāpati; he, to (the two) Aśvinī(putras); they, to the Hundred-powered One; he, to the sages Atri(putra) etc.;

Remarks

The Tibetan translators follow the original Sanskrit word for word (with the exception that *smṛtvā* is put after *āyuṣo vedaṃ* on grounds of syntax). Their procedure is all the more remarkable here as by doing so they get into conflict with

elementary grammar, which requires the verb always to stand at the end of its clause or sentence. On this peculiar aspect of translational Tibetan see Introd. § 27.

aṅgrahat "he made grasp, taught" has been rendered by *bsad-pa yin* "he told."

Aśvinau "the two Aśvins" has been represented by *Tha-skar*, which properly signifies the goddess Aśvinī, the mutual wife of the two Aśvins later considered to be their mother. As in the case of the following *rGyun-ses* (~ Skr. *Atri*; see note on v. 2), the name of the parent serves here as a substitute for that of the son.

Sahasrākṣa "the Thousand-eyed One," an epithet of Indra (who, endeavouring to seduce Ahalyā, was cursed by her husband with a thousand female sex organs later changed into eyes; cf. MBh. XIII 34.27 sq.), has been replaced by *brGya-byin* "the Hundred-powered One" (~ Skr. *Śatakratu*), another epithet of Indra meaning that he has sacrificed a hundred times (cf. MBh. IX 49.1 sq.).

Instead of *des rGyun-ses stsogs* NP simply read *de-yis rGyun-ses*, the diastole of *des* leading to the omission of *stsogs*.

I 1. 4

Sanskrit Text

te 'gniveśādīkāms te tu prthak tantrāṇi tenire |
tebhyo 'tiviprakīrṇebhyaḥ prāyaḥ sāratarocayaḥ ||

they, to Agniveśa etc. But they composed (their) works separately. (These) being too widely scattered, there is (now) made [*kriyate* 5a] from them, as a collection for the most part of very essential (matter),

Tibetan Version

*de-yis Me-bzin-'jug-la sogs*¹ |
de-rnams-kyis [[2]] *rgyud so-sor* [5] *byas* |
*šin-tu 'thor-ba*² *de-rnams-las* |
*rab-gces*³ *phal-cher btus(5)-pa ni* ||

¹ NP; *stsogs* CD.

² NP; *'thob-pa* CD.

³ NP; *ces* CD.

they, to Agniveśa etc. (But) they composed (their) works separately. (These) being too widely scattered, there was (then) made [*byas* 5b] from them, as a collection for the most part (of) very essential (matter),

Remarks

The name *Agniveśa* has been Tibetanized as *Me-bzin-'jug* "he who enters like fire" (thus also Mvy. 3471). This translation presupposes for *Agniveśa* the etymology "he whose entrance is like that of fire" (as against PW I 34 "he who has a fire-temple"), by which a brahmin must be understood; cf. Vas. XI 13 [~ KāṭhUp. I 1.7]: *vaiśvānaraḥ praviśaty atīthir brāhmaṇo grāham [grhān]* "as fire enters a brahmin guest the house [the houses]."

The particle *tu* has been omitted for lack of space and the adverb *prthak* interchanged with *tantrāṇi* on grounds of syntax. For the same reason, *tebhyāḥ* has been placed after *ativiprakīrṇebhyaḥ* and *prāyaḥ* before *uccayaḥ*.

The word *viprakīrṇa* (and its equivalent *'thor-ba*) should be interpreted to mean, not "umfangreich" as HILGENBERG & KIRFEL have it, but "scattered" as the commentators suggest; see Aruṇadatta's paraphrase *vikṣiptebhya uccāvacoṭīrthata-yaivetaścetaśca gatebhyo 'ta eva kaścid evārthaḥ kasmād eva tantrāntarāj jñāyate*

“dispersed, gone hither and thither because of the diversity of subjects treated so that every subject is known from another work.”—For *’thor-ba* CD have substituted *’thob-pa*, which occurs only as the future of *thob-pa* “to gain”; but this makes no sense in the present context.

The comparative *sūratara* is used here for the elative and, consequently, has been rendered by *rab-gees* “very essential (matter).” CD give the short form *rab-ces* instead, which is not attested elsewhere.

11.5

Sanskrit Text

kriyate ’aṣṭāṅgaḥṛdayaṃ nātisaṃkṣepavistaram |
kāyabālagrahordhvāṅgaśalyadaṃṣṭrājarāvṛṣān ||

the Aṣṭāṅgaḥṛdaya, without too much brevity or prolixity. Body, child, demon, upper part (of the body), dart, fang, old age, and potent man

Tibetan Version

śin-tu bsdus min rgyas min-par |
yan-lag-brgyad((5))-pai sñiñ-po byas |
lus dañ byis-pa gdon lus-stod |
[[3]] mthson dañ mche-ba rgas ro-tsa ||

the Aṣṭāṅgaḥṛdaya, neither too brief nor (too) prolix. Body, child, demon, upper part of the body, dart, fang, old age, (and) potency:

Remarks

kriyate “is made” has been placed at the end of the sentence and turned into the past tense: *byas* “was made.”

nātisaṃkṣepavistaram “without too much brevity or prolixity” has been interchanged with *aṣṭāṅgaḥṛdayaṃ* and put verbally: *śin-tu bsdus min rgyas min-par* “neither too brief nor (too) prolix.”

kāya “body,” *bāla* “child,” etc. stand for the eight parts of Indian medicine usually known as general therapy, pediatrics, psychiatry, supraclavicular surgery, general surgery, toxicology, rejuvenation, and virilification. Bu-ston, who has quoted the Tibetan version of this and the following line in his Chos-’byun¹, holds a different view, understanding the first *lus* as “womb,” the second *lus* (in *lus-stod*) as “interior or trunk,” and *rgas ro-tsa* as “senile lust.” On this misinterpretation, as well as on the nomenclature and arrangement of the eight parts of Indian medicine, see VOGEL, IJ vi p. 290 sqq.—Since Vāgbhaṭa names these parts metonymically after the objects with which they are concerned, it is unsatisfactory if not incorrect to render *śalya* by “Sonde,” as HILGENBERG & KIRFEL do; one should rather say “dart,” the object of general surgery being that of removing darts and other foreign bodies.

vṛṣa “potent man” has been translated by the corresponding abstract noun *ro-tsa* “potency,” spelt *ro-rtsa* in Bu-ston’s quotation.

¹ gSuñ-’bum, lHa-sa edition, vol. ya, fol. 18b 4—6. Cf. OBERMILLER, Transl. I p. 48.

I 1. 6

Sanskrit Text

*aṣṭāv aṅgāni tasyāhuś cikitsā yeṣu saṁśritā |
vāyuh pittaṁ kaphaś ceti trayo doṣāḥ samāsataḥ ||*

they call its eight parts with which therapy is concerned. Wind, choler, and phlegm (are), in short, the three humours.

Tibetan Version

*gso-dpyad [6] gañ-la gnas-pa-yi |
yan-lag brgyad-du de bśad-do |
rluñ dañ mkhris-pa bad-kan (6) yañ |
ñes-pa rnam-gsum mdor bsdus yin ||*

these are said to be the eight parts with which therapy is concerned. Wind, choler, and phlegm are, in short, the three different humours.

Remarks

The Tibetan differs from the Sanskrit only in some minor points: *aṣṭau* has been put after *aṅgāni*; *tasya*, which refers to *aṣṭāṅgaḥṛdayam* in 5a, has been given the role of summing up the preceding objects; the relative clause *cikitsā yeṣu saṁśritā* has been placed before its governing noun; *iti* has been left untranslated; and *trayaḥ* "three" has been interchanged with *doṣāḥ* and qualified by the addition of *rnam* "different."

A few words may be said on the term *doṣa* and its pendant *ñes-pa*. In non-technical language, they both mean "fault"; in medical literature, however, they denote a morbid agent not necessarily defective itself and hence conveniently called "humour." This differentiation, accepted by nearly all authorities on the subject, is vigorously denied by MÜLLER (JMV xvii p. 76 sqq.), who wants to see the basic meaning also applied to medical texts.

I 1. 7

Sanskrit Text

*vikṛtāvīkṛtā dehaṁ ghnanti te vartayanti ca |
te vyāpino 'pi hrñnābhyor adhomadhyaordhvasaṁśrayāḥ ||*

(According as they are) changed (or) unchanged (in their state), they (respectively) destroy and sustain the body. Though spreading everywhere, they (are) seated (respectively) below, between, and above breast and navel.

Tibetan Version

*de ni rnam gyur¹ ((6)) ma gyur-pas |
[[4]] lus ni 'joms dañ gnas-pa yin |
des khyab gyur kyañ sñiñ-ga dañ |
[7] lte-bai og bar steñ-na gnas ||*

¹ CD; 'gyur NP.

According as they are changed (or) unchanged (in their state), they (respectively) destroy and sustain the body. Though spread everywhere, they are seated (respectively) below, between, (and) above breast and navel.

Remarks

vikṛta “changed” has been metaphrased by *rnam gyur* (v. l. *rnam ’gyur*; cf. Mvy. 2574 & 7315), with *rnam* standing pleonastically for *vi*°, while *avikṛta* “unchanged” has been translated simply by *ma gyur-pa*. The collocation *vikṛtāvikṛtāḥ* may be considered to be either a copulative adjective compound (see the similar combinations *hitākṛta* 5.2 and *varāvāra* 5.20) or a case of effaced hiatus (~ *vikṛtā avikṛtāḥ*; cf. WHITNEY, Skr. Gr. § 177b).

te has been transferred to the beginning of the sentence on grounds of syntax. *vartayanti* “let live, sustain” has been rendered by *gnas-pa yin*, which literally means “stay,” but here seems to signify “stay up, sustain,” in the same way that the corresponding noun *gnas* “place” often represents the Buddhist term *niśraya* “support” (cf. EDGERTON, Dict. p. 306 sq.). Such a transitive use of *gnas-pa* is not, however, recorded in the existent dictionaries.

vyāpin “spreading everywhere” has been turned *khyab gyur* “spread everywhere.”

hrd and its equivalent *sñin-ga* should be understood here as “breast” rather than “heart,” this contrasting better with the following *nābhi* “navel.”

I 1. 8

Sanskrit Text

vayohorātribhuktānām te ’ntamadhyādigāḥ kramāt |
tair bhaved viśamas tikṣṇo mandaś cāgniḥ samaiḥ samaiḥ ||

During life, day and night, and meals they (are) apparent towards the end, middle, and beginning successively. Through them, the (digestive) fire may become irregular, violent, and sluggish (respectively and, if they are) balanced, regular.

Tibetan Version

na-thsod ñin-ḥag zas zos-la |
de ni mtha dbus sogs¹ (7) rtogs rim |
des ni ’ju-ba mi [[5]] sñoms rno |
chuñ² dan mñam-pas ((7)) mñam-par ’gyur ||

¹ NP; *stsogs* CD.

² CD; *chu* NP.

During (any) period of life, day, (and) intake (of) food they are noticed towards the end, middle, (and) beginning (successively). Through them, digestion becomes irregular, violent, (and) sluggish respectively and, if they are balanced, regular.

Remarks

vayas Aruṇadatta and Indu explain as “man’s life” (*manuṣyāyus*, *puruṣāyus*), while Candranandana takes it to mean any “stage of the body produced by time such as youth” (*kālakṛtā śarīrasyāvasthā yauvanādīḥ*; cf. Hemādri’s gloss *śarīra-*

pariñāmaḥ). The Tibetans have adopted this second interpretation, reproducing *vayas* with *na-thsod* "period of life." Vāgbhaṭa distinguishes three such periods of life: youth, till 16; manhood, till 70; and senility, above 70 (Ah. II 3.105).

ahorātri "day and night" is used here in the technical sense of a span of 24 hours (like the Greek *νυχθήμερον*). Hence its translation by the tautologic *ñin-ṣag* instead of the customary *ñin-mthsan*.

bhukta, a perfect past participle turned action-noun, has been metaphrased by *zos*, to which a cognate accusative has been added by way of specification.—The genitive, separated from its governing noun by the subject and represented in Tibetan by a dative of sphere, is best considered to be one of general concernment (cf. WHITNEY, *Skr. Gr.* § 300b).

ga "coming, appearing" has been rendered more freely by *rtogs* "are noticed."

rim, the pendant of *kramāt* "successively," poses a syntactical problem. Following *rtogs*, it cannot well be connected with the previous sentence, though that is what the Sanskrit would suggest. The easiest way out of this dilemma seems to be that of referring *rim* to the next sentence and understanding it in the sense of "respectively."

taiḥ is used here elliptically for *tair viśamaiḥ* "through them (if they are) unbalanced," as appears from the analogous *samaiḥ* in *pāda* d.

bhavet "may become" has been shifted to the end of the stanza and translated by 'gyur "becomes," such nuances of speech as the optative of softened statement being unknown in Tibetan.

For *chuñ* NP write *chu* which, in view of the following *dañ*, seems to be nothing but a haplography passed from N into P (cf. *Introd.* p. 33 n. 1).

agni "(digestive) fire" has been placed after *taiḥ* and altered to 'ju-ba "digestion."

11.9

Sanskrit Text

koṣṭhaḥ krūro mrdur madhyo madhyaḥ syāt taiḥ samair api |
śukrārtavasthair¹ janmādaḥ viṣeṣeṇa viśakrimeḥ ||

¹ B; śuklā° K.

The belly may be hard, soft, (and) normal (respectively, that is), normal only when they are balanced. (As they are) seated in sperm and menstrual blood, (there are produced) by them [*taiḥ* 10a.] in the beginning of birth, just as by poison (in the case) of a poisonous insect,

Tibetan Version

de ni lto-ba sra sñi ran |
mñam-pas kyañ ni bar-mar 'gyur |
[16a1] *skye-bai dañ-por¹ khu khrag gnas |*
duḡ-can srin-bui duḡ dañ mthsuñs ||

¹ CD; *dbañ-po* NP.

(Through) them, the belly becomes hard, soft, (and) normal (respectively, that is), normal only when they are balanced. As they are seated (in) sperm (and) menstrual blood in the beginning of birth, (there are produced by) them [*de ni* 10a.], just as (by) poison (in the case) of a poisonous insect,

Remarks

syāt “may be” and *tailh* “through them” have been transferred to their appropriate places at the end and the head of the sentence and altered to *’gyur* “becomes” and *de ni* “as to them” respectively, while the second *madhyaḥ* has been interchanged with *samair api*.

janmādan “in the beginning of birth,” glossed by the scholiasts as *garbhādhānakāle* “at the time of conception,” has been referred not to what follows but to what precedes and, consequently, has been put before *śukrārtavasthaiḥ*. Instead of *dan-por*, the usual equivalent of *ādi*, NP read *dban-po*, which is likely to be corrupt.

khag must be understood here, like the original *ārtava*, in the specific sense of “menstrual blood.” Impregnation, according to Indian physicians, is brought about by the union of sperm and menstrual blood, which are considered the male and female generative fluids.

viśakrimeḥ and its corresponding *dug-can srin-bui* ought to be connected, not with *viṣeṇa* and *dug* as is done by HILGENBERG & KIRFEL contrary to all commentaries, but with a hypothetical *prakṛtiḥ* (*ran-bzin*) to be inferred from the following *prakṛtayaḥ* (*ran-bzin*). In other words, the present genitive is again one of general concernment rather than of possession. It must be admitted that the Tibetan, taken by itself, points at first sight in a different direction, especially as *viśakrimeḥ* has been placed before *viṣeṇeva*; but then it should be borne in mind that elliptical clauses like this confront a Lamaist translator with serious difficulties and that, under such circumstances, keeping to the original as closely as possible is about the best solution to the problem.

I 1. 10

Sanskrit Text

tais ca tisraḥ prakṛtayo hīnamadhyottamāḥ prthak |
samadhātuḥ samastāsu śreṣṭhā nindyā dvidoṣajāḥ ||

the three constitutions, each (being) weak, average, and strong. That in which the elements are balanced (is) the best of all; to be regarded as inferior (are) those originating (only) in two humours.

Tibetan Version

de ni ran¹[[6]]-bzin rnam-gsum-ste |
(45a1) chuñ²brin chen-po so-sor blta² |
ma-lus-pa-la khams mñam-pa |
((45a1)) mchog yin ñes³-pa gñis³byuri smad ||

¹ CDN; *rin* P.

² NP; *lta* CD.

³ CD; *mñes* NP.

the three different constitutions, each to be viewed as weak, average, (and) strong. That which is balanced as to its elements is the best of all; those originating (only) in two humours are regarded as inferior.

Remarks

tailh “by them” has again been altered to *de ni* “as to them,” in the same way that the preceding *viṣeṇa* “by poison” has been modified to *dug* “as to poison.” This is indicative of a slightly different sentence-construction (not expressed in our English rendering), the verb to be supplied being something like *sampadyante*

“are produced” in Sanskrit (thus the commentators) but *yin* “are existent” in Tibetan; for if we understand the translation correctly, then *ste* in pāda a serves as a continuative while (b) *lta* in pāda b, together with *so-sor*, forms the equivalent of *prthak*.

tisraḥ has been interchanged with *prakṛtayaḥ* and qualified by the addition of *rnam* “different.”

rin-bzin (for *ran-bzin* “constitution”) in P is a mistake evidently caused by the preceding *ni*.—The three constitutions are the so-called wind, choler, and phlegm types of man, on which see Ah. II 3.84 *sqq.*

samastāsu has been represented by a dative of sphere and transferred to the head of the sentence, for the obvious reason that it belongs to *śreṣṭhā* as well as to *nindyāḥ*.

samadhātu “whose elements are balanced” has been reproduced by *kham* *mām-pa* “balanced as to its elements.” (*dhātu* is used here as a synonym of *doṣa*.) Placing the final member of a bahuvrīhi before the initial member and treating it as a modal accusative is one of the commonest ways of turning such compounds into Tibetan.

nindya “to be blamed, regarded as inferior” has been put at the end of the stanza and rendered simply by *smad-pa* “to blame, regard as inferior,” the gerundive having been neglected without any palpable effect on the context.

For *ñes-pa* NP read *mñes-pa*, which is unattested in the meaning of *doṣa*.

Sanskrit Text

tatra rūkṣo laghuḥ śītaḥ kharaḥ sūkṣmaś calo 'nilaḥ |
pittaṃ sasnehatikṣṇoṣṇaṃ laghu visraṇ saraṇ dravam ||

Among the (humours), the wind (is) rough, light, cold, pungent, subtle, (and) volatile; the choler—slightly unctuous, violent, hot, light, musty, liquid, (and) flowing;

Tibetan Version

de[2]-la rluñ ni rtsub-ciñ yañ |
grañ-ziñ sra-la phra¹-ziñ gyo |
[[7]] mkhris-pa snum-bcas rno-ziñ dro |
yañ-ziñ dri(2)-mmam 'khru-ziñ gśer ||

¹ CD; 'phra NP.

Among the (humours), the wind is rough, light, cold, pungent, subtle, and volatile; the choler—slightly unctuous, violent, hot, light, musty, liquid, and flowing;

Remarks

rūkṣa does not mean “dry” in this and similar contexts, as supposed by JOLLY (Medicin p. 40) *et al.*; rather, it is synonymous with *paruṣa* “rough,” as may be seen from its Tibetan pendant *rtsub(-pa)*. On the physical properties of the humours (according to Caraka, Suśruta, and Vāgbhaṭa) see VOGEL, PO xxiv pp. 31 & 35.

khara and *sra(-ba)*, both of which literally mean “hard,” are here used in the pregnant sense of “hard on the tongue, pungent,” since the wind is taught by Suśr. I 20.28 to be soft.

phra occurs in NP as *'phra*, a rare secondary spelling also recorded in the dictionaries.

anila has been placed after *tatra* for syntactical reasons.

visra "musty" has been paraphrased by *dri-mnam* "reeking of dirt."

drava "flowing" has been rendered by *gser(-ba)* which, as an equivalent of *drava*, has been noted already by Das (Diet. p. 1251), but only in the nominal sense of "water, liquid" (cf. Ah. I 5.82 & 28.37). However, the corresponding adjective meaning is established for the Ah. beyond doubt by such occurrences as I 9.6, 12.11, 16.25, 17.18 & 19.

Sanskrit Text

snigdhaḥ śīto gurur mandāḥ ślakṣṇo mṛtsnaḥ sthiraḥ kaphaḥ |
samsargaḥ saṁnipātaś ca taddvitrīkṣayakopataḥ ||

the phlegm—unctuous, cold, heavy, sluggish, soft, slimy, (and) solid. Combination and junction (result) from the diminution or ebullition of two and three of the (humours respectively).

Tibetan Version

bad-kan snum bsil lci-ba dan |
rtul-ñiñ 'jam brtan 'byar-bag-can |
((2)) de gñis gsum zad¹ [3] 'khrugs-pa-las |
ldan-pa [[8]] dan ni 'dus-pa yin ||

¹ N adds *la*.

the phlegm—unctuous, cold, heavy, sluggish, soft, solid, (and) a trifle sticky. From the diminution (or) ebullition (of) two (and) three (of) the (humours respectively) result combination and conjunction.

Remarks

ślakṣṇa and *mṛtsna* are hardly separable from each other without difficulty. In PO xxiv p. 35, we had understood them to mean "slimy" (~ *picchila*) and "soft" (~ *mṛdu*), tacitly equating *ślakṣṇa* with *'byar-bag-can* "a trifle sticky" and *mṛtsna* with *'jam* "soft" (which, in itself, is quite possible). On second thought, however, it seems more likely that *ślakṣṇa* corresponds to *'jam* and *mṛtsna* to *'byar-bag-can*, particularly since Arunadatta and Candranandana (whose commentaries we had not at our disposal when writing the above article) explain *ślakṣṇa* with *aparusa* "not rough" and *mṛtsna* with *mṛḍyamāno 'ṅguligrāhi picchilaguṇayuktaś cakacakāyamānaḥ* [v. l. *kacakacāyamānaḥ*] "sticking to the fingers when squeezed, endowed with a slimy quality, glimmering¹."

In other regards, *kapha* has been transferred to the beginning of the stanza and *pāda c* interchanged with *pāda d* on grounds of syntax. After *zad* N adds a super-numerary *la* probably miscarved for the following ' in *'khrugs*.

¹ Doubtless to be derived from *cak* [*kac*] "to shine."

I 1. 13

Sanskrit Text

rasāśṛṅmāṃsamedosthimajjāśukrāṇi¹ dhātavaḥ |
sapta dūṣyāḥ malā mūtraśakṛtsvedādayo 'pi ca ||

¹ B; °*majjāsuklāni* K.

Chyle, blood, flesh, fat, bones, marrow, and sperm (are) the seven elements; (they are) liable to be spoilt (by the humours). The secretions (are) urine, feces, sweat, etc.; and (they are liable to be spoilt by them) too.

Tibetan Version

lus-zuñs dañs-ma khrag dan̄ śa |
thsil dan̄ rus rkañ khu-chu-ste |
 (3) *gnod bya bdun yin dri-ma gcin |*
bśaṅ-ba rñul-la sogs¹-pa yin ||

¹ NP; *stsogs* CD.

The elements are chyle, blood, flesh, fat, bones, marrow, (and) sperm; they are liable to be spoilt (by the humours and are) seven (in number). The secretions are urine, feces, sweat, etc.

Remarks

dañs-ma, as the pendant of *rasa* "chyle" is spelt throughout the Ah., is not in this form given by the lexicographers; they write *dvañs-ma* instead.

khu-chu, the equivalent of *śukra* "sperm," is a tautology literally to be turned "sperm & semen."

dhātu "element" has been transferred to the head of the stanza and etymologized as *lus-zuñs* "body-hold." Though in keeping with the definition offered by the scholiasts (*śarīradhāraṇād dhātavaḥ*), this etymology does not conform to Nir. I 20 where *dhātu* is explained more correctly as a derivative of *dhā* "to put" (*dhātur dadhāteḥ*). The usual Tibetan correspondent is *kham*s.

sapta is treated by the commentators as an attribute of *dhātavaḥ*, while *dūṣyāḥ* is taken for a short sentence of its own (the neglected sandhi indicating a period after *dūṣyāḥ*). The Tibetans do not follow their example; they rather make both *sapta* and *dūṣya* specifications of *dhātu*, connecting them to what precedes in reverse order by means of *ste* (the annunciatory continuative called *dam-bca* by native grammarians; see BACOT on Thon-mi I 13).

mala and *dri-ma* properly signify "dirt, impurity." As in the case of *doṣa* and *ñes-pa*, however, their original meaning has become somewhat obliterated in medical usage. Both terms now denote the waste products or "secretions" of the elements, which are respectively phlegm, choler, dirt in the apertures, sweat, nails & hair, fat of eyes, skin & feces, and vital essence (Ah. II 3.63 sq.; cf. JOLLY, *Medicin* p. 43).

The words *api ca*, which according to the scholiasts stand elliptically for *te 'pi ca dūṣyāḥ* (Indu's paraphrase), have been omitted by the Tibetans, apparently for lack of space. They have not been translated by HILGENBERG & KIRFEL either.

I 1. 14

Sanskrit Text

vṛddhiḥ samānāḥ sarveṣāṃ viparitair viparyayaḥ |
rasāḥ svādvamlalavaṇatiktoṣaṇakaṣāyakāḥ ||

(There will be) an increase of all (humours, elements, and secretions) through homogeneous (substances); through opposite ones, the opposite. The six [ṣaḍ 15a] flavours (are) sweet, sour, salt, bitter, pungent, and astringent;

Tibetan Version

thams-cad mñam-pas 'phel 'gyur-ñin /
 [4] [[16a1]] *de-las ((3)) bzlog-pas gnod-par 'gyur /*
ro ni mñar skyur lan-thsva dan /
thsā dan kha dan bska-ba-ste //

All (humours, elements, and secretions) will be increased by homogeneous (substances) and spoilt by those different from them. The flavours are sweet, sour, salt, bitter, pungent, and astringent;

Remarks

In the first sentence, the nominal diction has been abandoned and the wording modified. In the second, the terms *tikta* “bitter” and *ūṣaṇa* [rare for *uṣṇa* ~ *kaṣu*-(*ka*)] “pungent” have been translated by *thsā*(-*ba*) and *kha*(-*ba*) respectively, which is just the opposite of what should be expected on the strength of the dictionaries (including Mvy. 1901 *sq.*). Glancing over the first book of the Ah.¹, however, we have found 4 other cases (1.15, 3.4, 5.24, 5.50) in which *thsā*(-*ba*) corresponds to *tikta* and no less than 10 other cases (3.4, 5.24, 6.79, 6.108, 9.21, 9.29, 12.52, 18.21, 18.35, 19.59) in which *kha*(-*ba*) corresponds to *kaṣu*(*ka*). Under these circumstances, we dare not assume a change of word-order in the present stanza.

¹ With the aid of a handwritten Tibetan-Sanskrit glossary kindly placed at our disposal by Dr. LOKESH CHANDRA, New Delhi. This glossary proves invaluable on many occasions for tracing parallel passages.

I 1. 15

Sanskrit Text

ṣaḍ dravyam āśritās te tu¹ yathāpūrvam balāvahāḥ /
tatrādyā mārutaṃ ghnanti trayas tiktādayaḥ kapham //

¹ B; ca K.

inherent in a substance, they (are) generative of strength in (descending) order; the first three of them destroy the wind, the bitter and following ones—the phlegm,

Tibetan Version

rdzas drug-la gnas (4) de-rnams¹ kyañ /
go-rim² bzin-du stobs chen yin /
de-la³ [[2]] dan-poi gsum-po ni /
rluñ 'joms thsa sogs⁴ [5] bad-kan sel //

¹ NP; *dag* CD. ² NP; *rims* CD. ³ NP; *las* CD. ⁴ NP; *thsva stsogs* CD.

inherent in six substances, they are also great in strength in (descending) order; the first three of them destroy the wind, the bitter and following ones remove the phlegm,

Remarks

ṣaḍ has been regarded by the scholiasts as an attribute of *rasa* (14c), in obvious analogy to *sapta* and *dhātu* (13bc), though an enjambment like this is none too frequent in Sanskrit. In Tibetan, it has been connected with *dravya*, which shows that the translators read *ṣaḍdravyam* (in one word) rather than *ṣaḍ dravyam* (in two words), taking the phrase for a dvigu.

For *de-rnams* CD have substituted the commoner *de-dag*; for *go-rim*, the alternative *go-rims*. The enclitic *kyan* would fit the text of K (*ca*) better than that of B (*tu*).

balāvaḥa “generative of strength” has been rendered by *stobs chen* “great in strength,” which corresponds to *mahābala* in Sanskrit (see Mvy. 3343). Here again it would be quite possible to assume a variant reading in the translators’ copy.

For *de-la* CD give *de-las*, which occurs only at times in the sense of *tatra*.

ghnanti has been left in its original position after the first object (*mārutam*), a new verb (*sel*) having been added to each of the other two objects (*kapham* 15d and *pittam* 16b).

trayaḥ has been transferred to its appropriate place after *ādyāḥ*, while *tikta* has again been represented by *thsa* (spelt *thsva* in CD).

I 1. 16

kaṣāyatiktamadhurāḥ pittam anye tu kurvate |
śamanam kopanam svastahitam dravyam iti tridhā ||

the astringent, bitter, and sweet ones—the choler, the other ones produce (them). Sedative, irritative, (and) good for normal (humours, elements, and secretions): thus a substance (is) threefold (in its effect);

Tibetan Version

bska dan kha dan ((4)) mñar-ba ni |
mkhris sel gzan-dag byed¹-pa yin |
de-ltar rdzas ni rnam-pa gsum |
zi (5) ’khrugs tha-mal gnas-la [[3]] phan //

¹ NP; *skyed* CD.

the astringent, bitter, and sweet ones remove the choler, the other ones produce (them). Thus a substance (is) threefold (in its effect): sedative, irritative, (and) good for (humours, elements, and secretions) that are in a normal state;

Remarks

tikta “bitter” has here been represented by its usual equivalent *kha(-ba)*. Contrast vv. 14 & 15.

The words *anye tu kurvate* and *gzan-dag byed-pa yin* “the other ones produce (them)” must be interpreted to mean, as the commentators put it, that the bitter, pungent, and astringent flavours produce wind, the sweet, sour, and salt ones—phlegm, and the sour, salt, and pungent ones—choler. In CD *byed-pa* has been replaced with the synonymous *skyed-pa*.

svastha "normal" has been paraphrased by *tha-mal gnas*, which is best turned "being in a normal state." Strictly speaking, *tha-mal(-pa)* alone would have done in Tibetan; for *gnas* (~*stha*) has been added merely in an effort to make the translation more literal.

The clause *dravyam iti tridhā* has been shifted to the beginning of the sentence, while the particle *iti* has nevertheless been rendered by *de-ltar*, which refers as a rule not to what follows but to what precedes. It is doubtful, though, if the Tibetans really had any such relation in their mind.

I 1. 17

Sanskrit Text

uṣṇāṣītaguṇotkarṣāt tatra vīryam dvidhā smṛtam |
tridhā vipāko dravyasya svādvamlakāṭukātmakāḥ ||

according to the prevalence of the qualities hot or cold, the power in it (is) taught (to be) twofold, (namely heating or cooling); threefold (is) the digestion of a substance, (namely) of a sweet, sour, or pungent nature;

Tibetan Version

de-la tsa bsil phul-byun-bas |
nus-pa rnam-pa gñis-su bsad |
[6] *rdzas-kyi zu¹-ba rnam-gsum-ste |*
mñar skyur tsa-bai bdag-ñid-can ||

¹ NP; *ni khu* CD.

according as (the qualities) hot (or) cold are prevalent in it, (its) power is said to be twofold, (namely heating or cooling); the digestion of a substance is threefold, namely of a sweet, sour, (or) pungent nature;

Remarks

uṣṇāṣītaguṇotkarṣāt "according to the prevalence of the qualities hot or cold" has been denominalized into *tsa bsil phul-byun-bas* "according as (the qualities) hot (or) cold are prevalent," with *guṇa* "quality" having been omitted.

tatra "in it," which belongs to *uṣṇāṣītaguṇotkarṣāt* as well as to *vīryam*, has been connected only with the former, the construction *ἄπο νομοῦ* being impracticable in Tibetan.

The words *tridhā vipāko dravyasya* have been inverted for syntactical reasons. Instead of *rdzas-kyi zu-ba* CD read *rdzas ni khu-ba*, which appears to be corrupt.

I 1. 18

Sanskrit Text

gurumandahimasnigdhaślakṣṇasāndramṛdusthirāḥ |
guṇāḥ sasūkṣmaviśadā vimśatiḥ saviparyayāḥ ||

heavy, sluggish, cold, unctuous, soft, viscid, pliant, and solid as well as subtle and dry (are) the qualities (of a substance: they are) twenty together with their opposites.

Tibetan Version

((5)) *yon-tan lci rtul bsil dan snum /*
^o*jam dan bska*[[4]]-*ba mñen* (6) *dan brtan /*
*phra dan bcas-ñiñ skam*¹-*bag-can /*
de bzlog-pa dan ñi-su yin //

¹ NP; *bska* CD.

the qualities (of a substance are) heavy, sluggish, cold, unctuous, soft, viscid, pliant, slightly subtle, and a trifle dry: these, together with their opposites, are twenty.

Remarks

Except for the inevitable transposition of *guṇa* and *viṃśati*, the Tibetan version is a faithful reproduction of the original Sanskrit—so faithful, in fact, that the merely connective office of *sa*^o in *sasūkṣmaviśada* seems to have escaped the translators' attention; for *phra dan bcas-ñiñ skam-bag-can* cannot well be interpreted otherwise than indicated.

The opposite qualities not mentioned here are specified by Aruṇadatta and Candranandana as *laghutīkṣṇoṣṇarūḥṣakharadravakaṭhīnasarasthūlapicchilāḥ* "light, violent, hot, rough, harsh, mobile, hard, liquid, coarse, and slimy." The confrontation of *viśada* and *picchila* is noteworthy in that it presupposes a meaning "dry" or the like not attested for *viśada* but corroborated by the Tibetan *skam* (which CD have malcorrected into *bska* "astringent"). For *viśada* ~ *skam*, also see I 9.7.

I 1. 19

Sanskrit Text

*kālārthakarmaṇām yogā*¹ *hīnamithyātīmātrakāḥ*¹ /
samyagyogaś ca vijñeyo rogārogyaīkakāraṇam //

¹ B; *yogo* and ^o*kaḥ* K.

The weak, wrong, and excessive connections (of a humour) with season, object, and action and (its) proper connection (with these are) to be known as the sole cause(s) of illness and health (respectively).

Tibetan Version

dus don las-kyi sbyor[7]-*ba-rnams /*
*dman dan log*¹-*pa lhag-pa dan /*
*yañ-dag*² *sbyor-bas nad dan ni /*
nad-med [[5]] *rgyu* ((6)) *gcig yin źes bya //*

¹ NP; *par* CD.

² C adds *par*.

According as the connections (of a humour) with season, object, (and) action are connected weakly, wrongly, excessively, and properly, they are said to be the sole causes of illness and health.

Remarks

It must be observed at the outset that the present śloka is not readily understandable by itself, neither in Sanskrit nor in Tibetan. Judging from Aruṇadatta's

and Candranandana's comments as well as from a more detailed account in I 12.34 *sqq.* (which see for further information), the attributes *hīna*, *mīthyā*, *atimātra*, and *samyagñc* are meant to qualify *kāla*, *artha*, and *karman* rather than *yoga*. Such a phenomenon is known to classical scholars as a *metathesis qualitatum*.

hīnamīthyātīmātraka and *samyagyoga*, which are respectively subordinate and co-ordinate to *yoga* (the singular in K is not confirmed by the Tibetan), have been combined with it into a gerundial clause, with the pertinent changes limited to a minimum degree.

For *log-pa* CD have substituted *log-par*, which seems to be influenced by the adverbial *mīthyā* but does not harmonize with the sentence-construction.

After *yañ-dag* C has added a supernumerary though grammatically correct *-par*.

viññeya "to be known" has been transferred to the end of the stanza and rendered by *ñes bya*, a phrase usually corresponding to *nāma*, *nāmocyate*, or the like. Its being used as a verb of declaration, with a supine (*yin*) depending on it, is very strange. Since *viññeya* would ordinarily be *ñes bya* in Tibetan, the present *ñes bya* bears every mark of an old corruption.

de-rnams lus sems dbye-ba-yis /
[[6]] gnas kyañ rnam-pa gñis yin-no //

¹ NP; *sñoms* CD.

² CD; *yin* NP.

³ CDN; *blo* P.

Illness is disharmony (of) the humours; harmony (of) the humours (is) health. Of these (two conditions), the diseases are said to be two(fold) because of (their) division into endogenous (and) accidental ones; on account of the distinction between body (and) mind, they are twofold

with regard to (their) seat too [on account of their classification into (such of the) body (and such of the) mind, (their) seat too is twofold].

Remarks

The chiasitic word-order in the first and second pādas has been retained by the translators.

śhom-pa has been altered to *śhoms-pa* in CD, evidently for uniformity's sake.

nad-med-ñid, as given in CD, is the precise correspondent of *arogatā* "state of non-illness, health." The reading *nad-med yin* in NP is a redactional change obviously prompted by stylistic considerations.

tatra, which Aruṇadatta and Candranandana refer to the preceding *roga* and *arogatā*, has been placed at the head of the sentence.

glo-bur is written *blo-bur* in P, both spellings being equally current.

dvidhā "twofold" has been rendered simply by *gñis* "two" (instead of the usual *rnam-[pa] gñis*), a brachylogy doubtless caused by lack of space.

For *smṛtāḥ* "taught" K prints *matāḥ* "held." The Tibetan *bsad* "are said" does not clearly show which reading the translators had before them.

The last sentence admits of two slightly different interpretations, depending on whether *teṣāṇi* is referred to *kāyamanobhedād* or *adhiṣṭhānam*. The Tibetan is of no avail here, being ambiguous itself.

I 1. 21

Sanskrit Text

rajas tamaś ca manaso dvau ca doṣāv udāhṛtau |
darśanasparśanapraśnaiḥ parikṣetātha¹ rogiṇam ||

¹ B; *parikṣeta ca K.*

Passion and delusion (are) taught (to be) the two mental disorders. By inspection, palpation, and interrogation (the physician) shall examine a patient;

Tibetan Version

'dod-chags gñi((7))-mug kyañ yid-kyi |
ñes-pa gñis-su bstan-pa yin |
(45 b1) nad-pa blta dañ reg-pa dañ |
dri-ba¹-yis ni yoñs-su brtag² ||

¹ NP; *driś-pa* CD.

² CD; *rtag* NP.

Passion and delusion are taught to be the two mental disorders . . .

Remarks

The sentence starting with *nad-pa* in 21 c and reaching up to *'thob-pa yin* in 22 b, though reproducing the original word for word, differs sharply from it in structure, and besides is obviously corrupt. As it stands in the block-prints, the Tibetan can only be rendered—

"with regard to a patient, there are: examination by inspection, palpation, and interrogation, portent of the cause of disease, symptom, reaction, (and) course" which does not make any sense. One should rather expect it to read —

“with regard to a patient, there is an examination by inspection, palpation, and interrogation; with regard to a disease, there are cause, portent, symptom, reaction, (and) course”

with *pāda* 22a changed into *nad ni gzi-ma dan-poi thsul*. But this is still somewhat unsatisfactory. Perhaps one should also change (*b*)*rtag* into *rtog* and translate as follows—

“a patient is examined by inspection, palpation, and interrogation; a disease is (diagnosed by) cause, portent, symptom, reaction, (and) course”

with the predicate left in its mid-sentence position and taken up at the end by an auxiliary (see *Introd.* § 27), which would come closest to the basic text.

The variant *dris-pa* found in CD is merely a substitute spelling of *dri-ba*.

The particle *atha*, replaced by *ca* in K, has been omitted in Tibetan; it seems to be expletive anyhow.

I 1. 22

Sanskrit Text

rogaṃ nidānaprāgrūpalakṣaṇopasaṃyāptibhiḥ |
bhūmidehaprabhedena deśam āhur iha dvidhā ||

a disease (he shall diagnose) by cause, portent, symptom, reaction (to certain articles of food or medicine), and course. On account of the distinction between land and body, (scholars) say the (meaning of) region (is) twofold here, (namely tract of land and part of body).

Tibetan Version

nad-kyi gzi-yi dan[[7]]-poi thsul |
[2] mthsan-ñid ñer¹ bsten 'thob-pa yin |
sa dan lus-kyi bye-brag-gis |
'di-la yul-sa rnam-gñis bsad ||

¹ CDP; ñe-bar N.

... On account of the distinction between land and body, the (meaning of) region is said to be twofold, (namely tract of land and part of body).

Remarks

ñer has been resolved by N into ñe-bar, which does not agree with the metre.

deśa “region” has been translated by *yul-sa*, a tautological compound properly meaning “place & region.”

āhuḥ “(scholars) say” has been shifted to the end of the sentence and rendered by the impersonal *bsad* “are said” as a matter of course.

iha “here” refers to the science of medicine; it has been put right after °*prabhedena*.

¹ CDP; *skams* N.

² NP; *skyed* CD.

Jungle chiefly produces wind, swamp increases phlegm, (and) ordinary land is indifferent to the humours: (thus) a tract of land is said to be three(fold).

Remarks

The first half of the sentence has been paraphrased rather than metaphrased. But if the meaning has been grasped correctly remains doubtful. From the explanation given by the commentators it would seem that the terms *jāṅgala*, *anūpa*, and *sādhāraṇa* stand metonymically for the plants, birds, human beings, wild animals etc. indigenous to these regions (*jātauśadhikagapurusaṃrṃgādayaḥ* Aruṇadatta & Candranandana).

skams-sa in N is obviously a miswriting.

bskyed is, strictly speaking, the perfect of *skyed-pa* "to produce." In NP, however, it is used also for the present (as often elsewhere). CD have *skyed* in virtually all the cases.

mala serves here, according to the scholiasts, as a substitute for *doṣa*; hence its translation by *ñes-pa*.

tridhā "threefold" has been interchanged with *bhūdeśa* and reproduced simply by *gsum* "three" (see v. 20). So we should perhaps understand the final clause as follows: "(thus) the tracts of land are said to be three (in number)."

I 1. 24

Sanskrit Text

kṣaṇādir vyādhyavasthā ca kālo bheṣajayogakṛt /
śodhanam śamanam ceti samāsād auśadham dvidhā //

Moment etc. and state of disease (make up) the right time determining the (suitableness of the) administration of a remedy. Purgative and sedative: thus, in short, a medicine (is) twofold.

Tibetan Version

skad-cig-la sogs nad-kyi skabs /
dus-su sman ni sbyor-bar byed /
mdor-na sman ni rnam-gñis-te /
sbyañ-ba dañ ni ((2)) *zi-bao* //

Moment etc. (and) state of disease let (the physician) administer a remedy at the right time. A medicine, in short, is twofold: purgative and sedative.

Remarks

The terms *kṣaṇādi* "moment etc." and *vyādhyavasthā* "state of disease" represent the idea of time in its astronomical and medical aspects. According to Aruṇadatta and Candranandana, the units of time not specified here comprise *lava*, *truṭi*, *muhūrta* ("hour"), *yāma* ("night-watch"), *ahorātra* (day & night), *pakṣa* (half-month), *māsa* (month), *ṛtu* (season), *ayana* (half-year), and *saṃvatsara* (year)¹, while the states of disease are characterized as *sāma* (immature), *nirāma* (mature), *mṛdu* (mild), *madhya* (moderate), and *tikṣṇa* (severe).

The nominative *kālo* has been reproduced in Tibetan by the terminative *dus-su*, which makes it almost certain that the basic reading was *kāle*; hence the difference in interpretation. It is equally certain, however, that this reading is corrupt inasmuch as a dual predicate (*bheṣajayogakṛtau*) would then be required, which is incompatible with the metre.

The third and fourth pādas have been transposed, with the annunciatory *te* taking the place of *iti*.

¹ Indian writers differ considerably on the division of time, especially as regards the smaller units up to a *muhūrta* (~ 48 minutes). Cf. COLEBROOKE, *Essays* I p. 540 *sqq.* This applies also to medical authors. Hemādri, for example, while commenting on the present stanza, takes *kṣaṇa* to mean *akṣinimeṣa* (twinkling of an eye) and *ādi* to stand for *kāṣṭhākalā* < *bhāga* > *nāḍikāmuhūrtayāmāhorātrapakṣamāsaṛtvayana-varṣāṇi*, equating—

15	akṣinimeṣa	to	1	kāṣṭhā
30	kāṣṭhā	to	1	kalā
17	kalā	to	1	bhāga
20	bhāga	to	1	nāḍikā
2	nāḍikā	to	1	muhūrta
3 ³ / ₄	muhūrta	to	1	yāma
8	yāma	to	1	ahorātra
15	ahorātra	to	1	pakṣa
2	pakṣa	to	1	māsa
2	māsa	to	1	ṛtu
3	ṛtu	to	1	ayana
2	ayana	to	1	varṣa

Suśruta, on the other hand, who is the only physician of the classical triad to deal with the problem extensively (I 6.4 *sqq.*), assigns—

15	akṣinimeṣa	to	1	kāṣṭhā
30	kāṣṭhā	to	1	kalā
20 ¹ / ₁₀	kalā	to	1	muhūrta
30	muhūrta	to	1	ahorātra
15	ahorātra	to	1	pakṣa
2	pakṣa	to	1	māsa
2	māsa	to	1	ṛtu
3	ṛtu	to	1	ayana
2	ayana	to	1	saṃvatsara
5	saṃvatsara	to	1	yuga

The terms *lava* and *truṭi* recorded by Aruṇadatta and Candranandana occur in neither system.

Sanskrit Text

śarīrajānām doṣāṇām krameṇa param auśadham |
bastir vireko vamanam tathā tailam ghrtaṁ madhu ||

The best medicine for somatogenic diseases—according to the (above) order (of humours)—(is) a clyster, cathartic, (and) vomitive; in the same way, sesame-oil, ghee, (and) honey.

Tibetan Version

[[16b1]] *lus-las byuñ-bai nad-rnams-kyi |*
rim-gyis sman-gyi (3) dam-pa ni |
mas-btañ¹ bkru-sman slon[4]-sman dan |
de-bzin til-mar mar sbran-rtsi ||

¹ NP; *gtoñ* CD.

The best medicine for somatogenic diseases—according to the (above) order (of humours)—(is) a clyster, cathartic, (and) vomitive; and—in the same way—sesame-oil, ghee, (and) honey.

Remarks

The words *śarīraja doṣa* must here be understood both as “bodily humour” and as “somatogenic disease”: in their primary meaning “bodily humour” they depend on *krameṇa* and refer to the sequence *vāyu—pitta—kapha* in v. 6; in their secondary meaning “somatogenic disease” they belong to *param auśadham* and contrast with *manodoṣa* in v. 26. The Tibetans proceed eclectically, adopting the latter connotation but retaining the former construction.

The terms *basti* “clyster,” *vireka* “cathartic,” and *vamana* “vomitive” have been paraphrased by *mas-btañ* “moving-downward (drug),” *bkru-sman* “washing-off drug,” and *slon-sman* “thrusting-out drug” respectively. Instead of *mas-btañ*, CD read *mas-gtoñ* throughout.

 gso-ba-dag-tu bstan((3))-pa ni /
 sman-pa sman dan nad-gyog dan //
 nad-pa yan-lag rnam-bži-ste /
 (4) re-re'an rnam-pa bži[5]-bži yin /
 sman-pa mkhas stegs² gzuñ don śes /
 las-rnams [[3]] mthoñ-žin³ gtsaṅ-ba yin //

¹ NP; stogs CD.² CD; rtogs NP.³ NP; bžin CD.

Intelligence, firmness, (and) knowledge of one's self etc. are the best medicine for mental disorders. According to what has been taught in therapeutics, physician, medicine, attendant, and patient are the four factors, each individual one being fourfold: the physician is dextrous, one who knows the precepts of (medical) science from a teacher, one who has seen practice [tried in practice], and clean;

Remarks

As pāda 27a has been placed before pāda 26c, both stanzas cannot well be separated from each other.

dravya means "substance" in general and "medicinal substance" in particular. Here it has been used in the latter sense (as appears from the corresponding *auśadha* 28b), and so has been rendered by *sman* "medicine."

cikitsitasya, a genitive attribute belonging to *pādacatuṣṭayam*, has been represented by *gso-ba-dag-tu* and connected with *nirdiṣṭam*. This change of construction, hand in hand with which goes a change of word-order, points to a variant *cikitsiteṣu* in the basic text, the plural of *cikitsita* denoting the therapeutic chapters of medical works (see PW II 1007).

pratyekeṇ caturguṇam "possessed of four qualities each" has been put tautologically: *re-re'an rnam-pa bži-bži yin* "each individual one being fourfold," with *guṇa* "quality" left untranslated.

tīrtha is explained by the commentators as *upādhyāya* or *guru* "teacher." Its proper equivalent is known to be *stegs* (also occurring as *mu-stegs* or *mu-stegs-pa*), for which NP have substituted *rtogs* "knowing, expert."

drṣṭakarmaṇ is susceptible of two equally relevant interpretations: "one by whom practice has been seen" and "one whose practice is tried." Its Tibetan counterpart *las-rnams mthoñ-žin*, too, can be understood either way. The reading *mthoñ-bžin* offered by CD is less satisfactory inasmuch as a present participle would make little sense here.

śuci and *gtsaṅ-ba* are intended to signify cleanliness of body and clothing as well as integrity of character.

bhīṣaj has been transferred to the beginning of the sentence for syntactical reasons.

I 1. 28

Sanskrit Text

bahukalpam bahugunaṃ sampannaṃ yogyam auśadham /
 anuraktaḥ śucir dakṣo buddhimān paricārakaḥ //

susceptible of many modes of application, possessed of many qualities, perfect, (and) suitable—the medicine; loyal, clean, dextrous, (and) endowed with intelligence—the attendant;

Tibetan Version

sman ni cho-ga mañ-po dañ |
yon-tan mañ ldan phun((4))-thsogs 'phrod |
nad-gyog rjes brtse¹ gtsaṅ-spra-can |
sgrin²-zin blo dañ ldan-pa (5) yin ||

¹ CDP; *rtse* N.

² NP; *sgrim* CD.

the medicine—possessed of many modes of application and many qualities, perfect, (and) suitable; the attendant—loyal, possessed of cleanliness, dextrous, and endowed with intelligence;

Remarks

bahukalpa “susceptible of many modes of application” and *bahuguna* “possessed of many qualities” have been combined into a single phrase: *cho-ga mañ-po dañ yon-tan mañ ldan* “possessed of many modes of application and many qualities.”

sampanna (Tib. *phun-thsogs*) “perfect” is interpreted by the commentators to allude either to the origin (*praśastabhūmideśajāta* “grown in a recommended tract of land”) or to the preparation (*pākaśaṃskārādiyukta* “subjected to cooking, dressing etc.”) of the medicine. Aruṇadatta refers in this connection to Ah. V 6.1 *sqg.*:

dhanvasādhāraṇe deśe same sanmr̥tike śucar |
śmaśānacaityāyatanaśvabhṛavalmikavarjite ||
mṛdau pradakṣiṇajāle kuśarohiṣaśaṃstr̥te |
aphālakṛṣṭe 'nākrānte pādapaṅkajabalaṅvattaraiḥ ||
śasyate bheṣajam jātam |

“As medicine is recommended (anything) grown in a desert or moderate region—(a region that is) even, of good soil, clean, devoid of cremation grounds, topes, temples, chasms, and ant-hills, soft, of auspicious water, covered with kusa and geranium grass, untilled by the plough, (and) unassailed by bigger trees.”

auśadha “medicine” and *paricāraka* “attendant” have been placed at the head of their respective clauses.

For *rjes brtse* N has an erroneous *rjes rtse*.

śuci “clean,” on which see v. 27, has been paraphrased by *gtsaṅ-spra-can* “possessed of cleanliness.”

sgrim (for *sgrin*) seems to be a mistake passed from D into C, the letters *n* and *m* being easily confusable in Tibetan.

I 1. 29

Sanskrit Text

ādhyo rogī bhiṣagvaśyo jñāpakāḥ sattvavān api |
sarvaauśadhakṣame dehe yūnaḥ puṃso jītātmanaḥ ||

the patient—wealthy, obedient to his physician, communicative, and endowed with courage. In case the body of a self-controlled young man is tolerant of all medicines,

Tibetan Version

nad[6]-*pa phyug-ciñ bsgo-ba ñan* /
 [[4]] *śes-par nus-siñ sñiñ-stobs ldan* /
smān kun bzod-par nus-pai lus /
skyes-bu gñon-ñiñ bdag-ñid thul //

the patient—wealthy, obedient to instructions, knowledgeable, and endowed with courage. In the case of a body tolerant of all medicines (and) a man (who is) young and self-controlled,

Remarks

ādhyā has been interchanged with *rogin* on the usual grounds of syntax.

bhīṣagrasīya “obedient to his physician” has been modified to *bsgo-ba ñan* “obedient to instructions.”

jñāpaka “causing to know, communicative” has been rendered by *śes-par nus* “able to know, knowledgeable.”

pumś has been co-ordinated with *deha* in an effort to leave the original word-order intact. The locative absolute has been represented by a modal accusative.

I 1. 30

Sanskrit Text

amarmago 'lpahetvagrārūparūpo 'nupadravaḥ /
atulyadūṣyadeśartuprakṛtiḥ pādasaṃpadī //

a disease [*gadaḥ* 31d] not going to the vitals, trifling in its cause, portents, and symptoms, not leading to sequelae, disagreeing as to the (affected) element, region, season, and constitution—with the (above) factors being complete

Tibetan Version

gnad-du ma soñ ((5)) *rgyu sñar-thsul* /
mthsan-ñid chuñ dan gnod-pa med /
gnod-bya yul [[5]] *dus* [7] *rañ-bñin*(6)-*rnams* /
mthsuñs min yan-lag phrun-sum-thsogs //

(a disease) not going to the vitals, trifling in its cause, portents, (and) symptoms, doing no harm, disagreeing as to the (affected) element, region, season, (and) constitution—with the (above) factors being complete

Remarks

The subject of both this and the next sentence is *gada* “disease” in 31d. As the corresponding *nad* stands in 31c, the present sentence is elliptical in Tibetan.

On the “vitals” (*marman*, *gnad*), of which 107 are distinguished in Indian medicine, see Ah. II 4.1 sqq.

The words *alpahetvagrārūparūpa* must be regarded as a single possessive compound whose final member is a copulative compound: “trifling in its cause, portents,

and symptoms.” See the analogous sequence in v. 22. HILGENBERG & KIRFEL have erroneously separated *alpahetu* from *agrārūparūpa*: “die . . . nur kleine Ursache hat, deren Symptome noch im Anfangsstadium stehen.”

The term *upadrava* “sequela” has been rendered loosely by *gnod-pa* “harm.” In I 12.60 & 62 it occurs as *bla-gñan* “danger of life,” in the former instance with v. l. *bla-brnan*.

The phrase *dūṣya* (∼ *gnod-bya*), which properly means “liable to be spoilt,” is here used in the sense of *dhātu* “element”; cf. v. 13.

The plural suffix *rnams* after *rañ-bžin* indicates that the words *gnod-bya yul dus rañ-bžin* have been understood and treated in the manner of a Sanskrit dvandva.

I 1. 31

(and) the planets favourable—, (originating in the affection) of a single humour and path, (and having developed but) recent(ly, is) easy to cure; (a disease) remediable (only) by scalpel etc. and, (as follows) from the (aforegoing definition, one dependent) upon a mixture (of affected humours is) difficult to cure;

Tibetan Version

gza¹ ni rjes-su² mthun-pa-la |
ñes-pa lam gcig gsar gso sla |
nad³ ni mthson sogs⁴.kyis gdab⁵-ciñ |
gso((6))-ba dka-žin de[[6]]-las 'dres⁶ ||

¹ NP; *bza* CD.

² CDP; *rjesu* N.

³ CD; *gnad* NP.

⁴ NP; *mthsan stsogs* CD.

⁵ NP; *btab* CD.

⁶ CD; *'das* NP.

(and) the planets favourable—, (originating in the affection of) a single humour (and) path, (and having developed but) recent(ly), is easy to cure; (even) a disease (that is) remediable (only) by scalpel etc., difficult in its treatment, and, (as follows) from the (aforegoing definition), miscellaneous (as to the affected humours),

Remarks

The term *graha* (∼ *gza*) was used by the Indians, just as the corresponding *πλάνης* by the Greeks, not only for the planets proper (Mercury, Venus, Mars, Jupiter, and Saturn), but also for the sun and moon. It denotes, in other words, all celestial bodies seeming to have a motion of their own among the fixed stars; the sun answers this description in so far as it moves between the tropics of Cancer and Capricorn and travels through the zodiac from west to east. Occasionally, the ascending and descending nodes of the moon (i.e. the two intersecting points of the lunar orbit and ecliptic passed as the moon goes north and south respectively) were reckoned among the planets as well, whence *graha* and *gza* may symbolize the number “nine.”—Instead of *gza* CD read *bza*, which is unauthenticated in this meaning.

The adverbial *rjes-su* has been shortened to *rjesu* in N; cf. *Introd.* p. 23 n. 6.

The term *mārga* (~*lam*) alludes to the three courses a disease may take in attacking the body: the stages of the outer path being roughly extremities, elements, and skin; those of the inner path, stomach and bowels; and those of the middle path, vitals and joints. Cf. I 12.44 *sqq.*

The *pādas* 31cd and 32ab have been grossly misrepresented by the Tibetans in that the clean-cut distinction between difficultly curable and incurable but mitigable diseases has been abandoned in favour of a word-for-word translation following the original in arrangement rather than construction. On this phenomenon see Introd. § 27.

As concerns the numerous variants, *gnad* (for *nad* “disease”) and *mihsan* (for *mihsan* “scalpel”) are unattested secondary spellings, while *btāb* “remedied” (for *gdab* “going to be remedied, remediable”) and *das* “passed away, fatal [?]” (for *’dres* “mixed, miscellaneous”) appear to be malcorrections made by a later hand.

I 1. 32

Sanskrit Text

śeṣatrāḍ āyuso yāpyaḥ pathyābhyāsād viparyaye |
anupakrama eva syāt sthito ’tyantaviparyaye ||

because of a rest of life (that may still be left, a disease may well be) mitigable through a wholesome regimen (even if it is) in the opposite state (of curability); it may be (rated) incurable only if it is in the very opposite state:

Tibetan Version

thse-yi lhag-ma lus phyir [17a1] ’thso |
go-bzlog-pa-la¹ (7) goms phan-ñid |
bcos-pai thabs med-ñid-du ’gyur |
šin-tu phyin-ci-log-par gnas ||

¹ CD; *las* NP.

(can be) cured, because there may (still) be left a rest of life; otherwise, a regimen (may be) wholesome; if (a disease) becomes incurable, it is in the very opposite state (of curability):

Remarks

The noun phrase *śeṣatrāḍ āyusaḥ* “because of a rest of life” has been turned into a subordinate clause: *thse-yi lhag-ma lus phyir* “because there may be left a rest of life.” *āyus* “life” might well be taken to mean “vital energy” in this context, were it not for the Sanskrit gloss *jīvita* and the Tibetan equivalent *thse*, both of which preclude any such interpretation.

Instead of *go-bzlog-pa-la* NP read *go-bzlog-pa-las*; the Tibetan ablative is quite unusual, however, in reproducing the Sanskrit locative, whose function is normally assumed by the dative of sphere.

In the second half of the stanza, the construction has again been sacrificed to the word-order, but this time by a less drastic measure—the interchange of protasis and apodosis.

anupakrama has been metaphrased by *bcos-pai thabs med* “being without a means of curing.”

I 1. 33

Sanskrit Text

autsukyamohāratikṛd dṛṣṭariṣṭo 'kṣanāśanaḥ |
tyajed ārtam bhiṣagbhūpair dviṣtam teṣāṃ dviṣaṃ dviṣaṃ ||

causing desire (for the sense-objects), mental alienation, and discontent, showing the symptoms of death, (and) impairing the sense-organs. One shall avoid a patient hated by physicians and kings, hostile to these, hostile (to himself),

Tibetan Version

'dod dan rmoṅs dan khro-bar byed |
'chi-ltas snañ-ziñ [[7]] dbaṅ-po ṅams |
sman-pa rgyal-po[2]((7))-la sdañ dan |
de dan mi mdza dan-ba dan ||

it makes (a patient) desirous (of the sense-objects), mentally alienated, and discontent, the symptoms of death show up, and the sense-organs are impaired. (A patient who is) hostile to physicians (and) kings, unpopular with them, hostile (to himself),

Remarks

The compound *autsukyamohāratikṛt* "causing desire, mental alienation, and discontent" has been transformed into a short sentence of its own, in which the original objects appear as predicate nouns: *'dod dan rmoṅs dan khro-bar byed* "it makes desirous, mentally alienated, and discontent." Practically the same word-grouping occurs in the salutatory stanza, where it must be understood in a different way, though.

As *autsukyamohāratikṛt*, so have *dṛṣṭariṣṭa* "showing the symptoms of death" and *akṣanāśana* "impairing the sense-organs" been rendered independent, with intransitive verbs taking the place of the former transitives: *'chi-ltas snañ-ziñ dbaṅ-po ṅams* "the symptoms of death show up and the sense-organs are impaired."

The predicate *tyajet* "one shall avoid" has been transferred to the end of the sentence in 34d and reproduced by *span* (a secondary form of *spoñ*), which is a brachylogy for *span-bar bya* "shall be avoided." The following *ārta* "patient" has been disregarded.

The attributes *bhiṣagbhūpair dviṣtam* "hated by physicians and kings" and *teṣāṃ dviṣaṃ* "hostile to these" have been inverted: *sman-pa rgyal-po-la sdañ dan de dan mi mdza* "hostile to physicians (and) kings and unpopular with them." This was evidently done with a view to sidestepping the collocation *dviṣaṃ dviṣaṃ*, the second member of which is paraphrased by the scholiasts as *dviṣaṃ ātmanaḥ* "hostile to himself."

I 1. 34

Sanskrit Text

hinopakaraṇaṃ vyagram avidheyam gatāyusaṃ |
caṇḍaṃ śokāturaṃ bhīruṃ kṛtaghnaṃ vaidyamāninaṃ ||

destitute of the (bare) necessities, busy, disobedient, finished with life, frantic, harassed with grief, timid, unmindful of past services, (and) regarding himself as a physician.

Tibetan Version

yo-byad mi 'byor brel-ba dan |
 (46a1) ñan-du mi btub thse zad dan |
 gtum-ñin mya-ñan-la mnan 'jigs¹ |
 byas-pa mi bzo² sman brñas spañ³ ||

¹ CD; 'jig NP.² NP; gzo CD.³ NP; spañs CD.

lacking the (bare) necessities, busy, disobedient, finished with life, frantic, harassed with grief, timid, not remembering past services, (and) despising medicines, shall be avoided.

Remarks

hinopakaraṇa "destitute of necessities" has been rendered by *yo-byad mi 'byor* "not having at hand, lacking, necessities."

avidheya "disobedient" has been paraphrased by *ñan-du mi btub*, which literally means "unable to obey."

For 'jigs "timid" NP offer the unattested spelling 'jig.

kṛtaghna "destructive, unmindful, of past services" has been translated by *byas-pa mi bzo* "not remembering past services." For *bzo* CD have substituted the commoner *gzo*; cf. Mvy. 2357, where both spellings occur side by side.

vaidyamānin may be interpreted to signify either "regarding oneself as a physician" or "despising a physician." The commentators, following Pāṇ. III 2.82, understand it in the sense of someone "who, though no physician, regards himself as a physician (and) prepares medicines at his own discretion" (*avaidyō 'pi yo vaidyam ivātmānaṃ manyate svamatenaivauśadhaṃ karoti*)¹. The Tibetans, however, have *sman brñas* instead, which can only be turned "despising medicines," unless *sman* is considered a brachylogy for *sman-pa* "physician."

On *spañ* (~ *tyajet*) see previous stanza. The perfect *spañs* given in CD makes no sense here; it is probably a malcorrection.

¹ Thus Candranandana and Indu, the latter omitting only the particles *iva* and *eva*; Aruṇadatta's *naivauśadhaṃ* is obviously corrupt and must be restored to <*svamate*>*naivauśadhaṃ*.

Introductory Line

Sanskrit Text

*athāto dinacaryādhyāyaṃ¹ vyākhyāsyāmaḥ ||*²

¹ B; *dinacaryāṃ nāmādhyāyaṃ* K.

² K adds: *iti ha smāhur Ātreyaḍāyo maharṣayaḥ*; cf. I 1 introd.

Now we shall set forth the chapter on the conduct during the day.

Tibetan Version

de-nas ñin re-ñin spyad¹-pai leu bsad-par byao ||

¹ NP; *dpyad* CD.

Now will be set forth the chapter on the conduct during every day.

Remarks

dina° “during the day” has been paraphrased by *ñin re-ñin* “during every day”; cf. 1.35. The same expression recurs in 3.2, where CD read *ñin re bzin*, and in Dzl. p. 82.8, where SCHIEFNER (Ergänzungen p. 21), with reference to p. 82.3, wants to write *ñin re bzin* too; here the Petersburg Kanjur, whose provenance has not yet been established beyond doubt (see CH’EN, HJAS ix p. 57), offers *ñin re-re* instead.

caryā “conduct” corresponds to *spyad-pa* (more commonly spelt *spyod-pa*), which is found only in NP. *dpyad-pa* (or *dpyod-pa*), as given by CD, properly means “examination” (*vicāra*), but here appears to be a secondary spelling of *spyad-pa*. Similar cases could not be traced. The reverse phenomenon, however, that *spyod-pa* occurs instead of *dpyod-pa* seems to be far more frequent; cf. JÄSCHKE, Dict. p. 329, and Suv. p. 42.20 & 25.

I 2. 1

Sanskrit Text

brāhme muhūrta uttiṣṭhet svastho rakṣārtham āyusaḥ |
śarīracintāṃ nirvartya kṛtaśaucavidhis tataḥ ||

At the brahmanic hour a healthy man shall get up, for the protection of his life. Having completed the care of the body, having then performed the rite of purification,

Tibetan Version

bde-gnas thse ni ((2)) bsrün-bai phyir |
yud-thsam thsaṅs phyir gnas-te [5] laṅs |
lus-kyi [[3]] bya-ba rdzogs byas-nas |
de-nas gtsaṅ-sprai cho-ga (3) bya ||

A healthy man shall get up at the brahmanic hour, for protecting his life. Having risen (and) completed the affairs of the body, he shall then perform the rite of purification.

Remarks

The term *brāhma muhūrta* (~ *yud-thsam thsañs*) “brahmanic hour,” usually spelt *brahmamuhūrta*, denotes the fourteenth or second last muhūrta of the night, a full day comprising thirty muhūrtas of forty-eight minutes each. As appears from its post-noun position, *thsañs* “Brahman” is used here as an adjective.

The predicate *uttiṣṭhet* “shall get up” has been transferred to the end of the sentence and metaphrased by *phyir gnas-te*, with *te* anticipating the auxiliary *bya* in 3b. It has been resumed in the next sentence by *lañs* “having risen.”

The subject *svastha* “healthy man,” which belongs to the following sentence as well, has been shifted to the head of the stanza and rendered by *bde-gnas*, a compound precisely equivalent to *sustha*; this is an oft-recurring variant of *svastha*.

The nominal phrase *rakṣārtham āyusaḥ* “for the protection of his life” has been verbalized into *thse ni bsrun-bai phyir* “for protecting his life.”

Instead of *śarīracintā* “care of the body,” the translation has *lus-kyi bya-ba*, which rather corresponds to *śarīrakārya* “affairs of the body.” This expression seems more relevant inasmuch as it more clearly implies, besides the idea of making toilet, that of relieving nature, for which activity the rite of purification is meant in the first place.

The possessive compound *kṛtaśaucavidhi* “having performed the rite of purification” has been turned into an independent sentence: *gtsaṅ-sprai cho-ga bya* “he shall perform the rite of purification,” *bya* being on a par with *phyir gnas-te* in pāda b. The following *tataḥ* has been inserted between subordinate clause and main sentence.

I 2. 2

Sanskrit Text

arkanyagrodhakhadīrakarañjakakubhādīkam |
prātar bhuktvā ca mṛdvagraṃ kaṣāyakaṭutiktakam ||

and having at dawn taken his meal, he shall eat [*bhaksayed* 3a] a soft-tipped (and) astringent, pungent, or bitter tooth-cleaner [*dantadhavanam* 3a] of mudar, banyan, catechu, Indian-beech, or arjun (sprigs) etc.

Tibetan Version

arka¹ nya-gro²-dha señ-ldeñ |
ka-rañdza ka-ku-la sogs³ |
bska dañ thsa dañ kha-ba-dag |
rtse 'jam nañ-par zas spyad-nas ||

¹ CD; *arga* NP.

² DNP; *glo* C.

³ NP; *stsogs* CD.

Having at dawn taken his meal, he shall eat as a tooth-cleaner [*so-yi dag-byed bca-bar bya* 3b] the astringent, pungent, bitter, and soft-tipped (sprigs of) mudar, banyan, catechu, Indian beech, arjun etc.

Remarks

The possessive copulative *arka-nyagrodha-khadira-karañja-kakubhā'dika*, which (like *mṛdvagra* and *kaṣāyakaṭutiktaka*) syntactically belongs to *dantadhavana* in 3a, has been severed from its governing noun and rendered immediately dependent on the principal verb, with the former object turned into a predicate noun.

For *arka* NP write (less correctly) *arga*, the distinction between hard and soft mutes being often neglected in the adoption of Sanskrit words.

For *nya-gro-dha* C has a misspelt *nya-glo-dha*. It may be noted here that the principles employed by the Tibetans in transliterating Sanskrit names are diametrically different from those used in translating them: while it is the etymology that counts in the latter case (even though it may be wrong from the linguistic point of view), it is the ligatures that matter in the former. Thus *nyagrodha* is spelt *nya-gro-dha* and not *nyag-ro-dha*, as would be in keeping with its derivation ("growing downwards").

The participial clause *prātar bhuktvā ca* has been placed after *mṛdvagram* and this again has been interchanged with *kaṣāyakaṭutiktakam*.

The plural suffix *dag* after *kha-ba* is grammatically suspect (if at all, it should stand after 'jam) and probably corrupt; the original reading seems to have been *dan* (cf. 2.39).

On the tooth-cleaning procedure in general, see the exhaustive description given in Suśr. IV 24.4 sqq. HILGENBERG & KIRFEL's translation of the present stanza is far wide of the facts.

I 2. 3

Sanskrit Text

bhakṣayed dantadhavanaṃ¹ dantamāmsāny abādhayan /
nādyād aṣṭirnavamathuśvāsakāsaḥjvarārditi //

¹ B; °pavanaṃ K.

without injuring the gums. Anyone suffering from indigestion, nausea, dyspnea, cough, fever, and hemiplegia of the face

Tibetan Version

so ((3)) dan rñil-la ma gnod[[4]]-par /
[6] so-yi dag-byed bca-bar bya /
ma-žu slon-bro dbugs mi-bde /
lud-pai¹ lu² rims kha-yon-can //

¹ NP; pa CD.

² DNP; lud C.

without injuring teeth and gums. Anyone suffering from indigestion, nausea, dyspnea, mucous cough, fever, (and) hemiplegia of the face

Remarks

The first pāda has been interchanged with the second and the verb transferred to the end of the sentence.

The compound *dantamāmsa* "tooth-flesh, gums" has been interpreted as copulative rather than determinative and rendered by *so dan rñil* "teeth and gums"; see As. I 3.16 (our subsequent numbering), which reads *dantān dantamāmsāny abādhayan* "without injuring teeth (and) gums."

The predicate *nādyāt* "shall not eat" has been moved to the end of pāda 4b. *kāsa* "cough" has been paraphrased by *lud-pa(i) lu* "mucous cough," as against the usual *lud-pa*.—*lud* in C is a miscarving.

arditin means "suffering from hemiplegia of the face" and not just "suffering," as HILGENBERG & KIRFEL understand it (that would rather be *ardita*).

12.4

Sanskrit Text

trṣṇāsyapākahr̥nnetraśiraḥkarnāmayī ca tat |
sauvīram añjanaṃ nityaṃ hitam akṣṇos tato bhajet ||

and afflicted with thirst, stomatitis, and diseases of the heart, eye, head, and ear shall not eat [*nādyād* 3c] this. He shall then regularly turn to galena as a collyrium, (which is) good for the eyes.

Tibetan Version

(4) *skom-ziñ kha bskams¹ sñiñ mig rna |*
mgo-bo na-bas 'di mi bca |
rtag-tu mig[[5]]-sman skyer-khañda |
mig-la phan-pas de phyir ((4)) bsten ||

¹ P; *skams* CD; *bskam* N.

(and) afflicted with thirst, xerostomia, (and diseases of the) heart, eye, ear, (and) head shall not eat this. He shall then regularly turn to barberry extract as a collyrium, because it is good for the eyes.

Remarks

āsyapāka "inflammation of the mouth, stomatitis" has been rendered by *kha* (b) *skams* "dryness of the mouth, xerostomia," this being a major symptom of the complaint; cf. Ah. VI 21.58 sq.—*bskam* in N is a haplography.

śiras "head" and *karna* "ear" have been transposed on metrical grounds.

sauvīra is generally understood by the dictionary-makers as "antimony"—meaning stibnite or antimony trisulphide [Sb₂S₃], in which form this metal usually occurs native. Writers on Indian pharmacopoeia and chemistry, however, tend to identify *sauvīra* as galena or lead sulphide [PbS]; cf. DUTT, *Materia* p. 74, and RAY, *History* p. 175.¹ The Tibetans, on the other hand, who seem to have had no ready access to either mineral, prescribe as a substitute *skyer-khañda* or "barberry extract" (so DAS, *Dict.* p. 110; LAUFER, *Beiträge* p. 62, equates *skyer-pa* with turmeric).

añjana and *akṣaṇ* have been interchanged with *sauvīra* and *hita* respectively, while *nitya* has been placed at the beginning of the sentence.

The participial phrase *hitam akṣṇoḥ* "good for the eyes" has been translated by a gerundial clause: *mig-la phan-pas* "because it is good for the eyes."

— — —

¹ It is interesting to learn in this connection that two samples of stibnite bought in the bazaars of Karachi and Bombay, when analysed in the Historical Pharmaceutical Institute of the Technical University of Brunswick, turned out to be galena. Cf. PATEL, *Mineralien* p. 25 sq.

K adds here a spurious śloka which recurs in As. I 3.24 sq. (our subsequent numbering) and runs as follows:

locane tena bhavataḥ susnigdhaḥ śhanapakṣmaṇī |
ṛyaktatrivarṇe vimale manojñe sūkṣmadarśane ||

“Thereby one’s eyes become endowed with very smooth and dense eyelashes, bright in that the three colours¹ become distinct, beautiful, (and) sharp-sighted.”

¹ Viz. red (capillaries), white (sclerotic), and black (pupil).

I 2. 5

Sanskrit Text

cakṣus tejomayaṃ tasya viśeṣāc chleṣmaṇo¹ bhayaṃ |
yojayet saptarātre ’smāt srāvaṇārthe rasāñjanam ||

¹ *viśeṣāt śleṣmaṇo* B; *viśeṣāc śleṣmato* K.

The eye (is) composed of fire, (and) the danger of phlegm (is) particularly (imminent) for it; so one shall apply elixir-salve every seven nights for demucification.

Tibetan Version

[7]¹ *de ni me-yi rañ-bžin-te |*
lhag-par bad-kan-la ’jigs-pas |
mchi-ma ’dzag phyir skyer-khaṇḍa |
zag bdun-žin ni blugs-par bya ||

¹ In N follows a blank of 8 cm., apparently an erasure; the text is complete.

As these are composed of fire and particularly endangered by phlegm, one shall instil barberry-extract every seven days for lachrymation.

Remarks

In Sanskrit, the present stanza consists of three co-ordinate sentences; in Tibetan, these have been linked to form a period, with *cakṣus tejomayaṃ* and *tasya . . . bhayaṃ* subordinated to *yojayet . . . rasāñjanam*.

cakṣus and *tasya* have been dropped and their offices taken by *de ni*, which refers to *mi* in pāda 4d.

tejomaya “composed of fire” has been rendered by *me-yi rañ-bžin*, which is synonymous with *me-las grub-pa* and *me-las byas-pa* “made out of fire”; see Mvy. 6477 where *ratnamaya* “composed of gems” is turned *gzi rin-po-che-las grub-pa’am rin-po-che-las byas-pa’am rin-po-chei rañ-bžin*.

bhaya “fear, danger” has been verbalized to *’jigs-pa* “be afraid of, endangered by.”

yojayet “shall apply” has been transferred to the end of the sentence and translated more specifically by *blugs-par bya* “shall instil,” the idea in Tibetan of this and the preceding stanza being that barberry-extract shall be used cosmetically every morning but medically only once a week.

saptarātre “every seven nights” has been altered to *zag bdun-žin* “every seven days.” Though idiomatically correct (cf. Mvy. 8413), this modification is materially incorrect, as appears from Car. I 5.17 sq.:

divā tan na prayoktavyaṃ netrayas tikṣṇam añjanam /
virekadurbalā dṛṣṭir ādityaṃ prāpya sīdati //
tasmāt srāvyaṃ niśāyāṃ tu dhruvam añjanam iṣyate /

“Strong eyesalve, now, (is) not to be applied to the eyes by day. A seeing-organ weakened by drainage gets affected when exposed to sunlight. So eyesalve for drawing (phlegm) is invariably indicated only by night.”

asmāt “so” has been rendered superfluous by the above change of construction and hence has been omitted in Tibetan. Also, the pādas c and d have been transposed for syntactical reasons.

srāvaṇārthe “for letting (phlegm) go, demucification” has been paraphrased by *mchi-ma ’dzag phyir* “for the flowing of tears, lachrymation.” Both interpretations amount to the same thing inasmuch as from the Indian point of view lachrymation naturally involves demucification.

rasāñjana “elixir-salve” is understood as a rule to denote an extract called *rasaut* in the vernaculars and prepared by boiling together equal parts of a decoction of Indian barberry (*Berberis asiatica* Roxb. and other species) and milk. DUTT (Materia p. 107) points out that some Bengali physicians, who are evidently not acquainted with this plant, invariably use galena or lead sulphide whenever the term occurs in a prescription. Other substitutes are copper vitriol and brass calx (pw V 174).

Sanskrit Text

tato nāvanagaṇḍūśadhūmatāmbūlabhāg bhavet /
tāmbūlaṃ kṣatapittāsra¹rūḥṣotkupitacakṣuṣām //

¹ B; °pittāśrg° K.

One shall then turn to a sternutatory, a gargle, an inhalant, and betel; betel (is) unwholesome [*apathyaṃ* 7 b] for those affected with pulmonary rupture, hemorrhage, and eyes irritated by roughness,

Tibetan Version

de-nas [[6]] *sna*(5)-*sman mkhur*¹-*bkañ-dor* /
*dud*²-*pa so-rtsi bsten-par bya* /
*so-rtsi glo*³[18a1]-*grams mkhris-pa khrag* /
rsub((5))-*pas mig ni na-ba dan* //

¹ CD; °*khur* NP.

² CDP; *bdud* N.

³ CD; *blo* NP.

One shall then turn to a sternutatory, a gargle, an inhalant, (and) betel; betel is harmful [*gnod-pa yin* 7 b] for those affected with pulmonary rupture, hemorrhage, (and) roughness at the eyes,

Remarks

gaṇḍūśa “gargle” has been paraphrased by *mkhur-bkañ-dor*, meaning roughly “that which one spits out [*dor*, from °*dor-ba*] after having filled [*bkañ*, from °*genś-pa*] one’s cheeks”; *mkhur*-(*ba*), of which °*khur* in NP is a rare alternative spelling (v. LOKESH CHANDRA, Dict. II p. 305, s. v. *mkhur-īhsos*), corresponds to Skr. *gaṇḍa*.

bdud-pa (for *dud-pa*) in N seems to be a mistake.

kṣata denotes a rupture in general as well as a rupture of the lungs; compare the definitions given in Suśr. IV 2.20 *sq.* and VI 41.24. Here it must be understood in the latter sense, as appears from Candranandana's gloss *urahl:kṣata* "pectoral rupture," and consequently has been translated by *glo-'grams* "pulmonary rupture" (in Mvy. 9513 also written *glo-'drams-po*). NP have *blo* instead of *glo*, a scarce secondary form recurring in 5.49 as the reading of N and in 5.67 again as that of NP.

rūkṣotkupitacakṣus may be interpreted, according to Candranandana and Indu, to signify either "affected with eyes irritated by roughness" or else "affected with roughness and irritated eyes." In Tibetan, preference is given to the former possibility: *ritsub-pas mig ni na-ba* "affected with roughness at the eyes." Roughness means deficient lubrication by phlegm, as for example in oligodacryorrhea.—*kupita* "irritated" has been rendered by *na-ba* "affected" and assigned a different role.

12.7

Sanskrit Text

*viṣamūrchūmadārtānām apathyam śoṣiṇām api |
abhyāṅgam ācaren nityam sa jārāśramavātahā ||*

for those stricken with poison, stupor, and alcoholism, and for those suffering from desiccation. One shall regularly perform an inunction; that (is) dispersive of old age, fatigue, and wind

Tibetan Version

*dug-gis brgyal-ñiṅ chañ-nad gzir |
lus skyem gyur-la gnod-pa [[7]] yin |
rtag-tu bsku-byug spyod byed-na |
de ni rgas ñaṭ rluñ 'joms yin ||*

for those fallen into a toxic stupor, for those stricken with alcoholism, (and) for those suffering from desiccation. If one regularly performs an inunction, that disperses old age, fatigue, (and) wind

Remarks

viṣamūrchūmadārta is regarded by Aruṇadatta and Candranandana as a tatpuruṣa having a tripartite dvandva for its initial component: "stricken with poison, stupor, and alcoholism." The Tibetans hold a different view, taking *viṣamūrchā* also to be a tatpuruṣa and translating as follows: *dug-gis brgyal-ñiṅ chañ-nad gzir* "fallen into a toxic stupor and stricken with alcoholism"; they may appeal to Suśr. VI 46.7 *sqq.* where a stupor is described as being caused by wind, choler, phlegm, blood, alcohol, or poison.

apathyā "unwholesome" has been placed at the end of the sentence and turned *gnod-pa yin* "is harmful."

śoṣiṇ "suffering from desiccation" has been paraphrased by *lus skyem gyur*, lit. "having become thirsty as to the body." *śoṣa* serves as a synonym of *rājayakṣman* "consumption," which is called "desiccation" on the ground that it desiccates the elements (*rasādīśoṣaṇāc choṣaḥ* III 5.3). Hemādri offers *mukhaśoṣa* "xerostomia" as an alternative interpretation, quoting Suśr. IV 24.24:

*raktapittakṣatakṣiṇatīṣṇāmūrchāparitīnām |
rūkṣadurbalamatībhyo na hitam mukhaśoṣiṇām ||¹*

¹ The Nirṇaya Sāgara Press edition reads *rūkṣadurbalamartyānām*, "for those whose body is rough and weak" as well as *cāsyāśoṣiṇām*.

“(Betel is) not good for those affected with hemorrhage, pulmonary rupture and consumption, thirst, and stupor, for those who are rough, weak, and drunk, (and) for those suffering from xerostomia.”

abhyāṅga “inunction” has been rendered by a hendiadys: *bsku-byug*, lit. “be-smearing & anointing” (cf. 2.9 & 4.6). Expressing action-nouns this way is a favourite practice in Tibetan.

ācareṭ “one shall perform” has been changed from a finite verb to a conditional gerund: *spyod byed-na* “if one performs.”

nityam “regularly” has been shifted to the head of the sentence.

I 2. 8

Sanskrit Text

dr̥ṣṭiprasādapuṣṭyāyuhṣvapnasutvaktvadārdhyakṛt |
śīraḥśravaṇapādeṣu taṁ viśeṣeṇa śīlayet ||

(and) productive of brightness of look, plumpness, (long) life, (sound) sleep, beauty of skin, and strength; one shall practise it especially at the head, ears, and feet;

Tibetan Version

miḡ (6) *gsal lus rgyas* [2] *thse 'phel-žin |*
gñid on pags 'jam rtas byed yin |
((6)) *de¹ ni mgo dan rna-ba dan |*
rkan-pa khyad[[8]]-*par rtag-tu bsten² ||*

¹ NP; *des* CD.

² NP; *bṛtan* CD.

(and) produces bright eyes, plump body, growing life, oncoming sleep, smooth skin, (and) strength; one shall regularly turn to it especially for the head, ears, and feet;

Remarks

The abstract nouns *dr̥ṣṭiprasāda* “brightness of look,” *puṣṭi* “plumpness,” and *sutvaktva* “beauty of skin” have been turned into their concrete pendants *miḡ gsal* “bright eyes,” *lus rgyas* “plump body,” and *pags 'jam* “smooth skin,” whereas the pregnant nouns *āyus* “(long) life” and *svapna* “(sound) sleep” have been paraphrased by *thse 'phel* “growing life” and *gñid on* “oncoming sleep.” With regard to *puṣṭi* it may be noted that *embonpoint* is considered a mark of beauty; cf. Car. I 5.89:

susparśopacitāṅgaś ca balavān priyadarśanaḥ |
bhavadaty abhyāṅganityatrān naro 'tpajara eva ca ||

“By the regular performance of inunction, a person becomes smooth- and plump-limbed, strong, good-looking, and slow-aging.”

taṁ has been interchanged with *śīraḥśravaṇapādeṣu* and translated by *de ni*; CD read *des ni* instead, which refers to the agent: “he,” that is, “the healthy man.”

śīlayet “one shall practise” has been replaced by *rtag-tu bsten* “one shall regularly turn to,” a phrase corresponding in 2.4 to *nityaṁ bhajet*. For *bsten*, the future of *sten-pa*, CD have substituted *bṛtan*, which seems to be a secondary form of *bṛtan*, the future of *rtan-pa*; both verbs are similar in meaning but different in construction: the former taking as a rule the accusative, the latter the dative.

I 2. 9

Sanskrit Text

varjyo 'bhyaṅgaḥ kaphagrastakṛtasamśuddhajaḥ jīrṇibhiḥ |
lāghavam karmasāmarthyam dīpto 'gnir medasaḥ kṣayaḥ ||

inunction (is) to be avoided by those seized with phlegm, subjected to purgation, and suffering from indigestion. Lightness, power of action, a blazing (stomach) fire, reduction of fat,

Tibetan Version

bad-kan skyes dan ma-žu dan |
bkru-smān sogs¹ btañ bsku-byug spañ |
yañ-žin las ni nus-pa dan |
me-yi drod bskyed² thsil³ 'bri[3]-la ||

¹ NP; *stsogs* CD.

² NP; *skyed* CD.

³ NP; *thsul* CD.

inunction shall be avoided when phlegm has arisen, in indigestion, and when a purgative etc. has been administered. Lightness, power of action, increasing heat of the (stomach) fire, reduction of fat,

Remarks

Predicate (*varjya*) and subject (*abhyāṅga*) have, in reverse order, been transferred to the end of the sentence, while the agent (*kaphagrastakṛtasamśuddhajaḥ jīrṇibhiḥ*) has been deprived of its grammatical function and converted into three modal accusatives agreeing with the original compound in matter but differing from it in arrangement and phrase. Thus *kaphagrasta* "seized with phlegm" appears as *bad-kan skyes* "phlegm having arisen," *kṛtasamśuddhi* "with a purgation having been performed" as *bkru-smān sogs btañ* "a purgative etc. having been administered," and *ajīrṇin* "suffering from indigestion" simply as *ma-žu* "indigestion."

dīpto 'gniḥ "blazing (stomach) fire" has been represented by *me-yi drod (b)skyed* "increasing heat of the (stomach) fire."

thsul (for *thsil*) seems to be a mistake passed from D into C.

I 2. 10

Sanskrit Text

vibhaktaghanagātravaṃ vyāyāmād upajāyate |
vātapittāmayī bālo vṛddho 'jīrṇī ca taṃ tyajet ||

(and) a harmonious and solid condition of the body result from gymnastics; someone suffering from wind and cholera diseases, a child, an old man, and someone suffering from indigestion shall eschew it;

Tibetan Version

lus(7)-kyi skabs phyed mkhregs-pa-ñid |
[[18a1]] rtsol-ba-las ni ((7)) 'byuñ-bar 'gyur |
rluñ mkhriś¹ nad-can byis-pa dan |
rgas-šin 'khogs-pas de spañ bya ||

¹ CDN; *khriś* P.

and harmoniousness (and) solidness of the body result from gymnastics; someone suffering from wind (and) choler diseases, a child, and someone being old and frail shall eschew it;

Remarks

vibhakta has been metaphrased by *phyed(-pa)*; both words literally mean “divided,” but may also be used in the sense of “proportioned, harmonious.” The affix *tva* has been rendered twice: by *skabs* (“nature”) in the case of *vibhakta* and by *ñid* (“self”) in the case of *ghana*.

khriś (for *mkhriś*) in P is a xylographical error.

Instead of *vrddho 'jīrṇī ca* “an old man and someone suffering from indigestion” the Tibetan has *rgas-śiñ 'khogs-pa* “someone being old and frail,” which precisely corresponds to *vrddho jīrṇas ca*. As the difference in writing is only slight, there can be little doubt that this was the reading of the original text, particularly in view of Susruta’s statement (IV 24.44 sq.) that—

vyāyāmaṃ kurvato nityaṃ viruddhaṃ api bhojanam ||

vidagdhaṃ avidagdhaṃ vā nirdoṣaṃ paripacyate |

“in a man regularly engaging in gymnastics, even disagreeable, decomposed, or crude food is fully digested without any ill effects.”

Sports exercises are in fact a good remedy for sluggishness of the bowels, and it is inconceivable why Vāgbhaṭa should have discouraged them in this case.

I 2. 11

Sanskrit Text

ardhaśaktyā niṣevyas tu balibhiḥ snigdhabhojibhiḥ |
śītakāle vasante ca mandam eva tato 'nyadā ||

by those, however, who are robust (but) eat fat (food it is) to be engaged in with half their strength in the cold season and spring (and) only little in any other season.

Tibetan Version

stobs-ldan snum-bag za-ba dan |
grañ-bai dus dan dpyid-dus dan |
nus[[2]]-ldan-dag[4]-gi¹ de bsten bya |
de-las gzan tse dal-ba ñid ||

¹ NP; *gis* CD.

those who are robust (but) eat slightly fat (food) shall engage in it in the cold season and spring as far as they are able (to do so), in any other season only with leisure.

Remarks

Pāda a has been placed after pāda c for syntactical reasons; otherwise, the word-order has been left virtually intact.

ardhaśaktyā “with half their strength” has been paraphrased by *nus-ldan-dag-gi(s)* “as far as they are able (to do so),” a construction usually restricted to verbs (DAS, Dict. p. 39) but here extended to a predicate noun. The interpretation

accords with Indu's gloss *yāvac chakyate tato 'rdham iti*. Suśr. IV 24.46 sq. is more elaborate on this point:

*sarreṣṭ rtiṣv ahar ahaḥ pumbhīr ātmahitaiṣibhīḥ ||
balasyārdhena kartavyo vyāyāmo hany ato 'nyathā |*

"By people who seek their own good gymnastics (is) to be engaged in in all seasons (and) day for day, (but only) to the half extent of their strength; otherwise it is injurious (to their health)."

The adversative particle *tu* has been omitted.

snigdha "fat" has been translated by *snum-bag* "slightly fat"; cf. 3.26.

The term *śītakāla* (~ *grāṇ-bai dus*) "cold season" comprises *hemanta* "winter" (mid-November to mid-January) and *śīsira* "pre-spring" (mid-January to mid-March). Both seasons are often regarded as a unit, especially in the Brāhmaṇas (*hemantaśīsira* PW VII 1655).

The subsidiary nature of the clause *mandam eva tato 'nyadā* "only little in any other season" is reflected in that its equivalent *de-las gzan tḥse dal-ba ñid* "in any other season only with leisure" stands after the governing verb and thus has become a new if elliptical sentence.—*tatas* and *de-las* are comparative ablatives dependent on *anyadā* and *gzan tḥse* respectively.

I 2. 12

Sanskrit Text

*taṃ kṛtvānu sukhaṃ dehaṃ mardayec ca samantataḥ |
trṣṇā kṣayaḥ pratamako raktapittaṃ śramaḥ kṛlmaḥ ||*

Having finished it, one shall massage the body on all sides to one's heart's content. Thirst, consumption, syncopic dyspnea, hemorrhage, fatigue, weariness,

Tibetan Version

(47a1) *de byas ci-bder lus-dag ni |
kun((47a1))-nas yon̄s-su¹ mñe-bar bya |
rtsol²-ba de byas zin-nas ni |
bde-bar lus kun gnas-par bya |
śin-tu rtsol³-bas [[3]] lud-pa dañ |
skom dañ gcoñ-can mi-dran[5] mun ||*

¹ CDP; *yon̄su* N.

² CDN; *rtso* P.

³ CD; *rtsal* NP.

Having finished it, they shall thoroughly massage their bodies on all sides to their heart's content. [Having completely finished gymnastics, one shall be at ease with one's entire body.] From excessive gymnastics result ['*byun̄-bar 'gyur* 13b] cough, thirst, consumption, syncopic dyspnea,

Remarks

The words *dehaṃ mardayec ca* "one shall massage the body" have been rendered by *lus-dag ni yon̄s-su mñe-bar bya* "they shall thoroughly massage their bodies," which points to a variant *dehān mardayeyuh* in the basic text.

śamantatas has been interchanged with *marḍayec ca* and translated twice: by *kun-nas* "on all sides" and by *yoñs-su* "thoroughly" (contracted to *yoñsu* in N; cf. Introd. p. 23 n. 6).

After pāda b the Tibetan inserts two lines that are not traceable in our editions and that, judging from their contents, are a clumsy interpolation. For *rtsol-ba* P has a miscarved *rtso-ba*.

Pāda 13a has been put before pāda 12c on syntactical grounds; thereby pāda 12d has come to stand at the beginning of the next stanza. Instead of *rtsol-ba* NP read *rtsal-ba*, which is not attested so far as a secondary spelling of *rtsol-ba*.

kṣaya "consumption" has been reproduced by *gcoñ-can*, lit. "consumptive," which makes no sense in this connection. The suffix *can* is likely to be corrupt for *dan*.

pratamaka "syncopic dyspnea" has been represented by *mi-dran mun*, lit. "darkness of unconsciousness." While *mun* is a wrong etymologization of *tamaka* (which is not derived from *tamas* "darkness" but from *tam* "to gasp for breath"; cf. Introd. § 27), *mi-dran* marks the difference between *tamaka* and *pratamaka*, which lies in the supervention of fever and fainting-fits. There are five, six, or seven varieties of dyspnea (*śvāsa*) according to Indian authorities: Ah. III 4.1 *sqg.* names minor (*kṣudraka*), bronchial (*tamaka*), respiratory (*chinna*), major (*mahat*), and expiratory (*ūrdhva*) dyspnea; Suśr. VI 51.1 *sqg.* adds syncopic (*pratamaka*) and Car. VI 17.45 *sqg.*, besides this, cardiac (*saṃtamaka*) dyspnea.

śrama "fatigue" has been paraphrased by *rgyas ñal* "great fatigue" so as to better contrast it with the following *klama* "weariness," which presupposes no physical exertion (Suśr. III 4.51).

I 2. 13

Sanskrit Text

ativyāyāmataḥ kāso jvaraś chardiś ca jāyate |
vyāyāmajāgarādhvastrihāsyabhāṣyādīsāhasam ||

cough, fever, and nausea result from excessive gymnastics. He who shows [*bhajan* 14b] rashness in (doing) gymnastics, waking, (making) travels, (enjoying) women, laughing, talking etc.,

Tibetan Version

khrag dan mkhris rgyas ñal dan dub¹ |
rims (2) dan slon-pa 'byun-bar 'gyur |
((2)) rtsol-ba mi ñal lam bud-med |
dgod² dan smra sogs śugs 'byin dan ||

¹ CD; *dug* NP.

² CD; *rgad* NP.

hemorrhage, great fatigue, weariness, fever, and nausea. When (a man) shows rashness in (doing) gymnastics, not sleeping, (making) travels, (enjoying) women, laughing, talking etc.,

Remarks

For *dub* NP have a suspicious and probably corrupt *dug*; the mistake may have been caused by the following *śad*.

jāgara "waking" (*jāgarā* according to Pat. on Pāṇ. III 3.101) has been turned into its negative equivalent *mi ñal* "not sleeping."

For *dgod* NP write *rgad*, which seems to be a secondary form of *rgod* but is not otherwise attested.

dan after *sugs* 'byin must be understood here as comitative, lit. "with showing rashness."

I 2. 14

Sanskrit Text

gajaṃ siṃha ivākaraṣaṇa bhajann ativinaśyati |
udvartanaṃ kaphaharaṇaṃ medasaḥ pravilāpanam¹ ||

¹ B; *pravilāpanam* K.

is most utterly ruined, like a lion who falls in with an elephant. Massage (is) eliminative of phlegm, dissolvent of fat,

Tibetan Version

señ-ges glaṇ[+]-po draṅs-pa bžin |
šin-tu drags¹-par² ma-ruṅs³ 'gyur |
[6] dril-phyis bad-kan sel-ba dan |
thsil ni rab-tu zu byed-ciñ ||

¹ CD; *grags* NP.

² NP; *pas* CD.

³ NP; *ruṅ* CD.

he gets most utterly ruined, like when a lion has fallen in with an elephant. Massage (is) the best (way) [*mchog* 15b] of eliminating phlegm, making fat dissolve,

Remarks

The words *gajaṃ siṃha ivākaraṣaṇa* "like a lion who falls in with an elephant" have been turned into a comparative clause: *señ-ges glaṇ-po draṅs-pa bžin* "like when a lion has fallen in with an elephant," with *gaja* placed after *siṃha* and the present *ākaraṣaṇa* changed into the perfect *draṅs-pa*.

bhajan has been transferred to the end of the preceding stanza.

drags-par, which represents the prefix *vi*^o in *vinaśyati*, has been pieced together from the suspicious readings *grags-par* in NP and *drags-pas* in CD.

For *ma-ruṅs* CD give the alternative spelling *ma-ruṅ*.

udvartana "massage" has been rendered by the hendiadys *dril-phyis*, which implies the act of rolling ('*dril-ba*) and wiping ('*phyi-ba*).

The construction of the following sentence has been altered by (1) taking the adverb *param* in 15b for a predicate noun and the predicate nouns *kaphaharam* etc. for attributes of it and (2) turning the dependent compounds *kaphaharam* etc. into participial clauses, thus verbalizing the nominal diction of the original.

I 2. 15

Sanskrit Text

sthirikaraṇam aṅgānāṃ tvakprasādakaraṇam param |
dīpanam vṛṣyam āyusyaṃ snānam ūrjābalaḥpradam ||

productive of firmness of limbs, (and) productive of pureness of skin in the highest degree. Bathing (is) digestive, viriligenic, vitalizing, generative of vigour and strength,

Tibetan Version

yan-lag brtan-par byed(3)-pa dan |
 pags-pa ((3)) gsal-bar byed-pai mchog |
 khrus ni [[5]] drod skyed ro-tsa dan |
 thse dan mdañs dan stobs rab bskyed¹ //

¹ NP; skyed CD.

making the limbs firm, and making the skin pure. Bathing produces (gastric) heat, generates virility, life, vigour, and strength,

Remarks

dīpana “digestive” has been translated by *drod skyed* “produces heat”; what is meant here is the heat of the gastric fire (*me-yi drod* v. 9), which is responsible for digestion.

vr̥ṣya “viriligenic,” *āyusya* “vitalizing,” and *ūrjābalaprada* “generative of vigour and strength” have been combined to *rotsa dan thse dan mdañs dan stobs rab* (*b*)*skyed* “generates virility, life, vigour, and strength.”—*ūrjā* (~*mdañs*) denotes the vital essence, usually called *ojas*, that consists of the seven elements, pervades the whole body, and brings about the functioning of the organs. It is described in Suśr. I 15.21 as a soma-like, unctuous, white, cold, solidifying, mobile, distinct, soft, and slimy substance and identified by BHISHAGRATNA (Transl. I p. 130) as albumen.—*rab* is used pleonastically for the prefix *pra*.

snāna has been moved to the head of the sentence.

I 2. 16

Sanskrit Text

kaṇḍūmalaśramasvedatandrātr̥ddāhapāpmañit |
 uṣṇāmbunādhaḥkāyasya pariṣeko balāvahaḥ //

(and) destructive of itch, dirt, fatigue, sweat, laziness, thirst, and disease. The douching with warm water of the lower part of the body (is) creative of strength;

Tibetan Version

gya dan dri-ma ñal dan¹ [7] rñul |
 sñoms² skom lus-thsa mi-śis³ sel |
 chu dron-gyis ni lus-kyi smad |
 blugs-śin bkrus-pa stobs bskyed⁴ [[6]] yin //

¹ CD; dri mñal dan ldan NP.

² N; sñom CDP.

³ CD; śes NP.

⁴ NP; skyed CD.

(and) destroys itch, dirt, fatigue, sweat, laziness, thirst, body-heat, (and) disease. The douching with warm water of the lower part of the body creates strength;

Remarks

mala (~*dri-ma*) must be taken here in its non-medical sense of “dirt”; the meaning “secretion” assumed by HILGENBERG and KIRFEL is untenable because of

the following *sveda* "sweat," which is reckoned among the secretions in 1.13. —The reading *dri mñal dan ldan* in NP, though being the *lectio difficilior*, has not been adopted on the ground that *mñal* is unattested so far as a variant form of *ñal*.

sñoms in X and *sñom* in CDP are both of equally frequent occurrence.

dāha "heat" has been specified by *lus-thsa* "body-heat."

pāpman, lit. "evil," has been rendered by *mi-śis*, prop. "misfortune." According to III 1.1, *pāpman* is a synonym of *roga* and other such words as signify disease; its Tibetan equivalent is given there as *sdig-pa*. —*mi-śes* in NP appears to be a misspelling.

pariśeka "douching" has been translated twice, each time by a hendiadys: in pāda 16d by *blugs-sññ bkrus-pa*, lit. "the besprinkling and bathing," and in pāda 17a by *blugs-khrus byas-na*, lit. "having made a besprinkling and bathing."

I 2. 17

Sanskrit Text

*tenaiva cottamāṅgasya*¹ *balahr̥t keśacakṣuṣām* /
snānam arditanetrāsyakārṇarogātisārīṣu ||

¹ B; *tūttamāṅgasya* K.

(the douching) with it of the head (is) detractive from the strength of hair and eyes. Bathing (is) prohibited [*garhitam* 18b] for those suffering from hemiplegia of the face, diseases of the eye, mouth, and ear, and diarrhea,

Tibetan Version

de ñid (4) *mgor blugs*((4))-*khrus byas-na* /
skra dan miḡ-gi stobs 'phrog *yin* /
khrus ni 'gram *chags*¹ *miḡ-nad* [18b1] *dan* /
rna-bai nad dan thsad-pas 'khru ||

¹ CD; 'chags NP.

having made a douching with it at the head, (that) detracts from the strength of hair and eyes. Bathing is prohibited [*smad* 18b] in hemiplegia of the face, diseases of the eye, diseases of the ear, diarrhea,

Remarks

The objective genitive *uttamāṅgasya* "of the head" has been replaced by the terminative *mgor* "at the head." The following *balahr̥t* has been interchanged with *keśacakṣuṣām*.

ardita "hemiplegia of the face" has been translated by 'gram *chags*, which literally means "broken cheek"; in v. 3 the same term had been rendered by *kha yon*, prop. "wry mouth." —For *chags* NP read 'chags, which looks suspicious because of the preceding 'gram.

netrāsyakārṇaroga "diseases of the eye, mouth, and ear" has been decomposed into *miḡ-nad* "diseases of the eye" and *rna-bai nad* "diseases of the ear," with *āsyā* "mouth" left aside.

The possessive affix 'in "having, suffering from" has been disregarded.

I 2. 18

Sanskrit Text

*ādhmānapīnasājīrṇa¹ bhuktavatsu ca garhitam /
jīrṇe hitam miṭam cādyān na vegān īrayed balāt //*

¹ B; °jīrṇi° K.

for those affected with inflation, catarrh, and indigestion, and for those who have (just) eaten. After (the food of the day before has been properly) digested, one shall take (a) wholesome and frugal (meal). One shall not stimulate the natural urges by force;

Tibetan Version

*lto sbos cham-pa ma-žu dañ /
zos ma[[7]]-thag-tu¹ rnam-la smad /
žu-nas phan-žin ran-par za /
gsaṅ sogs² nan-gyis (5) brnag³ mi bya //*

¹ NP; pa CD.

² NP; bsaṅ stsogs CD.

³ CD; brnags NP.

inflation, catarrh, (and) indigestion and for those who have just eaten. After having digested (the food of the day before), one shall eat in a wholesome and frugal way. One shall not attempt evacuation etc. by force;

Remarks

ādhmāna "inflation" has been paraphrased by *lto sbos*, lit. "inflated belly."

bhuktavatsu "for those who have eaten" has been turned *zos ma-thag-tu rnam-la* "for those who have just eaten." The insertion of the adverb *ma-thag-tu* between stem and ending is noteworthy here inasmuch as it leads to the concurrence of two disparate suffixes; CD have avoided this concurrence by replacing *tu* with *pa*.—The possessive affix °*vat*, which properly belongs to the entire compound, has been referred only to the final member.

jīrṇe is taken by the commentators for an elliptical locative absolute to be completed, say, like this: *pūrva āhāre* (Arunadatta)¹, *hyastane 'nne* (Candranan-dana), *hyastane 'nne sati* (Hemādri) "after the food of the day before has been digested." Only Indu holds a different view, as appears from his remark: *jīrṇa eva bhoktavyam ajīrṇe na bhoktavyam evety ubhayanīyamam* "in the case of digestion (one is given) permission to eat; in the case of indigestion (one is) not (given) permission to eat: thus (the permission to eat is) of a two-way description." The Tibetans follow the majority interpretation.

hitam miṭam cādyāt "one shall take (a) wholesome and frugal (meal)" has been translated *phan-žin ran-par za* "one shall eat in a wholesome and frugal way," with *hitam* and *miṭam* understood as adverbs rather than accusative objects.

vega "natural urge" has been rendered more specifically by *gsaṅ sogs* "evacuation etc." The spellings *gsaṅ* and *bsaṅ* are more or less interchangeable.

īrayet "one shall stimulate" has been put at the end and reproduced by *brnag bya* "one shall attempt"; the perfect stem *brnags* is untenable in this context.

¹ So RAJVAIDYA'S edition; KUNTE prints *pūrvaka āhāram* (sc. *adyāt*).

I 2. 19

Sanskrit Text

*na vegito 'nyakāryaḥ*¹ *syān nājītvā sādhyam āmayam /*
sukhārthāḥ sarvabhūtānāṃ matāḥ sarvāḥ pravṛttayaḥ //

¹ B; °kāryi K.

nor shall one engage in (any) other (business without) having responded to the natural urges, nor without having got over a curable disease.— All activities of all beings (are) supposed (to be) aimed at bliss,

Tibetan Version

śugs ma ((5)) phyuñ-bar gzan mi bya /
gnod-las mi bde-bar ma yin /
sems[2]-can thams-cad [[8]] bde 'dod phyir /
rtson¹-pa kun-la 'jug-par 'dod //

¹ CD; rtson NP.

nor shall one engage in (any) other (business) without having given vent to the natural urges, nor without having recovered from a disease.— All beings are supposed to enter on all activities because they long for bliss,

Remarks

The negative particle *na* must be connected, as appears from the Tibetan, both with *vegitaḥ* and with *anyakāryaḥ syāt*. As such double relations are somewhat unusual in Sanskrit, the suspicion suggests itself that *na vegito* is corrupt for *nāvegito*, which would perfectly harmonize with the analogous *nājītvā*.

The participial phrase *na vegitaḥ* (or, if our conjecture is accepted, *avegitaḥ*) is interpreted by Aruṇadatta to signify *saṃjātavātaviṇmūtravegas tam akṛtvā* “not having responded to the natural urge of wind, feces, and urine (already) aroused.” In Tibetan, it has been represented by a supine: *śugs ma phyuñ-bar* “without having given vent to the natural urges.”—For a specification of the natural urges and the diseases caused by their suppression see I 4.1 *sqq.*

The participial clause *ajītvā sādhyam āmayam* “not having got over a curable disease” has been rendered *gnod-las mi bde-bar* “without having recovered from a disease.” The attribute *sādhyā* “curable” is wanting.

The auxiliary *ma yin*, which corresponds to the second *na*, is meant to resume the proleptically used *gzan mi bya*. On this construction see *Introd.* § 27.

The last half of the stanza has been translated rather freely if not distortedly. The reading *rtson-pa* (for *rtson-pa*) in NP is suspect.

I 2. 20

Sanskrit Text

sukhaṃ ca na vinā dharmāt tasmād dharmaparo bhavet /
bhaktiā kalyāṇamitrāṇi seveta taradūragāḥ //

and (there is) no bliss without virtue; so one shall be excellent in virtue. One shall wait on good friends with devotion, going far away from others.

Tibetan Version

*bde-ba*¹ *chos med-par ma yin* /
*de-bas chos-la brtson-par byao*² /
mos-pas dge-bai bśes-gñen bsten /
 (6) *cig-śos ((6)) riñ-du spañ-bar bya* //

¹ NP; *bar* CD. ² NP; *bya* CD.

(and) there is no bliss without virtue; so one shall aspire to virtue. One shall wait on good friends with devotion (and) shun others from far away.

Remarks

Instead of *bde-ba chos med-par ma yin* “there is no bliss without virtue,” which corresponds precisely to *sukhaṃ . . . na vinā dharmā*, CD read *bde-bar chos med-par ma yin* “one is not in bliss without virtue.”—*dharmā* (Tib. *chos*) “virtue” is decorum towards fellow-men, animals, and gods, i.e. legal, moral, and religious discipline; a one-word rendering of this universal term can only be approximate.

The nominal expression *dharmaparo bhavet* “one shall be excellent in virtue” has been verbalized and modified to *chos-la brtson-par bya(o)* “one shall aspire to virtue.” While the commentators take *para* to mean “excellent” (*pradhāna*), the translators understand it in the sense of “intent”.

bhakti (Tib. *mos-pa*) “devotion” is a specifically Hinduistic term denoting, like *karman* “works” and *jñāna* “spiritual knowledge,” a means of salvation, whereas *kalyāṇamitra* (Tib. *dge-bai bśes-gñen*) “good friend” is a specifically Buddhistic term signifying one (not as a rule a Buddha) who helps in conversion and religious progress. The juxtaposition of both these terms is noteworthy.

The predicate noun *itaradūraga* “going far away from others” has been turned into an independent clause of a somewhat different wording: *cig-śos riñ-du spañ-bar bya* “one shall shun others from far away.”

I 2. 21

Sanskrit Text

*himsāsteyānyathākāmaṃ*¹ *paiśūnyam*² *paruṣānrte*³ /
*sambhinnālāpa*⁴ *vyāpādam abhidhyā*⁵ *drgviparyayam* //

¹ B; °kāma° K. ² B; °paiśūnya° K. ³ B; °ṛtam K.

⁴ B; *sambhinnālāpaṃ* K. ⁵ B; *abhidhyām* K.

Violence, theft, adulterous love, slander, abuse, untruth, incoherent talk, malevolence, covetousness, and misapprehension of the doctrine:

Tibetan Version

[[18b1]] *’thse dan brku dan ’dod log-spyod* /
phra[3]-ma ’nag rtsub brdzun thsig dan /
mi-’brel smra dan gnod-sems dan /
brnab-sems lta-ba phyin-ci-log //

Violence, theft, misconduct in love, slanderous talk, abusive (and) deceitful speech, incoherent talk, malevolence, covetousness, (and) misapprehension of the doctrine:

Remarks

anyathākāma “adulterous love” (lit. “otherwise-love”) has been paraphrased by ‘*dod log-spyod* “misconduct in love.”

paśiśūnya “slander” has been translated by *phra-ma naḡ* “slandorous talk” (lit. “slander-talk”), whereas *paraśāṇṛta* “abuse and untruth” has been rendered by *rtsub brdzun thsig* “abusive (and) deceitful speech” (lit. “. . . deceit-speech”). Both *phra-ma* and *brdzun* are nouns used here as adjectives.

I 2. 22

Sanskrit Text

pāpaṃ karmaṇi daśadhā kāyavāñmānasais tyajet |
avṛttivṛddhiśokārtān anuvarteta śaktitah ||

such (is the) tenfold sinful act (that) one shall eschew with body, speech, and mind. Those stricken with want of livelihood, disease, and grief one shall support to the best of one’s ability;

Tibetan Version

de-ltar sdig-pai las-rnams bcu |
lus naḡ yid[[2]]-kyis spañ-bar bya |
phoñs-pa (7) nad-pa ((7)) mya-ñan gzir |
ci nus-par ni phan-gdags [4] bya ||

such (are the) ten acts of sin (that) one shall eschew with body, speech, (and) mind. The poor, sick, (and) grief-stricken one shall support to the best of one’s ability;

Remarks

pāpaṃ karma “sinful act” has been turned *sdig-pa i las* “act of sin.” The plural suffix *rnams* is striking because of the numeral *bcu* that follows; it is no doubt corrupt for *nam(-par)*, the phrase *nam-bcu* corresponding exactly to the original *daśadhā*.

The ten sinful acts recorded above agree in substance with the ten Buddhist commandments (three for the body, four for the speech, and three for the mind) defined in Mvy. 1685 sqq. as abstention from—

- (1) destruction of life (*prāṇātighāta*, *srog gcod-pa*);
- (2) taking of what has not been given (*adattādāna*, *ma sbyin-par len-pa*);
- (3) misconduct in love (*kāma mithyācāra*, ‘*dod-pas log-par gyem-pa*);
- (4) deceitful speech (*mṛṣāvāda*, *rdzun-du smra-ba*);
- (5) abuse (*pāruṣya*, *thsig rtsub-mo* [v.l. -po] *smra-ba*);
- (6) slander (*paśiśūnya*, *phra-mar smra-ba*);
- (7) incoherent talk (*saṃbhinna pralāpa*, *thsig* [v.l. *naḡ*] *bkya-* [v.l. ‘*khyal-*] *ba*);
- (8) covetousness (*abhidhyā*, *brnab-sems*);
- (9) malevolence (*vyāpāda*, *gnod-sems*);
- (10) heretic doctrine (*mūḥyādr̥ṣṭi*, *log-par lta-ba*).

avṛttivṛddhiśokārta “stricken with want of livelihood, disease, and grief” has been translated by *phoñs-pa nad-pa mya-ñan gzir* “poor, sick, (and) grief-stricken.”

anuvarteta has been interchanged with *śaktitaḥ* and rendered by *phan-gdags bya*. The verb *phan-'dogs-pa* is a hendiadys literally meaning "to be useful to and take care of." In Mvy. 2870 & 2874 it is equated to *upakāra* "help" and in Mvy. 2875 to *upayuj* "to attach oneself to."

śaktitas, prop. "according to one's ability," has been reproduced by *ci nus-par*, prop. "however one is able to."

I 2. 23

Sanskrit Text

ātmavat satataṃ paśyed api kīṭapipīlikam |
arcayed devagovipravṛddhavidyā¹ nṛpātithin ||

¹ B; °*vaidyavṛddha*° K.

even worms and ants one shall always regard as equal to one's self. Gods, cows, brahmins, seniors, physicians, kings, and guests one shall treat with deference;

Tibetan Version

'bu-srin grog-sbur²-dag-la yañ |
rañ dañ 'dra-bar rtag-tu blta |
lha dañ dge-sloñ bram-ze dañ |
sman[[3]]-pa rgan rgyal mgron-pos mchod ||

¹ NP; *spur* CD.

even worms (and) ants one shall always regard as equal to one's self. As they are treated with deference by gods, monks, brahmins, physicians, seniors, kings, (and) guests,

Remarks

The pādas a and b have been transposed for syntactical reasons, the former containing the predicate.

kīṭa (Tib. *'bu-srin*) signifies "worm" as well as "insect." In view of the following *pipīlikā* (Tib. *grog-sbur*) "ant," which, strictly speaking, denotes an insect itself, the first meaning is preferable here (HILGENBERG & KIRFEL seem to disagree). No undue emphasis should, however, be placed on the zoological aspect of these terms, worms and ants being only representative of all small and helpless creatures.—For *grog-sbur* CD clearly print *grog-spur*. There appears to be some uncertainty as to the correct spelling of the word; the dictionaries usually have *grog-sbur*, but JÄSCHEKE (Dict. p. 78) writes *grog-spur*.

arcayet "one shall treat with deference" has been transferred to the end of the stanza and rendered by *mchod*, which takes as a rule the accusative (or, rarely, the dative) of the person. The instrumental *mgron-pos* is very strange in this connection and can only be interpreted to denote the agent: "treated with deference by . . ." There is obviously something wrong about the reading.

go "cow" has been replaced by *dge-sloñ* (Skr. *bhikṣu*) "monk," because cow worship is not practised in Tibet. For material changes like this see Introd. § 27.

vṛddha "senior" and *vaidya* "physician" are given in reverse order, which confirms the text of K.—*vṛddha* (Tib. *rgan*), prop. "old," is understood by the commentators to relate to religious standing rather than age: *jñānaśīlatapobrahmacaryavratādiṣu śaktāḥ* "committed to spiritual knowledge, moral conduct, religious austerity, chastity vow, etc." (Candranandana's paraphrase).

I 2. 24

Sanskrit Text

vimukhān nārthinaḥ kuryān nāvamanyeta nākṣipet /
upakārapradhānaḥ syād apakārapare²py arau //

beggars one shall not occasion to turn away, nor shall one despise or insult (them). One shall be excellent in beneficence even towards an enemy intent on maleficence.

Tibetan Version

sloṅ-la rgyab-kyis phyogs mi bya /
brñas-par mi bya tṣar mi gcad¹ /
 (47b1) ((47b1)) *gnod-par byed brtson dgra[5]-gžan-la' an /*
phan²-gdags-pa ni gtso-cher bya //

¹ CD; *bcad* NP.

² DNP; C adds *da*.

one shall not turn one's back upon beggars, nor shall one despise or insult (them). One shall excel in beneficence even towards an enemy intending to do harm.

Remarks

The clause *vimukhān nārthinaḥ kuryāt* "one shall not occasion beggars to turn away" has been rendered more freely by *sloṅ-la rgyab-kyis phyogs mi bya* "one shall not turn [with] one's back upon beggars," the image being different in Sanskrit and Tibetan.

The verb *tṣar-gcod-pa* (usu. "to annihilate") in the rare sense of "to insult" also occurs Mvy. 7183, where it stands for hybrid *nirbhāts* "to revile"; cf. EDGERTON, Dict. p. 302. Going by the reading *bcad* in NP, the perfect stem of *gcod-pa* seems here and there to assume the office of the future.

The pādas c and d have been interchanged on grounds of syntax, the former making up the predicate. Moreover, the nominal diction has been converted into a verbal one and the word-play *upakāra*: *apakāra* abandoned as apparently impracticable. After *phan* C has a miscarved *da*.

ari "enemy" has been translated by *dgra-gžan*, which is best interpreted as a hendiadys meaning "enemy & stranger." It may be remembered in this connection that THÈME (Fremdling p. 1 sqq.) has established "stranger" to be the original meaning of Skr. *ari*.

Arunadatta, elaborating on the latter part of this stanza, adduces Śiś. II 37 by way of comparison:

upakartrāriṇā samdhir na mitreṇāpakāriṇā /
upakārāpakārau hi lakṣyaṃ lakṣaṇam etayoḥ //

"With a beneficent enemy (may be made) a compact, not with a maleficent friend; for beneficence and maleficence (are) to be considered the (main) characteristics of these two."

I 2. 25

Sanskrit Text

sampadvipatsv ekamanā hetāv irṣyet phale na tu¹ /
kāle hitaṃ mitaṃ brūyād avisamvādi peśalam //

¹ B; *tu na K*.

In fortune and misfortune (one shall be) even-minded. Of the cause (of success) one shall be jealous, but not of success (itself). One shall talk at the right time in a proper, concise, uncontradictory, agreeable manner.

Tibetan Version

'byor dan [[4]] rgud¹-la'an yid gcig bya |
rgyu-la phrag-dog 'bras-bu min |
dus-su phan dan ran-par smra |
slu-ba med-ciñ² nes-par bya ||

¹ DNP; rgyud C. ² CDP; ci N.

In good luck and even in misfortune one shall be even-minded. Towards the cause (of success one shall feel) jealousy, not towards success (itself). One shall talk at the right time in a proper, concise, undeceitful, definite manner.

Remarks

The antithetical pun *sampad*: *vipad* has again been held unfit for imitation. To *rgud-la* has been added an emphatic 'an. The reading *rgyud* in C is suspect here, though it is tenable as such (cf. Mvy. 7389).

The copula after *ekamanāḥ*, which is altogether missing in Sanskrit, has not been fully given in Tibetan either; *yin-par* is to be supplied.

irṣyet "one shall be jealous" has been replaced by *phrag-dog* "jealousy." This is noteworthy inasmuch as the Tibetans usually follow the opposite policy of verbalizing nominal phrases.

brūyāt "one shall talk" has been retained in its mid-sentence position (*smra*) and resumed at the end of the stanza by an auxiliary (*bya*).

avisamvādin "uncontradictory" has been reproduced by *slu-ba med-ciñ* "being without deceit, undeceitful."—*ci* (for *ciñ*) in N is a haplography.

For *peśala* "agreeable" has been substituted *nes-pa* "definite." Perhaps the translators had a different reading before them.

I 2. 26

Sanskrit Text

pūrvābhībhāṣī sumukhaḥ suśīlaḥ karuṇāmṛduḥ |
naikaḥ sukhī na sarvatra viśrabdho¹ na ca śaṅkitaḥ ||

¹ B; *visrabdho* K.

(One shall be) greeting first, bright-faced, well-conducted, (and) soft with pity; (one shall) not (be) happy alone, nor (shall one be) trustful and afraid of everybody.

Tibetan Version

b'zin 'dzum gsoñ-por smra-ba dan |
spyod-pa ((2)) [6] bzan(2)-zin sñin-rje 'jam¹ |
gcig-pu [[5]] bde² min thams-cad-la |
yid³ mi brtan-zin⁴ dogs mi bya ||

¹ CDP; *rjes jam* N. ² CDN; *bden* P. ³ CDP; *yin* N. ⁴ CD; *ciñ* NP.

(One shall be) smiling (all) over the face, greeting first, amiable in conduct, and soft with pity; one shall not be happy alone, nor (shall one be) trustful and afraid of everybody.

Remarks

pūrvābhīhāṣin "greeting first" (prop. "speaking first") has been interchanged with *sumukha* "bright-faced" and translated by *gson-por smra-ba*, a phrase literally meaning "speaking straightforward." The adverb *gson-por* is, however, also used as a substitute for *sñar* "beforehand" (DAS, Dict. p. 1313), at least in the present combination; see Myy. 848 and 1787, where *gson-por smra-ba* is equivalent to the synonymous *pūrvābhīlāpin*.

sumukha "bright-faced" has been rendered by *bzin 'dzum* "smiling (all) over the face" and *suśīla* "well-conducted" by *spyod-pa bzān* "amiable in conduct."

For *sñin-rje 'jam* N has an apparently corrupt *sñin-rjes jam*.

bden (instead of *bde*) as given by P is a xylographical error.

viśraddha "trustful" has been reproduced by *yid brtan*, which properly signifies "firm as to one's mind." The corresponding noun is, however, frequently employed in the sense of "confidence" or "reliance" (DAS, Dict. p. 1135).—For *yid* N has a miscarved *yin*; for *zin* NP write, less correctly, *cin*.

I 2. 27

Sanskrit Text

*na kaṃcid ātmanaḥ śatruṃ nātmānaṃ kasyacid ripum /
prakāśayen nāpamānaṃ¹ na ca niḥsnehatām² prabhoḥ //*

¹ B; *nāvamānaṃ* K.

² B; *nisnehatām* K.

One shall not proclaim somebody (to be) one's enemy nor oneself (to be) somebody's foe nor contempt nor (one's) master's ungraciousness.

Tibetan Version

*su yañ bdag-gi dgra yin dan /
bdag ni su-yi dgrar gyur dan /
brñas dan bdag-la gtso-bo ni /
mi byams źes ni smra mi bya //*

One shall not proclaim that somebody is one's enemy, that one has become somebody's enemy, that one contemns (somebody), and that (one's) master is ungracious towards oneself.

Remarks

The predicate has been transferred to the end of the sentence, while the accusative objects and their adjuncts have been converted into subordinate clauses, so to speak, wound up by the particle *źes* (usually spelt *śes* after a final *s*).

śatru "enemy" and *ripu* "foe" have both been rendered by *dgra* "enemy," without regard to the stylistic variation in the original Sanskrit.

niḥsnehatām prabhoḥ may be interpreted to mean "ungraciousness of the master" as well as "unkindness towards the master." The Tibetans have decided in favour of the first possibility: *bdag-la gtso-bo ni mi byams źes* "that (one's) master is

ungracious towards oneself." The term *byams-pa* "kind, gracious" is used only of the relation of parents to their children, of benefactors to the indigent, or (as in the present case) of superiors to their subordinates, but not conversely. Cf. JÄSCHKE, Dict. p. 375.

I 2. 28

Sanskrit Text

janasyāśayam ālakṣya yo yathā parituṣyati |
taṃ tathāivānuvarteta parārādhanapañḍitaḥ ||

Having descried a man's character, one shall adapt oneself to him in such a way that he is content, expert (as one shall be) in the pleasing of others.

Tibetan Version

³gro[7]-bai bsam[[6]]-pa ((3)) śes-nas ni |
gañ(3)-zing ji-lar yoñs¹ mgu-ba |
de-la de-bzin rjes ³jug-ciñ |
gzan-dag dga byed mdzañs-pa yin ||

¹ DNP; C adds *su*.

Knowing a man's character, one shall adapt oneself to him in such a way that he is content, and shall be expert in pleasing others.

Remarks

ālakṣya "having descried" has been rendered loosely by *śes-nas* "knowing." *pari*^o (in *parituṣyati*) and *anu*^o (in *anuvarteta*) have been represented separately by *yoñs* and *rjes*. After *yoñs* C inserts a redundant *su*.

parārādhanapañḍita "expert in the pleasing of others," which figures as a predicate noun in Sanskrit, has been formally superordinated to *anuvarteta*: *gzan-dag dga byed mdzañs-pa yin* "and shall be expert in pleasing others."

I 2. 29

Sanskrit Text

na piḍayed indriyāṇi na caitāny atilālayet |
trivargaśūnyam nārambhaṃ bhajet taṃ cāvirodhayan ||

One shall not strain one's senses, nor shall one pamper them too much. One shall not turn to an undertaking devoid of the three aims of life, not setting them at variance either;

Tibetan Version

dbañ-po gzir-bar mi bya-ziñ |
³di rab ṇams bder bya-ba'añ min |
thsoms [[7]] gsum med-pai [19a1] brtsom¹-pa-la |
mi bsten de dan ((4)) ³gal mi bya ||

¹ N; *rtsom* CDP.

The senses shall not be strained, nor shall they be too much at ease. One shall not turn to an undertaking devoid of the three aims of life, nor shall one act in discord with them;

Remarks

pīḍayet “one shall strain” has been interchanged with *indriyāṇi* “senses” and, like the following *atīlālayet* “one shall pamper too much,” rendered intransitive: *gzir-bar bya* “shall be strained” and *rab ṅams bder bya-ba* “shall be too much at ease” (lit. “shall be too happy in their condition”).—*ṅams* is often pleonastically added to words expressive of some state of affairs.

trivarga (Tib. *thsoms gsum*), prop. “the three sets,” refers to the three objectives of existence described in Hindu philosophy as virtue (*dharma*), profit (*artha*), and love (*kāma*).

brtsom-pa (for the ordinary *rtsom-pa*) as found in N is, according to LOKESH CHANDRA (Dict. ix p. 1922), attested three times: Abhis. I 2 (~ *ārambha*), NyāyabT. p. 4,20 (~ *prārambha*), and NyāyabT. p. 27,7 (~ *ārambha*).

ca and *dañ* (in pāda d), though equivalent in their current sphere of meaning, are poles asunder in the present context: *ca*, on the one hand, is used as a disjunctive particle contrasting the negative *na bhajet* to an affirmative *bhajet* that must be supplied (say like this: “one shall not busy oneself with an undertaking devoid of the three aims of life; rather, <one shall busy oneself> without setting them at variance”); *dañ*, on the other hand, serves to connect the object *de* with its governing verb *gal-ba*, which is construed as a rule either this way or with an ablative ending in *las*. The instance is characteristic of the translating-technique adopted by the Tibetans; while meticulously retaining the words of the original as such, they freely assign them different functions whenever they deem it necessary to do so.

avirodhayan, which has been treated as a finite verb in Tibetan, may be understood to mean either “not setting at variance” or “not acting in discord.” While the commentators follow the first interpretation (Arunadatta adds *parasparam* “with one another”), the translators decide for the second: *gal mi bya* “nor shall one act in discord.” Objectively speaking, however, the scholiasts’ point of view deserves preference inasmuch as the devout Hindu is in fact bound to keep the aims of life in strict mutual harmony.

I 2. 30

Sanskrit Text

anuyāyāt pratipadam sarvadharmeṣu madhyamām |
nīcaromanakhaśmaśrur nirmalāṅghrimalāyanaḥ ||

one shall follow a middle course in all (religious and profane) matters.—One’s hair, nails, and beard (shall be) short, one’s feet and secretory paths not dirty.

Tibetan Version

chos(4)-rnams kun-gyi lam-la ni |
dbu-mai¹ lam-gyi² rjes’jug bya |
skra sen kha-spu riñ mi gzag³ |
sgo dgu rkañ-pa dri med bya ||

¹ DNP; *mii* C.

² CD; *gyis* NP.

³ CD; *bzag* NP.

one shall follow a middle course in religious matters (and) in every (other) way.—One's hair, nails, (and) beard shall not be left (to grow) long, nor shall one's nine apertures (and) one's feet be dirty.

Remarks

anuyāyāt "one shall follow" has been transferred to the end of the sentence and metaphrased by *rjes 'jug bya*, the adverb *rjes(-su)* corresponding to *anu*¹. The genitive *lam-gyi*, for which NP have the instrumental *lam-gyis*¹, is explained by the fact that *rjes* has preserved to some extent its original substantive character, so that *rjes-su 'jug-pa* means quite literally "to enter into the track of."

sarvadharmaṣu "in all matters" has been placed at the beginning of the sentence and rendered by *chos-rnams kun-gyi lam-la* "in religious matters (and) in every (other) way." This agrees in substance with Indu's paraphrase *sakalavyāpāreṣu sarveṣu ācāreṣu ca* "in all activities and in all religious practices."

dbu-mii (for *dbu-mai*) in C is a miscarving.

The predicate nouns *nīcaromanakhaśmaśruḥ*, lit. "one whose hair, nails, and beard are short," and *nirmalāghrimalāyanaḥ*, lit. "one whose feet and secretory paths are not dirty," to which the copula *syāt* or *bhavet* must be added, have been converted into a full sentence, with some minor changes made in expression and word-order: *skra sen kha-spu rin mi g'zag sgo dgu rkañ-pa dri med bya* "one's hair, nails, (and) beard shall not be left (to grow) long, nor shall one's nine apertures (and) one's feet be dirty." NP have substituted the perfect *b'zag* for the future *g'zag*, thus introducing a relative time element unsuitable in the present context.

roman, strictly speaking, denotes the short hair on the body (Tib. *spu*; a fine example is the following *kha-spu*, lit. "face-hair," which stands for *śmaśru* "beard"), whereas *keśa* signifies the long hair of the head (Tib. *skra*). This differentiation, though neglected in the original, has been re-established by the Tibetans.

malāyana "secretory path" has been translated by *sgo* "aperture," of which *dgu* "nine" are distinguished. These fall into two groups, seven of the head and two of the abdomen (I 11.36), and comprise the two nostrils, the two ears, the two eyes, the anus, the mouth, and the urethra (II 3.40); women have got three more, the two breasts and the vagina (II 3.41). A slightly different classification and specification is given in connection with hemorrhages (III 3.7 sq.).

¹ Both cases are often confused with each other in spoken as well as written language. Cf. FRANCKE, Addenda p. 114.

I 2. 31

Sanskrit Text

snānaśīlaḥ susurabhiḥ suveśo 'nulbaṇojjvalaḥ |
dhārayet satatam ratnasiddhamantramahanuśadhīḥ ||

Fond of bathing, well-perfumed, well-clad, (and) not extravagant (but) brilliant (in trinkets): one shall always wear jewels, effective charms, and sovereign remedies.

Tibetan Version

khrus¹-la dga-ñiñ [[8]] *dri-ñim bsgos² /*
cha[2]-lugs bzan-ñiñ mi³ 'phyar spa³ /
rin-chen grub-pai gsañ-sñags dan /
 ((5)) *smān chen rtag-tu bcañ⁴(5)-bar bya //*

¹ DNP; *brus* C.² NP; *bsgo* CD.³ CD; *spañ* NP.⁴ CDP; *bca* N.

Delighted at bathing, fragrant with perfume, chic in clothing, and not extravagant (but) beautiful (in trinkets): one shall always wear jewels, effective charms, and sovereign remedies.

Remarks

snānaśīla, lit. "having bathing as custom," has been rendered by *khrus-la dga-(-ba)* "delighted at bathing," which is indeed the underlying sense ("fond of bathing" MW p. 1267).—*brus* in C is an error.

susurabhi "well-perfumed" has been translated by *dri-ñim bsgos* "fragrant with sweet scent, perfume"; *bsgos*, for which CD read *bsgo*, corresponds to Skr. *āvāsita* (I 3.32) or the like (cf. LOKESH CHANDRA, Dict. iii p. 586).

suveṣa "well-clad" has been turned *cha-lugs bzan(-ba)* "chic in clothing."

anulbaṇa "not extravagant" has been reproduced by *mi 'phyar*, which agrees precisely with the commentators' explanation *anuddhata* "not lifted up," that is, "not excessive, extravagant."

ujjvala "brilliant" has been represented by *spa* (more commonly spelt *dpa*) "beautiful"; the reading *span* found in NP is suspect.—While *suveṣa* refers to the wearing-apparel, *anulbaṇajjvala* relates to adornments such as jewels, bracelets, rings, etc.

dhārayet and *satatam* have been inverted and transferred to the end of the stanza; *bca* (for *bcañ*) in N is a mistake.

I 2. 32

Sanskrit Text

sātapatrapadatrāṇo vicared yugamātradr̥k /
nīśi cātyayīke kārye danḍī maulī sahāyavān //

Equipped with parasol and foot-gear, one shall move about, looking (ahead) as far as a yoke; but at night (only) for an urgent matter (and) with stick, head-wear, (and) companion.

Tibetan Version

gdugs dkar lham dan ldan-pa ni /
gñā-ñiñ gañ-tsam bla-ñiñ 'gro /
 [[19a1]] *mthsan-mo don chen-dag-la ni /*
dbbyg¹ thogs mgo² dkri [3] *grogs ldan bya //*

¹ NP; *dbyg* CD.² CD; *og* NP.

Equipped with a white parasol (and) foot-gear, one shall move about, looking (ahead) as far as a yoke; at night, (only) for important matters, one shall take a stick, wrap one's head, (and) have a companion along.

Remarks

ātapatra “parasol” (lit. “heat-protector”) has been translated by *gdugs dkar* “white parasol.”

vicaret “one shall move about” has been placed at the end of the pāda.

yugamātradr̥ś and its equivalent *gñā-siñ gañ-tsam blta-ñiñ* “looking (ahead) as far as a yoke” are used in the sense of looking to the ground in order to avoid treading on something. According to the Indian system of measures, 1 yoke (*yuga*) equals 4 cubits (*hasta*) or 8 spans (*vitasti*) or 96 fingers (*anguli*) or 576 (or 768) barley-corns (*yava*); cf. COLEBROOKE, Essays I p. 528 sqq.

The last two pādas of the Sanskrit text form an elliptical sentence co-ordinate with, and to be completed after, what precedes. The translators have severed this connection by omitting the disjunctive *ca* and supplying new verbs (*thogs-pa*, *dkri-ba*, and *ldan-pa*) from the possessives *dañḍin*, *maulin*, and *sahāyavat*, assigning them the function of necessitives.

ātyayika “having a rapid course, urgent” has been rendered somewhat loosely by *chen(-po)* “great, important.” Besides, the singular has been exchanged for the plural.

Instead of *dbyug(-pa)* CD read *dbyig(-pa)*, which is equally common.

For *mgo* “head” NP write *og* “below,” which is evidently corrupt, though it would make sense (“one shall . . . wrap [oneself] below”).

I 2. 33

Sanskrit Text

caityapūjyadhvajāśastacchāyābhasmatuṣāśucin |
nākrāmec charkarāloṣṭhabaliśnānabhuvō¹ pi ca ||

One shall not tread on the shadow of a tope, respectable (person), flag, and inauspicious (object) or on ashes, chaff, and impure (places), nor (shall one tread) on gravel, clods, and offering and bathing sites.

Tibetan Version

mchod-rten mchod-bya rgyal-mthsan dan |
mi-sis grib-ma thal phub dan |
mi((6))-gtsaṅ gseg boṅ (6) gtor-ma dan |
khrus-byas [[2]] sa ni¹ gom¹ mi bya ||

¹ CD; *bsgom* NP.

One shall not tread on the shadow of a tope, respectable (person), flag, and inauspicious (object or on) ashes, chaff, impure (places), gravel, clods, (and) offering and bathing sites.

Remarks

caitya may be a tope as well as a sacred tree (usually the pipal or Bodhi tree, *Ficus religiosa* L.) in Buddhist terminology. The Tibetan equivalent *mchod-rten* denotes only the former, its etymology being “receptacle of oblations”; the latter is called *mchod-rten-siñ*, which corresponds to Skr. *caityadruma*.

nākrāmet “one shall not tread on” has been moved to the end of the stanza and rendered by *gom mi bya*, for which NP have substituted *bsgom mi bya* “one shall not meditate”; like the previous *og* (v. 32), this seems to be a corruption rather than a true variant.

bali (of dubious etymology) and its pendant *gtor-ma* (i.e. “that which is strewn”) signify propitiatory oblations consisting of portions of uncooked or unbaked food such as grain, rice, etc. which are offered to gods, demigods, saints, *et al.* so as to ward off all sorts of danger, particularly visitations of epidemics, drought, famine, etc. (MW p. 723; DAS, Dict. p. 527). Bloody sacrifices are not included in the term.

snānabhū “bathing site” is the place where someone else has bathed (*yatra kascit snātaḥ* Indu), and which he has defiled thereby; hence its translation by *khrus-byas sa*.

I 2. 34

Sanskrit Text

nadīm taren na bāhubhyām nāgniskandham abhivrajet |
saṇḍigdhanāvaṃ vṛkṣaṃ ca nārohed duṣṭayānavat ||

One shall not cross a river with one's arms, nor shall one go near a pyre. One shall not board a dangerous ship nor (climb) a tree, just as (one shall not get into) a defective vehicle.

Tibetan Version

chu-bor rkyal-te 'gro mi bya |
me chen phuñ-por 'gro mi bya |
the-thsom bcas[4]-pai gru śin-la¹ |
g'zon²-pa mi bsrun b'zin³ mi gzeg⁴ ||

¹ CD; *las* NP.

² NP; *b'zon* CD.

³ CDN; *b'zan* P.

⁴ NP; *'dzeg* CD.

One shall not go to a river, swimming (through it), nor shall one go near a pyre. One shall not board a dangerous ship (nor climb) a tree, just as (one shall not get into) a defective vehicle.

Remarks

nadīm taren na bāhubhyām “one shall not cross a river with one's arms” has been turned freely *chu-bor rkyal-te 'gro mi bya* “one shall not go to a river, swimming (through it).”

agniskandha “fire-heap, pyre” has been rendered *me chen phuñ-po*, lit. “huge fire-heap” (≈ *mahān agnirāśih* Indu); cf. Mvy. 224, where *mei phuñ-po chen-po* stands for *mahān agniskandhaḥ*. The Prakrit equivalent *agikhamdha*, which occurs in Aśoka's fourth rock-edict, is explained by BÜHLER (ZDMG xxxvii p. 260) as referring either to bonfires or to scaffolds or pillars for illumination; this interpretation is adopted by THOMAS (JRAS 1914 p. 394 *sq.*), but rejected by HULTZSCH (Inscriptions p. 7).

Instead of *śin-la* NP read *śin-las*; dative and ablative are occasionally confused in the same way as genitive and instrumental (see note to v. 30).

g'zon-pa (in NP) is another, according to JÄSCHKE (Dict. p. 484) incorrect, form of *b'zon-pa* (in CD); combined with *che*, it recurs *g'Zon-nu* p. 16 as the translation of *Mahāvahana* (a king's name).

b'zan (for *b'zin*) in P is a mistake.

gzeg-pa (in NP) is an alternative form of *'dzeg-pa* (in CD), as appears from Mvy. 8629. The verb is construed as a rule with the dative (*śin-la*, q. v.).

Remarks

ātapatra “parasol” (lit. “heat-protector”) has been translated by *gdugs dkar* “white parasol.”

vicaret “one shall move about” has been placed at the end of the pāda.

yugamātradr̥ś and its equivalent *gñā-siñ gañ-tsam blta-ñiñ* “looking (ahead) as far as a yoke” are used in the sense of looking to the ground in order to avoid treading on something. According to the Indian system of measures, 1 yoke (*yuga*) equals 4 cubits (*hasta*) or 8 spans (*vitasti*) or 96 fingers (*aṅguli*) or 576 (or 768) barley-corns (*yava*); cf. COLEBROOKE, Essays I p. 528 sqq.

The last two pādas of the Sanskrit text form an elliptical sentence co-ordinate with, and to be completed after, what precedes. The translators have severed this connection by omitting the disjunctive *ca* and supplying new verbs (*thogs-pa*, *dkri-ba*, and *ldan-pa*) from the possessives *dañḍin*, *maulin*, and *sahāyavat*, assigning them the function of necessitives.

ātyayika “having a rapid course, urgent” has been rendered somewhat loosely by *chen(-po)* “great, important.” Besides, the singular has been exchanged for the plural.

Instead of *ḍbyug(-pa)* CD read *ḍbyig(-pa)*, which is equally common.

For *mgo* “head” NP write *og* “below,” which is evidently corrupt, though it would make sense (“one shall . . . wrap [oneself] below”).

I 2. 33

Sanskrit Text

caityapūjyadhvajāśastacchāyābhasmatuṣāśucin |
nākrāmec charkarāloṣṭhabaliśnānabhūvo¹ pi ca ||

One shall not tread on the shadow of a tope, respectable (person), flag, and inauspicious (object) or on ashes, chaff, and impure (places), nor (shall one tread) on gravel, clods, and offering and bathing sites.

Tibetan Version

mchod-rten mchod-bya rgyal-mthsan dan |
mi-sis grib-ma thal phub dan |
mi((6))-gtsan gseg boñ (6) gtor-ma dan |
khrus-byas [[2]] sa ni¹ gom¹ mi bya ||

¹ CD; *bsgom* NP.

One shall not tread on the shadow of a tope, respectable (person), flag, and inauspicious (object or on) ashes, chaff, impure (places), gravel, clods, (and) offering and bathing sites.

Remarks

caitya may be a tope as well as a sacred tree (usually the pipal or Bodhi tree, *Ficus religiosa* L.) in Buddhist terminology. The Tibetan equivalent *mchod-rten* denotes only the former, its etymology being “receptacle of oblations”; the latter is called *mchod-rten-siñ*, which corresponds to Skr. *caityadruma*.

nākrāmet “one shall not tread on” has been moved to the end of the stanza and rendered by *gom mi bya*, for which NP have substituted *bsgom mi bya* “one shall not meditate”; like the previous *og* (v. 32), this seems to be a corruption rather than a true variant.

One shall not twist one's limbs, nor shall one sit in a squatting posture. The activities of body, speech, (and) mind one shall suspend before fatigue (arises).

Remarks

āṅga "limb" has been turned *lus-kyi yan-lag*, lit. "part of the body," whereas *ceṣṭeta vigraṃam* "one shall move in an unmannerly way" has been rendered *gcu-ziñ* "one shall twist."

āsīta "one shall sit" has been transferred to the end of the sentence.

utkaṭaka, as given in B, is unattested so far; usually the spelling varies among *utkaṭikā*¹, *utkaṭuka*, *utkuṭaka*, and *utkuṭuka*.

prāk śramāt "before fatigue (arises)" has been metaphrased by *sā-nas nāl-las*, the prepositional use of *sā-nas* being noteworthy. —*la* (for *nāl*) in NP is a carver's error passed from N into P (see Introd. p. 33 n. 1).

¹ According to MW p. 175, who depends on pw i p. 219, *utkaṭikā* denotes a manner of sitting in which the legs are outstretched and form a right angle. But Yogaś. iv 131, to which he expressly refers, defines this posture quite otherwise: *pūṭapārṣṇisamāyoge prāhur utkaṭikāsanam* "if (there is) contact between the buttocks and heels, they call (it) the *utkaṭikā* seat."

I 2. 37

Sanskrit Text

nordhvañanus ciraṃ tiṣṭhen naktam seveta na drumam |
tathā catvaracaityāntaś¹ catuṣpathasurālayān ||

¹ B; °caityānta° K.

One shall not lie down (too) long with raised knees, nor shall one stay at a tree by night; at a crossing of three roads, the vicinity of a tope, a crossing of four roads, and a house of gods either;

Tibetan Version

pus 'greñ yun riñ¹ [[4]] gnas mi bya |
mthsan-mo śiñ druñ bsten mi bya |
(48a1) ((48a1)) sum-mdo mchod-rten druñ bži-mdo |
lha-yi khañ-pa'an² de-bžin-no ||

¹ NP; *riñs* CD.

² NP; *lhai khañ-pa yañ* CD.

One shall not lie down for (too) long a time with raised knees, nor shall one stay near a tree by night; at a crossing of three roads, the vicinity of a tope, a crossing of four roads, and a house of gods either;

Remarks

ciraṃ "(too) long" has been translated by *yun riñ* "for (too) long a time." The spelling *riñs* in CD is extremely rare (cf. Suv. p. 76.10 v. l.) and most probably corrupt.

seveta na "one shall not stay," which serves as a predicate for the following two elliptical sentences as well, has been placed at the end of the pāda and resumed later on by the final *o* (37d) and the auxiliary *min* (38b) respectively.

After *śin* "tree" the postposition *druṇ* "near" has been inserted.
tathā has been moved to the end of the stanza.

For *lha-yi khañ-pa'an* CD write *lhai khañ-pa yañ*, which is equally satisfactory.

I 2. 38

Sanskrit Text

sūnāṭaviśūnyagrhaśmaśānāni divāpi na |
sarvathekṣeta nādityaṃ na bhāraṃ śirasā vahet ||

(and) at an execution site, a forest, an empty house, and a cremation ground not even in the day-time. By no means shall one look into the sun or carry a burden on one's head,

Tibetan Version

gsod-sa 'brog ston khañ ston dan |
dur-khrod-du ni [6] ñin-mo'an min¹ |
rnam-kun ñi-ma[[5]]-la mi blta |
mgo-yis khur nā bskur mi bya ||

¹ CDN; *yin* P.

(and) at an execution site, a barren wilderness, an empty house, and a funeral place not even in the day-time. By no means shall one look into the sun or carry a burden on one's head,

Remarks

sūnā and its correspondent *gsod-sa* "execution site" may also be interpreted to mean "slaughtering-yard."

ataṇi "forest" has been translated by *'brog ston* "barren wilderness" as woods are not known in Tibet; Mvy. 5266 equates the word to *'brog* alone. Similarly, *śmaśāna* "cremation ground" has been replaced by *dur-khrod* "funeral place" because of the different customs in India and Tibet of disposing of the dead: while the Indians cremated the bodies, the Tibetans either buried, embalmed, burned, or cut them into pieces as food for animals (cf. KOEPPEN, Religion II p. 322 sq.). On material changes like this see Introd. § 27.

min has erroneously been spelt *yin* in P.

īkṣeta and *bhāraṃ* have been put after *ādityaṃ* and *śirasā* respectively.

bskur is attested so far only as the perfect, future, and imperative stem of *skur-ba* "to send"; here it must be taken for a secondary form of *bkur*, which is used in West Tibetan writings as the perfect (and future) stem of *'khur-ba* "to carry" (cf. DAS, Dict. p. 67).

I 2. 39

Sanskrit Text

neḥkṣeta pratataṃ sūkṣmadīptā¹medhyāpriyāṇi ca |
madyavikrayasaṃdhānadānādānāni nācaret ||

¹ B; °*dīprā* K.

nor shall one continuously look at minute, glittering, impure, and unpleasant (objects). One shall not indulge in the selling, preparing, offering, and accepting of liquor.

Tibetan Version

sin-tu phra dan 'thser-ba dan |
 (2) *mi-gtsaṅ mi((2))-sdug rgyun mi blta* |
chaṅ 'thson-ba dan *sbyor-ba-dag* |
sbyin dan len-la spyad mi bya ||

nor shall one continuously look at very minute, glittering, impure, (and) unpleasant (objects). One shall not indulge in selling, preparing, offering, and accepting liquor.

Remarks

nekṣeta and *pratataṃ* have been exchanged one for the other and transferred to the end of the sentence.

sūkṣma "minute" has been rendered by *sin-tu phra* "very minute."

dag (after *sbyor-ba*), which occurs in all the extant xylographs, is very strange in this connection. It might be explained by assuming that the translators analysed *vikrayasamdhānādānāni* as *vikrayasamdhāne* and *dānādāne*, in which case it would, properly speaking, be a dual suffix; cf. БЕКН, Beiträge p. 9 sqq., and FRANCKE, Addenda p. 113. There is, however, a strong possibility that *dag* is simply corrupt for *dan*.—The several verbal nouns have been converted into participles.

purovātātaparajastuśārāparuṣāṇilān |
anṛjuḥ kṣavathūdgārakāśasvapnānnamaitḥunam ||

Frontal wind and sunshine, haze, frost, and rough wind; sneezing, belching, cough(ing), sleep(ing, taking) food, and (performing) coitus in a twisted posture;

Tibetan Version

mdun-gyi bser¹-bu ṅi²[7] thsan rdul |
 [[6]] *ba-mo dan ni rluṅ rtsub³ dan* |
sbrid-pa sgregs-pa lud-pa zas |
gñid log ṅal-po gcu⁴ mi bya ||

¹ N; *ser* CD; *gser* P. ² CDN; *ṅin* P. ³ CD; *thsub* NP. ⁴ CD; *gcus* N; *bcus* P.

Frontal cold wind (and) hot sun, haze, hoar-frost, and rough wind—in sneezing, belching, cough(ing, taking) food, falling asleep, (and performing) coitus one shall not twist—;

Remarks

purovātāta (Tib. *mdun-gyi bser-bu ṅi thsan*) has been interpreted according to Suśr. IV 24.96 *na pratīvātātapam seveta* and Ḍaḥḥaṇa's explanation *abhimukhaṃ vātam ātapam vā . . . nādhyāsita nopaviśet* "one shall neither sit nor lie down facing wind or sunshine." Hence its translation by "frontal wind and sunshine" and "frontal cold wind (and) hot sun." The commentators understand *purovāta* to mean *pūrvadīgāgato vātaḥ* "wind blowing from an easterly direction" (Aruṇadatta's

paraphrase) while taking *puraātapa* in the sense of *pūrvātapa* “frontal sunshine.”—*bser-bu* is spelt *ser-bu* in CD and *gser-bu* in P, all three forms being in frequent use. For *ñi tshan* P writes erroneously *ñin tshan*; the same mistake occurs I 3.48 in both N and P.

tuṣāra may denote frost, cold, snow, mist, dew, or drizzle (MW p. 452); here it has been rendered *ba-mo* “hoar-frost.”

Instead of *rluñ rtsub*, the precise equivalent of *paruṣāṇila* “rough wind,” NP read *rluñ-thsub* “wind-storm, gale.”

anrju “twisted” has been placed at the end of the stanza and turned into a finite verb: *gcu mi bya* “one shall not twist.” Since this cannot possibly refer to the objects in pādas a and b (which are dependent on *spañ* 44d), we are given no choice but to treat the last two hemistichs as a parenthesis.—For *gcu* N has substituted *gcus*, the perfect of *gcud-pa* (misspelt *bcus* in P), which does not go with the following *mi bya*.

svapna “sleep” has been interchanged with *anna* “food” and reproduced by *gñid log* “falling asleep.”

I 2. 41

Sanskrit Text

kūlacchāyānrpadviṣṭavyāladamṣṭriviṣāṇinaḥ |
hinānāryātiniṣṇasevām vighrahaṃ uttamaiḥ ||

the shadow of a slope, the enemy of a king, a beast of prey, a tusked [fanged] animal, and horned cattle; intercourse with wicked, dishonourable, and overshrewd (people and) quarrel with superiors;

Tibetan Version

gad-khai griḥ-ma rgyal-po sdañ |
(3) *sbrul gdug ((3)) gcan-zan¹ rva-can dañ ||*

¹ NP; *gtsan-gzan* C; *gcan-gzan* D.

the shadow of a slope, the enemy of a king, a poisonous snake, a beast of prey, (and) horned cattle;

Remarks

kūla “slope” has been rendered by *gad-kha*, lit. “face of rock”; cf. Mvy. 8599, where the synonymous *taṭa* has been translated this way. What is apparently meant here is a precipice composed of brittle stone and liable to landslide; at any rate, *gad-pa* denotes in a more specific sense what is called by geologists pudding-stone or conglomerate: water-worn fragments of rock cemented into a mass.

nrpadviṣṭa, lit. “one who is hated by a king,” has been turned *rgyal-po sdañ*, lit. “one who hates a king.” Though the approach is different, both phrases come to the same.

damṣṭrin, which has changed places with *vyāla*, signifies any being possessed of tusks (elephant, boar, etc.) or fangs (lion, tiger, leopard, hyena, poisonous snake, etc.). The Tibetans have confined it to *sbrul gdug* “poisonous snake”; the exact correspondent would be *mche-ba-can*.

The spellings *gcan-zan* (NP) and *gcan-gzan* (D) are of equally frequent occurrence; *gtsan-gzan* (C) is a mistake.

The last two pādas are missing in Tibetan and hence are likely to be spurious.

I 2. 42

Sanskrit Text

saṃdhyāsu abhyavahārastrisvapnādhyayanacintanam |
śatrusatraganākirṇaganīkāpaṇikāśanam ||

taking food, (enjoying) women, sleep(ing), reading, and thinking at dawn and dusk; food (originating) from enemies, sacrifices, vagrants, meetings, harlots, and traders;

Tibetan Version

dus-mthsams-dag-tu zas bza dañ |
 [[7]] *bud-med* [19b1] *ñal klog¹ sems-las dañ |*
dgra-boi nar-mar zan thsogs 'dus |
smad-'thson thson-pai zas-dag dañ ||

¹ CD; *log* NP.

taking food, (enjoying) women, sleeping, reading, (and) thinking at dawn and dusk; food (originating) from enemy sacrifices; victuals (originating) from vagrants, meetings, harlots, (and) traders;

Remarks

saṃdhyāsu, lit. "at the junctures (of day and night)," has been rendered *dus-mthsams-dag-tu*, lit. "on the borders of time." Either phrase denotes the morning and evening twilight.

For *klog*, the equivalent of *adhyayana* "reading," NP write *log*, which, combined with the preceding *ñal*, would signify "falling asleep" (cf. v. 40); but this is doubtless corrupt.

śatru "enemy" has been considered to be dependent on, rather than co-ordinate with, *sattra* "sacrifice" (wrongly spelt *satra* in the printed texts): *dgra-boi nar-mar zan* "food (originating) from enemy sacrifices."—*nar-ma* in the present sense recurs only Bodhic. I 32a, where *sattraḍāyika* is translated *nar-mai zas* [zan N] *sbyor-ba*. After *nar-ma* an additional *zan* "food" has been inserted.

gaṇa (Tib. *thsogs*), lit. "troop," is interpreted by the commentators to denote *kathakacāraṇādayaḥ* "story-tellers, minstrels, etc."

ākīrṇa is explained by Indu in no less than four different ways: (1) as *ākīrṇam*, i.e. *prthagjanaiḥ* . . . *itastato vyāptam* "obtained by various people here and there"; (2) as *ākīrṇe*, i.e. *janasamsadī* "at a meeting of people"; (3) as *ākīrṇam*, i.e. *janair ākīrṇam* "scattered around by people"; and (4) as *ākīrṇāḥ*, i.e. *dhūrtāḥ* "rogues." The Tibetans have decided in favour of the second possibility.

gaṇikā "harlot" has been paraphrased by *smad-'thson*, which properly means "she who sells her lower part."

śāna "food" has been put in the plural: *zas-dag* "eatables, victuals."

I 2. 43

Sanskrit Text

gātravaktranakhair vādyam hastakeśāvadhūnanam |
toyāgnipūjyamadhyena yānam dhūmaṃ śavāśrayam ||

music (made) by body, mouth, and nails; the shaking of hands and hair; the walking between (two) waters, fires, and respectable (men); the smoke resulting from (the cremation of) corpses;

Tibetan Version

lus dan mchu dan sen sgra 'byin /
 lag-pa skra ni sprug¹-pa (4) dan /
 chu me ((4)) mchod-byai bar-du 'gro /
 [[8]] ro bsregs-la bsten² dud-pa dan //

¹ NP; sprugs CD. ² NP; brten CD.

making noise with body, lips, and nails; shaking hands (and) hair;
 walking between (two) waters, fires, (and) respectable (men); smoke
 resulting from the cremation of corpses;

Remarks

vaktra "mouth" has been changed into mchu "lip" and vādyā "music" into sgra 'byin "causing noise to come forth, making noise." This and the next precept are apparently aimed at those who, like modern jazz fans, make a habit of accompanying music by striking their bodies, clicking with their tongues or lips, clapping their hands or finger-nails, and the like. This is also the interpretation proposed by K. L. BHISHAGRATNA for the parallel passage in Suśr. IV 24.95 na gātranakhavak-travādītram kuryāt "one shall not make music with body, nails, and mouth" or, as the commentator Ḍaḥaṇa puts it, na gātram vādyabhāṇḍam kuryāt "one shall not make one's body a musical instrument."

For sprug-pa CD have substituted the perfect sprugs-pa, which serves here as an action-noun.

dhūmaṃ śavāśrayam "smoke resulting from corpses" has been paraphrased by ro bsregs-la bsten dud-pa "smoke resulting from the cremation of corpses." For bsten, the perfect and future root of sten-pa, CD give brten, the perfect and future root of rten-pa; both verbs are almost synonymous and have been interchanged once before (see v. 8).

attachment to liquor etc.; and confidence in, (and) independence from, women: (all these things) one shall eschew. In all activities of a wise (man) the world alone is his teacher;

Remarks

Instead of *madyātisaktim* "excessive attachment to liquor" the text used by the translators must have read *madyādisaktim* "attachment to liquor etc.," as appears from the Tibetan *chan s(ts)ogs chags*; this variant is not, however, found in any of the present editions.

svātānrya "independence" has been rendered *rañ-dbañ gyur-pa*, lit. "the having become, being, independent." The variant *gyur-pas* in NP is unclear and, at any rate, does not agree with the original; it may perhaps be understood this way: "confidence in women one shall eschew by independence (from them)."

ācāryaḥ has changed places with *dhīmataḥ* for syntactical reasons.

I 2. 45

Sanskrit Text

anukuryāt tam evāto laukike 'rthe¹ parīkṣakaḥ |
ādrasamānātā tyāgaḥ kāyavākcetasām damaḥ ||

¹ B; *laukikārthe* K.

therefore (he who is) circumspect in worldly matters shall follow this alone. Soft-mindedness, liberality, control of body, speech, and mind, (and)

Tibetan Version

de-bas 'jig[[19b1]]-rten-pa-yi don |
(5) rtogs-par byed¹-pas de ñid bya |
((5)) sñiñ-rjes brlan²-ñiñ gtoñ³ dan ldan |
lus dan ñag yid [3] dul-ba dan ||

¹ CDN; *byad* P.

² CD; *bslan* NP.

³ CD; *ston* NP.

therefore he who knows worldly matters shall follow this alone. Being soft with pity, possessed of liberality, controlled in body, speech, (and) mind, and

Remarks

anukuryāt and *tam eva* have been interchanged and transferred to the end of the sentence, *bya* being apparently elliptical for *rjes-su bya*; cf. Mvy. 7500, where *rjes-su byed-pa* corresponds to *anuvīdhāna* "obedience."

To *rtogs-pa* "to know" (~ Latin *novisse*) *byed-pa* has been added as an auxiliary; *byad-pa* in P is a mistake.

ādrasamānātā "soft-mindedness" has been rendered by *sñiñ-rjes brlan-ñiñ* "being soft with pity," *tyāga* "liberality" by *gtoñ dan ldan* "possessed of liberality," and *kāyavākcetasām damaḥ* "control of body, speech, and mind" by *lus dan ñag yid dul-ba* "controlled in body, speech, (and) mind." — The spellings *bslan* (for *brlan*) and *ston* (for *gtoñ*) in NP have yet to be verified.

Sanskrit Text

svārthabuddhiḥ parārtheṣu paryāptam iti sadvratam |
nakṭamdināni me yānti kathambhūtasya samprati ||

in other (people's) affairs the (same) attitude (as) in one's own affairs: thus noble conduct (is) perfect. "My nights and days are passing now, (myself) being in what situation?"

Tibetan Version

gzan-gyi don-la rañ don sems |
de-dag dam-pai spyod mthar thug |
de-ltar bdag ni [[2]] ñin¹ mthsan-du |
ji-lta-bur ni gnas² gro źes ||

¹ DNP; ñid C.

thinking about other (people's) affairs (the same way as) about one's own affairs: these (traits make up) noble conduct carried to the limit. "I am moving about day (and) night now, being in what situation?"

Remarks

svārthabuddhiḥ "attitude towards one's own affairs" has been placed after *parārtheṣu* "towards other (people's) affairs" and, like the preceding nouns, put verbally: *rañ don sems* "thinking about one's own affairs."

paryāpta "perfect" has been transferred to the end of the sentence and rendered *mthar thug* "reaching, carried to, the limit."

For *iti* "thus" has been substituted *de-dag* "these (traits)."

The last two pādas have been arranged and construed somewhat differently, though the underlying sense remains unaffected.

naktam̐dina "night and day" has been turned *ñin mthsan* "day (and) night"; *ñid* (for *ñin*) in C is an error.

saṃprati "now" has been translated by *de-ltar*, which usually means "so" (~ *evam*, *tathā*), but sometimes corresponds to *adhunā* (Mvy. 8297) or *sāṃpratam* (Mvy. 8298) "now" as well.

I 2. 47

Sanskrit Text

duḥkhabhāñ na bhavaty evaṃ nityaṃ saṃnikhitasmṛtiḥ |
ity ācāraḥ samāsenā saṃprāpnoti¹ samācāraṇ ||

¹ B; *yaṃ prāpnoti* K.

de-ltar spyod-pa mdor bsduṣ-pas |
[4] gañ-źig kun-tu spyod byed-pa ||

Applying one's awareness constantly to this (idea) [źes 46d], one does not become participant in distress.—Such is, in short, the conduct (during every day), observing which

Remarks

The pādas a and b have been interchanged on grounds of syntax, with *evam* transferred to the end of the preceding stanza.

saṃnikhitasmr̥ti "having one's awareness fixed on" has been rendered *dran-pa ñer* 'jog-pa "applying one's awareness to," which is only a verbalization of *dran-pa ñer* [or ñe-bar] *bzag-pa*, the Tibetan correspondent of *smṛtyupasthāna* "application of awareness" (Mvy. 952 sqq.). Thus there can be little doubt but that the pādas 46cd and 47ab reproduce a purely Buddhist train of thought. A detailed account of the four kinds of *smṛtyupasthāna* (Pali *satipaṭṭhāna*), pertaining to the body (*kāya*), the sensations (*vedanā*), the mind (*citta*), and the phenomena (*dharma*) respectively, is given Śikṣ. 228.9 sqq.

prāpnoti "one attains" has been placed at the end of the sentence (48b) and put in the future tense: 'thob'gyur "one will attain." The prefix *saṃ*° is evidently corrupt for *yaṃ* as found in the Kottayam edition and corroborated by the Tibetan *gañ-ñig*.

I 2. 48

Sanskrit Text

āyur ārogyam aiśvaryaṃ yaśo lokāṃś ca śāśvatān ||

long life, health, power, fame, and the eternal worlds.

Tibetan Version

thse dañ nad-med dbaṅ-phyug dañ |
[[3]] *grags-pa 'jig-rten rtag 'thob 'gyur ||*

one will attain long life, health, power, fame, (and) the eternal worlds.

Remarks

ārogya has been metaphrased by *nad-med*, both words properly signifying "non-disease."

aiśvarya "power" has been translated by *dbaṅ-phyug*, which ordinarily means "master" (lit. "he who is rich in power"), but occasionally stands for "power" (lit. "richness in power") as well; cf. Mvy. 6539.

Sanskrit Text

*māsair dviṣaṃkhyair māghādyaiḥ kramāt ṣaḍ ṛtavaḥ smṛtāḥ |
śiśīro 'tha vasantas ca grīṣmavarṣāśaraddhimāḥ ||¹*

¹ Line missing in K.

With the months numbering two (each and) beginning with Māgha, (there are) said (to be) six seasons in succession: pre-spring, then spring, and summer, monsoon, autumn, and winter.

Tibetan Version

*[5] dgun-zla ra-ba sogs¹ gñis[[4]]-gñis |
rim-bzin dus ni drug-tu bsad ||*

¹ NP; *stsogs* CD.

Beginning with Mārgaśīrṣa (and comprising) two (months) each, there are said to be six seasons in succession.

Remarks

māsa "month" has been left untranslated; for the instrumental absolute see WHITNEY, Skr. Gr. § 281 g.

dviṣaṃkhyā "numbering two" has been placed after *māghādya* and rendered simply by *gñis-gñis* "two each."

māghādya “beginning with Māgha”¹ has been changed to *dgun-zla ra-ba* (*mgo-la*) *s(ts)ogs* “beginning with Mārgaśīrṣa” (cf. Mvy. 8270). This substitution of the first month of winter (according to the Tibetan calendar) for the first month of pre-spring (according to the Indian calendar) deserves notice inasmuch as it agrees precisely with the parallel passage in As. I 4 (~ I p. 24a11 *sqq.*), which reads:

tair (māsair) mārgaśīrṣādībhir dviṣaṃkhyaiḥ kramād dhemantaśīśiravasanta-grīṣmavarṣāsāraddākyāḥ ṣaḍ ṛtavo bhavanti |

With these (months) beginning with Mārgaśīrṣa (and) numbering two (each), there are six seasons in succession, called winter, pre-spring, spring, summer, monsoon, and autumn.

The same sequence recurs in Ak. I 1.3.14 *sqq.* and MBh. XIII 106.17; it is supposed to have been prevalent especially among Northern Buddhists (see WEBER, Nachrichten II p. 333).

The second half of the stanza is wanting in Tibetan; as it is not found in K either, it is doubtless an interpolation.

I 3. 2

Sanskrit Text

*śīśirādyaś tribhis tais tu vidyād ayanam uttaram |
ādānaṃ ca tad ādatte nrnāṃ pratidinaṃ balam ||*

Pre-spring etc.—by these three (seasons) one shall know the northern course (of the sun), and this (is named) “absorption” (as) it absorbs strength from man every day.

¹ In starting the year with the month of Māgha and the season of Śīśira, Vāgbhaṭa follows Suśr. I 6.6:

*tatra māghādayo dvādaśa māsāḥ | dvimāsikam ṛtuṃ kṛtvā ṣaḍ ṛtavo bhavanti |
te śīśiravasanta-grīṣmavarṣāsāraddhemantāḥ | teṣāṃ tapastapasyau śīśirah madhu-
mādhavaṃ vasantaḥ śuciśukrau grīṣmaḥ nabhonabhasyau varṣāḥ iṣorjau śarat
sahāsahasasyau hemanta iti ||*

Next (come) the twelve months, beginning with Māgha. Making a season bimes-trial, there are six seasons. They (are) pre-spring, spring, summer, monsoon, autumn, and winter. Of these, Tapas and Tapasya (make) pre-spring; Madhu and Mādhava, spring; Śuci and Śukra, summer; Nabhas and Nabhasya, monsoon; Iṣa and Ūrja, autumn; (and) Sahas and Sahasya, winter.

This system, termed by HOERNLE (Transl. p. 35) as “civil” in contrast to the medical one that immediately follows, derives its origin from an isolated Vedic tradition preserved, for example, in Jyot. I 6 *sq.*:

*māghaśukla-prapaṇṇasya pauṣaḥkrṣṇasamāpinaḥ |
yugasya pañcavarṣasya kālajñānaṃ pracakṣate ||
sva ākramete somārkaṃ yadā sākaṃ savāsavaṃ |
syāt tadādi yugaṃ māghaś tapah śuklo 'yanam hy udak ||*

(Now the author) sets forth the chronology of the five-year cycle starting with the bright half of Māgha (and) ending with the dark half of Pauṣa. When the moon and sun ascend the sky together, being in conjunction with Vāsava [21st lunar mansion], then the cycle, the (month) Māgha (or) Tapa, the bright half, (and) the northern path begin.

For details of interpretation see WEBER, Nachrichten II p. 354 *sqq.* and Veda-kalender p. 23 *sqq.*

Tibetan Version

de-las dgun-zla tha-chuñ sogs¹ /
 gsum ni byañ-du 'gro źes bya /
 de thse mi-rnams ñin re-źiñ² /
 mthu 'phrog³-pa źes (48b1) bya-ba yin ||

¹ NP; chuñs stsogs CD.

² NP; bźin CD.

³ NP; 'phrogs CD.

Of these the three (seasons) beginning with (the month of) Māgha are called the northern course (of the sun); this period, absorbing strength from man every day, is named accordingly.

Remarks

Considerable liberties have been taken by the translators both with the arrangement and with the construction of the present verse. As stating these in detail would be useless, mention is made only of some special points of interest.

śiśirādyāḥ and *tribhis taiḥ* form at first sight an anacoluthon; since the pādas 1 c and d are probably spurious, however, it is more likely that the original text had a period after *śiśirādyāḥ*. Besides, *śiśira* "pre-spring" has been replaced by *dgun-zla tha-chuñ* (*mchu*) "Māgha" (cf. Mvy. 8272), which is the last month of winter according to the Tibetan calendar, but the first month of pre-spring according to the Indian division of the year as found from the Sūtra period onwards. As such, and not as the name of a season, the term is here to be understood. The proper Tibetan equivalent would be *dgun-smad* (cf. Mvy. 8258).—The variant reading *tha-chuñs* (CD) is met with already in Mvy. 8263 & 8269.

vidyāt "one shall know" has been translated by *źes bya* "are called," which is apparently corrupt for *śes bya* "are to be known"; cf. 1.19, where *viññeya* also corresponds to an erroneous *źes bya*.

For 'phrog-pa CD have substituted 'phrogs-pa, which recurs in v. 4 as the spelling of P, in v. 17 again as that of CD, and in v. 42 as that of all xylographs. Also see Mvy. 5363.

pratidinam "every day" (like *dina°* in I 2 introd.) has been rendered by *ñin re-źiñ*. CD read *ñin re bźin* instead, which would be καθ' ἐκάστην τὴν ἡμέραν (Isoc. IV 78), the Tibetan *bźin* or *bźin-du* being often equivalent to the Greek κατά with accusative; cf. JÄSCHKE, Dict. p. 483.

I 3. 3

Sanskrit Text

tasmin hy¹ atyarthatikṣṇoṣṇarūkṣā mārgasvabhāvataḥ /
 ādityapavanāḥ saumyān kṣapayanti guṇān bhuvaḥ ||

¹ B; tasminn K.

For in this (period) the sun and winds, being exceedingly violent, hot, and rough because of the nature of the (solar) path, destroy the soma-like qualities of the earth.

Tibetan Version

de thse śin-tu rno((48b1))-źiñ thsa /
 rtsub-pai lam[6][[5]]-gyi¹ ño-bo-ñid /
 ñi-ma rluñ-gi zla-ba-yi /
 sa-yi yon-tan zad-par byed ||

¹ NP; las-kyi CD.

In this period, (because of) the exceedingly violent, hot, (and) rough nature of the (solar) path, the sun (and) winds destroy the moon-like qualities of the earth.

Remarks

hi “for” has been omitted in the Kottayam edition as well as in Tibetan.

atyarthatīkṣṇoṣṇarūkṣa “exceedingly violent, hot, and rough” has been connected with *mārgasvabhāva* “nature of the (solar) path” instead of *ādityapavana* “sun and wind.” It looks as if the translators had a variant *atyarthatīkṣṇoṣṇarūkṣamārgasvabhāvataḥ* before them, although the possibility of a change in construction cannot be excluded.—*rtsub-pai* and *lam-gyi* (for which CD falsely write *las-kyi*) are both adjuncts of *ño-bo-ñid*; a similar instance is the following *zla-ba-yi sa-yi yon-tan*. That the adjectival precedes the substantival attribute in such cases is a point not expressly mentioned by modern grammarians.

ñi-ma rluñ-gi must here be taken for the agent, the suffix *gi* being sometimes used to denote the instrumental; see LALOU, Manuel p. 24, and WELLER, Index p. 4.

saumya “soma-like” has been rendered by *zla-ba* “moon-like,” either term meaning as much as “cool and moist.” This agrees with the practice current in post-Vedic mythology of equating Soma, the god of the soma plant¹ and the divine intoxicant made of it, with the moon, the lord of plants and the receptacle of the other divine beverage called “nectar” (*amṛta*).

kṣapayanti “destroy” has been transferred to the end of the sentence and metaphorised by *zad-par byed*, lit. “make consumed.”—*guṇān* has been interchanged with *bhuvaḥ*.

¹ Perhaps *Sarcostemma brevistigma* W. & A. The attempts of identifying soma are legion; some have been recorded by MÜLLER, *Asiatica* p. 436 sq.

13. 4

Sanskrit Text

tikṭaḥ kaṣāyaḥ kaṭuko balino 'tra rasāḥ kramāt |
tasmād ādānam āgneyam ṛtavo dakṣiṇāyanam ||

Then the (rough) flavours bitter, astringent, (and) pungent (are) strong in succession. Therefore (the period of) absorption (is) fire-like.—The southern course (of the sun comprises) the seasons

Tibetan Version

'dir ni tsa bska kha-ba-yi |
ro-rnams stobs ni che-ba yin |
de-bas me ni mihu-stobs 'phrog¹ |
lho-phyogs-su ni 'gro-bai dus ||

¹ CDN; *'phrogs* P.

Then the (rough) flavours bitter, astringent, (and) pungent are great in strength. Therefore fire absorbs strength.—The seasons of the southern course (of the sun),

Remarks

tikta "bitter" and *kaṭuka* "pungent" have been translated by *thsa(-ba)* and *kha-ba* respectively, on which see 1.14.

balin "strong" has been placed at the end of the sentence and rendered by *stobs ni che-ba* "great in strength." The missing copula has been added.

atra "then" and *rasa* "flavour" have been transferred to the beginning of the first and second hemistichs respectively, while *kramāt* "in succession" has been omitted.

tasmād ādānam āgneyam "therefore absorption (is) fire-like," which relates to what is said in vv. 3 and 4ab, has been altered to *de-bas me ni mthu-stobs 'phrog* "therefore fire absorbs strength," *mthu-stobs* being, properly speaking, a tautology ("strength & power").—On *'phrog(s)* see v. 2.

The following period has been handled rather freely, especially as far as the syntactical relationship of the several clauses is concerned.

I 3. 5

Sanskrit Text

varṣādayo visargaś ca yad balaṃ visrjaty ayam /
saumyatvād atra somo hi balavān hīyate raviḥ //

monsoon etc. and (is named) "liberation" as it liberates strength (in man); for the moon (is) strong then because of its being soma-like, (while) the sun declines,

Tibetan Version

dbyar[[6]]-la sogs-pai¹ (2) slar ((2)) stobs bskyed² /
[7] 'di stobs slar ni bskyed²-pas-na /
'dir ni bsil-bas zla-ba ni /
stobs dan ldan-pas ñi-ma 'bri //

¹ CD; *par* NP.

² NP; *skyed* CD.

(those) beginning with monsoon, re-create strength (in man); as they re-create strength, the moon is strong then because of its coolness, while the sun declines.

Remarks

dbyar-la sogs-pai is dependent on *dus*, which must be repeated from the previous stanza. NP write *dbyar-la sogs-par* instead, which presupposes a different interpretation of the whole sentence: "During the seasons of the southern course (of the sun), (namely) monsoon etc., strength (in man) is re-created." But in either case *dakṣiṇāyana* has been treated as an adjunct of *ṛtu*, which is incompatible with the Sanskrit text.

visarga "liberation" has been verbalized and paraphrased by *slar stobs (b)skyed* "re-create strength," in much the same way that *ādāna* "absorption" (v. 2) has been represented by *mthu 'phrog(s)-pa* "absorbing strength." Similarly, the corresponding *visrjati* "liberates" has been translated by *slar (b)skyed* "re-create."

ca "and" has been omitted and *yad* "as" replaced by the composite suffix *pas-na*. Besides, the causative clause has been connected with what follows rather than with what precedes.

idam has been put at the head of the pāda and referred to *ṛtu* instead of *dakṣiṇāyana* as required by the above change of construction.

saumyatvād and *atra* as well as *hīyate* and *raviḥ* have been transposed on syntactical grounds. For *saumyatva* "being some-like" the Tibetans have substituted *bsil-ba* "coolness"; see v. 3.

I 3. 6

Sanskrit Text

meghavṛṣṭyanilaiḥ śitaiḥ śāntatāpe mahitale /
snigdhas cehāmlalavanamadhurā balino rasāḥ //

the surface of the earth showing heat tempered by cool clouds, rains, and winds. And now the smooth flavours sour, salt, and sweet (are) strong.

Tibetan Version

char 'bab-pa dan' rluṅ bsil-bas /
sa-steṅ¹ tsha-ba ṣi-ba-na /
'dir [[7]] ni snum dan' skyur lan-thsva /
mñar-bai ro-rnams mthu bskyed²-do //

¹ NP; *steṅs* CD.

² NP; *skyed* CD.

When the surface of the earth has been tempered in its heat by cool rainfall and wind, then the smooth as well as sour, salt, (and) sweet flavours develop strength.

Remarks

megha "cloud" has been left untranslated, whereas *vṛṣṭi* "rain" has been turned *char 'bab-pa* "falling rain, rainfall"; cf. Mvy. 4634 & 5311 sq.

śāntatāpa "showing tempered heat" has been interchanged with *mahītala* "surface of the earth" and resolved into *tsha-ba ṣi-ba* "tempered in its heat." The locative absolute, which still belongs to what precedes, has been rendered by a temporal clause and joined to the next sentence so as to keep the original word-order intact. — The spelling *sa-steṅs* (CD) is rare though not unique; it recurs, for example, in Bodh. X 36 (D) and in Mvy. 3423.

ca "and," which is meant to contrast *iha* "now" with *atra* "then" in v. 4 (*caśabdo vyatireke* Indu), has been wrongly interpreted to link *snigdha* with *amlalavanamadadhura*. — On the formal differentiation between rough (*rūkṣa*) and smooth (*snigdha*) flavours see I 10.37 sq.

iha "now" has been placed at the head of the main clause and correlated to *ṣi-ba-na* "when it has been tempered," taking the sense of "then."

balin "strong" has been transferred to the end of the stanza and paraphrased by *mthu (b)skyed-do* "develop strength."

I 3. 7

Sanskrit Text

śīte 'gryaṃ vṛṣṭigharme 'lpaṃ balaṃ madhyaṃ tu śeṣayoḥ /
balinaḥ śītasamrodhād dhemante prabalo 'nalāḥ //

Strength (is) greatest in the cold (season and) little in monsoon and summer, but middling in the remaining two (seasons). In a strong (man)

the (digestive) fire is [*bhavaty* 8a] strong during winter because of its obstruction by cold.

Tibetan Version

((3)) *dgun* (3) *che*¹ [20a1] *char dan thsa dus-su* |
stobs chun lhag-ma-dag-la 'brin |
stobs-ldan gran-bas bkag-pas-na |
dgun-gyi dus-su me stobs ldan ||

¹ NP; *thsa* C; *thse* D.

Strength is great in winter, little in the monsoon and summer seasons, (and) middling in the remaining two (seasons). In a strong (man) the (digestive) fire is strong during the winter season because it has been obstructed by cold.

Remarks

śīta "cold," like *śītakāla* "cold season" in 2.11, denotes the period from mid-November till mid-March going by the name of *hemantaśisira* "winter & pre-spring." The Tibetans have simply put *dgun* "winter" (Mvy. 8257) in its place; if this term is also representative of *dgun-smad* "pre-spring" (Mvy. 8258) remains to be seen.

agrya "greatest," itself a superlative, has been degraded to the positive *che(-ba)* "great," of which *thsa* (C) and *thse* (D) are mere corruptions.

alpa and *bala* as well as *mādhya* and *śeṣa* have been interchanged for syntactical reasons, while *tu* has been omitted. That *bala* has been retained in its mid-sentence position is noteworthy, though.

śeṣayoḥ has been translated by *lhag-ma-dag-la*, the suffix *dag* being expressive of the dual. This harmonizes with the result БЕКН has obtained from a close study of the Tibetan Meghadūta (Beiträge p. 9 sqq.); his findings are questioned by FRANCKE (Addenda p. 113).—The three temporal locatives *śīte*, *vr̥ṣṭigharme*, and *śeṣayoḥ* have been reproduced each by a different case: the first by an accusative (*dgun*), the second by a terminative (*char dan thsa dus-su*), and the third by a dative (*lhag-ma-dag-la*).

śītasamrodhāt "because of its obstruction by cold" has been turned into a gerundial clause: *gran-bas bkag-pas-na* "because it has been obstructed by cold."—Indu explains the meaning of the whole sentence as follows:

vahn̄er āsmāṇo romakūpair bahir nihsaranto bāhyena śait̄yena samruddhāḥ pratinivṛtyodaraṁ praviśya tam evāgniṁ samvardhayanti |

"The vapours of the (digestive) fire, coming forth through the pores, (are) stopped by the outward cold (and), having turned back (and re-)entered the belly, increase this very fire."

He refers in this connection to As. I 4 ~ I p. 24b16 sqq., which starts as under:

dehoṣmāṇo viśanto 'ntaḥ śīte śītānīlākatāḥ |

*udare*¹ *piṇḍitoṣmāṇam prabalaṁ kurvate 'nalam* ||

"The vapours of the body, turning inwards in the cold (season after having been) struck by cold wind, make the (digestive) fire strong, its vapours having been condensed in the belly."

¹ The Trichur edition prints *jāṭhare*.

I 3. 8

Sanskrit Text

*bhavaty alpendhano dhātūn sa paced vāyuneritaḥ /
ato hime 'smin seveta svādvamlalavaṇān rasān //*

Having (only) little fuel, it may cook the elements (when) kindled by wind. In this cold (season), therefore, one shall turn to the sweet, sour, and salt flavours.

Tibetan Version

*[[8]] de ni rluṅ-gis sbar-bas-na /
zas ṅuṅ gyur-na lus-zuṅs skems /
de-bas dgun ni mñar skyur [2] dan /
lan-thsvai ro ni ((4)) bsten-par (4) bya //*

As it is kindled by wind, it may parch the elements if fuel has become little. In winter, therefore, one shall turn to the sweet, sour, and salt flavours.

Remarks

bhavati "is" still belongs to the preceding sentence. Enjambments like this are not uncommon in the prosody of Vāgbhaṭa and other medical authors.

dhātu "element" has been translated etymologically by *lus-zuṅs* "body-hold"; cf. 1.13.

sa and *vāyuneritaḥ* have been transferred to the beginning of the stanza.

pacet "may cook" has been rendered freely by *skems* "may parch." The same form recurs in Dbh. V f (~ *ucchoṣayati*), Suv. p. 29.8 (~ *saṁśuṣyate*), and Suv. p. 48.18 (~ *saṁśoṣaka*), while the usual spelling is *skem(-pa)*.—The idea behind this is that the digestive fire metabolizes the elements if the intake of food and hence the production of humours is insufficient. Indu cites a later¹ verse, which says:

*āhāram agniḥ pacati doṣān āhārararjitaḥ /
dhātūn kṣiṇeṣu doṣeṣu jīvitam dhātusamkṣaye //*

"The (digestive) fire (usually) cooks the food; if it lacks food, the humours; if the humours have been consumed, the elements; after the consumption of the elements, life (itself)."

hime 'smin "in this cold (season)" has again been simplified to *dgun* "in winter"; cf. v. 7.

seveta "one shall turn to" has been placed at the end of the sentence.

rasa and its equivalent *ro* "flavour" have been used metonymically for food possessed of the flavours mentioned.

¹ if we understand the introductory *vakṣyati ca* correctly; our endeavours to trace this couplet in the extant editions (hampered by the total lack of indexes) proved unsuccessful.

I 3. 9

Sanskrit Text

*dairghyān niśānām etarhi prātar eva bubhukṣitaḥ /
avaśyakāryaṁ sambhāvya yathoktaṁ śīlaye anu //*

(Though) being hungry already at dawn because of the length of the nights in this period, one shall (first) perform the necessary business as mentioned (above) and then practise

Tibetan Version

de thse mthsan-mo rin-bas-na /
nan-par ñid ni bkres-par 'gyur /
nes-par [[20 a 1]] bya-ba byas-nas ni /
ji-skad bsad rdzogs de rjes-la //

(Though) getting hungry already at dawn because the nights are long in this period, one shall (first) perform the necessary business and then, after having completed whatever has been mentioned (above),

Remarks

The phrase *daīrghyān nīśānām etarhi* “because of the length of the nights in this period” has been inverted and verbalized: *de thse mthsan-mo rin-bas-na* “because the nights are long in this period.”

bubhukṣitaḥ “being desirous to eat, hungry” has been rendered by *bkres-par 'gyur* “getting hungry.”

saṃbhāvyā and its correspondent *byas-nas*, lit. “having performed,” are translated here as finite verbs in order to make the English version readable.

yathoktam “as mentioned (above),” which refers to the instructions of chapter two (particularly vv. 1—6), has been severed from its governing verb (*saṃbhāvyā*) and turned into a separate clause: *ji-skad bsad rdzogs* “after having completed whatever has been mentioned (above).”

śīlayet “one shall practise” has been omitted and compensated for by transforming the action-nouns dependent on it into predicates.

I 3. 10

Sanskrit Text

vātaghnataīlair abhyāṅgaṃ mūrdhni¹ tailaṃ vimardanam /
niyuddhaṃ kuśalaiḥ sārḍhaṃ pādāghātaṃ ca yuktitāḥ //

¹ B; *mūrdha*° K.

inunction (of the body) by wind-destroying oils, oil(ing) at the head, massage, wrestling with competent people, and treading with one's feet; (all this) in a proper way.

Tibetan Version

rluñ 'joms til-mar-gyis byug-ciñ /
spyi-bo¹ til-mar-gyis byug [3] mñe /
bag-yod-pa dan stobs 'gyed-ciñ /
rkañ²-pas ran-par [[2]] mñe-bar (5) bya //

¹ CD add 'aṇ.

² CDN; *kañ* P.

anoint (one's body) with wind-destroying oils, anoint one's head with oil, massage (one's limbs), try one's strength with careful people, and tread with one's feet in a proper way.

Remarks

After *spyi-bo* "head" CD insert an enclitic 'an "also."

niyuddha "wrestling" has been interchanged with its adjunct and paraphrased by *stobs 'gyed(-pa)* "try one's strength."

kuśala "competent" has been translated by *bag-yod-pa* "careful."

yuktitaḥ "in a proper way" has been placed before, and connected only with, *pādāghāta* "treading with one's feet," although it belongs to the other action-nouns as well.—*kañ* (for *rkañ*) in P is a mistake.

I 3. 11

Sanskrit Text

kaṣāyāpahṛtasnehas tataḥ snāto yathāvidhi |
kuṅkumena sadarpaṇa pradigdho 'guru¹dhūpitah ||

¹ B; 'garu^o K.

Having thereupon bathed according to ritual—with the oil removed by an astringent—, rubbed (one's body) with musk-charged saffron, (and) fumigated (oneself) with aloe-wood:

Tibetan Version

((5)) *de-nas bska-bas snum bsal-la¹ |*
cho-ga bzin-du khruś dag bya |
gur-gum gla-rtsi dan bcas-pas² |
lus bsku a-ka-ru-yis bdug ||

¹ CDN; ba P.

² CD; pa NP.

Thereupon, having removed the oil with an astringent, one shall purify (oneself) by a bath according to ritual, rub one's body with musk-charged saffron, fumigate (oneself) with aloe-wood,

Remarks

The participial phrases *snāta*, *pradigdha*, and *dhūpita* have been turned into gerundial clauses almost co-ordinate with the main sentence (vv. 12—14).

The possessive compound *kaṣāyāpahṛtasneha* "with the oil removed by an astringent" has been placed after *tatas* "thereupon" and rendered by a temporal clause: *bska-bas snum bsal-la* "having removed the oil with an astringent." For *bsal-la* P reads *bsal-ba*, which is probably corrupt, though an absolute participle seems to be not altogether impossible in such cases; cf. v. 45, where NP have *byas-pa* instead of *byas-la*.

snāta "having bathed" has been interchanged with *yathāvidhi* "according to ritual" and translated by *khruś dag bya* "shall purify (oneself) by a bath."

For *bcas-pas* NP write less correctly *bcas-pa*.

To *bsku* "shall rub" *lus* "body" has been added.

I 3. 12

Sanskrit Text

rasān snigdhan palam puṣṭam gaudam acchasurām surām |
godhūmapiṣṭamāṣekṣukṣūrotthavikṛtiḥ śubhāḥ ||

one shall (at last) turn to [bhaḥet 14b] rich broths, fat meat, rum, barm, arrack, delicious products made of wheat, (rice-)flour, urd-beans, sugar-cane, and milk,

Tibetan Version

śa thson khu-ba [4] snum-pa dan /
bu-ram-chañ dan chañ-dañs [[3]] chañ /
gro dan 'bras-khur ma-śa dan /
o-ma bu-ram-śiñ byas bza //

(and at last) turn to [brten-par bya 14b] fat meat, rich broths, rum, barm, arrack, food made of wheat, rice-flour, urd-beans, milk, (and) sugar-cane,

Remarks

rasān snigdhan "rich broths" has been interchanged with *paṣaṇ puṣṭam* "fat meat."

acchaturā (~ *chañ-dañs*), lit. "clear spirits," is explained by Aruṇadatta and Indu as *surāmaṇḍa* "barm," while the following *surā* (~ *chañ*), lit. "spirits," is taken by Indu to mean liquor "made of grain" (*piṣṭakṛta*), that is roughly, "arrack." *piṣṭa* "flour" has been translated by 'bras-khur "rice-flour"; cf. Indu's gloss *sālīpiṣṭa* at As. I 4 ~ I p. 25b9.

ikṣu "sugar-cane" has been placed after *kṣīra* "milk."

vikṛti "product" has been rendered by *bza* "food," whereas its adjunct *śubha* "delicious" has been omitted.

dreu[5]-rñog reu-bal la-ba⁵ gdiñ //

¹ N(?)P; *spra* CD. ² CDP; *peu* bslag N. ³ CD; *dan* NP.

⁴ P; *stsogs* CD; *sog* N. ⁵ *la-ba* NP; *chen* CD.

fresh victuals, lard, (and) sesame-oil; (besides), to purification with tepid water, to a quilt, fur-coat, silk-dress or the like, mule's-hair cushion, kid's-wool blanket, (and) carpet,

Remarks

The phrase *śaucakārye sukhodakam* "tepid water for purification" has been modified to *dro-jam chu-yis gtsaṅ-sbra bya* "purification with tepid water." The spellings *gtsaṅ-sbra* in NP and *gtsaṅ-spra* in CD are both of frequent occurrence (cf. Mvy. 6369 & 6479).

The following adjective-compound, which is dependent upon *śayana* "bed" in 14b, has been separated from its governing noun and treated as a copulative compound, with the final *āstṛta* "covered" nominalized into *gdiṅ* "carpet." For identifying the various textiles here mentioned, we have consulted the commentaries of Aruṇadatta, Candranandana, Hemādri, Indu, and Cakrapāṇidatta (on Car. I 6.15).

prāvāra "quilt," synonymous with (*varṇa*-)*kambala* and (*sthūla*-)*paṭa*, is described as "a heavy cover" (*guru-prāvarāṇa* Cakrapāṇidatta) "woven together from cotton etc. and the hair of sheep, deer, rams etc." (*kārpāsādīnāviraṅkūrābhrādiromaḥhiṣ ca saṃśyūtaḥ* Indu). The Tibetan equivalent *beu-ras*, lit. "calf-cotton," seems still to reflect the animal and vegetable raw material used in its manufacture.

ajina "hide" denotes "the pleasant-to-touch hairy skin of tigers etc." (*vyāghrādīnāṃ sukhasparśaṃ romaśaṃ carma* Indu). For its counterpart (*g*)*yaṅ*-(*g*)*zi* or (*l*)*pags-pa* (Mvy. 6994), the translators have substituted *slag-pa* "fur-coat."—*peu bsag-pa* in N is a corruption.

kauseya is "a kind of silk made of threads obtained from the cocoons of the silk-worm" (*kṛmikośotthātātunirmītaḥ paṭṭaviśeṣaḥ* Indu). The Tibetan has *dar sog* *bgo* "silk-dress or the like" instead.—*daṅ* in NP and *sog* in N are suspect.

praveṇī "ramie," interchangeable with *goṇī* and *sūcīdhāna* (*°bāṇa*, *°vāṇa*), signifies "a fabric made of Chinese silk" (*ghanaś cīnapaṭṭavinirmītaḥ* Indu), and originates from an East-Asian herb (*Boehmeria nivea* HOOK. & ARN.) also called "Chinese silk plant" in English. The translation gives *dreu-rñog* "mule's-hair cushion" as a surrogate.

kaucava "goat's-hair sheet," equated to (*citra*-)*kambala*, *tavaraka*, and *rāṅkava* (*-vastra*), is understood as "a fabric made of goat's hair dyed with safflower juice" (*kausumbharasaraktaśchāgaromanirmīto ghaṇaḥ* Indu). The Tibetan *reu-bal la-ba* "kid's-wool blanket" agrees on the whole with this definition. CD read *reu-bal chen*, which may be interpreted to mean "kid's-wool fabrics," by analogy with phrases like *gos chen* "silk fabrics." In Mvy. 5861 *bal la-ba* corresponds to *kocava*¹.

¹ This is also the spelling given by the majority of the manuscripts at Divy. pp. 40.11, 550.16 & 553.9; COWELL and NEIL print *kocca(ka)* throughout, which is untenable. The Pali equivalent *kojava* is defined as "a goats' hair coverlet of fine workmanship" (CHILDERS, Dict. p. 208). In East Turkestan our fabric was known as *kojava* or *kośava*, which LÜDERS (Textilien p. 37) relates to the woollen tapestries and pile carpets discovered in the grave pits of the Lou-lan cemetery; for illustrations see STEIN, Asia iii pl. xlv & lxxxvii and Serindia iv pl. xxxvii.

I 3. 14

Sanskrit Text

*uśṇasvabhāvair laghubhiḥ prāvṛtaḥ śayanam bhajet |
yuktyāṛkakiraṇān svedaṃ pādātṛṇaṃ¹ ca sarvadā ||*

¹ B; *padātṛṇaṃ* K.

clad (as one shall be) with naturally warm (and) light (night-clothes); (moreover), to sunbeams (and) sudorifics in a proper way and to foot-gear all the time.

Tibetan Version

[[4]] *ran-bzin dro-zin yañ-ba¹-yi* /
gos bgo mañ-la brten-par bya /
ñi-mai od-la ran-par 'de² /
dugs bya lham ni rtag-tu bgo //

¹ CD; *pa* NP. ² D; 'di C; *bde* NP.

to putting on naturally warm and light (night-)clothes, (and) to a bed; (moreover), one shall properly bask in the sunbeams, take sudorifics, (and) always don foot-gear.

Remarks

In order to follow the course once taken to its logical end, the translators have also turned the predicate noun *prāvṛtaḥ* "clad" into an object and changed the attendant instrumentals *uṣṇasavabhāvaḥ* and *laghubhīḥ* "with naturally warm (and) light (night-clothes)" accordingly: *ran-bzin dro-zin yañ-ba-yi gos bgo* "putting on naturally warm and light (night-)clothes." The spelling *yañ-pa* (for *yañ-ba*) in NP is obsolete.

Since the governing verb *bhajet* has retained its original position, the appended objects *arkakiraṇān*, *svedam*, and *pādatrāṇam* have been combined into a new sentence, with the necessary predicates either added from the context ('*de* and *bgo*) or taken from the object itself (*dugs bya*).

ran-par "properly" has been confined to '*de*, while the basic *yuktyā* "in a proper way" refers to *svedam* as well.—For '*de* "one shall bask in" (misspelt '*di* in C), NP have substituted *bde* "one shall delight in"; perhaps this is only a corruption for *blde*, the future of '*de-ba*, which would be even more satisfactory in the present case.

dugs bya means literally "one shall warm (oneself)"; what is implied here appears from two later occurrences (I 20.17 and 23.4) where the same phrase stands for *svedayet* "one shall cause to sweat, apply a sudorific."

I 3. 15

Sanskrit Text

pīvarorustanaśṛṇyaḥ samadāḥ pramadāḥ priyāḥ /
haranti śītam uṣṇāṅgyo dhūpakūṅkumayaṁvānāḥ //

Passionate (and) lovely women with exuberant thighs, breasts, and buttocks take away the cold, their body being hot with incense, saffron, and youth.

Tibetan Version

(7) ((7)) *chuñ-ma gzon-zin yid-on rgyags* /
nu-ma brla dan ro-smad rgyas /
gur[6]-gum-gyis [[5]] *byugs spos¹-kyis bdugs²* /
lus-kyi drod-kyis grañ sel-bao //

¹ DNP; *slos* C. ² NP; *bdug* CD.

Young, pretty, (and) buxom women, exuberant in breasts, thighs, and buttocks, anointed with saffron, (and) fumigated with incense, take away the cold by the heat of their body.

Remarks

Both versions, though virtually identical in content, are widely different in form. As a matter of fact, they agree only in their skeleton structure (subject, predicate, object), whereas all other parts have undergone more or less far-reaching changes.

The possessive compound *pīvarorustanaśroṇyaḥ* “with exuberant thighs, breasts, and buttocks” has been resolved as usual by means of modal accusatives: *nu-ma bṛla dañ ro-smad rgyas* “exuberant in breasts, thighs, and buttocks [lit., lower parts],” with *ūru* and *stana* transposed.

The attribute *samadāḥ* “passionate,” also translatable as “intoxicated,” has been replaced by *rgyags* “fat, buxom.”

The predicate noun *uṣṇāṅgyaḥ* “their body being hot” has been rendered by *lus-kyi drod-kyis* “by the heat of their body.”

The instrumental dvandva *dhūpakunkumayauvanaiḥ* “with incense, saffron, and youth” has been disconnected from its governing noun, separated into its three components, and converted by the requisite additions and alterations into a series of subject attributes: *dhūpa* “incense” becoming *spos-kyis bdugs* “fumigated with incense,” *kunkuma* “saffron”—*gur-gum-gyis byugs* “anointed with saffron,” and *yauvana* “youth”—*gñon* “young.” At the same time, *dhūpa* and *kunkuma* have been interchanged.—*slos* (for *spos*) in C and probably also *bdug* (for *bdugs*) in CD are xylographical errors.

I 3. 16

Sanskrit Text

aṅgaratā pasamītagarbhābhūveśmacāriṇaḥ |
śītapāruṣyajanito na doṣo jātu jāyate ||

In (a man) living in an inside or basement room heated by charcoal heat there never arises a disease caused by cold and roughness (of wind).

Tibetan Version

sa-khañ khañ-pa ñis-rim byas |
mdag-mai¹ drod-kyis bsros-pa ni |
grañ dañ rtsub-pa-las byuñ-bai |
ñes-pa (49a1) nam yañ mi ((49a1)) 'byuñ-ño ||

¹ NP; *mei* CD.

In (a man) having warmed basement (and) ground floor by the heat of live coals there never arises a disease caused by cold and roughness (of wind).

Remarks

The Tibetan translation deviates from the original Sanskrit only in the first half of the stanza. Here the pādas have been inverted and several other changes made.

aṅgāra “charcoal” has been rendered somewhat loosely by *mdag-ma* “live coal,” also occurring as *me-mdag*, for which CD read *mdag-me* “live-coal fire.” The proper equivalent would be *sol-ba* or the like; cf. Bodh. X 8.

saṃtapta "heated" has been separated from *garbhabhūveśman*, put in the active voice (*bsros-pa* "having warmed"), and substituted for *cārin*.

*garbhabhūveśma*², which must be interpreted to mean *garbhaveśmani tathāvidhe bhūveśmani vā* "in an inside room or, likewise, in a basement room" (Indu's explanation), has been represented by *sa-khañ khañ-pa ñis-rim byas*. While *sa-khañ* is a metaphor of *bhūveśman* "basement" (Hindi *taikhānā*), *khañ-pa ñis-rim byas* is incongruous with *garbhaveśman* "inside room"; it denotes, to use the Tibetan wording, "the room built in the second place," that is, the ground floor.

cārin "living" has been dropped and the gap filled as indicated above.

doṣa (~ *ñes-pa*) must be understood here, not in the secondary meaning of "humour," but in the original sense of "fault, disease"; cf. 1.21. Aruṇadatta and Indu equate it to *duḥkha* "trouble."

I 3. 17

Sanskrit Text

āyam eva vidhiḥ kāryaḥ śīṣire 'pi viśeṣataḥ |
tadā hi śītam adhikaṃ raukṣyaṃ cādānakālaḥ ||

This regimen (is) to be observed in especial also during pre-spring; for then (there are still felt) excessive cold as well as roughness caused by the period of absorption.

Tibetan Version

*dgun-smad*¹ [7] [[6]] *dus-su*² *lhag-par yañ |*
cho-ga 'di ñid bya-ba yin |
de thse lhag-par grañ-ba dan |
*stobs 'phrog*³ *las byuñ rtsub-pa yin ||*

¹ DNP; *smān* C.

² CD; *du* NP.

³ NP; *'phrog* CD.

This regimen shall be observed in especial also during the pre-spring season; (for) then there are (still felt) excessive cold as well as roughness caused by the absorption of strength.

Remarks

The pādas a and b have been transposed on syntactical grounds and the attributes *āyam eva*, *adhikaṃ*, and *ādānakālaḥ* interchanged with their respective nouns. Besides, the particle *hi* "for" has been omitted.

As concerns the variant readings, *dgun-smān* in C is a simple miscarving, while *dus-du* in NP is an antiquated spelling. On *stobs 'phrog(s)* see v. 2.

I 3. 18

Sanskrit Text

kaphaś cito hi śīṣire vasante 'rkāṃśutāpitaḥ |
hatvāgnīm kurute rogān atas taṃ tvarayā jayet ||

The phlegm accumulated in pre-spring (and) heated by sunbeams in spring causes diseases after having impaired the (digestive) fire; so one shall quickly remove it.

Tibetan Version

dgun ni bad-kan kho¹-na sogs² /
dpyid dus ñi-mai od dros-pa /
me-yi drod (2) ñams nad ((2)) bskyed³[[7]]-de /
[20 b1] de-bas de ni myur-du bsal //

¹ NP; *khoñ* CD.² NP; *stsogs* CD.³ NP; *nas skyed* CD.

The phlegm accumulated in winter (and) heated by sunbeams in the spring season causes diseases after the heat of the (digestive) fire has been impaired; so one shall quickly remove it.

Remarks

cita "accumulated" has been rendered by *sogs*, which seems to be a rare perfect form of *sog-pa* "to accumulate" (also spelt *gsog-pa*, *bsog-pa*, or *sogs-pa*); the usual perfect stem is *bsags*, for which Suv. p. 54.18 has *bsogs*. In 4.26 the synonymous *sañcita* has been translated by *gsogs gyur* (with v. l. *sogs 'gyur*).

hi has been interpreted as emphatic and hence reproduced by *kho-na*, while the scholiasts consider it correlative with *atas*. CD read *khoñ-na* instead, which would mean "in the interior (of the body)."

sisira "pre-spring" has been placed at the head of the stanza and changed into *dgun* "winter"; see v. 7.

hatvāgnim "after having impaired the (digestive) fire" has been paraphrased by *me-yi drod ñams* "after the heat of the (digestive) fire has been impaired."

kurute and *rogān* have been transposed for obvious reasons.—*nas* (for *nad*) in CD is corrupt.

I 3. 19

Sanskrit Text

tīkṣṇair vamananasyādyair laghurūṅksaiś ca bhojanaiḥ /
vyāyāmodvartanāghātair jītvā śleṣmāṇam ulbaṇam //

Having removed the surplus phlegm by pungent emetics and sternutatories etc., by light and rough food, (and) by gymnastics, massage, and treading;

Tibetan Version

rno dan skyug-smān sna-smān sogs¹ /
yañ dan rtsub-pai kha-zas dan /
bcag dan lus-kyi mñe-ba²-yis /
bad-kan bdo-bai nad bsal³ bya //

¹ CDP; *soḍ* N.² NP; *pyi-mñes-pa* C; *phyi-mñes-pa* D.³ CDP; *gsal* N.

By pungent (substances), emetics, sternutatories etc., light and rough food, treading, and body massage one shall remove the disease of surplus phlegm.

Remarks

In Sanskrit, the stanzas 19 to 23ab form a period consisting of three participial clauses and a main sentence¹. In Tibetan, the first and second participial clauses have been rendered independent, while the main sentence has been divided into two parts. In spite of these structural changes, the word-order has been left virtually intact.

īkṣṇa "pungent," though doubtless meant to be an attribute of *vamananasyādyā* "emetics, sternutatories, etc." and also treated like that by the commentators, has been turned into a noun (*rno* "pungent substance") and co-ordinated with what follows by the insertion of *dan* "and."

soḍ in N is an abbreviated spelling of *sogs*; cf. Intro. p. 23 n. 6.

vyāyāma "gymnastics" (~ *rtsol-ba* 2.10, 12, 13) has been omitted, unless *bcag* is a short form of *rtsol-bcag* (which corresponds to *vyāyāma* in 14.7); then *āghāta* "treading" would be absent.

udvartana "massage" has been paraphrased by *lus-kyi mñe-ba* "body massage." CD read *lus phyi-mñes-pa* instead (the former with a miscarved *pyi*), which properly means "wiping and rubbing the body," *phyi(s)* and *mñes* being the perfect stems of 'phyi-ba and mñed-pa combined into a hendiadys action-noun; cf. *dril-phyis* "rolling and wiping" in 2.14.

jīvā "having removed" has been translated by *bsal bya* "one shall remove." N writes *gsal*, which is a scarce secondary form of *bsal*; cf. Mvy. 1358, where *gsal-ba* is equated to *vinodana* "driving away."

śleṣmāṇam ulbaṇam "surplus phlegm" has been converted into a genitive attribute dependent upon an added *naḍ* "disease."

¹ Candranandana and Indu let the period start with *laghurūḥṣaiḥ* and *jīvā* respectively, connecting what precedes with *jayet* in v. 18. Their interpretation is not corroborated by the Tibetan.

I 3. 20

Sanskrit Text

snāto 'nulīptaḥ karpūracandanāguru¹kuṅkumaiḥ |
purāṇayavagodhūmakṣaudraajāṅgalaśūlyabhuk ||

having bathed (and) besmeared oneself with camphor, sandal, aloe, and saffron; (and) eating old barley and wheat, honey, and the roasted meat of game:

Tibetan Version

khrus byas ga-pur tsandan¹ dan |
[[8]] gur-gum sogs²-pas bsku-bar ((3)) bya |
(3) nas dan gro ni [2] rñiñ-pa dan |
sbrañ-rtsi skam-sai bsregs³ śa bza ||

¹ CDN; *tsan-dan* P.

² NP; *stsogs* CD.

³ CD; *bsreg* NP.

Having bathed, one shall besmear (oneself) with camphor, sandal, saffron, etc. Eating old barley and wheat, honey, (and) the roasted meat of game;

Remarks

anulipta "having besmeared oneself" has been placed at the end of the clause and rendered by *bsku-bar bya* "one shall besmear (oneself)."

For *tsandan* P writes *tsan-dan*, which recurs in 3.38, 40, 53 as the spelling of NP, while CD retain the ligature throughout.

aguru "aloe" (~ *a-ka-ru* 3.11) has been omitted and *s(ts)ogs-pa* "etc." put in its stead.

skam-sai, lit. "of dry land, jungle," is a petrified genitive standing for *jāṅgala* "jungle animal, game"; see v. 51, where the same form is used as an accusative object. The full expression is *skam-sai srog-chags*; cf. vv. 30 & 45.

bsreg in NP, properly the future of *sreg-pa* "to roast," seems also to take the function of the perfect; thus *bsreg-zu* corresponds to *hutāsana* "oblation-eater, fire" in Mvy. 7397.

⁵ CDP; *groḍ* N.

⁶ Erased in N; another erasure, with no word missing, follows after *dro*.

drinking an essence mixed with mango juice (and) prepared against thirst; (and) associating (oneself) with women possessed of sweet scent (and) lotus-eyes: one shall drink together with friends after having made (oneself) glad and happy as to one's mind; (and) one shall drink [*btuñ bya* 23 b] unvitiated old (and) tepid liquor, rum, wine, mead,

Remarks

The English translation of the major part of the Tibetan text, though fairly sound in itself, must nevertheless be viewed with caution; for little help could be derived from the original Sanskrit, which is largely different in form and matter. Under these circumstances, a close comparison of the two versions would be of no avail, and only such points will be dealt with in the following as are of special interest for one reason or another.

a-ma in P is corrupt for *a-mra*, also spelt *ā-mra* (~ Skr. *āmra* "mango").

sbyar-ba, the perfect of *sbyor-ba*, is construed as a rule with *dan* in the meaning of "mixed with" and with the terminative in the meaning of "prepared for"; cf. JÄSCHKE, Dict. p. 406. The juxtaposition of both usages is noteworthy.—*sbyor-ba* in C is evidently a mistake.

netropala "eye-lotus" has been rendered by *utpal-gyi mig* "lotus-eye," for which NP write less correctly *utpal-gyis mig*.

For *dan lhan-cig bcin* "tying together, associating, with" CD have substituted *dan lhan-cig-cin* "being together with, in the company of," which is best referred to the temporal clause ending with *byas-pas*: "after having made (oneself) glad and happy as to one's mind in the company of women possessed of sweet scent (and) lotus-eyes."—*chun-ma*, lit. "wife," is evidently understood here (as in v. 15) to mean simply "woman" or "mistress."

byas-pas "after having made," though perfectly fitting the context, may ultimately rest on a wrong interpretation of *ṛkṛtaḥ*, the inflected root-suffix having been mistaken for a passive past participle.

āsava and *ariṣṭa* are two brands of liqueur differing in their share of liquid and solid ingredients (Dalhaṇa on Suśr. I 45.197). The former is prepared from 100 palas of wood-apple extract, 500 palas of inspissated sugar-cane juice, and 1 prastha of honey (Kauṭ. II 25.19). The latter is made either, according to the Mitākṣarā, of soap-berries and molasses or, according to the Matsyaśuktatantra, of bael roots, plums, and sugar (Mitra, Indo-Aryans I p. 412).

Tibetan Version

sga-chu bskol dan seui chu |
sbran¹-chu'am gla²-sgaṅ[[2]]-chu btun bya |
lho-phyogs bser³-bus bsil-ba dan |
mtha-ma kun-tu chu 'bab-la ||

¹ CDP; *sgraṅ* N.

² CD; *bla* NP.

³ NP; *ser* CD.

boiled ginger water, pomegranate water, honey water, or nut-grass water. In groves [*skyed-mos-thsal-du* 25b] cooled by southerly cold winds, (with) water flowing on all sides

Remarks

śṛṅgaverāmbu "ginger water" has been translated by *sga-chu bskol* "boiled ginger water," which agrees with the explanation given by the commentators except Candranandana (*śuṇṭhīkvathitajala* Aruṇadatta).

sārāmbu "essence water" is described by Candranandana as water made with an extract of either pomegranates or catechu, asan, sandal, etc. The Tibetans adopt the former interpretation, rendering the term as *sevi chu* "pomegranate water."

sgaṇ-chu (for *sbraṇ-chu*) in N is probably a xylographical error.

jalada, prop. "water-giver, rain-cloud," is according to the scholiasts a synonym of *musta* or *mustā* "nut-grass," and consequently has been reproduced by *gla-sgaṇ* (for which NP offer the unattested spelling *bla-sgaṇ*). It is certainly wrong to understand *jaladāmbu* in the sense of "Regenwasser," as HILGENBERG & KIRFEL do.

The following ten pādas (up to 25d) make up a monster sentence the gist of which exceeds hardly two hemistichs, the remainder being only a series of attributes belonging to *kānaneṣu*. While both versions agree in their general arrangement, the Tibetan shows a remarkable looseness of construction, *chu* (in 23d), *od* (in 24a), *sa* (in 24d), *śiṇ* (in 25a), and *dri-ṣim* (in 25b) being without a proper syntactical connection.

dakṣiṇānila "southerly [i.e. maritime] wind" has been rendered by *lho-phyogs* (b)ser-bu "southerly cold wind" (cf. 2.40). This slight change of wording is significant inasmuch as in Tibetan climate southerly winds must not necessarily be cold.

jalavāhin "discharging water" has been turned intransitive: *chu 'bab-la* "(with) water flowing."

I 3. 24

Sanskrit Text

adṛṣṭanaṣṭasūryeṣu maṇikuṭṭimakāntiṣu /
parapuṣṭavighuṣṭeṣu kāmakarmāntabhūmiṣu //

the sun having perished in them (as it were because of its being) invisible, showing the splendour of tessellated jewel pavements, resounding with cuckoos, affording excellent places for sexual activities,

Tibetan Version

ñi-mai od [4] *ni mi snaṇ daṇ* /
((5)) *nor-bu bcag 'drai* (5) *mdaṇs ldan-pa* /
*khu-byug sñan-pa sgra sgrog-ciṇ*¹ /
'dod-pai loṅs-spyod ldan-pai sa //

¹ NP; *stsogs-śiṇ* C; *sgrogs-śiṇ* D.

and the sunbeams being invisible, showing a splendour like tesseral jewels, sending forth the melodious notes of cuckoos, (with) places providing for sexual enjoyment,

Remarks

naṣṭa “perished” has been dropped (including the implied simile) and *sūrya* “sun” turned *ñi-mai od* “sunbeams.”

maṇḍikūṭṭimākaṇṭi is interpreted by the scholiasts differently than by the translators. The scholiasts, on the one hand, resolve it into *maṇayo vajramarakatādayas tatktāni kuṭṭimāni taiḥ kāntir yeṣāṃ tāni* “those whose splendour (is produced) by tessellated pavements made of jewels (such as) diamonds, emeralds, etc.” (Indu’s paraphrase), taking it for a possessive dependent. The translators, on the other hand, represent it by *nor-bu bcag ’drai mdañs ldan-pa* “showing a splendour like tesseral jewels,” treating it as a possessive descriptive or rather appositional possessive. In so doing they avoid the somewhat fantastic idea of a forest ground laid with gems.

parapuṣṭavighuṣṭa “resounding with cuckoos” has been rendered by *khu-byug sñan-pa sgra sgrog-ciñ* [v.l. *sgrogs-śiñ*] “sending forth the melodious notes of cuckoos.” For *parapuṣṭa*, which literally means “that nourished by others” and more precisely corresponds to *gñan-gyis rgyas* or *gñan-gyis gsos* (DAS, Dict. p. 1078), the Tibetans have substituted the onomatopoeic *khu-byug*.—*stsogs-śiñ* (for *sgrogs-śiñ*) in C is corrupt.

kāmakarman “sexual activity” has been modified to *’dod-pai loñs-spyod* “sexual enjoyment.”

anta is understood by Aruṇadatta (who refers to Udbhaṭa¹) and Indu in the sense of *praśasta* “praised, praiseworthy, excellent.” A similar usage is met with in Megh. 23 and Śiś. IV 40, where Mallinātha (quoting the lost Śabdārṇava) equates *anta* to *ramya* “lovely.”² In Tibetan the word is neglected.

¹ Evidently the writer on poetics who was chief pundit of King Jayāpīḍa of Kashmir (779—813 A.D.). Cf. Rājat. IV 495.

² It ought, however, to be noted that in none of these cases is the basic meaning of *anta* (“end”) unsatisfactory and the explanation offered by the scholiasts conclusive. One may easily render *karmānta* by “business,” *vanānta* by “forest skirt,” and *mekhalānta* by “girdle [slope] edge.” This seems also to be the view held by the other commentators.

I 3. 25

Sanskrit Text

vicitrapuṣpavṛkṣeṣu kānaneṣu sugandhiṣu |
goṣṭhīkathābhīś citrābhir madhyāhnaṃ gamayet sukhī ||

displaying motley-blossomed trees, (and) emitting a fragrant smell:

(held) in (pleasant) company.

Tibetan Version

[[3]] *sna-thsogs me-tog ldan-pai śiñ |*
dri-’zim skyed-mos-thsal-du ni |
dga-’dun gñam ni sna-thsogs-pas |
phyed[5]-dus¹ bde-bas bde-bar bya ||

¹ NP; du CD.

trees endowed with motley blossoms, (and) a fragrant smell: (there) one shall be perfectly happy at noon with capricious conversations (held) in pleasant company.

Remarks

kānaṇeṣu has been interchanged with *sugandhiṣu* for syntactical reasons.

On *goṣṭhikathā* the commentators are at variance among themselves: Aruṇadatta understands it as "conversation (accompanied) with amusement" (*goṣṭhyām kriḍāyām kuthāḥ*); Candranandana as "entertainment with song, tabor, etc." (*goṣṭhyo gāndharvamarḍaṅgādibhiḥ*) and "conversation on poetry" (*kāvya-kathāḥ*); Hemādri as "talk on worldly matters" (*loka-vārttāḥ*) and "talk on religious [scientific] works" (*śāstra-vārttāḥ*); and Indu as "conversation held in the company of witty people" (*vidagdhānām āsanabandho goṣṭhi tasyām kṛtāḥ kathāḥ*). The Tibetan comes closest to this last interpretation, translating *dga'-dun gnam* "conversation (held) in pleasant company."

madhyāhnaṃ gamayet sukhī "one shall happily pass the noonday" has been rendered loosely by *phyed-du(s) bde-bas bde-bar bya* "one shall be perfectly happy [lit. happy with happiness] at noon."

I 3. 26

Sanskrit Text

guruśītadivāsvapnasnigdhāmlamadhurāṃs tyajet |
tikṣṇāṃśur atitikṣṇāṃśur grīṣme saṃkṣipatīva yat ||

Heavy and cold (food), sleep in the day-time, and fat, sour, and sweet (food) one shall eschew.—As the hot-rayed one, having exceedingly hot rays, is, as it were, destructive in summer,

Tibetan Version

lei bsil ((6)) ñin-mo ñal-ba (6) dan |
snun-bag mñar skyur spañ-bar bya |
[[4]] ñi-mai od-zer rab thsa-bas |
so-ga 'phrog-pa 'dra-ba yin ||

Heavy (and) cold (food), sleep in the day-time, and slightly fat, sweet, (and) sour (food) one shall eschew.—As the sun-rays are exceedingly hot, they are, as it were, eliminative in summer.

Remarks

snigdha "fat" has been turned *snun-bag* "slightly fat" (cf. 2.11) and *amla* "sour" placed after *madhura* "sweet."

tikṣṇāṃśu "the hot-rayed one" [i.e. the sun] has been omitted and its attribute *atitikṣṇāṃśu* "having exceedingly hot rays" converted into a causative clause: *ñi-mai od-zer rab thsa-bas* "as the sun-rays are exceedingly hot." Thereby the original word-play *tikṣṇāṃśu: atitikṣṇāṃśu* got lost.

saṃkṣipati and *'phrog-pa* are both used absolutely: "is destructive" and "are eliminative." The commentators add *jagatsneham* or *jagataḥ sneham* "the world's moisture" as object.

yat "as" has been dropped and the syntactical connection with what follows severed.

I 3. 27

Sanskrit Text

pratyaham kṣīyate¹ śleṣmā tena vāyus ca vardhate |
ato 'smiṇ paṭukaṭvamlavyāyāmārkakarāṇis tyajet ||

¹ B; *hīyate* K.

the phlegm decreases daily, and the wind becomes strong thereby; so in this (period) one shall eschew salt, pungent, and sour (food), gymnastics, and sun-rays.

Tibetan Version

de-bas de thse lan-thsva thsa¹ |
skyr rtsol² ñi-mai od-zer³ span ||

¹ CD; *thsva* NP. ² CD; *sol* NP. ³ DN; *zes* C; *zeñ* P.

So in this period one shall eschew salt, pungent, (and) sour (food), gymnastics, (and) sun-rays.

Remarks

The first two hemistichs, though found in all editions, are missing in Tibetan. As they are not explained by the commentators either, they form no doubt an interpolation.

As concerns the variant readings, *thsva* (for *thsa*) in NP is a mistake apparently influenced by the preceding *lan-thsva*, while *sol* (for *rtsol*) in NP looks at least suspicious; *od-zes* and *od-zeñ* (for *od-zer*) in CP are simply xylographical errors.

I 3. 28

Sanskrit Text

bhājen madhuraṁ evāṇṇaṁ laghu snigdhaṁ himaṁ dravaṁ |
suśītaṭoyasiktāṅgo lihyāt saktūn saśarkarān ||

One shall turn only to sweet, light, fat, cold, (and) liquid food. Having besprinkled one's limbs with very cold water, one shall sip sugared groats.

Tibetan Version

zas ni mñar dañ [6] yañ-ba dañ |
snum bsil sla-ba ñid bsten bya |
rab bsil chu((7))-yis [[5]] lus (7) bkru¹-ñiñ |
phye-zan kha-rar² bcas-pa bza ||

¹ CD; *krus* NP. ² CD; *ra* NP.

One shall turn only to sweet, light, fat, cold, (and) thin food. Bathing one's body in very cold water, one shall eat sugared groats.

Remarks

bhājet and *annam* have been transferred to the end and beginning of the sentence respectively.

drava "liquid" has been turned *sla-ba* "thin."

siktāṅga "having besprinkled one's limbs" has been paraphrased by *lus bkru-ziñ* "bathing one's body," with no chronological succession implied.—*krus-ziñ* in NP seems to be corrupt for *bkru-siñ* or *khrus-siñ* "having bathed," which would better harmonize with the original Sanskrit.

lihyāt "one shall sip" has been rendered by *bza* "one shall eat" and placed at the end of the stanza.

saktu "groats" is prepared as a rule from barley-meal; hence its translation into Tibetan by *phye-zan*, which properly signifies "barley-meal porridge."

For *kha-rar* NP write *kha-ra*, which from the point of view of grammar is less suited to the following *bcas-pa*.

I 3. 29

Sanskrit Text

madyaṃ na peyaṃ peyaṃ vā svalpaṃ subahuvāri vā |
anyathā śophaśaithilyadāhamohān karoti tat ||

Alcohol (is) not to be drunk, or to be drunk (only) in small quantities or with much water; otherwise it causes cutaneous swellings, flaccidity, heat, and stupor.

Tibetan Version

chañ mi btuñ-ste 'thuñ-na yañ |
ñuñ-ba'am chu mañ bsres-la btuñ |
gžan-du de ni kha bskams¹ lhod |
[7] tsa dañ rmoñs-par byed-pa yin ||

¹ NP; *skom* CD.

Alcohol shall not be drunk or, if it is drunk, shall be drunk (only) in small quantities or after having been mixed with much water; otherwise it makes one dry in the mouth, flaccid, hot, and stuporous.

Remarks

The second *peyaṃ* has been moved to the end of the sentence and an additional '*thuñ-na yañ* "if it is drunk" put in its place.

The predicative *subahuvāri* "with very much water" has been reproduced by a temporal clause: *chu mañ bsres-la* "after having been mixed with much water."

The copulative compound *śophaśaithilyadāhamoha* "cutaneous swellings, flaccidity, heat, and stupor" has been resolved into a series of predicatively used adjectives: *kha bskams lhod tsa dañ rmoñs-pa* "dry in the mouth, flaccid, hot, and stuporous." For *śopha* "cutaneous swelling" the translators read apparently *śoṣa* "xerostomia" (given as a variant in the Kottayam edition); CD write *kha skom* instead of *kha bskams*, which would mean "thirsty in the mouth."

tat has been inserted after *anyathā* on syntactical grounds.

I 3. 30

Sanskrit Text

kundendudhavalam śālīm aśnīyāḥ jāṅgalaiḥ palaiḥ |
pibed rasaṃ nātighanaṃ rasālāṃ rāgakhāṇḍavarū¹ ||

¹ B; *rāgaśāḍavarū* K.

One shall eat rice (that is) white like jasmine and the moon, (together) with the meat of game. One shall drink broth (that is) not too thick, rasālā curds, rāga and khāṇḍava syrup,

Tibetan Version

¹bras-chan kun-da¹ ltar [[6]] dkar dan /
 skam-sai srog-chags sa-dag bza /
 (49b1) ((49b1)) khu-ba mi ska² zo dan ni /
 bu-ram³ sbyar sogs⁴ gyos byas btuñ /
 phal-cher skyur-ba btuñ-bar byao ||

¹ N; kunda CDP.

² CD; bśka NP.

³ DNP; rum C.

⁴ NP; stsogs CD.

One shall eat boiled rice (that is) white like jasmine, and the meat of game. One shall drink broth (that is) not thick, curds, and a potion (that is) concocted from treacle products etc. (and) preponderantly sour.

Remarks

kun-da is spelt *kunda* in CDP, with the original ligature left intact.

indu "moon" has been dropped.

śālī "rice" has been turned ¹*bras-chan* "boiled rice" and put at the head of the stanza.

asñyāt "one shall eat" has been placed at the end of the sentence.

pībet "one shall drink" has been transferred only to the end of the present stanza though it belongs also to the following one; thereby it became necessary to add another *btuñ* in 31 d.

atighana "too thick" has been simplified to *ska* "thick"; *bśka* "astringent," as found in NP, seems to be a redactional change rather than a secondary spelling.

rasālā, which denotes a certain kind of thick milk mixed with sugar and spices, has been rendered merely by *zo* "curds," evidently for lack of an adequate term. A similar reason accounts for the lengthy paraphrase of *rāgakhāṇḍavau* (written *rāgaṣāḍabau* in K) as *bu-ram sbyar sogs gyos byas btuñ phal-cher skyur-ba* "a potion (that is) concocted from treacle products etc. (and) preponderantly sour," which led to the insertion of a supernumerary hemistich.—*bu-rum* in C is nothing but a mistake.

The best definition of *rasālā*, *rāga*, and *khāṇḍava* is given by Indu. Quoting from some unidentifiable source¹, he says:

khajena mathitaṃ pādaśarkaraṃ dadhisamṃyutam /
śuṇṭhījīrakasindhūṭṭhai rasālāṃ mārjikāṃ viduḥ||

"(One) quarter of sugar mixed with (three quarters of) curd, stirred with a twirling-stick, (and) seasoned with dry ginger, cumin, and rock-salt they know as *rasālā* (or) *mārjikā*."

¹ If DAS GUPTA (IC III p. 154) and GODE (Studies I p. 159 sq.) are correct in assuming that Indu the commentator of the Ah. & As. and Indu the author of a lost medical Nighaṇṭu repeatedly cited in Kṣīrasvāmin's commentary on the Amarakoṣa (see Introd. § 9) are one and the same person, then the stanzas in question may well have been taken from this very Nighaṇṭu.

And again:

drākṣākvāṭhaḥ śālīsaktūpapaṇṇaḥ
ksaudraprāyaḥ śarkarāvāṃśimīśraḥ /
gauḍāṃśāḍhyaḥ satrijātaḥ sadhāṇyo
rāgo jñeyaḥ ṣaḍābo ḍāḍimāmlaḥ //

“A decoction of grapes mingled with śālī-rice grits, charged with honey, combined with sugar and bamboo manna, enriched with a portion of treacle, seasoned with the three spices [mace, cardamom, cinnamon], (and) mixed with dhānya rice (is) to be known as rāga; (and) as ṣaḍāba (when it is in addition) acidulated with pomegranates.”

I 3. 31

Sanskrit Text

pāṇakaṃ pañcasāraṃ vā¹ navamṛdbhājanasthitam /
mocacocadalair yuktam sāmīlaṃ mṛnmayaśuktibhiḥ //

or, from clay shells, a five-essence potion (that is) kept in a new vessel, mixed with small banana and coco-nut pieces, (and) acidulated,

Tibetan Version

sñiñ-po lña-yi [21 a 1] *btuñ-ba ni /*
kham-phor sar-pa-la [[7]] *gnas-pa /*
chu-ñiñ rgya-star¹ dum-bu bsres /
skyur bcas kham-phor²-snod-kyis btuñ //

¹ CD; *rgyas-ltar* NP.

² CDN; *por* P.

(Moreover) one shall drink from clay cups a five-essence potion (that is) kept in a new clay vessel, mixed with small banana (and) coco-nut pieces, (and) acidulated.

Remarks

pāṇaka has been interchanged with its attribute *pañcasāra* and the following *vā* left untranslated. Yet it is not likely that the first pāda ran *pāṇakaṃ pañcasārākhyam* in the basic text, which (according to the *apparatus criticus* of K) is the reading of all manuscripts but one. Indu adduces another Nighaṇṭu śloka:

drākṣāmadhūkamadhukakolaḍḍāḍimasādhitam /
pāṇakaṃ pañcasārākhyam dāhatṛṣṇānivartakam //

“Prepared from grapes, mahua fruits, liquorice, jujubes, and pomegranates, the potion called “five essences” (is) eliminative of heat and thirst.”

coca (K wrongly prints a second *moca*) usually denotes the cinnamon bark but may also stand for the coco-nut, the fan-palm fruit, and the banana (MW p. 402). Adding to this uncertainty, Arunadatta identifies it as *panasaphala* “bread-fruit,” while Indu is silent on the point. Candranandana and Hemādri, however, give *nālikera* “coco-nut” as equivalent, and this is also the meaning of *rgya-star* (corrupted to *rgyas-ltar* in NP), which recurs in 5.19 & 6.117 as the sole spelling of all xylographs and roughly translates “large nut.”

mṛṇmayaśukti "clay shell," which signifies a thin-walled cup (*tanukaiś caṣakaiḥ* Candranandana), has been rendered tautologically by *kham-phor-snod* "clay-vessel cup."—*por* (for *phor*) in P is a miscarving.

I 3. 32

Sanskrit Text

pāṭalāvāsitaṃ cāmbhaḥ sakarpūraṃ suśītaṃ |
śaśāṅkakiraṇān bhakṣyān raṇanyāṃ bhakṣayan pibet ||

and water (that is) perfumed with trumpet-flowers, charged with camphor, (and) very cold. Taking at night moonbeams as food, one shall drink

Tibetan Version

chu ni pa-ta-las bsgos¹-śiñ |
(2) ((2)) ga-pur² bcas-śiñ śin-tu bsil |
zla-zer lta-bui [2] bza-ba ni |
mīhsan-moi³ dus-su bza[[8]]-ba dan ||

¹ CD; *bsgos* NP.

² NP; *bur* CD.

³ CD; *mo* NP.

Taking in the night-time water (that is) perfumed with trumpet-flowers, charged with camphor, and very cold, (and) food (that is) like moonbeams,

Remarks

For *bsgos* "perfumed" (~ *āvāsita*; cf. 2.31) NP have substituted *bsgos* "made into balls" (~ *piṇḍita*), which bears every mark of a redactional change.

ambhas "water" has been transferred to the head of the stanza and connected with *bhakṣayan* in 32d instead of *pibet* in 30c.

For *ga-pur* CD have *ga-bur*, the same distinction being made in 3.40; of other stanzas compared, 3.20 & 53 read *ga-pur*, while 13.6 has *ga-bur*. This uncertainty of spelling is also reflected in the dictionaries (*ga-pur* JÄSCHKE, *ga-bur* DAS); the Mvy. writes *ga-pu-ra* in 5834 and *ga-bur* in 6258. It is noteworthy that the initial media is not subject to a similar fluctuation though, going by the Sanskrit, a tenuis should be expected at least in part of the cases.

śaśāṅkakiraṇān bhakṣyān bhakṣayan "taking moonbeams as food" has been rendered by *zla-zer lta-bui bza-ba bza-ba dan* "with taking food (that is) like moonbeams," the cognate accusative having been retained.—"Moonbeams" are defined by Indu, who again cites an unknown authority, as follows:

vāmśpiṣṭasitākhaṇḍaiḥ sagodhūmapriyaṅgubhiḥ |
kṣīre pākaghane kṣiptaiḥ piṇḍāś candrakarāvayāḥ ||

Lumps out of bamboo manna, flour, and sugar candy mixed with wheat and millet (and) thrown into milk thickened by boiling (are) called "moonbeams." On what grounds the dish is named "moonbeams" in Sanskrit and in what way it can be characterized as "moonbeam-like" in Tibetan is not clear from this definition. More light is cast on the problem by Aruṇadatta and Candranandana, who identify the dish as some camphor preparation called "camphor tubes" (*karpū-*

ranāḍikā, also spelt *karpūranālikā*) that is described in Bhpr. I 2.2.106 *sqq.*;¹ camphor, however, is often metaphorically expressed by words literally meaning “moon” (see MW s. vv. *candra*, *soma*, *indu*, *vidhu*, etc.), while the analogy between “tubes” and “beams” is too obvious to require elaboration.

rajanyām “at night” has been paraphrased by *mthsan-mo(i) dus-su* “in the night-time.”

pibet “one shall drink” has been placed at the end of 33 b.

¹ This description runs as follows:

ghṛtādhyayā samitayā lambaṃ kṛtvā puṭaṃ tataḥ |

lavaṅgolvaṇakarpūrayutayā sitayānvitam ||

pacē ājyena siddhaiṣā jñeyā karpūranālikā |

Having made an oblong leaf wrapper (that is filled) with wheat-flour enriched with ghee, and (that is) combined with sugar mixed with cloves, pepper, and camphor, one shall bake (it) in clarified butter; when ready, this (is) to be known as a “camphor tube.”

Note: *ulvaṇa* is explained by the Hindi commentator as *maric* “pepper.”

13. 33

Sanskrit Text

sasitaṃ māhiṣaṃ kṣiraṃ candranakṣatraśītaḥ |

abhraṃkaṣamahāśāla¹tālaruddhoṣṇaraśmiṣu ||

¹ B; *sāla* K.

sugared buffalo’s milk (that is) cooled by the moon and stars. In groves [*vaneṣu* 34a] in which the hot-rayed one is darkened by cloud-grazing huge sal trees and palmyra palms,

Tibetan Version

zla-ba skar-ma ltar dkar¹-bai |

ma-hei o-ma bsil-mo btuñ |

sā-la tā²-la chen-po³ ni |

sprin reg thsa-bai od-zer sgrib ||

¹ CDN; *dka* P.

² NP; *ta* CD.

³ NP; *mo* CD.

one shall drink cold buffalo’s milk (that is) white like the moon (and) stars. Possessed [*bcas-nas* 36b] of beautiful groves [*nags-thsal bzan* 34b] (that are) darkening the hot rays with cloud-grazing huge sal trees (and) palmyra palms,

Remarks

sasita “sugared” has been interchanged with *candranakṣatraśīta* and translated by *bsil-mo* “cold,” which points to a variant *saśita* in the basic text. Accordingly, *śīta* (which usually signifies “cool”) has been given the rare sense of *dkar-ba* “white”; cf. *śītalacchada* “white leaf” or “white-leaved” MW p. 1078.—*dka-ba* in P is a carver’s error.

abhraṃkaṣamahāśālatālaruddhoṣṇaraśmi “in which the hot-rayed one [i.e. the sun] is darkened by cloud-grazing huge sal trees and palmyra palms” has been rendered more freely by *sā-la tā-la chen-po* [v.l. *ta-la chen-mo*] *ni sprin reg thsa-bai*

od-zer sgrīb “darkening the hot rays with cloud-grazing huge sal trees (and) palmyra palms.” It may be noted by the way that *mahāsāla* cannot possibly be understood in this context to denote “grosse Häuser,” as is done by HILGENBERG & KIRFEL.

Tibetan Version

rgun-²brui sñe-ma gyur-za-ziñ |
 ((3)) *'khri-siñ (3) dan ldan¹ nags-thsal [3] bzan |*
 [[21a1]] *dri-bzan kha-bai² chu-yis ni |*
bsil³ khañ lus dan 'thsam byas-pa⁴ ||

¹ NP; *ldan dan* CD. ² NP; *khañ-pa* CD. ³ CDP; *gsil* N. ⁴ NP; *la* CD.

profuse in bunches of grapes, and endowed with creepers; of a rest-house (that is) cooled by fragrant cold water

Remarks

vana “grove” has been transferred to the end of the second hemistich and further specified by the addition of *bzan* “beautiful.”

mādHAViśliṣṭa “clinging to spring-flowers” has been separated from, and interchanged with, *drākṣāstabakāśālin* “profuse in bunches of grapes,” and has been rendered more freely by *'khri-siñ dan ldan* “endowed with creepers.” The term *mādHAVi* (from *mādHava*) “spring-flower” denotes a species of creepers alternatively called *atimuktaka* and generally identified as *Hiptage madablota* GAERTN.—For *dan ldan* CD read *ldan dan*, which does not make sense here.

gyur-za, the correspondent of *sālin* “profuse,” is of doubtful meaning and its rendition only tentative: SCHMIDT (according to JÄSCHKE, Dict. p. 518) takes it to signify, “what has become ripe and eatable”; ACHARYA (according to DAS, Dict. p. 1154) equates it to Skr. *nirbhara* and *puṣa* “dependence, support,” while DAS himself (referring to the rTsis-gzi phyogs-bsgrigs ch. 17) understands by it “a tree bent under the weight of its flowers or fruits”; the Dict. of the Fr. Cath. Miss. p. 922 again translates “manger les épis mûrs.” In the absence of further occurrences, no definite conclusion can be arrived at.

hima “cold” has been reproduced by *kha-ba*, which usually corresponds either to *tikta* “bitter” or to *kaṭu(ka)* “pungent” (v. remarks on 1.14), but sometimes assumes the present meaning as well: thus in 6.138 (~ *hima* “coldness”), Suv. p. 155.22 (~ *hima* “snow”), Suv. pp. 35.19 & 178.14 (~ *tuṣāra* “snow”), etc. CD write *khañ-pa* instead of *kha-ba*, which again does not make sense here.

sicyamāna “besprinkled” has been detached from its syntactical connection and removed to the next pāda, its place being taken by an added *bsil* “cooled” (misspelt *gsil* in N).

paṭālika “plenty of cloths” has been left untranslated, evidently for lack of space, and its attribute *sicyamāna* joined to *kāyamāna* instead.

⁵ N; *gduñs-pa* CD; *gduñ-pas* P.

(and) besprinkled; (or) of a couch (that is) soft in that it is furnished with shoots (and) fruit-pendants of mango-trees, banana-leaves, white nymphaeas, lotus-fibres, nelumbos, blue nymphaeas, (and) full-blown flowers: (there) one shall sleep at noon when pained by the sun; or in a bath-house

Remarks

kāyamāna "rest-house" has been transferred to the end of the preceding stanza and rendered etymologically by *khañ lus dan 'thsam byas-pa* "a house made suitable for the body." (The actual derivation remains yet to be established.) For *byas-pa* CD read *byas-la*, which seems corrupt inasmuch as a dative is incompatible with the sentence-construction.—*kāyamāna* is described by Indu as "a kind of house built from living bamboo etc., thatched with leaves, (and) varicoloured, or covered with patches of harita grass" (*ārdraveṇvādikalpitaḥ patrapihito vicitro haritaśāḍḍvalāva-cchanno vā grhaviśeṣaḥ*).

The first hemistich is found only in CD; if it was originally left out by the translators and subsequently added by a redactor, or if this is simply an oversight on the part of NP, cannot be told for sure.

cīta "covered" has been omitted and its adjunct *cūta pravālaphalalumbibhiḥ* "with the shoots and fruit-pendants of mango-trees" subordinated to the following *kalpita* "prepared."

lumbin is not listed in the dictionaries, though the spelling is confirmed by all extant editions. Judging from the Tibetan equivalent *'phyan-ba* "hanging down" (miscarved *'chan-ba* in P), it appears to be a secondary form of *lambin*. The commentators equate it to *stabaka* "bunch" or *saṃghāta* "cluster."

'bab (for *'dab*) in C is a xylographical error.

kalha-ra is a Tibetanization of *kalhāra*, which in its turn is an oft-recurring variant of *kahlāra* (the ligatures *lha* and *hla* being not always clearly discernible from each other). CD have corrupted this to *kal-lha-ra*.

For *kamala* "nelumbo" the translators have substituted the synonymous *padma*. On the various names for lotus and their identification see RAU, *Asiatica* p. 505 sqq.

kalpita "prepared from" has been expressed more generally by *dan ldan-pa* "furnished with" and rendered dependent on *komala* in the form of a supine, whereas *komala* "tender, soft" has been connected with *talpa* instead of *kadalī* etc.

The compound *hasatkusumapallava* has been deprived of its possessive character and, like *kadalī* etc., referred to *kalpita*. Besides this, *hasatkusuma* "opening bud" has been replaced by *me-tog rgyas-pa* "full-blown flower" and *pallava* "sprout" left untranslated.

The locatives *vaneṣu* 34a, *kāyamāne* 35a, and *talpe* 36a have been turned into (elliptical) terminatives governed by an inserted *bcas-nas* "possessed of."

arkatāpārta "pained by the heat of the sun" has been simplified to *ñi-mas gduñ-bas-na* "pained by the sun."—*gduñ-ba* in N and *gduñs-pa* in CD are alternative spellings of equal frequency, while *gduñ-pa* in P is a mistake.

The principal verb *svapyāt* "one shall sleep" has been kept in its original position and the ensuing locative *dhārāgrhe*, together with its attribute, fashioned into a new sentence.

I 3. 37

Sanskrit Text

*pusta*¹*strīstanahastāsyappravṛttośīravārīni |*
niśākarakarākīrṇe saudhāprṣṭhe niśāsu ca ||

¹ B; *putta* K.

in which cuscus-water is flowing from the breasts, hands, and mouth of a modelled woman. And on a moonbeam-flooded palace-roof garden (one shall fix) at night

Tibetan Version

*bud-med bcos*¹ *gzugs nu-ma lag |*
kha-las u-śir chu 'bab bya |
mthsan-mo yañ-thog rdo-thal byugs |
[[3]] *zla-bai od-kyis bsil-bar ñal ||*

¹ DNP; *bcos* C.

cuscus-water shall flow from the breasts, hands, (and) mouth of a female effigy. At night one shall sleep on a roughcast roof-garden (that is) cooled by moonbeams.

Remarks

pustastri "modelled woman" has been translated by *bud-med bcos gzugs* "a woman's artificial body, female effigy." What is meant here is a kind of gargoyle given the shape of a female statue.—*bcos* (for *bcos*) in C is a mistake.

niśākarakarākīrṇa "flooded by moonbeams" has been interchanged with *niśāsu* "at night" and rendered freely by *zla-bai od-kyis bsil-ba* "cooled by moonbeams."

saudhaprṣṭha "palace-roof garden" has been represented by *yan-thog rdo-thal byugs* "roof-garden coated with mortar." While the commentators take *saudha* (from *sudhā* "mortar") for a substantive denoting a mortared house or "palace" (*harmya*), the Tibetans regard it as an adjective meaning "mortared, roughcast." It cannot be denied that this last interpretation, though less poetic, comes closer to reality.

The particle *ca* "and," so one should think, makes the present line still a part of the preceding sentence, and the addition in Tibetan of another *ñal* "one shall sleep" certainly warrants this assumption. The following *āsanā* "bedstead" (in 38a), for which K reads *āsanam*, would then have to be connected with *svasthacitta*, as is in fact done by the translators who insert a supine *bde-bar* for the purpose. However, both Arunadatta, Candranandana, and Indu start a new sentence here, letting it end with *āsanā* (*āsanam*) and supplying *kāryā*, *śasyate*, or *kāryam* as predicate. The question of whether or not such an enjambment should be conceded is ultimately one of personal taste.

I 3. 38

Sanskrit Text

*āsanā*³ *svasthacittasya candanārdrasya māliṇaḥ* /
nivṛttakūmatantrasya susūkṣmatanuvāsasaḥ ||

¹ B; *āsanam* K.

one's bedstead. From him whose mind is at ease, (who is) moist with sandal (and) adorned with garlands, by whom the manual of love has been put aside, (and) whose clothes are very thin and fine—

Tibetan Version

((5)) *mal-stan bde[5]-bar sems* (5) *bde-ñin* /
*tsan-dan*¹ *lde-gu* ²*phreñ*²-*ba thogs* /
*rab-tu phra-bai gos bgos-ñin*³ /
⁴*dod-pai rgyun-las ldog*⁴-*par bya* ||

¹ NP; *tsandan* CD.

² NP; *phreñ* CD.

³ NP; *te* CD.

⁴ NP; *bzlog* CD.

Being at ease in one's mind in that one is content with one's bedstead, sporting sandal ointment (and) garlands, (and) being clad with very thin clothes: one shall turn away from the stream of love.

Remarks

While in Sanskrit the present stanza opens a period extending over the next 16 hemistichs, in Tibetan a break has been made after the fourth pāda, with the initial genitive attributes turned into a separate sentence. For the syntactical relation of *āsanā*, see remarks on last verse.

candanārdra "moist with sandal" and *mālin* "adorned with garlands" have been joined together into a single phrase: *tsan-dan lde-gu* (')*phreñ-ba thogs* "sporting sandal ointment (and) garlands." On the spelling of *tsan-dan*, see v. 20.

nirṛtakāmatantra "by whom the manual of love¹ has been put aside" has been interchanged with *susūkṣmatanuvāsa* and converted into the main clause: 'dod-pai rgyun-las ldog-par bya "one shall turn away from the stream of love." Although fitting the context, there can be no doubt whatever that *rgyun* "stream" is simply corrupt for *rgyud*, the proper equivalent of *tantra* "manual."—*ldog-pa* has been replaced in CD by the synonymous *zlog-pa*.

tanu "fine," which is more or less tautologic after the preceding *susūkṣma* "very thin," has been left untranslated. For *bgos-siñ* CD read *bgos-te*.

¹ This is not likely to refer to any erotic work, such as Vātsyāyana's *Kāmasūtra*, in particular.

I 3. 39

Sanskrit Text

jalārdrās tālavṛntāni vistrtāḥ padminīputāḥ |
utkṣepās ca mṛdūkṣepā jalavarṣihimānītāḥ ||

(from him) wet-cloth, palmyra-stalk, large lotus-leaf, and yak-tail fans (which), gently raised, (are) showering water and offering cool wind;

Tibetan Version

tā¹-lai bsil-yab spos-chus² [[4]] btab |
padmai 'dab rgyas rluñ-yab dan |
dal-gyis legs-par [6] gyob-pa dan |
rdzi-char³ ((6)) bser⁴-bu dan ldan bya ||

¹ NP; *ta* CD.

² CD; *chu* NP.

³ DNP; *thsar* C.

⁴ NP; *ser* CD.

Fans of palmyra palms besprinkled with sweet-scented water (and) fans of large lotus-leaves, swinging gently (and) properly and providing wind-rain (and) cool breezes;

Remarks

jalārdra has been joined to *tālavṛnta* and rendered by *spos-chus btab* "besprinkled with sweet-scented water" (for which NP read, less correctly, *spos-chu btab*). This makes it likely that the Tibetans had a variant *jalārdratālavṛntāni* before them and consequently took *jalārdra* in its literal sense "wet with water." The text known to the scholiasts and handed down to us has another meaning; here it is necessary to assume as the basic form a substantive *jalārdrā*, which recurs in Śīs. I 65 and denotes a wet cloth moved to and fro for the sake of cooling.

tālavṛnta "palmyra-stalk fan" has been translated *tā-lai bsil-yab* "fan of palmyra palm," which is in keeping with Candranandana's and Hemādri's interpretation. According to another explanation (followed by Arunadatta & Indu and also recorded by Candranandana), the term is used metaphorically for "fans made of the tail-feathers etc. of peacocks (and) having the form of palmyra-stalks" (*mayūrapicchā-dikṛtāni tālavṛntādikṛtāni vyajanāni*). For *tā-la* CD write *ta-la* again; cf. v. 33.

dan after *rluñ-yab* has no conceivable function other than that of an expletive. *utkṣepa* has been omitted in Tibetan; Indu equates it to *cāmara* "yak-tail fan."

mṛdūkṣepa, lit. "the raising of which is gentle," has been paraphrased *dal-gyis legs-par gyob-pa* "swinging gently (and) properly."

jalararṣihimānila “showering water and offering cool wind” has been turned freely *rāzi-char* (*b*)*ser-bu dan* *ldan bya* “providing [lit. making provided with] wind-rain (and) cool breezes,” the idea being that as these fans are besprinkled with water they afford not only wind but also rain, as it were.—*thsar* (for *char*) in C is a mistake.

I 3. 40

Sanskrit Text

karpūramallikāmālā hārāḥ saharicandanāḥ |

³ NP; *phren* CD.

⁴ NP; *tsandan* CD.

⁵ NP; *stsogs* CD.

wreaths of camphor (and) of jasmine; pearl-necklaces white with sandal; parrots, thrushes, etc. sending forth a sweet (and) lovely chatter; and

Remarks

On *ga-pur* and *ga-bur* see v. 32. For *malli-ka* CD read *ma-li-kai*, the spelling being less correct but the genitive more adequate.

'phren-ba and *phren-ba* are alternative forms; cf. v. 38.

hāra “string of pearls” has been rendered *mu-tig do-śal* “pearl-necklace,” while its adjunct *saharicandana* “furnished with yellow sandal” has been turned *tsan-dan dkar* “white with sandal.” On *tsan-dan* and *tsandan* see v. 20.

manohara “lovely” and *kala* “sweet” have been transposed, while the *bahuvrihi* has been resolved by adding *sgrogs-pa* “sending forth.”—*śiśu* “young” has been omitted and *sogs* “etc.” inserted after *sārīka* “thrush,” which has been interchanged with *śuka* “parrot.”

I 3. 41

Sanskrit Text

mṛṇālavalayāḥ kāntāḥ protphullakamalojjvalāḥ |
jaṅgamā iva padmīnyo haranti dayitāḥ kṛamam ||

beautiful women (who), possessed of lotus-fibre bracelets (and) radiant with full-blown lotuses, (are) like moving water-lilies: (these) take away the weariness.

Tibetan Version

chuñ-ma gdu-bu pad¹-rtsa 'dra |
padma rgyas-pa lta-bur [7] mdzes |
padma-can ni 'gro 'dra-ba |
sñom-pa² sel-bar byed-pa ((7)) yin ||

¹ DNP; bde C. ² CD; sñom-par N; sñoms-par P.

women beautiful as full-blown lotuses in their lotus-fibre-like bracelets (and) resembling moving water-lilies: (these) take away one's weariness.

Remarks

The phrase *mṛṇālavalayāḥ kāntāḥ protphullakamalajjalāḥ* "beautiful women possessed of lotus-fibre bracelets (and) radiant with full-blown lotuses" has been rendered freely by *chuñ-ma gdu-bu pad-rtsa 'dra padma rgyas-pa lta-bur mdzes* "women beautiful as full-blown lotuses in their lotus-fibre-like bracelets," with the simile of the second line having been extended to the whole stanza.—*bde-rtsa* (for *pad-rtsa*) in C is a corruption.

padminī "water-lily" has been metaphrased by *padma-can*, the affix *can* corresponding to *'ini*.

haranti and *dayitāḥ* have been placed respectively at the end and beginning of the stanza.

sñom(s)-par (for *sñom-pa*) in NP seems to be a mistake occasioned by the following *sel-bar*.

I 3. 42

Sanskrit Text

ādānaglānavapuṣām agniḥ sanno 'pi sīdati |
varṣāsu doṣair duṣyanti te 'mbulambāmbude 'mbare ||

The (gastric) fire of those whose body has been emaciated by (the period of) absorption, though (being already) weak, is (further) weakened during the rains by the humours. These get irritated when the sky is covered with clouds hanging down because of their water, (and that)

Tibetan Version

mthu 'phrogs(7)-pas¹ ni na-bai lus |
dman-par²-las kyañ dman [[6]] gyur-te |
dbyar ni³ gnod-pas gnod 'gyur⁴-te |
mkha-la sprin 'dus chu-yis [21b1] brlan ||

¹ NP; pa CD. ² NP; pa CD. ³ CD; kyi N; gyi P. ⁴ NP; gyur CD.

The body (which is already) sick by the absorption of strength, after having become even weaker than weak, gets (further) affected by the humours in the rainy season. (When) heaps of clouds wetted with water (are seen) in the sky, (the humours) are irritated [*gnod-par byed* 44a]

Remarks

In their endeavour to follow the original word-order as closely as possible, the translators had to resort to syntactic changes on a large scale. Above all it was

imperative, once the predicates were kept in their medial position, to let the first sentence close with *śidati* instead of *doṣaḥ*, and the second with *duṣyanti* instead of *mandana* (in 44a). This again rendered necessary the addition after *mandana* of a new verb (*gnod-par byed*) that substantially agreed with *duṣyanti*. Furthermore, both subjects (*agni* and *te*) have been dropped, presumably for lack of space, and while the latter may still be inferred from the context, the former has lost its function to *vapus*, the bahuvrīhi compound having been stripped of its possessive character.

As for details, *ādāna* “absorption” has again been paraphrased by *mthu 'phrogs-pa* “absorption of strength” (cf. 3.2, 4, 17); but this time the reading *'phrogs-pa* occurs in all the block-prints. For the instrumental CD have substituted a temporal accusative.

glāna “emaciated” has been turned *na-ba* “being sick.”

For *dman-par-las* CD write *dman-pa-las*, apparently in order to avoid the unusual combination of the affixes *par* and *las*. If this is the ordinary policy in such cases cannot be told for sure. Anyhow, as *dman-par* grammatically depends upon *gyur-te* and *las* merely serves as a comparative particle, the reading of NP is altogether unimpeachable.

api is referred by the commentators to *varṣāsu* and equated to *punar* “again,” and that, as they put it, “because of the multivocalness of particles” (*anekārthatvān nīpātānām* Aruṇadatta & Indu). But their interpretation is quite arbitrary and is not confirmed by the Tibetan.

dbyar ni “in the rainy season” has been replaced in NP by the genitive *dbyar-gyi* (misspelt *-kyi* in N) “of the rainy season.”

For *'gyur-te* CD read *gyur-te*, thereby making the clause antecedent in time to what follows.

ambulambāmbude 'mbare “when the sky is covered with clouds hanging down because of their water” has been rendered very freely *mka-la sprin 'dus chu-yis brlan* “(when) heaps of clouds wetted with water (are seen) in the sky.”

I 3. 43

Sanskrit Text

satuṣāreṇa marutā sahasā śītalena ca |
bhūbāṣṇēṇāmlapākena malinena ca vāriṇā ||

by wind accompanied with drizzle and suddenly (turned) cold, ground vapour, water liable to sour digestion and polluted,

Tibetan Version

chu-thigs bcas-pai rluṅ dañ ni |
gran-ba drag-por¹ ldañ-ba dañ |
sa-yi rlañs-pa skyur smin² dañ |
chu ni rñog-pa³((50a1))-can-dag(50a1)-gis ||

¹ CD: *po* NP.

² NP; *min* CD.

³ NP; *ma* CD.

by wind accompanied with drizzle, suddenly rising cold, ground vapour, sour digestion, polluted water,

Remarks

satuṣāra has been rendered by *chu-thigs bcas-pa*, which literally means “accompanied with waterdrops” and precisely agrees with the explanation offered by the commentators (*sajalakaṇa* Aruṇadatta & Candranandana, *sajalabindu* Indu). The word *tuṣāra* as such denotes anything from frost to cold, snow, fog, dew, and drizzle (cf. MW p. 452).

śītala has been interchanged with *sahasā* and regarded, not as an attribute belonging to *marut* (as is done by the scholiasts), but as an independent substantive. Consequently, *sahasā* has been taken for an attribute rather than adverb and paraphrased by *drag-por ldan-ba* “rising suddenly.” The absolute *drag-po* in NP is less satisfactory from the grammatical point of view.

amlapāka has been interpreted to be, not a possessive compound referring to *vāri* (as is suggested by the commentators in accordance with Car. I 6.34)¹, but an independent descriptive compound.—*min* (for *smiṇ*) in CD is probably a mistake.

For *rñog-pa* CD write *rñog-ma*, both spellings being equally correct. The plural suffix *dag* seems to go, not so much with the noun to which it immediately belongs, but with the preceding nouns as well, which, taken together, indeed make up a plural. Like the case suffix *gis*, which is also more or less superfluous in view of the following *chuñ-bas* (in 44a), it serves mainly as an expletive.

¹ *bhūbāṣpān meghanisyaṇḍāt pākād amlāj jalasya ca |
varṣāsv agnibale kṣiṇe kupyanti pavanādayaḥ ||*

The strength of the (gastric) fire being weakened during the rains on account of evaporation from the ground, precipitation from the clouds, and sour digestion of water, the (humours) wind etc. get irritated.

Tibetan Version

sbyañ-bas lus ni dag byas-la¹ /
zas ni yañ-bag khu-ba bza /
skam-sai [[8]] *srog-chags śa-khu* (2) *dan /*
((2)) sbrañ-rtsi chañ² ni rñiñ-pa btuñ //

¹ CD; *pa* NP.

² NP; *can* CD.

having purged one's body with a cathartic enema, one shall eat as food a soup (made) of early-barley meal and drink game-broth and old mead;

Remarks

While the Sanskrit, up to 47b, simply gives a list of the just mentioned substances, which syntactically still belongs to what precedes, the Tibetan starts a new sentence here, adding *zas ni bza* "one shall eat as food" and *btuñ* "one shall drink" as predicates.

The first hemistich has been rendered *sbyañ-bas lus ni dag byas-la* "having purged one's body with a cathartic enema." This makes it virtually certain that the basic text read *āsthāpanasūddhatanur* instead of *āsthāpanam sūddhatanur*, all the more so as *āsthāpana* "cathartic enema" does not quite fit into the present list of victuals. There are three kinds of enemas: cathartic enemas, lubricant enemas, and urethra injections; cf. I 19.2. For *byas-la* NP have an absolute *byas-pa*.

jīrṇam dhānyam "old grain" (that is, according to Indu's comment on v. 20, five- or six-month-old grain) has been replaced by *yañ-bag* "early-barley meal" and treated as an adjunct of *rasa* "soup," with *kṛta* "prepared" having been omitted. It is not impossible that the translators had a variant *jīrṇadhānyarasān* before them. The Tibetans distinguish barley into three varieties: early (*mggyogs-nas*), late (*ser-mo*);

and middling (*che-nas*) barley; the former is called alternatively *khra-ma*, *drug-cu-nas*, or *yañ-ma* and grows ripe in about 60 days (cf. JÄSCHKE, Dict. p. 304, s. v. *nas*).

jāṅgalam piṣitam "game-meat" has been simplified to *skam-sai srog-chags* "jungle-animal, game" and rendered dependent on *yūṣa* "broth." This points to a reading *jāṅgalapiṣitam yūṣam* in the basic copy. The omission of *piṣita* "meat" is not, however, absolutely certain inasmuch as *śa* might be taken for its equivalent; then *yūṣa* would correspond only to *khu* instead of the ordinary *śa-khu*.

madhu, equated by the commentators to *mādvika* "wine," has been interpreted as *sbrañ-rtsi chan* "honey-spirits, mead" (for which v. 22 reads *sbrañ-chan*), while *ariṣṭa* "ariṣṭa liqueur" has been left untranslated. The latter seems to be little known in Tibet, because it has been neglected once before (see v. 22). Here it may again be held that *ariṣṭa* is not missing but is represented by *chan* (like in 5.70), while *madhu* has, in accordance with its literal meaning "honey," been reproduced by *sbrañ-rtsi*. Yet the whole sentence-construction runs counter to such a formalistic interpretation¹, and that *sbrañ-rtsi* should not be separated from *chan* is also indicated by the variant *sbrañ-rtsi-can* "provided with honey" in CD, which may be explained as denoting any kind of honey beverage.

¹ In retrospect, the same argument applies to the collocation *yañ-bag khu-ba*, which, if taken for an asyndeton, would undoubtedly come closer to the original. Here additional evidence may be found in the following *skam-sai srog-chags śa-khu*, which, in view of the governing *btuñ*, can be understood only the attributive way, despite the absence of a genitive termination.

I 3. 46

Sanskrit Text

mastu sauvarcalāḍhyaṃ vā pañcakolāvacūrṇitam |
divyaṃ karuṇaṃ śṛtaṃ cāmbho bhojanam tv atidurdine ||

whely richly mixed with sochal salt or besprinkled with powder of the five spices, rain-water, well-water, and boiled water; in very bad weather, however, food

Tibetan Version

dar-ba kha-ru-thsar sbyar-ba'am ¹ |
thsa-ba lñai ² *phye-ma-can* |
khron-pai chu ni bskol-ba'an ruñ |
char chei [3] *dus-su kha-zas ni* ||

¹ CD; *ba* NP.

² NP; *lñai* ni CD.

(moreover one shall take) buttermilk mixed with sochal salt or besprinkled with powder of the five spices, well-water, or else boiled one; at times of heavy rain food

Remarks

mastu "whely" has been replaced by *dar-ba* "buttermilk." Another such case is seemingly met with in I 14.22; but there *mastu* and *ariṣṭa* have been transposed, so that actually *mastu* corresponds to *zo-ga-chu* "whely" and *ariṣṭa* to *dar-ba* "buttermilk." For this last meaning of *ariṣṭa* see Ak. II 9.53.

A few words must here be said about *mastu*. Amarasimha (Ak. II 9.54) defines it as *maṇḍam dadhibhavam* "the scum produced upon curds" [i.e. sour cream], having previously (v. 49) explained *maṇḍa* by *sarvarasāgra* "the head of any liquid" [i.e. scum].¹ Other lexicographers follow suit. Thus Halāyudha (Abhidhānar. II 166) describes it as *dadhimāṇḍa* "the scum of curds,"² while Hemacandra (Abhidhānac. 396) states: *sarvarasāgryaṃ maṇḍam atra tu dadhiḥ mastu* "(that which is) found on top of any fluid (is called) maṇḍa; if it is, however, produced upon curds, (it is called) mastu." Quite a different view is held by the commentators. To name only some, Kṣīrasvāmin (on Ak. II 9.54) understands *maṇḍa* as *dravo bhāgaḥ*, so that *mastu* would then be "the liquid part produced in curds" [i.e. whey]; Sāyaṇa (on ŚBr. III 3.3.2) interprets *mastu* as *dadhibhavam sārabhūtam udakam* "the water produced in curds (and) constituting their chief part"; and Ḍaḥṇa (on Suśr. I 45.81 *sqq.*) calls it *adhodadhi jalamiśram* "the water-mixed lower part of curds." In later texts, the word is even given a sense contrary to its original meaning; thus Bhāvamīśra (Bhpr. I 2.5.21) says:

dadhnaḥ tūpari yo bhāgo ghaṇaḥ snehasamanvitaḥ |
sa loke sara ity akto dadhno maṇḍas tu mastv iti ||

The thick (and) oil-containing part that (is found) on top of curds (is called) sara in common language; the diffused whey of curds, mastu.

The Tibetan rendition of the term, too, must be viewed in the light of this conspicuous change in meaning. While *mastu* has been replaced in the present case, it has been retained in 5.35 and translated there by *zo-kha-chu* "whey," for which CDP₂ read *zo-ga-chu* (the former corresponding in Mvy. 5693 to *dadhimāṇḍa*).

sauvarcalāḍhya "richly mixed with sochal salt" has been simplified to *kha-ru-thsar sbyar-ba* "mixed with sochal salt," the following *vā* (~'am) "or" being missing in NP. Sochal salt is prepared by boiling down soda with emblic myrobalan; RAY (History p. 228) identifies it as saltpetre.

By *pañcakola* "the five spices" are meant long pepper (*pippali*), long-pepper roots (*pippalīmūla*), elephant pepper (*cavya*), plumbago (*citraka*), and dry ginger (*nāgara*). Instead of *līai* CD offer *līa ni*, which is probably corrupt for *līa-yi*.

divya (sc. *ambhas*) "rain-water" and *tu* "however" have been left untranslated, whereas *ca* "and" has been replaced by *'an ruṇ* "or else."

atidurdina "very bad weather" has been paraphrased by *char chei dus* "time of heavy rain."

¹ LOISELEUR, in his translation, renders *maṇḍa* by "écume" but *mastu* by "petit-lait du caillé."

² AUFRECHT, in his glossary, takes *mastu* for "the liquid part of curdled milk, whey."

I 3. 47

Sanskrit Text

vyaktāmlalavaṇasnehaṃ saṃśuṣkaṃ kṣaudravaḥ laghu |
apādacāri surabhīḥ satataṃ dhūpitāmbaraḥ ||

(that is) perceptibly provided with sour matter, salt, and oil, completely dry, furnished with honey, (and) light. Not going on foot, smelling sweetly, (and) wearing constantly fumigated garments:

Tibetan Version

*rab*¹-*skyur lan-thsva snum dan bcas* /
 [[21 b 1]] *skam-ñin sbran-rtsir ldan-la yan* /
rkañ-gis mi 'gro dri-ñim (3) *byugs*² /
rtag((3))-*tu gos ni spos*³-*kyis bdugs*⁴ //

¹ CD; *rañ* NP.² CD; *byug* NP.³ CD; *sos* NP.⁴ NP; *bdug* CD.

(that is) provided with strongly sour matter, salt, (and) oil, dry, furnished with honey, and light. Not going on foot, anointed with perfume, (and) constantly fumigated with incense as to one's garments:

Remarks

vyaktāmlalavaṇasneha, lit. "in which sour matter, salt, and oil are perceptible," has been rendered by *rab-skyur lan-thsva snum dan bcas* "provided with strongly sour matter, salt, (and) oil." For *rab-skyur* "strongly sour matter" NP write *rañ-skyur*, which CSOMA translates as "vinegar," though this condiment was probably unknown in Tibet (cf. JÄSCHKE, Dict. p. 27).

saṃśuṣka "completely dry" has been simplified to *skam(-pa, -po)* "dry."

surabhi, prop. "possessed of sweet smell," has been paraphrased by *dri-ñim byugs* "anointed with perfume." The perfect *byug* given in NP is not attested so far and may be corrupt.

satatam "constantly" may be connected, as Indu points out, with both *surabhi* and *dhūpitāmbara*; the Tibetans have referred it to the latter.

dhūpitāmbara, lit. "whose garments are fumigated," has been resolved into *gos ni spos-kyis bdugs* "fumigated with incense as to one's garments." While *sos* (for *spos*) in NP is undoubtedly corrupt, *bdug* (for *bdugs*) in CD looks at least suspicious; cf. v. 15.

I 3. 48

Sanskrit Text

harmyapṛṣṭhe vased bāṣpaśītaśīkaravarjite /
nadījalodamanthāhaḥsvapnāyāsātāpāṃs tyajet //

one shall stay on a (sheltered) palace-roof garden free from vapour, cold, and drizzle. River-water, water-mix, sleep in the day-time, exertion, and sunshine one shall eschew.

Tibetan Version

*khañ-bzañ*¹ *steñ-du ba-mo bsil* /
*char-gyi zer spañs gnas-par bya*² /
*kluñ*³-*chu dan sbyar*⁴ [4] *skyo-ma*⁵ *dan* /
*ñin-gñid*⁶ [[2]] *rtsol dan ñi*⁷ *thsan spañ*⁸ //

¹ NP; *bzañs* CD.² NP; *byas* CD.³ P; *rluñ* CD; *klu* N.⁴ DNP; *sbyor* C.⁵ DN; *skyo-me* C; *spyo-ma* P.⁶ CD; *ñid* NP.⁷ CD; *ñin* NP.⁸ CDP; *spañs* N.

one shall stay on a (sheltered) palace-roof garden, (thus) being free from hoar-frost, cold, (and) drizzle. River-water, mixed pap, sleep in the day-time, exertion, and hot sun one shall eschew.

Remarks

harmyapṛṣṭhe "on a palace-roof garden" has been translated by *khañ-bzan(s) steñ-du*, which means literally "on top of a beautiful house." Compare the different interpretation in v. 37 of the synonymous *saudhapṛṣṭha*.

raset "one shall stay" has been removed to the end of the sentence on grounds of syntax. For *gnas-par bya* CD read *gnas-par byas* "having stayed," thereby subordinating the clause to what follows.

bāspa "vapour" (~ *rlan̄s-pa* Mvy. 1052 & 4489) has been replaced by *ba-mo* "hoar-frost," since in the rough climate of Tibet the moisture issuing from the ground is more likely to freeze than to evaporate.

śikara "drizzle" has been rendered by *char-gyi zer(-ma)*, which signifies literally "raindrop."

varjita "avoided by, free from" has been metaphrased by *span̄s* but construed differently; while belonging to *harmyapṛṣṭha* in Sanskrit, it refers to the agent in Tibetan.

For *kluñ-chu* "river-water" (misspelt *klu-chu* in N) CD have substituted *rluñ chu* "wind (and) water," which is a redactional alteration made without consulting the Sanskrit text.

udamantha "water-mix" has been represented by *sbyar skyo-ma* "mixed pap," *sbyor skyo-me* in C and *sbyar spyo-ma* in P being simply xylographical errors. According to a Nighaṇṭu śloka cited by Indu,—

saktavaḥ sarpiṣābhyaktāḥ śitodakasamanvitāḥ |

nātidraṇo nātisāndra udamantha iti smṛtāḥ ||

"Goats oiled with ghee (and) charged with cold water, neither too liquid nor too solid, (are) called udamantha."

ñid (for *gñid*) in NP is suspect, particularly in view of the preceding *ñin*.

ātapa "heat, sunshine" has been turned *ñi thsan* "hot sun," for which NP have a corrupt *ñin thsan*; cf. 2.40.

span̄ "one shall eschew" has been changed in N to *span̄s* "having eschewed." If correct, this must be co-ordinated with *gyur-pa-la* in 49a: "with those who have eschewed . . . (and) who have become . . ."

I 3. 49

Sanskrit Text

varṣāśīto citāṅgānāṃ sahasaivārakaraśmibhiḥ |
taptānāṃ saṃcītaṃ vṛṣṭau pittaṃ śaradī kupyati ||

With those whose body has become used to the cold of the monsoon, when suddenly afflicted by sunbeams, the choler accumulated in the rainy season gets irritated in autumn.

Tibetan Version

dbyar lus bsil-bar gyur-pa-la |
'phral¹-du ñi-zer-gyis gduñs-pas |
char (4) ((4)) 'bab thse-na² bsags-pa-yi |
mkhris-pa ston ni ldan-bar 'gyur ||

¹ DNP; 'phrul C.

² NP; na'an CD.

With those who have become cold as to the body in the monsoon, when suddenly afflicted by sunbeams, the choler accumulated at the time of rainfall gets irritated in autumn.

Remarks

varṣāśītoṭāṅga “whose body has become used to the cold of the monsoon” has been rendered freely by *dbyar lus bsil-bar gyur-pa* “having become cold as to the body in the monsoon.”

For *’phral-du* C has an erroneous *’phrul-du*.

saṃcīta and *vr̥ṣṭi* have been transposed on grounds of syntax.

vr̥ṣṭi “rainy season” has been paraphrased by *char ’bab thse* “time of falling rain, rainfall.” CD add an emphatic *’an* to the temporal locative.

I 3. 50

Sanskrit Text

tajjayāya ghr̥taṃ tiktam vireko raktamokṣaṇam |
tiktam svādu kaṣāyaṃ ca kṣudhito ’nnaṃ bhajet laghu ||

For its removal (are indicated) bitter ghee, purgation, (and) bloodletting. When hungry, one shall turn to bitter, sweet, astringent, and light food:

Tibetan Version

de bsal phyir ni sman-mar kha |
bkru-sman [[3]] gtañ¹ [5] dañ gtar-ga bya |
kha dañ mñar dañ bska²-ba dañ |
bkres thse zas ni yañ-ba³ bza ||

¹ CD; *btan* NP.

² CD; *ska* NP.

³ CD; *yin-pa* NP.

For removing it one shall give bitter ghee (and) a purgative and shall do a bloodletting. One shall eat bitter, sweet, astringent, and—when hungry—light food:

Remarks

tajjayāya “for its removal” has been verbalized into *de bsal phyir ni* “for removing it.”

ghr̥taṃ tiktam “bitter ghee” has been paraphrased by *sman-mar kha*, which means literally “bitter medicinal ghee”; on its preparation see IV 19.2 *sqq*.

For the missing predicate (*kāryam* or the like), *gtañ* “one shall give” and *bya* “one shall do” have been inserted. The form *btan* in NP suggests an antecedence in time hardly intended by the author: “For removing it one shall do a bloodletting with bitter ghee (and) a purgative having been given (beforehand).”

Instead of *bska-ba* “astringent” NP write *ska-ba* “thick,” which does not agree with the basic text and seems to be an arbitrary change made by a later redactor; cf. v. 30, where quite similarly *ska* “thick” has been altered to *bska* “astringent.”

kṣudhitaḥ “when hungry” has been retained in its medial position and consequently referred only to *laghu*, although it belongs to the whole sentence.—*yin-pa* (for *yañ-ba*) in NP is a corruption.

bhajet "one shall turn to" has been placed at the end of the stanza and rendered by *bza* "one shall eat," which is later (in 52b) superseded by an additional *btuñ* "one shall drink."

I 3. 51

Sanskrit Text

*sālimudgasitādhātripaṭolamadhujāṅgalam*¹ /
taptaṁ taptāṁśukiraṇaiḥ śītaṁ śītāṁśuraśmibhiḥ //

¹ B; °paṭolaṁ madhu jāṅgalam K.

rice, mung-beans, white sugar, emblic myrobalans, wild snake-gourds, honey, and game; to water [*jalam* 52d] (that is) heated by the beams of the hot-rayed one (and) cooled by the beams of the cold-rayed one,

Tibetan Version

'bras-chan mudga skyu-ru-ra /
sbran-rtsi skam-sai pa-to-la /
 (5) ((5)) *ñi-mai zer-gyis gduñs-pa dan* /
zla-bai od-kyis bsil [[4]] *byas-la* //

boiled rice, mung-beans, emblic myrobalans, honey, game, (and) wild snake-gourds; one shall drink water [*chu btuñ* 52b] (that is) heated by sunbeams and cooled by moon-rays,

Remarks

sāli "rice" has been translated by *'bras-chan* "boiled rice"; cf. v. 30.

śitā "white sugar" has been omitted, while *paṭola* "wild snake-gourd" has been placed after *jāṅgala* "game."

jāṅgala "game" has been rendered by *skam-sai*, on which see v. 20.

tapta "heated" and *śīta* "cooled" have been transferred to the end of their respective hemistichs, whereas *taptāṁśu* "hot-rayed one" and *śītāṁśu* "cold-rayed one" have been represented simply by *ñi-ma* "sun" and *zla-ba* "moon."

I 3. 52

Sanskrit Text

samantād apy ahorātram Agastyodayanirviṣam /
śuci haṁsodakam nāma nirmalaṁ malañj jalam //

and this thoroughly day and night; (that is) detoxicated by the (heliacal) rising of Canopus, pure, called "swan-water," devoid of dirt, (and) destructive of dirt;

Tibetan Version

Ri-ṣi śar-bas dug med-pa /
 [6] *ñin mthsan gñi-gar*¹ *sbyaṅs chu btuñ* /
*dan-bai*² *dri med*³ *chu źes-pa* /
dri med dri-ma sel gyur-ba //

¹ P; gñis-kar CD; gñid-gar N.

² NP; dan-s-pai CD.

³ NP; mañ CD.

detoxicated by the rising Canopus, (and) purified both day (and) night: (water that is) pure, called "dirt-free water," lacking dirt, dispelling dirt,

Remarks

The construction of what follows is slightly different from the original. The first pāda has been interchanged with the second and connected, not with the preceding *tapta* "heated" and *śīta* "cooled," but with a newly added *śhyaṃs* "purified," which renders the introductory *samantād api* "and this thoroughly" superfluous. Besides, *jala* "water" has been transferred from the fourth to the second hemistich and subordinated to a newly added *btuṃ* "one shall drink," so that what ensues (up to 53b) must be regarded as appositions rather than attributes.

ahorātram "day and night" has been represented more emphatically by *ñin mthsan gñi-gar* "both day (and) night," *gñis-kar* in CD being an alternative spelling of *gñi-gar* (corrupted to *gñid-gar* in N).

Agastya, also written *Agastī*, has been reproduced here and in IV 3.131 by the Sanskrit word *Ri-ṣi* (for *ṛṣi*), *Agastya* being evidently taken for the Indian sage *par excellence*. The proper Tibetan correspondent, which is given as *Ri-byi* in Mvy. 3457, occurs in IV 6.54 and VI 35.64, but only as the reading of CD, while NP have respectively *Ri-ṣi* and *Ri-yi* instead.

Canopus (α Carinae or α Argus) is a star of the first magnitude in the southern hemisphere and next to Sirius the brightest of all fixed stars; it is invisible in Europe, though. On the date of its heliacal rising and the rules for computing it, as noted by the indigenous astronomers, see COLEBROOKE, Essays II p. 310 *sqq.* The regent of Canopus is said to be the sage *Agastya*, from whom the star takes its name in Sanskrit. The story of *Agastya* cleaning the waters is also alluded to in VI 35.63 *sq.* The topic recurs in other medical texts (Car. I 6.46; As. I 4 ~ I p. 27b7 & VI 40 ~ III p. 328a20) as well as in classical poetry (Ragh. XIII 36). Its origin we were unable to trace.

udaya denotes in this connection what astronomers call the heliacal rising, that is, the first appearance of a star after a period of invisibility due to its conjunction with the sun. The Tibetan equivalent *śar-ba* may be understood either as a verbal noun, in which case it is the perfect root of **char-ba* "to rise," or as a present participle, in which case it is a secondary form thereof.

Instead of *śuci hamsodakam nāma* "pure (and) called swan-water" the Tibetan reads *dan-bai dri med chu źes-pa* "pure (and) called dirt-free water," which has been changed by CD into *dañs-pai dri mañ chu źes-pa* "pure (and) called scent-rich water." Both versions are incompatible with the original, the latter clearly showing the polishing hand of a redactor. There can be little doubt but that the initial *dan-bai* is corrupt for *nañ-pai*, in which case the line would translate: "called dirt-free swan-water." Perhaps one should go even farther and place *nañ-pai* after *dri-med*, thereby bringing the Tibetan into full harmony with the basic text.

I 3. 53

Sanskrit Text

nābhīṣyandi na vā rūkṣaṃ pānādiṣv amṛtopamam |
candanośīrakarpūramuktāśragvasanojjvalaḥ ||

(and that is) neither causative of effusions nor rough, (but) nectar-like among the beverages etc.; (and)—beautiful(ly adorned) with sandal, cuscus, camphor, pearls, garlands, and (fine) clothes—

Tibetan Version

mi 'brug rtsub-pa ma yin-pa /
btuñ-ba-la sogs bdud(6)((6))-rtsir mthsuñs /
 [[5]] *tsan-dan u-śir¹ ga-pur dan /*
mu-tig chun 'phyañ²[7]-'phreñ³ gos mdzes //

¹ NP; *tsandan ur-śin* CD.

² N; *'phyens* C; *'phyañs* D; *'phyan* P.

³ NP; *phreñ* CD.

neither causing effusions nor being rough, (and) resembling nectar among the beverages etc.; (and)—beautiful(ly adorned) with sandal, cuscus, camphor, pearl ornaments, garlands, (and fine) clothes—

Remarks

As *nirmala* “devoid of dirt” and *malajit* “destructive of dirt” in 52d, so *abhiśyan-din* “causative of effusions,” *rūkṣa* “rough,” and *amṛtopama* “nectar-like” have been put verbally: *'brug* (for *'brub*) “causing effusions,” *rtsub-pa yin-pa* “being rough,” and *bdud-rtsir mthsuñs* “resembling nectar.”

For *tsan-dan* CD write *tsandan*, on which see v. 20. For *u-śir* they read *ur-śin*, which appears to be a popular etymology of sorts.

muktā “pearl” has been translated by *mu-tig chun* “pearl ornament,” whereas *sraja* “garland” has been paraphrased by *'phyañ-(')phreñ*, which properly means “dangling wreath.” For *'phyañ* (miscarved *'phyan* in P) CD read *'phyañs* (miscarved *'phyens* in C), the perfect participle being, however, less satisfactory in this connection.

I 3. 54

Sanskrit Text

saudheṣu saudhahavalāṃ candrikāṃ rajanīmukhe /
tuśārakṣārasauhityadadhitaḥlavasātapān //

to the palace-white moonlight on palace(-roof garden)s at nightfall. Dew, alkali, surfeit, curds, sesame-oil, lard, sunshine,

Tibetan Version

khañ-bzañ¹ rdo-thal-gyis dkar-ziñ /
zla-zer-can-du mhsan gnas kyañ² /
zil-pa thal-smān ha-cañ 'drañs³ /
zo dan til-mar zag ñi⁴ thsan //

¹ N; *khañ-bzañs* CD; *kha-bzañ* P.

² NP; *bya* CD.

³ NP; *'grañs* CD.

⁴ DNP; *ñid* C.

one shall stay at night on palace(-roof gardens that are) white with mortar and flooded by moonbeams. Dew, alkali, surfeit, curds, sesame-oil, lard, hot sun,

Remarks

saudha (from *sudhā* “mortar”) properly means “mortared” and usually stands for “mortared house, palace.” In the first case, it has accordingly been translated by *khañ-bzañ(s)*, lit. “beautiful house” (cf. v. 48), *kha* in P being merely a xylo-

graphical error. (Arunadatta and Candranandana interpret *saudha* here in the sense of *dhavalagrhapṛṣṭha* or *gṛhamastaka* “palace-roof garden.”) In the second case, however, *saudhadhavaḷa* “white like a palace” has been represented by *rdo-thal-gyis dkar(-ba)* “white with mortar” (cf. v. 37) and referred, not to *candrikā* “moonlight,” but (along with this) to *saudha* “palace”: *khañ-bzan(s) rdo-thal-gyis dkar-ziñ zla-zer-can-du* “on palace(-roof gardens that are) white with mortar and flooded by moonbeams.”

rajanīmukhe “at nightfall” has been simplified to *mihsan* “at night” and *gnas kyañ* (v.l. *gnas bya*) “one shall stay” added as predicate.

kṣāra “alkali” has been rendered by *thal-smān*, which literally signifies “ash-medicine”; cf. 1.38.

For *ha-can* *’drañs* CD have substituted the commoner spelling *ha-can* *’grāñs*.

ātapa “heat, sunshine” has again been paraphrased by *ñi thsan* “hot sun”; cf. 2.40 & 3.48.—*ñid* (for *ñi*) in C is a mistake.

I 3. 55

Sanskrit Text

[[6]] *mi-bzan chañ dan ñin-par ñal |*
(7) ((7)) *mdun-gyi bser¹-bu yoñs-su² spañ |*
dgun [22a1] dan dbyar ni dan-poi³ gsum |
dpyid ni tha-mai ro gsum-ste⁴ ||

¹ N; *ser* CD; *bsil* P. ² CDP; *yoñsu* N. ³ CD; *po* NP. ⁴ NP; *bsten* CD.

bad liquor, sleep in the day-time, (and) easterly cold wind one shall eschew. In winter and monsoon one shall turn [*bsten* 56b] to the first three, in spring to the last three flavours,

Remarks

tikṣṇamadya “pungent liquor” has been interpreted as *mi-bzan chañ* “bad liquor.” *purovāta* “easterly wind” has been rendered by *mdun-gyi (b)ser-bu* “easterly cold wind,” with *bser-bu* “cold wind” corrupted in P to *bsil-bu* “coolness” (?). In 2.40 (q.v.) the same expression is, in spite of the commentaries, more likely to denote frontal wind.

For *yoñs-su* N uses the abbreviated spelling *yoñsu*; cf. Intro. p. 23 n. 6.

śīta “cold (season),” which according to the scholiasts must be understood to mean *hemantaśiśira* “winter and pre-spring,” has been translated simply by *dgun* “winter”; cf. 2.11 & 3.7.

Instead of *dan-poi*, which is correlated with the following *tha-mai*, NP write less correctly *dan-po*.

tri “three” has been reproduced twice, as is demanded by the context.

bhaje "one shall turn to" has been transferred by NP to the end of the sentence (in 56b), whereas CD have retained it in its original position, substituting *bsten* for *ste* and adding another *bsten* later on.

I 3. 56—57

Sanskrit Text

svūdum nidāghe śaradī svādutiktakaṣāyakān |
śaradrasantayo rūkṣaṃ śītaṃ gharmaghaṇāntayoḥ ||
annapānaṃ samāśena viparītaṃ ato 'nyadā |
nityaṃ sarvarasābhyāsaḥ svasvādhikyaṃ ṛtāv ṛtau ||

in summer to the sweet one, (and) in autumn to the sweet, bitter, and astringent ones. To sum up, in autumn and spring rough, in summer and autumn cold, in seasons other than these opposite food and drink; always constant use of all flavours, (but) in each season superiority of its own respective (flavour).

Tibetan Version

so-ga¹ mñar-te² ston-ka ni |
mñar dan kha dan bka-ba bsten |
mdor[[7]]-na zas dan skom-dag ni |
ston dan dpyid ni rtsub-pa-ste ||
so-ga dbyar-mtha (50b1) bsil((50b1))-bar [2] bya |
gžan-dag-tu³ ni de-las bzlog |⁴
rtag-tu ro kun bsten-pa-las |
rañ-rañ dus-su lhag-par bsten ||

¹ NP; *sos-ka* CD.

² CD; *ste* NP.

³ CD; *du* NP.

⁴ Double śad wanting in N.

in summer to the sweet one, and in autumn to the sweet, bitter, and astringent ones. To sum up, food and drink shall be rough in autumn and spring and cold in summer (and) autumn; the contrary thereof (shall be the case) in the other (seasons). While constantly turning to all flavours, one shall primarily turn to each (flavour) in its own respective season.

Remarks

As pāda 57a has been placed before pāda 56c on grounds of syntax, the present two ślokas are best dealt with together. Apart from the just mentioned rearrangement of lines, the adverbial phrases *nidāghe*, *gharmaghaṇāntayoḥ*, *samāśena*, and *anyadā* have been put in front of their respective nouns, while the nominal diction has been verbalized by adding suitable predicates. Little remains to be said on other matters.

For *so-ga* CD have substituted the alternative spelling *sos-ka*; cf. Mvy. 8253.

For *mñar-te* and *gžan-dag-tu* NP have retained the obsolete forms *mñar-ste* and *gžan-dag-du*; cf. Introd. p. 33 n. 2.

atas has been connected with *viparīta* instead of *anyadā*, as would have to be expected from its position and Candranandana's comment; but Aruṇadatta and Indu put it the same way.

After *bzlog* the usual double *śad* is wanting in N.

I 3. 58

Sanskrit Text

ṛtvor antyādisaptāhāv ṛtusamādhir iti smṛtaḥ |
tatra pūrvo vidhīḥ tyājyaḥ sevānīyo 'paraḥ kramāt ||

The two seven-day periods at the end and beginning of two (successive) seasons (are) called "the junction of two seasons." In these, the former regimen (is) gradually to be abandoned (and) the new one to be observed;

Tibetan Version

dus gñis thog [[8]] *mthai*¹ *zag bdun ni |*
dus mthsams yin-par śes-par bya |
*der*² *ni śā-mai cho-ga spañ |*
*og-ma*³ *rim-bzün bsten*[3]-*par bya ||*

¹ NP; *mai* CD.

² NP; *de* CD.

³ CDN; *mar* P.

The (twice) seven days at the beginning (and) end of two (successive) seasons one shall know to be the intermediate period of (two) seasons. In these, one shall abandon the former regimen (and) gradually turn to the new one;

Remarks

antyādi "end and beginning" has been translated in reverse order: *thog mtha* "beginning (and) end" (corrupted to *thog-ma* "beginning" in CD). The transposition is illogical, though.

ṛtusamādhī "junction of two seasons" has been paraphrased by *dus mthsams* "intermediate period of (two) seasons."

iti smṛtaḥ "(is) called . . ." has been rendered by *yin-par śes-par bya* "one shall know to be."

For *der ni* CD read *de ni*, which comes to the same.

sevānīya "to be observed" has been placed at the end of the sentence and turned *bsten-par bya* "one shall turn to."

og-mar (for *og-ma*) in P is a xylographical error.

kramāt "gradually," which belongs to *tyājya* and *sevānīya* alike, has been referred to the latter only.

I 3. 59

Sanskrit Text

asātmyajā hi rogāḥ syuḥ sahasā tyāgaśīlanāt ||

for (such) diseases (as are) caused by disagreeable (food) may result from practising the abandonment (too) suddenly.

Tibetan Version

((2)) *ma(2)-spaṅs-na ni nad 'gyur-te |*
'phral-du nad ni oṅ-bar 'gyur ||

as diseases arise from its non-abandonment, a disease may suddenly come upon one.

Remarks

The Tibetan version of this line is a paraphrase rather than a translation of the original Sanskrit, and a comparison of the two would be of no avail. In any case, it looks as if the translators read *sahasātyāgaśīlanāt* rather than *sahasā tyāgaśīlanāt*, analysing *sahasā atyāgaśīlanāt*.

I 4. 1

Sanskrit Text

vegān na dhārayed vātaviṇmūtrakṣavatrīkṣudhām |
nīdrākāsaśramaśvāsajṛmbhāśrucchardiretasām ||

The natural urges of wind, stool, urine, sneezing, thirst, hunger, sleep, cough, panting with fatigue, yawning, tears, vomiting, and sperm one shall not suppress.

Tibetan Version

phyi-dbugs bsan gci¹ sbrid[4]-pa dan |
(3) ((3)) bkres skom gñid dan lud nal²-dbugs |
[[2]] glal dan mchi³-ma skyug⁴-pa dan |
khu-bai śugs ni dgag mi bya ||

¹ CDP; ci N.

² NP; pa CD.

³ NP; mchil CD.

⁴ NP; skyugs CD.

The natural urges of wind, stool, urine, sneezing, hunger, thirst, sleep, cough, panting with fatigue, yawning, tears, vomiting, and sperm one shall not suppress.

Remarks

vegān na dhārayed "one shall not suppress the natural urges" has been transferred to the end of the stanza and *trṣ* "thirst" interchanged with *kṣudh* "hunger." For the rest, the Tibetan version is a faithful reproduction of the original Sanskrit. *vāta* "wind" has been translated by *phyi-dbugs*, which literally signifies "breath from behind."

For *gci* N erroneously writes *ci*.

śramaśvāsa has been explained by Candranandana as *śrameṇa janitaśvāsaḥ* “panting caused by fatigue.” The correspondent *ñal-dbugs* should consequently be understood the same way. That *śrama* and *ñal* are dependent on *śvāsa* and *dbugs* follows of necessity from the context, as fatigue does not fall under the natural urges. Interestingly, CD have dropped *ñal* and filled the resulting gap by substituting *lud-pa* for *lud*; this can only be the doing of a later redactor who was unaware of the syntactical relation and so took offence.

For *mchi-ma* “tear” CD read *mchil-ma* “spittle”; thus also, contingent on it, in v. 17. Here again a later hand was at work.

Instead of *skyug-pa* CD have *skyugs-pa*, the perfect root of that verb. As they are used here substantivally, both forms are possible.

I 4. 2

Sanskrit Text

adhovātasya rodhena gulmodāvartarukklamāḥ |
vātamūtraśakṛtsaṅgadṛṣṭyagnivadhahṛdgadāḥ ||

By the stoppage of the downward wind (are caused) visceral induration, secretory stasis, pain, weariness, retention of wind, urine, and feces, impairment of vision and digestion, and heart-disease.

Tibetan Version

phyen¹ ni bkag-par gyur-pa-yis |
skran dan rtug skam gzer sñom lci |
phyen¹ dan bsaṅ gci khoṅ-du 'gags |
[5] *miḡ rdul² drod chuṅ sñiṅ[[3]]-nad ((4)) 'gyur ||*

¹ NP; ² *phyen* CD.

² NP; *rtul* CD.

By stopped wind are caused visceral induration, dry secretions, pain, dull weariness, inwardly retained wind, feces, (and) urine, weak eyes, poor (gastric) heat, (and) heart-disease.

Remarks

adhovātasya rodhena “by the stoppage of the downward wind” has been simplified to (')*phyen ni bkag-par gyur-pa-yis* “by stopped wind,” with the action-noun replaced by the corresponding past participle and the genitive attribute changed into the governing noun. Similarly, *vātamūtraśakṛtsaṅga* “retention of wind, urine, and feces” has been represented by (')*phyen dan bsaṅ gci khoṅ-du 'gags* “inwardly retained wind, feces, (and) urine,” with *khoṅ-du* added redundantly and *mūtra* put after *śakṛt*.

udāvarta “secretory stasis” has been translated by *rtug skam* “dry secretions,” the main symptom standing for the disease. Similarly, *dṛṣṭyagnivadha* “impairment of vision and digestion” has been rendered by *miḡ rdul drod chuṅ* “weak eyes (and) poor (gastric) heat.”—*rdul(-po)* is a secondary form of *rtul(-po)* recurring in Dzl. p. 125.2.

klama “weariness” has been turned pleonastically *sñom lci* “dull weariness.” At the end of the stanza, *'gyur* “are caused” has been added as predicate.

I 4. 3

Sanskrit Text

*snehasvedavidhis tatra vartayo bhojanāni ca |
pñāni bastayaś caiva śastam vātānulomanam ||*

In this case (are prescribed) application of lubricants and diaphoretics, suppositories, (wind-promoting) food and drink, and enemas; (moreover), due regulation of the wind (is) commended.

Tibetan Version

Missing

Remarks

The present stanza is wanting in the Tibetan version as well as in all commentaries except Aruṇadatta's, and hence is undoubtedly an interpolation.

I 4. 4

Sanskrit Text

*śakṛtaḥ piṇḍikodveṣṭapraṭiśyāyaśirorujāḥ |
ūrdhvacāyujāḥ parikarto hṛdayasyoparodhanam ||*

(By the stoppage) of feces (are) said [*smṛtāḥ* 5b] (to be caused) cramps in the calf, catarrh, headache, upward wind, colic, heart-trouble,

Tibetan Version

(4) *bśaṅ 'gags byin-pai ṅa 'gyur-ziṅ |
cham-pas 'debs-śiṅ klad-pa na ||*

By stopped feces the muscles of the calf are (morbidly) altered, one gets afflicted with catarrh and sick in the head,

Remarks

śakṛtaḥ "of feces," to which *rodhena* "by the stoppage" must be added from 2a, has been translated *bśaṅ 'gags* "by stopped feces," the technique being the same as above.

The following diseases (up to 5b) have been represented by way of short sentences, with suitable verbs either supplied from the context (*'debs*, *'gyur-ba*) or derived from the respective nouns (*na*, *'byun-ba*). An exceptional position is held by *piṇḍikodveṣṭa* "cramps in the calf," which has not only been verbalized but paraphrased as well: *byin-pai ṅa 'gyur* "the muscles of the calf are (morbidly) altered."

The second half of the stanza is spurious; it is not only missing in Tibetan but is also left unexplained by the scholiasts.

I 4. 5—6

Sanskrit Text

*mukhena vitpravrṭtiś ca pūrvoktāś cāmayāḥ smṛtāḥ |
aṅgabhaṅgāśmaribastimedhravaṅkṣaṇavedanāḥ ||
mūtrasya rodhāt pūrve ca prāyo rogās tadauśadham |
vartyabhyāṅgāvagāhāś ca svedanam bastikarma ca ||*

outflow of stool through the mouth, and the above-named diseases. Racking in the limbs, gravel, and pain in the bladder, the penis, and the groins (arise) from the stoppage of urine, and normally the above diseases (as well). The remedies for these (are) suppositories, inunction, bathing, sweating, administration of enemas,

Tibetan Version

khar ni mi-gtsaṅ 'byuṅ-ba dan |
śnar bśad nad-du'aṅ 'gyur-ba yin |
gcin bsgags¹-pa-yis yan[6]-lag na |

dku-yi naṅ na śnar-gyi nad |
phal((5))-cher 'byuṅ-ño² de-yi (5) sman |
reṅ-bu bsku-byug lus spyiṅ³ dan |
dugs dan sman-mar⁴ mas-btaṅ⁵-bao ||

¹ NP; 'gags CD.

² DP; po CN.

³ NP; bciṅ CD.

⁴ CDP; ram N.

⁵ NP; gtor C; gtoṅ D.

stool flows out into the mouth, and it comes to the above-named diseases. By stopped urine are normally caused sickness in the limbs, gravel, sickness in the bladder, the penis, and the side, (and) the above diseases (as well). The remedies for these are suppositories, inunction, dipping the body, making (it) warm, and medicinal oils (administered) as enemas.

Remarks

mukhena "through the mouth" has been translated by *khar ni* "into the mouth," the difference in meaning being only slight.

viṣ "stool" has been paraphrased by *mi-gtsaṅ*, which literally signifies "unclean." *smṛta* "said" has been omitted.

aṅgabhaṅga "racking in the limbs" has been generalized to *yan-lag na* "sickness in the limbs," in the same way that *bastimedhravaṅkṣaṇavedanā* "pain in the bladder, the penis, and the groins" has been rendered by *chu-so pho-mṥsan dan dku-yi naṅ na* "sickness in the bladder, the penis, and the side," with *na* being more likely to stand for *nad* than to serve as case-affix (in which event *vedanā* would be missing and *roga* would have to take its office).

mūtrasya rodhāt "from the stoppage of urine" has been removed to the beginning of the sentence (in 5c) and turned *gcin bsgags-pa-yis* "by stopped urine," the change of cases resulting from the difference in construction: while in Sanskrit something like *jāyante* "arise" (thus Aruṇadatta) must be supplied, the Tibetan has *'byuṅ-ño* "are caused" (corrupted to *'byuṅ-po* in CN).—*bsgags*, which recurs in v. 11, seems to be a rare perfect stem of either *'gag-pa* or *'geg(s)-pa* "to stop"; CD give the commoner *'gags* in both cases.

prāyas "normally," which in Sanskrit doubtless belongs only to the last clause, has in Tibetan been referred to the whole sentence.

abhyāṅga "inunction" has been reproduced by a hendiadys: *bsku-byug*, which properly means "besmearing & anointing"; cf. 2.7 & 9.

avaṅgā "bathing" has been expressed by *lus spyiṅ* "dipping the body" and *svedana* "sweating" by *dugs* "making (it) warm."—For *spyiṅ* CD read *bciṅ*, which is obviously a mistake.

bastikarman "administration of enemas" has been represented by *śman-mar mas-btan*-[v.l. *gton*-] *ba* "medicinal oils (administered) as enemas," that is substantially, "lubricant enemas"; cf. I 19.2.—*ram* (for *mar*) and *gtor* (for *gton*), as found in N and C respectively, are xylographical errors.

Sanskrit Text

I 4. 7—8

annapānaṃ ca vidbhedi vidrodhottheṣu yakṣmasu |
mūtrajeṣu ca¹ pāne ca prāgbhaktam śasyate ghṛtam ||

and stool-loosening food and drink in diseases springing from the stoppage of stool; in those caused by (the retention of) urine, on the other hand, ghee is commended as drink, both before meals (in a small dose) and after digestion in a large dose, and this twofold application (is) known as an instillation. From the suppression again

Tibetan Version

zas skom bśaṅ-ba 'gags-pa daṅ |
bśaṅ 'gags¹[7][[5]]-las byuṅ glo-gcoṅ mthsuṅs |
chu bkag²-pa-la³ mar-sar⁴ ni |
che tśad tsam ni rab-tu sbyar ||

¹ CD; 'gag NP.

² CD; 'gag NP.

³ NP; *las* CD.

⁴ NP; *gsar* CD.

. . . ; in stopped urine, ghee shall be applied in as much as a full dose.

Remarks

As appears from the final *o* in 6d, the Tibetan begins a new sentence here. The first two lines, though still recognizable as a translation of their Sanskrit counterparts, are obscure if not corrupt, the main crux being *bśaṅ-ba 'gags-pa* "stopped stool," which is the very opposite of *vidbhedin* "loosening stool"; perhaps *bśaṅ-ba 'gags-pa* "restoring stool" should be read. Besides this, *yakṣman*, which is used here in the general sense of "disease" (*roga* Aruṇadatta, *vyādhi* Candranandana; cf. III 1.1), has been rendered *glo-gcoṅ mthsuṅs* "phthisis-like," with its syntactical relation left undetermined. Under such circumstances, we have abstained from turning the passage into English.

Of the remaining portion, only the words *mūtrajeṣu . . . śasyate ghṛtam . . . uttamayā mātrayā* and *dhāraṇāt* have been reproduced (for the latter see next stanza), and that with considerable liberty. Since the omissions do not affect a single verse but reduce two couplets to one, with nothing of importance missing, it stands to reason that the Tibetans have abridged the original text rather than followed a different version. The peculiar overlapping of sentences and the somewhat enigmatic definition of *avapiḍaka* may well have prompted this procedure.

With regard to the variants, the following may be noted: '*gag*-(*pa*)' "stopping," as given by NP for the perfect forms '*gags* and *bkag*-*pa*, is hardly ever used and only badly fits the context; so does the gerundial suffix *las* in CD, which seems to be influenced by the preceding '*gags*-*las*, whereas *mar-sar* and *mar-gsar* are both of frequent occurrence (cf. Mvy. 5835).

I 4. 9

Sanskrit Text

udgārasyāruciḥ kampo vibandho hṛdayorasoh |
ādhmānakāśahidhmāś ca hidhmāvat tatra bheṣajam ||

of belching (result) anorexia, tremor, oppression in the heart (region) and the chest, inflation, cough, and hiccup; in this case the remedy (is) as in hiccup.

Tibetan Version

sgregs((6))-pa bkag¹(6)-na yi-ga 'chus |
lus 'dar sñiñ dan bran 'gags na |
sbo-ñiñ lud-pa skyigs-bus [[6]] 'debs |
dei² sman skyigs-bu-dag [22b1] dan 'dra ||

¹ NP; *bgag* CD.

² CD; *de* NP.

In suppressed belching one is sick with a disturbed appetite, trembling body, (and) oppressed heart (region) and chest, inflated, and affected with cough (and) hiccup. The remedy for these (is) as in hiccups.

Remarks

To begin with, eructation is not mentioned in v. 1 as one of the natural urges. Since vv. 2—22 are otherwise strictly arranged according to that list, we have good reason to believe that the present stanza is an early interpolation.

While the word-order has been changed only in the second and fourth pādas, with *vibandha* and *hidhmāvat* placed after *hṛdayoras* and *bheṣaja* on syntactical grounds, the nominal style has been relinquished throughout in favour of a verbal mode of expression, the necessary predicates being either derived from the substantives in question (*bkag* from *dhāraṇa* in Sd and *sbo* from *ādhmāna*) or supplied from the context (*na* and *'debs*). Also, some of the diseases have been named after their principal symptoms: *aruci* "anorexia" corresponding to *yi-ga 'chus* "disturbed appetite," *kampa* "tremor" to *lus 'dar* "trembling body," and *vibandho hṛdayorasoh* "oppression in the heart (region) and the chest" to *sñiñ dan bran 'gags* "oppressed heart (region) and chest." Besides, *tatra* "in this case" has been translated by *dei* "for these" and *hidhmāvat* "as in hiccup" rendered plurally: *skyigs-bu-dag dan 'dra* "as in hiccups," there being several kinds of hiccup (cf. III 4.19).—The spelling *hidhmā* occurs throughout the present text and hence has been retained despite BÖTLINGK's assertion (pw vii p. 274) that it is, like *hikvā* and *hiškā*, corrupt for *hikkā*. MÜLLER (WZKSO iii p. 14) is of opinion that it derives from popular usage.

As regards the variant readings, *bgag* (for *bkag*) in CD seems to be a secondary form (cf. Mvy. 7381), while *de* (for *dei*) in NP is less satisfactory from the grammatical standpoint.

I 4. 10

Sanskrit Text

śirortindriyadaurbalyamanyāstambhārditam kṣuteḥ |
tikṣṇadhūmāñjanāghraṇanāvanārkaṣilokanaiḥ ||

Headache, weakness of the senses, stiffness of the neck, and hemiplegia of the face (result from the suppression) of sneezing. By pungent

inhalants, collyria, perfumes, and sternutatories and by looking at the sun

Tibetan Version

*sbrid bkag mgo na dbaṅ mi rno*¹ /
*gñeu*² *reṅs kha yo 'gram chag*³ *'gyur* /
dud rnon-gyis bdug mig-smān daṅ /
 (7) *sna((7))-smān ṅi-ma lta-ba-gyis* //

¹ DNP; *rmo* C.

² NP; *gña* CD.

³ NP; *chags* CD.

By suppressed sneezing are caused sick head, dull senses, stiff neck, wry mouth, (and) distorted cheek. By pungent inhalants, by perfumes, collyria, and sternutatories, (and) by looking at the sun

Remarks

The word-order of the Tibetan agrees with that of the Sanskrit except for *kṣuti*, which has been transferred to the beginning of the stanza, and *añjana*, which has been interchanged with *āghrāṇa*.

The translating-technique is much the same as in the previous verses, with *kṣuteḥ* (sc. *dhāraṇāt*) "from the suppression of sneezing" turned *sbrid bkag* "by suppressed sneezing" and the diseases named after their main symptoms. An exceptional position is held by *ardīta* "hemiplegia of the face," which has been represented by a tautology: *kha yo 'gram chag* "wry mouth (and) distorted [lit. broken] cheek," either term being earlier (2.3 & 17) used alone in the same sense. The predicate, which is missing in Sanskrit, has been supplied by the Tibetans (*'gyur*). A slight deviation from the original lies in the fact that *tikṣṇa*, which the scholiasts refer to the entire compound (except its final member), has been connected only with *dhūma*; as if to stress this point, its equivalent *rnon* has been given a (superfluous) case-ending of its own.

Turning to the variants, *rmo* in C is merely a carver's error, whereas *gña* and *chags* in CD are alternative spellings of *gñeu* and *chag*; on the former see Mvy. 9550.

I 4. 11—12

Sanskrit Text

pravartayet kṣutīm saktām snehasvedau ca śilayet /
śoṣāṅgasādabādhiryaśaṁmohabhramahṛdgadāḥ //
trṣṇāyā nigrhāt tatra śītaḥ sarvo vidhir hitaḥ /
aṅgabhaṅgāruciḡlānikārśyaśūlabhramāḥ kṣudhaḥ //

one shall stimulate impeded sneezing; moreover, one shall repeatedly use lubricants and diaphoretics. Xerostomia, flaccidity of limbs, deafness, stupor, giddiness, and heart-disease (result) from the restraint of thirst. In this case every cold application (is) wholesome. Racking in the limbs, anorexia, lassitude, emaciation, stitches, and giddiness (result from the restraint) of hunger.

Tibetan Version

sbrid-pa 'gags[[7]]-*pa bsaḥ bya-ṅin* /

 der bsil cho-ga thams-cad phan /
 (51a1) [[8]] bkres-pas lus ((51a1)) žig yi-ga 'chus /
 lus sñoms³ ñam chuñ gzer mgo 'khor ||

¹ NP; 'gags CD.

² CDN; bskams P.

³ NP; sñom CD.

one shall remedy impeded sneezing; and moreover one shall keep to lubricants and diaphoretics. Through restrained thirst one's mouth is dry, one's limbs are not well, one's ears are not quick, one's head spins, one is stuporous, and heart-diseases arise. In this case every cold application is wholesome. By hunger one's body is ruined, one's appetite disturbed, one's body lazy, one's strength poor, one feels pain, (and) one's head spins.

Remarks

The arrangement has been altered only where absolutely necessary from the Tibetan point of view. Thus *pravartayet* has come to stand at the end of 11a, *trṣṇāyā nigrāhāt* at the head of 11c (this, incidentally, being the reason why both stanzas are discussed together), *sarva* after *vidhi*, and *kṣudhāḥ* at the beginning of 12c.

The phrase, however, has been changed throughout. Not only have the diseases been named after their principal symptoms, but the resulting new terms have also been turned into short sentences. In a number of cases, the outcome is somewhat vague or does not fit the basic text at all: thus *aṅgasāda* "flaccidity of limbs" has been rendered by *yan-lag mi bde* "one's limbs are not well," *aṅgabhaṅga* "racking in the limbs" by *lus žig* "one's body is ruined" (as against *yan-lag na* "sickness in the limbs" in v. 5), and *sūla* "stitch" by *gzer* "one feels pain."—*śoṣa*, on the other hand, which denotes any kind of desiccation and is not specified in the commentaries, has been paraphrased by *kha (b)skams* "one's mouth is dry" and hence may be understood as xerostomia.

Going into further details, *pravartayet* "one shall stimulate" has been replaced by *bsal bya* "one shall remove, remedy" (cf. 5.71) and *śīlayet* "one shall practise, repeatedly use" by *bsten-par bya* "one shall keep to."

trṣṇāyā nigrāhāt "from the restraint of thirst" has been translated by *skom-pa bsgags-pas* "through restrained thirst."—For *bsgags* CD have substituted the commoner 'gags; cf. v. 5.

kṣudhāḥ (sc. *nigrāhāt*) "from the restraint of hunger," as this ellipsis must be completed after the preceding line, has been simplified to *bkres-pas* "by hunger."

Instead of *sñoms* CD offer the alternative spelling *sñom*.

Sanskrit Text

In this case light, fat, warm, and little food (is) to be taken. (From the restraint) of sleep (result) stupor, heaviness of head and eyes, indolence, yawning,

Tibetan Version

*de-la*¹ *zas yan snum* [3] *dro dan*² /
*chuñ-ba*³-*dag ni sbyar-bar bya* /
gñid bkag khon myos spyi-bo mig !
lci-ziñ sñom-la glal on-ziñ //

¹ DNP; *las* C.

² CDP; *dag* N.

³ CD; *pa* NP.

In this case light, fat, warm, and little food shall be taken. From restrained sleep one is stuporous, one's head (and) eyes are heavy, one is indolent, yawning comes upon one,

Remarks

What has been said on the preceding stanzas with regard to the order of words and mode of expression also holds good for the present verse.

de-las (for *de-la*) in C and *dag* (for *dan*) in N are xylographical errors caused by the following *zas* and *chuñ-ba-dag* respectively, while *chuñ-pa* (for *chuñ-ba*) in NP seems to be the relic of an outdated orthography.

yoyja "to be taken" and *bhojana* "food" have been interchanged on grounds of syntax.

nīdrāyāḥ (sc. *nigrahāt*) "from the restraint of sleep" has been translated by *gñid bkag khon* "from restrained sleep."

Sanskrit Text

aṅgamardas ca tatrestāḥ svapnaḥ saṁvāhanāni ca /
kāsasya rodhāt tadvṛddhiḥ śvāsāruciḥṛdāmayāḥ //

and rheumatism. In this case sleep and massages (are) desirable. From the stoppage of cough (result) its increase, dyspnea, anorexia, heart-disease,

Tibetan Version

[[22b1]] *lus zig sñam sems* (2) *de-la ni* /
gñid log ((2)) *lus mñes*¹ *phan-pa yin* /
lud-pa bkag-pas de ' *phel-ziñ* /
dbugs mi bde[4]-*ziñ yi-ga* ' *chus* //

¹ NP; *mñe* CD.

and one's body is, as it were, ruined. In this case going back to sleep (and) massaging the body are wholesome. By stopped cough the same is increased, one's breath is not well, one's appetite is disturbed,

Remarks

The practice of metonymizing and verbalizing begun in v. 11 has been continued in this and the subsequent stanzas, with a similar vagueness of expression noticeable in some cases, whereas the arrangement of words follows the original, apart from necessary but insignificant changes.

A problem is posed by *aṅgamarda*, which syntactically still belongs to the preceding list of diseases and hence cannot be taken in its literal sense of "body massage."

While the other commentators are silent on the point, Candranandana paraphrases: *aṅgāni mṛḍyanta iva* "the limbs are, as it were, crushed." This harmonizes on the whole with the Tibetan rendering *lus žig sñam sems* "the body is, as it were, ruined," the first component of which has previously (v. 12) been used for translating *aṅgabhaṅga* "racking in the limbs." The term *aṅgamarda* should therefore be understood in a similar way; BÖHTLINGK (pw II p. 286, with reference to Car. II 6.8) suggests "Gliederreißen."—On the meaning of *sñam sems* (lit. "one thinks in one's mind") see I 11.20, where the clause *medkhaṃ dhūmāyatīva* "the penis, as it were, smokes" has been turned *pho-mṥhsan tshig-pa sñam-du sems*.

For *mñes* CD have substituted *mñe*, the perfect and the future stem being more or less interchangeable when used substantively.

iṣṭa "desired, desirable" has been transferred to the end of the sentence and replaced by *phan-pa* "wholesome," with *yin-pa* added as copula.

hṛdāmaya "heart-disease" has been removed to the beginning of the next stanza, obviously for lack of space.

I 4. 15

Sanskrit Text

śoṣo hīdhmā ca kāryo 'tra kāsahā sutarāṃ vidhiḥ |
gulmahṛdrogasam̐mohāḥ śramaśvāsād vidhāritāt ||

desiccation, and hiccup. In this case a still more cough-destroying application (is) to be made. Visceral induration, heart-disease, and stupor (result) from suppressed panting with fatigue.

Tibetan Version

sñiñ-nad skem¹-byed skyigs-bus 'debs |
der ni luḍ bsal cho-ga [[2]] bya |
ñal-dub dbugs ni bkag-pa-las |
skran dañ sñiñ nad myos(3)-par 'gyur ||

¹ NP; *skems* CD.

(and) one is stricken with heart-disease, desiccation, (and) hiccup. In this case a cough-destroying application shall be made. From suppressed panting with fatigue one gets sick with visceral induration and heart(-disease as well as) stuporous.

Remarks

śoṣa "desiccation" has been rendered *skem(s)-byed* "making dry," which, properly speaking, is the epithet of a demon that causes drought in general and desiccation of the body in particular. In Mvy. 4761 it is equated to *Skanda* "Attacker," a name of Kārttikeya, who, among other things, is leader of the demons of children's diseases (cf. VI 3.11). The word may also be used in the metonymical sense of drought and desiccation as such.

kārya has been transferred to the end of pāda b and *śramaśvāsād vidhāritāt* to the head of pāda c, both for syntactical reasons.

The dvandva compound *gulmahṛdrogasam̐moha* "visceral induration, heart-disease, and stupor" has been represented somewhat incongruously by *skran dañ sñiñ nad myos-par 'gyur*, lit. "one gets sick with visceral induration and in the heart (as well as) stuporous." Were it not for the terminative *myos-par*, one would rather translate: "visceral induration, heart-disease, (and) stupor are caused."

I 4. 16

Sanskrit Text

hitam viśramaṇam tatra vātaghnaś ca kriyākramaḥ |
jrmbhāyāḥ kṣavavadroḡāḥ sarvaś cānila-jidvidhiḥ ||

¹ B; *sarvo* 'trānila° K.

In this case relaxation (is) wholesome and the wind-destroying method of treatment. From (suppressed) yawning (result) diseases (such) as (those resulting) from (suppressed) sneezing, and (in this case) every wind-destroying application (is wholesome).

Tibetan Version

de-la ((3)) nal gso bya-ba dan |
rluñ sel bya-bai¹ cho-ga phan |
glal bkag[5]-pa² ni sbrid bkag mthsuñs |
cho-ga thams-cad rluñ 'joms bya ||

¹ CD; *sel-ba-yi* NP. ² NP; *na* CD.

In this case a treatment that will disperse fatigue and remove wind is wholesome. With suppressed yawning (it is) as with suppressed sneezing, (and in this case) every application that will destroy wind (is wholesome).

Remarks

The rhetorical order of words in the first line and the elliptical mode of expression in the second have been abandoned, with only the predicate to be supplied in either case.

viśramaṇa "relaxation" has been rendered *nal gso bya-ba* "going to disperse fatigue" and made dependent upon, rather than co-ordinate with, *kriyākrama* "method of treatment," which in its turn has been simplified to *cho-ga* "treatment." Similarly, *vātaghna* "destroying wind" has been translated by *rluñ sel bya-ba* "going to remove wind"; the present participle *sel-ba* in NP, though coming closer to the basic text, is less satisfactory from the stylistic point of view.

jrmbhāyāḥ (sc. *vidhāritāyāḥ*) "from suppressed yawning," as the ellipsis is best completed after the previous stanza, has been represented by a modal accusative: *glal bkag-pa ni* "with suppressed yawning." For this CD have substituted a locative assuming the function of a conditional gerund: *glal bkag-na ni* "if yawning has been suppressed."

roga "disease" has been dropped and the remainder of the compound given a more general meaning: *sbrid bkag mthsuñs* "as with suppressed sneezing."

anilajit "destroying wind," like the above *vātaghna*, has been reproduced by a future participle: *rluñ 'joms bya* "going to destroy wind." It would, of course, also be possible to take *rluñ 'joms* alone for the correspondent of *anilajit* and *bya* for the predicate: "shall be made" (~ *kārya*; cf. v. 15); but then *thams-cad* "every" would be out of place, the sense being that any, not every, wind-destroying application shall be resorted to in this case.

I 4. 17

Sanskrit Text

pinasākṣīśirohṛdruṁmanyāstambhārucibhramāḥ |
saḡulmā bāṣpatas tatra swapno madyaṁ priyāḥ kathāḥ ||

Catarrh, pain in the eyes, the head, and the heart, stiffness of the neck, anorexia, and giddiness—along with visceral induration—(result) from (suppressed) tears. In this case sleep, liquor, (and) cheerful words (are wholesome).

[[3]] *mchī*¹-*ma bkag-pas mgo sñin na |*
gñā reṅs yi-ga 'chus mgo 'khor |
skran bcas sna-chu 'dzag (4) 'gyur der |
gñid ((4)) ñoms chañ btuñ gñam sñan phan ||

¹ NP; *mchil* CD.

By suppressed tears are caused sick head (and) heart, stiff neck, disturbed appetite, spinning head—along with visceral induration—, (and) dripping nasal mucus. In this case satisfying one's desire for sleep, drinking liquor, (and) cheerful talk (are wholesome).

Remarks

The word-order has been retained except for *pīnasa* and *priya*, which have been interchanged with *bāṣpatas* and *kathā*, and the nominal diction preserved except for *swapna* and *madya*, which have been turned into participial phrases, while the ellipses have again been duly completed. The names of the various diseases have for the most part been replaced by short descriptions of their main symptoms. Finally, *akṣi* "eye" has been left untranslated and *mchī-ma* "tear" altered to *mchil-ma* "spittle" in CD, on which see v. 1.

I 4. 18

Sanskrit Text

visarpakoṭhakuṣṭhākṣikaṇḍūpāṇḍvāmayaajvarāḥ |
sakāsaśvāsahṛllāsavyaṅgaśvayathavo vameḥ ||

Erysipelas, urticaria, leprosy, itching of the eyes, jaundice, and fever as well as cough, dyspnea, palpitation of the heart, freckles of the face, and swellings of the skin (result) from (suppressed) vomiting.

Tibetan Version

skyug[6]-*bro brnags*¹-*pas me-dbal mdze |*
'bras dañ mig nad [[4]] *gyan-pa rims |*
skya-rbab lud-pa dbugs mi bde |
*dañ-ga ro stod mi bde skraṅs*² ||

¹ CD; *mnags* NP.

² NP; *skran* CD.

By being replete with vomitus (are caused) erysipelas, leprosy, urticaria, disease (and) itching of the eyes, fever, jaundice, cough, dyspnea, bad

appetite (and indisposed) upper part of the body. (as well as) swellings of the skin.

Remarks

The word-order has been changed in four places: *koṭha* has come to stand after *kuṣṭha*, *pāṇḍvāmaya* after *jvara*, *hrllāsa* after *vyāṅga*, and *vami* before *visarpa*.

The nomenclature of diseases is essentially the same as in the Mahāvīyutpatti. Only the following deserve special mention:

koṭha is, according to VI 31.32 sq., a persistent form of *utkoṭha*, a disease characterized by numerous strongly itching, red-coloured, circular spots on the skin and identified by Durr as Urticaria evanida (see JOLLY, Medicin p. 101), by others as impetigo, ringworm, etc. (see MW p. 313). Its usual Tibetan correspondent is *zlum-po*¹, which properly denotes any round-shaped object. In the present case it has been rendered by *'bras*, which is equated in Mvy. 9487 to *gaṇḍa* "pimple."

aksikaṇḍū "itching of the eyes" has been translated by a hendiadys: *mig nad gyan-pa* "disease (and) itching of the eyes," that is substantially, "morbid itching of the eyes."

hrllāsa "palpitation of the heart" has been represented more generally by *ro stod mi bde* "indisposed upper part of the body," whereas *vyāṅga* "freckles of the face" has been expressed altogether differently by *dañ-ga* (sc. *mi bde*) "bad appetite." It is possible that the Tibetans had a variant reading before them or else mistook *lāsa* for *abhilāsa* "appetite" and *vyāṅga* (from *vi-aṅg*) for the homonymous *vyāṅga* (from *vi-aṅga*) "ill-limbed, crippled, deranged."

For *skrañ(s)* see remarks on 5.34.

In other respects, the prefix *sa* "along with, as well as" has been omitted, while *vameḥ* (sc. *vidhāritāyāḥ*) "from suppressed vomiting" has been turned *skyug-bro brnags-pas* "by being replete with vomitus," *mnags* in NP being perhaps a rare secondary spelling of *brnags*. It is not, however, impossible that both *brnags* and *mnags* are corrupt for *brnañs*, the perfect of *rnañ-ba* "to stop," which would come closest to the original.

¹ Cf. IV 19.66, VI 31.32 sq., VI 32.33; in two other occurrences (IV 19.52 & 20.9) it is missing.

der¹ kha bkañ dbo dud smyui² gnas /
rtsub zos³ de ñid skyug⁴-pa (5) dañ /
rtsol ((5)) dañ myur-bar gtar-ga gdab /
[7] bkru-smān btañ⁵-ba'añ [[5]] bñags-pa yin ||

¹ Missing in NP.

² CDN; *myui* P; NP add *bar*.

³ NP; *bros* CD.

⁴ NP; *skyugs* CD.

⁵ NP; *gtañ* CD.

After one has filled one's mouth—spilling (its contents), keeping to an inhalant (and) a fast, after one has eaten pungent (food)—ejecting it, engaging in gymnastics, quickly doing a bloodletting, and giving a purgative will be commended in this case.

Remarks

While leaving intact the original word-order except for *śasta*, which has been interchanged with *virecana*, and *atra*, which has been transferred to the head of the stanza, the Tibetans have expanded the several subjects into participial phrases, adding suitable verbs if necessary. In the case of *gaṇḍūṣa* “gargle,” apparently for want of an adequate term, they have resorted to the extraordinary paraphrase *khu bkañ dbo* “after having filled one's mouth—spilling (its contents)”; a similar roundabout expression occurs in 2.6, where *gaṇḍūṣa* is interpreted as *mkhur-bkañ-dor* “that which one spits out after having filled one's cheeks.” In the case of *srutir asrasya* “bloodletting” they have added not only a verb but also an adverb: *myur-bar gtar-ga gdab* “quickly doing a bloodletting.”

As regards the variants, NP have omitted *der* and compensated for the missing syllable by inserting *bar* after *smyuñ* (misspelt *myuñ* in P). For *zos* “after one has eaten” CD write *bros* “after one has tasted,” which is less satisfactory in this context; since *zos* and *bros* are very similar in script, the latter may be nothing but a corruption. Instead of *skyug* (present) and *btañ* (perfect) CD read *skyugs* (perfect) and *gtan* (future); as the distinction of tenses is abandoned in substantive usage, these substitutes are equally correct from the grammatical point of view.

hr̥dvyathā mūtrasaṅgāṅgabhaṅgar̥ddhyaśmaṣaṇḍhatāḥ¹ |
tāmracūḍasurūṣālibastyabhyaṅgāragāhanam ||

¹ B; °vardhmāśmaṣaṇḍhatāḥ K.

throbbing of the heart, retention of urine, racking in the limbs, swelling of the testicles, gravel, and impotence. Cock, arrack, rice, enema, inunction, bathing,

Tibetan Version

sñiñ-nad chu¹ 'gags lus žig² dan |
rdeu 'phel dan ma-niñ 'gyur |
de-la khyim-byai śa dan chan |
'bras-chan ((6)) mas[23a1][[6]]-btañ³ (6) lus spyiñ⁴ dan ||

¹ CD; chus NP.

² CD; žigs NP.

³ NP; gtoñ CD.

⁴ NP; bcin CD.

heart-disease, retained urine, ruined body, gravel, testicular swelling, and impotence. In this case rooster-meat, arrack, boiled rice, an enema, dipping the body,

Remarks

hr̥dvyathā "throbbing of the heart" has been translated by *sñiñ-nad* "heart-disease," *mūtrasaṅga* "retention of urine" by *chu 'gags* "retained urine" (the instrumental *chus* in NP is obscure and no doubt corrupt), and *aṅgabhaṅga* "racking in the limbs" by *lus žig* "ruined body" (see v. 12; *žigs* in NP seems to be an alternative spelling).

vr̥ddhi has been interchanged with *aśman* and metaphrased by *'phel*; both words literally mean "increase" but in medical terminology denote a testicular swelling (cf. III 11 & VI 13). The Kottayam text and the parallel passage As. I 5.20 (our subsequent numeration) read *varāhman* instead, which also signifies "hernia"; both diseases are regarded as congenerous by Indian physicians (cf. JOLLY, *Medicin* p. 104).

'gyur "are caused" and *de-la* "in this case" have been added.

tāmracūḍa "red-crested one, cock" has been paraphrased by *khyim-bya* "domestic cock, rooster." As the food is meant in this case, the Tibetans have inserted *śa* "meat."

By *surā* and *chan* is understood, not just plain liquor, but arrack or spirits made of grain; cf. 3.12.

śāli "rice" has been rendered by *'bras-chan* "boiled rice"; cf. 3.30 & 51.

abhyaṅga "inunction" has been dropped.

avagāhana "bathing" has again been turned *lus spyiñ* "dipping the body"; as in v. 6, CD write *bcin* for *spyiñ*, which does not make sense and appears to be a xylographical error occasioned by homophony.

I 4. 22

Sanskrit Text

baṣṭiśuddhikaraiḥ siddham bhajet kṣīraṃ priyāḥ striyaḥ |
tṛṣṭulārtaṃ tyajet kṣīraṃ viḍvamaṃ vegarodhinam ||

milk prepared with bladder-cleansing (substances, and) lovely women one shall turn to (in this case. A patient) suffering from stoppage of the natural urges (and either) affected with thirst and stitches (and) emaciated (or) vomiting stool one shall give up.

Tibetan Version

chu-soi nad bsal til-mar btsos |
o-ma bud-med g'zon bsten¹ phan ||

¹ DNP; *bston* C.

and turning to prepared sesame-oil eliminative of bladder-diseases, to milk, (and) to young women are wholesome.

Remarks

The first half of the stanza has undergone two major changes of construction, not to mention the shift of *bhajet* and *priya*. One concerns the attribute *siddha* "prepared," which has been severed both from the accusative object *kṣīraṃ* it belongs to and from the instrumental *bastiśuddhikaraiḥ* it governs, and which has been joined to a newly added accusative object *til-mar* "sesame-oil." (Perhaps the translators had a variant text before them.) The other concerns the verb *bhajet* "one shall turn to," which has been deprived of its function as predicate and degraded to the role of a participle: *bsten* "turning to" (*bston* in C is an error), with a newly added *phan* "are wholesome" serving as predicate. Furthermore, *bastiśuddhikara* "bladder-cleansing" has been rendered by *chu-soi nad bsal* "eliminating bladder-diseases" and *priya* "lovely" replaced by *g'zon* "young."

The second half of the stanza, the English translation of which follows Aruṇadatta's paraphrase, is missing in Tibetan as well as in Candranandana's commentary; it was, however, known to Hemādri and Indu.

I 4. 23

Sanskrit Text

rogāḥ sarve 'pi jāyante vegodīraṇadhāraṇaiḥ |
nirdiṣṭaṃ sādhanam tatra bhūyiṣṭhaṃ ye tu tān prati ||

All possible diseases are caused by provocation and suppression of the natural urges. A cure (has been) given (only) for those which (occur) most frequently among them.

Tibetan Version

śugs ni bkag dan btsir-ba-yis |
nad ni kun kyaṅ 'byun-bar 'gyur |
śin-tu maṅ-po de-yi phyir |
gso¹[2]-dpyad [[7]] maṅ-po 'dir bśad-dō ||

¹ DNP; *gsod* C.

All possible diseases are caused by suppressed and forced natural urges. (Only) for the most frequent ones common methods of treatment have here been given.

Remarks

The second and fourth hemistichs have been interchanged with the first and third respectively in order to meet the requirements of Tibetan syntax.

vegodīraṇadhāraṇa "provocation and suppression of the natural urges" has been rendered *śugs ni bkag dan btsir-ba* "suppressed and forced natural urges."

sādhana "cure" has been translated by *gso-dpyad* "method of treatment" (*gsod* in C being a mistake) and specified by adding *man-po* "many, frequent, common."

nirdiṣṭa "given" has been transferred to the end of the stanza on grounds of syntax.

tatra has been connected with *nirdiṣṭa* instead of *bhūyiṣṭha* and reproduced by *'dir*, which rather corresponds to *atra*, a slight irregularity necessitated by the change in relation.

bhūyiṣṭham, which is an adverb in Sanskrit, has been turned adjectively in Tibetan: *śin-tu man-po* "most frequent." The following relative *ye* has been omitted.

I 4. 24

Sanskrit Text

tataś cānekadhā prāyaḥ pavano yat prakupyati |
annapānaūṣadham tatra¹ yuñjītāto 'nulomanam ||

¹ B; *tasya* K.

And inasmuch as the wind is usually irritated by this (provocation and suppression of natural urges) in many ways, one shall apply to it food, drink, and medicine (suitable) for its regulation.

Tibetan Version

de-las phal-cher ((7)) *rluñ du-ma |*
gañ (7) *phyir 'khrugs-par gyur-pas¹-na |*
de phyir de-yi² zas skom³ sman |
mñam-par 'gyur-bar⁴ sbyar-bar⁴ bya ||

¹ NP; *'gyur-bas* CD.

² NP; *dei* CD.

³ CD add *dan*.

⁴ CD; *ba* NP.

Inasmuch as the wind is usually irritated by these (suppressed and forced natural urges) in many ways, one shall apply to it such food, drink, (and) medicine that it becomes normal (again).

Remarks

To keep the original sentence-construction, the Tibetans have radically changed the word-order, particularly in the second half of the verse, placing *anekadhā* after *pavana*, *tatra* before *annapānaūṣadha*, *yuñjīta* at the end of 24d, and *atas* at the head of 24c.

prakupyati "is irritated" has been rendered by *'khrugs-par gyur-pa*, lit. "has been irritated," the perfect denoting here, not the tense proper, but the antecedence in time to the action of the principal verb *sbyar-bar bya*; as this stands in the future, the variant *'khrugs-par 'gyur-ba* in CD has much the same function, a perfect infinitive in compound present forms being not infrequent.

For *tatra* K reads *tasya*, which is supported by the Tibetan, the genitive being possible if rare in this connection; cf. MārKP. LI 11: *śubhāśubhe nṛṇāṃ yunkte* "he bestows good and evil upon men." It should be noted that *de-yi* is a Sanskritism inasmuch as *sbyor-ba* usually takes the dative or the postposition *dan*. Instead of *de-yi* CD write *dei*; to make up for the missing syllable, they insert *dan* between *skom* and *smān*.

anulomanam "for its regulation" has been represented by a supine: *mān-par 'gyur-bar* "so that it becomes normal (again)." Here and in translating the predicate NP have disregarded the terminative case-ending.

I 4. 25

Sanskrit Text

dhārayet tu sadā vegān hitaiṣi pretya ccha ca |
lobhersyādveṣamātsaryarāgādīnāṃ jīvendriyaḥ ||

He, however, who desires welfare both after his death and here shall always suppress the urges of avarice, jealousy, hatred, envy, passion, etc. after having subjugated his senses.

Tibetan Version

'di dan gzan-du phan 'dod-pas |
'dod chen phrag-dog ze[[8]]-sdañ [3] dan |
ser-sna 'dod-chags-la sogs šugs |
rtag dgag¹ dbaṇ²-po thul-bar bya ||

¹ NP; *bkag* CD.

² Missing in NP.

He who desires welfare in this and the other (world) shall always suppress the urges of avarice, jealousy, hatred, envy, passion, etc. (and) subjugate his senses.

Remarks

As in the preceding stanza, the word-order has been thoroughly changed in favour of the sentence-construction. This has been altered only by turning the predicate (*dhārayet*) into a future (*dgag* NP) or perfect (*bkag* CD) gerund and the predicate noun (*jīvendriya*) into the main clause (*dbaṇ-po thul-bar bya*).—An interesting phenomenon is the omission in NP of *dbaṇ*, which reveals quite clearly the interdependence of these two xylographs (see Introd. § 21 *fin.*).

In other respects, *tu* "however" has been neglected and *lobha* "avarice" translated by *'dod chen*, lit. "great desire," a term corresponding in Mvy. 2210 & 2223 to the hybrid *icchāntika* (cf. EDGERTON, Diet. p. 113).

Finally, *pretya ccha ca* "both after death and here" has been paraphrased by *'di dan gzan-du* "in this and the other (world)."

I 4. 26

Sanskrit Text

yateta ca yathākālāṃ malānāṃ śodhanam prati |
atyārtha¹samcitās te hi kruddhāḥ syur jīvitacchidaḥ ||

¹ B; *atyartham* K.

And one shall in good time strive after purgation of the secretions; for if accumulated beyond measure, they may boil up (and) cut off life.

Tibetan Version

((51b1)) *dri-ma-rnams ni* (51b1) *sbyañ-bai phyir* |
ji-bžin dus-su nan-tan bya |
de ni šin-tu gsogs gyur¹-na |
śas-cher 'khrug²-pas srog [[23a1]] *rgyun gcod* ||

¹ NP; *gsogs 'gyur* CD.

² NP; *'khrugs* CD.

One shall in good time make an earnest effort at purging the secretions; if accumulated beyond measure, they boil up vehemently and thereby cut off the stream of life.

Remarks

The rhetorical word-order in Sanskrit, which is marked by the hyperbaton-cum-tmesis of predicate and prefix in the first line and by the interstitial arrangement of the predicate nouns in the second, has given way to a grammatical one, while the construction has undergone no changes; only the particles *ca* and *hi* are missing in Tibetan.

yateta "one shall strive" has been rendered by *nan-tan bya* "one shall make an earnest effort."

malānāṃ śodhanam prati "after purgation of the secretions" has been verbalized to *dri-ma-rnams ni sbyañ-bai phyir* "at purging the secretions."

For *gsogs gyur* "having become accumulated" CD write *gsogs 'gyur* "becoming accumulated"; for the spelling of (*g*)*sog-pa* see remarks on 3.18.

To *'khrug-pas*, which CD have replaced by the perfect *'khrugs-pas* in order to stress the priority of action, the translators have added *śas-cher* "in an eminent degree, vehemently" (~ *tivra* Mvy. 7264 sqq.).—The instrumental serves to establish a causal relation to the following *gcod*, which we have expressed in English by inserting "thereby."

The metaphor *jīvitacchid* "cutting off life" has been expanded into *srog rgyun gcod* "cutting off the stream of life."

I 4. 27

Sanskrit Text

doṣāḥ kadācit kupyanti jītā laṅghanapācanaiḥ |
ye tu saṃśodhanaiḥ śuddhā na teṣāṃ punarudbhavaḥ ||

The humours are sometimes irritated after having been subdued by fasting and cooking; with those, however, which (have been) purged by purgatives, no (such) reappearance (takes place).

Tibetan Version

gnod-pa [4] *smyun dañ bzu¹ byas-pas* |
bsal kyañ slar ni ldañ srid²-kyi |
gañ žig legs-par sbyañ-ba³-dag |
de ni ((2)) slar yañ 'byun mi 'gyur ||

¹ NP; *gzu* CD.

² DNP; *srin* C.

³ NP; *sbyaṅs-pa* CD.

The humours, although removed by one's having made a fast and aided digestion, are liable to rise again; those, however, which are properly purged, do not reappear.

Remarks

A number of changes have been made in the arrangement and diction of the original. Thus *kadācī* "sometimes" has been omitted, while *kupyanti* "are irritated" has been transferred to the end of the sentence and replaced by *slar ni ldan srid-kyi* "are liable to rise again," the gerund in *kyi* being a substitute for the adversative particle *tu*.—*srin* in C is a mistake.

jita "subdued" has been shifted to the end of the clause and rendered by *bsal kyañ* "though removed," a concessive sense being not necessarily implied by the Sanskrit.

lañghanapācana "fasting and cooking" has been reproduced by *smyuñ dan bzu byas*, which is best turned "having made a fast and aided digestion," both *smyuñ* and *bzu* being elliptical terminatives dependent upon *byas* (lit. "having made [oneself] to fast and [the humours] to be digested"). For *bzu*, the future of *zu-ba*, CD read *gzu*, which seems to be an alternative spelling, though it is not otherwise attested as such.

saṃśodhanaiḥ śuddhāḥ "purged by purgatives" has been simplified to *legs-par sbyaṅ-ba* "purged properly," with the cognate instrumental left unheeded. Instead of the present *sbyaṅ-ba* CD use the perfect *sbyaṅs-pa*, which comes still closer to the basic text.

The words *na teṣāṃ punarudbhavaḥ* "with those . . . no (such) reappearance (takes place)" have been put verbally: *de ni slar yañ 'byuñ mi 'gyur* "those . . . do not reappear."

I 4. 28

Sanskrit Text

*yathākramam yathāyogam ata ūrdhvaṃ prayojayet |
rasāyanāni siddhāni vṛṣayagāṃś ca kālavit ||*

He who knows the right time (for administering remedies) shall thereafter apply perfect elixirs and aphrodisiac preparations according to the (prescribed) order (and the attendant) circumstances.

Tibetan Version

*dus*¹ (2) *śes-pa-yis de phan*[[2]]-*chad* /
rim-pa bzin-du ci rigs-par /
bcud-kyis len-rnams [5] *grub-pa dan* /
ro-tsai sbyor-ba sbyar-bar bya ||

¹ C adds *dus*.

He who knows the right time (for administering remedies) shall thereafter apply perfect elixirs and aphrodisiac preparations according to the (prescribed) order (and the attendant) circumstances.

Remarks

While the word-order has again been adapted to Tibetan usage, with the subject and predicate moved to the beginning and end of the verse and the temporal placed before the modal adverb, the sentence-construction has been left unaltered.

Entering into particulars, *yathākramam* “according to the (prescribed) order” has been rendered by the original *rim-pa bzin-du*, whereas *yathāyogam* “according to the (attendant) circumstances” has been translated by the imitative *ci rigs-par*. The juxtaposition of these two modes of expression is remarkable.

rasāyana “elixir” has been represented by *bcud-kyis len*, which in this or similar forms¹ is its usual Tibetan correspondent. While *rasāyana* must be etymologized as that which comes forth (*ayana*) as juice (*rasa*) from pressed fruits, infused herbs etc., *bcud-kyis len* may be interpreted as an essence (*bcud*) by which (*kyis*) are obtained (*len-pa*) health, longevity etc.—The position of the plural suffix *rnams* after *bcud-kyis len* instead of *ro-tsa'i sbyor-ba* is striking; perhaps *nam* should be read.

vr̥ṣayoga, lit. “a preparation productive of sexual vigour,” has been turned *ro-tsa'i sbyor-ba*, lit. “a preparation for sexual desire.” The cognate accusative has for once been retained in Tibetan.

dus (after *dus*) in C is a dittography.

¹ *bcud-kyis len* also 5.21 & 6.157; *bcud-kyis len-pa* 18.17; *bcud len* 6.72, 84, 121, 161; *bdud-kyis len* [?] and *bcud-kyi len* Mvy. 5776.

Having purged one's body with medicines, one becomes gradually strong (again) as to one's body by wholesome food such as rice, sixty-day-old rice, wheat, mung-beans, meat, and ghee. Having become strong (furthermore) by appetizers and digestives combined with pleasant (and) stomachic remedies, by inunctions and massages accompanied with baths, and by enemas (made) of strong (and) mild fluids: the (patient) becomes endowed with strength as to all the fires and devoid of faults as to intellect, colour, (and) senses (and) thus possessed of long life, carnal desire, happiness, and vitality.

Remarks

The Tibetan version of this paragraph reveals considerable differences both between its two recensions and from the original. Those centre around the substitution of *brtas* for (*b*)*rta* in 29d ("having become gradually strong [again]") and of *byas* for *bcas* in 30c ("by having made inunctions, massages, and baths"), while these hinge upon the disconnection of stanzas 29 and 30 on the one hand and the connection of stanzas 30 and 31 on the other, to which add the modification of *bheṣajakṣapite*, the verbalization of *bṛṃhana*, and the tripartition of *labhate*. Within this altered frame, the word-order strictly follows the basic pattern, except for pādas 29b and 31a. As an elaborate comparison with the Sanskrit would be inexpedient under such circumstances, only a few points of interest will here be discussed.

To begin with, *pathya* "wholesome" has been relieved of its office as predicate and degraded to the role of an attribute, its repetition (*phan* in 29a and *phan-pai* in 29d) evidently serving to emphasize the appositional nature of the intervenient words (29bc).

zad (for *zas*) in N is a xylographical error.

ria(-ba) in NP appears to be a secondary spelling of *brta-ba*. The omission of the prefixed *b* is attested so far only for the perfect *brtas*; cf. JÄSCHKE, Diet. p. 224.

For *sa-lu* CD write *sā-lu*. The orthography varies elsewhere too; cf. Udr. pp. 1.9, 1.22, 19.24.

For *gro* "wheat" N has an erroneous 'gro, whereas CD read *dro*, which, if correct, signifies the hot time of day (from about 9 a.m. till 3 p.m.) or a meal taken then, the idea being perhaps that a convalescent shall eat rice, sixty-day-old rice, and—"at noon" or "for lunch"—mung-beans, meat, ghee etc.; *godhūma* "wheat" would be missing in that case.

mubga (for *mudga*) in N and *śad* (for *śa*) in C are again carver's errors.

hr̥dyadīpanabhakṣajya "cardiac and stomachic remedies" has been translated *yiḍ on drod skyed sman*, which literally means "remedies pleasing the heart (and) producing (gastric) heat." The interpretation in this context of *hr̥dya* as "pleasant" is quite untenable, though.—Remedies of the above description include, according to Arunadatta, dry ginger (*śuṇṭhī*), long pepper (*pippalī*), fresh ginger (*ādraka*) cinnamon (*tvac*), cardamom (*elā*), or the like.

rucipaktida "promotive of appetite and digestion" has been represented by *yi-ga 'byed-ciñ 'ju byed* "that which opens appetite and causes digestion," that is substantially, "appetizers and digestives."—For 'byed-ciñ NP have substituted the

intransitive 'bye-*zin*, which is less suitable here; *bzu* (for 'ju) in N seems to be a mistake.

The mātra of *zin* (in *bsku-zin*) is missing in D; cf. Introd. p. 28 *sup*.

On the hendiadys *dril-phyis* see 2.14.

sa has been retained in NP as *bcas* but connected only with *snāna*.

nirūhasnehabasti "purgative and lubricant enemas" (cf. I 19.2) has been paraphrased by *drag-po* 'jam rtsi mas-btan [v.l. *gton*] "enemas (made) of strong (and) mild fluids."

mi (for *me*) in C is a blunder.—On the various fires Aruṇadatta elaborates as follows:

tatra bhaumāpyāgneyavāyavyāḥ pañcoṣmāṇaḥ sanābhasāḥ pañcamahābhūtāgnayo dhātuvāgnayaḥ sapta trayodaśo jātharāgniḥ |

"Among these (are reckoned) the five kinds of heat relating to earth, water, fire, and wind as well as ether, (that is), the fires of the five gross elements, (moreover) the seven fires of the body-elements, (and) as the thirteenth the fire of the stomach."

śarman "comfort" has been moved to the end of the series of objects and turned *dpal dan gzi-mdan* "happiness and vitality," *gzi-mdan* being a tautological expression either component of which corresponds to Skr. *ojas*; on this term see 2.15.

vr̥ṣatā "potency" has been rendered by *ro-tsa* "carnal desire" (cf. v. 28) and interchanged with *dairghyam āyusaḥ* "longness of life," which again has been translated by *thse riñ* "long life."

I 4. 32

Sanskrit Text

ye bhūtaviśavāyavagnikṣatabhaṅgādisambhavāḥ |
kāmakrodha¹bhayādyāś ca te syur āgantavo gadāḥ ||

¹ B; *rāgadveṣa*° K.

Those which (are) caused by demons, poison, wind, fire, ruptures, fractures etc. and (include) passion, anger, fear etc. are the (so-called) accidental diseases.

Tibetan Version

[7] 'byuñ-po dug¹ dan rluñ dan me |
mtshon rmas² chags³-grugs sogs⁴ 'byuñ dan |
'dod-chags že-sdan [[5]] 'jigs sogs⁵ gañ |
de ni glo-bur nad ces bya ||

¹ NP; *dugs* CD.

² NP; *smas* CD.

³ CN; *chag* DP.

⁴ NP; *stsogs* CD.

⁵ NP; *'jig-thsogs* CD.

Those which are caused by demons, poison, wind, fire, sword- or spear-wounds, fractures etc. and (include) passion, anger, fear etc. are called the accidental diseases.

Remarks

In accordance with Tibetan usage, the relative pronoun has been moved to the end of its clause and the predicate shifted to the close of the sentence. Otherwise, no changes in word-order and construction have been made.

dug "poison" has been replaced in CD by *dugs* "heat," which appears to be a mistake rather than a true variant.

kṣata “rupture” signifies, according to *Suśruta* (IV 2.20 *sq.*)¹, “an external wound at any part of the body that (is) neither a cut nor a stab (but is) indicative of the symptoms of both (and) uneven.” Here it has been turned into its opposite *mthson rmas* “sword- or spear-wound,” which would rather be *chinna* or *viddha* in Sanskrit terminology.—For *rmas* CD have substituted the alternative spelling *smas*.

bhaṅga “fracture” has been rendered by *chag(s)-grugs*, a hendiadys literally meaning “breaking & crumbling.”

For *’jigs sogs*, the precise equivalent of *bhayādyā* “fear etc.,” CD write *’jig-thsogs*, which usually stands for Skr. *satkāya* “real personality” (Mvy. 1955 & 4684), one of the five heresies in Buddhism; cf. *EDGERTON*, Dict. p. 553. There can be no doubt but that a later redactor was here at work.

syuk, which must be regarded as an optative of softened statement (see *WHITNEY*, Skr. Gr. § 573a) meaning “are,” has been reproduced by *ces bya* “are called.”

Sanskrit Text

tyāgaḥ prajñāparādhānām indriyopasamaḥ smṛtiḥ |
deśakālātma vijñānaṃ sadvṛttasyānuvartanam ||

Avoidance of offences against wisdom [2.29], assuagement of the senses [2.29 & 4.25], awareness [2.46 *sq.*], knowledge of region [1.22 *sqq.*], season [2 *passim*], and constitution [1.9 *sq.*], (and) imitation of the conduct of sages [2.19 *sqq.*]:

Tibetan Version

śes-rab ṅes-pa spañ-ba dañ |
dbañ-po ṅer¹ ((5)) źi² dran-pa dañ |
yul [23 b1] dus bdag-ñid śes-pa dañ |
dam-pai spyod(5)-pai rnam³ ’jug-pa ||

¹ DNP; *ṅes* C. ² CD; *źiñ* NP. ³ NP; *rjes* CD.

Avoiding offences against wisdom, becoming assuaged as to one’s senses, being aware, knowing region, season, and constitution, and imitating the conduct of sages:

Remarks

Except for the transposition of *tyāga* and *prajñāparādhā* and the conversion into participles of the verbal nouns, the Tibetan is a faithful reproduction of the original Sanskrit.

As concerns the variant readings, *ṅes* (for *ñer*) in C is simply a mistake caused by the preceding *ṅes-pa*, while *źiñ* (for *źi*) in NP is an old corruption passed from N into P.—*rnam(-par)* in the sense of *anu*, as given by NP, is extremely rare; it recurs, so far as we can see, only in the *Laṅkāvatārasūtra* (*SUZUKI*, Index s. v. *anugama*) and hence has been replaced in CD by the usual *rjes(-su)*.

Sanskrit Text

*anutpattiyai samāśena vidhir eṣa pradarsitaḥ |
niṣāgantuvikārāṇām utpannānāṃ ca śāntaye ||*

this method (has been) taught in brief for the non-arising of endogenous and accidental diseases and for the alleviation of (those which have) arisen.

Tibetan Version

*lhan-cig skyes dan̄ [[6]] glo-bur nad̄ |
mdor-na ma skyes-pa-yi phyir¹ |
skyes-pa ṣi-bar bya-bai phyir |
cho-ga 'di ni bstan²-pa yin ||*

¹ NP; *skyes mi 'byun̄ dan̄* CD.

² NP; *bsten* CD.

with regard to endogenous and accidental diseases, this method has been taught in brief for (preventing those which have) not (yet) arisen (and) for alleviating (those which have) arisen.

Remarks

While leaving intact the subject-matter, the translators have taken considerable liberties in handling both the word-order and the sentence-construction of this stanza. Thus the third and fourth hemistichs have come to stand before the first and second respectively, to which add the transposition of *anutpattiyai* and *samāśena*, and the genitive attribute *niṣāgantuvikārāṇām* has been turned into a modal accusative.

The redactors of CD have made two further changes, substituting *skyes mi 'byun̄ dan̄* for *skyes-pa-yi phyir* and *bsten-pa yin* for *bstan-pa yin*. Our verse would then read in English:

with regard to endogenous and accidental diseases, this method shall be observed—in brief—for making (those which have) not (yet) arisen not arise and (those which have) arisen sedate.

The secondary nature of this last interpretation is, however, quite obvious.

I 4. 35

Sanskrit Text

*śītoḍbhavaṃ doṣacayaṃ vasante
viśodhayan grīṣmajam abhṛakāle |
ghanātyaye vārṣikam āśu samyak
prāpnoti rogān ṛtujān na jātu ||*

(By) quickly (and) properly purging in spring the accumulation of humours produced in the cold (season), in the cloudy season (that) caused in summer, (and) at the disappearance of clouds (that) formed in the rainy season: one never catches the diseases (usually) caused in (these) seasons.

Tibetan Version

grañ-ba-las byuñ ñes thsogs dpyid-kyi thse |
 ((6)) rnam bsal [2] so-ga-las byuñ dbyar dus-na |
 dbyar [[7]] bsags sprin bral dus-su (6) legs sbyañs-nas¹ |
 dus byuñ nad ni nam-yañ 'byuñ mi 'gyur ||

¹ NP; na CD.

After having removed in spring-time the accumulation of humours produced in the cold (season and) having properly purged in the rainy season (that) caused in summer (and) at the time of the dissolution of clouds (that) gathered during the rains: the diseases (usually) caused in (these) seasons will never arise.

Remarks

The metre of this and the next stanza is not Anuṣṭubh but Upajāti, to which correspond 4×9 syllables in Tibetan.

A number of necessary rearrangements have been made in the third and fourth lines, with *ghanātyaya* put after *vārṣika*, *roga* placed after *ṛtuja*, and the predicate moved to the end.

As regards the construction, the present participle *viśodhayan* has been translated by two temporal—in CD conditional—past gerunds (*rnam bsal* 35 b and *sbyañs-na(s)* 35c), while of its two adverbs *āśu* has been dropped and *samyak* coupled only with the second gerund. In another change of tenses (and words), the predicate *prāpnoti* “one catches” has become *'byuñ 'gyur* “there will arise,” with the former object (*rogān*) now serving as subject.

For the rest, *vasante* “in spring” has been rendered by *dpyid-kyi thse* “in spring-time,” *abhrakāle* “in the cloudy season” by *dbyar dus-na* “in the rainy season,” and *ghanātyaye* “at the disappearance of clouds” by *sprin bral dus-su* “at the time of the dissolution of clouds,” each of the three locatives being represented in a different way, namely, by an accusative, locative, and terminative (see 3.7). This apparently intended variation contrasts strongly with the quadruple use of *'byuñ-ba*.

I 4. 36

Sanskrit Text

nityaṃ hitāhāravihārasevī
 samikṣyakārī viśayeṣv asaṅgaḥ |
 dātā samaḥ satyaparaḥ kṣamāvān
 āptopasevī ca bhavaty arogaḥ ||

(By) always keeping to wholesome nourishment and deportment, acting upon mature consideration, being indifferent to worldly objects, generous, balanced, intent on truth, (and) full of patience, and keeping to the great: one becomes free from disease.

Tibetan Version

rtag-tu phan-pai zas dañ spyod-lam bsten |
 brtags¹-te byed-ciñ yul-rnams-la mi chags |
 gtoñ ldan [3] [[8]] sems sñoms bden ((7)) brtson bzod dañ ldan |
 ñams ldan sten²-par byed-na nad med 'gyur ||

¹ DNP; brtag C.

² CDN; bsten P.

If always keeping to wholesome food and behaviour, acting upon mature consideration, being indifferent to worldly objects, endowed with generosity, balanced in one's mind, intent on truth, (and) full of patience, (and) keeping to (those) possessed of greatness: one becomes free from disease.

Remarks

As the Sanskrit word-order is almost cut out for Tibetan requirements, no changes have been made in this regard, except for the transposition of *bharati* and *aroga*.

In other respects, the several predicate nouns ([°]*sevin*, [°]*kārin*, etc.) have been combined into a multipartite hypothetical clause, with occasional slight modifications in phrasing (*dātr*, *sama*, *āpta*), whereas the word-play *ākāra*: *vihāra* has been abandoned.

As concerns the variants, *brtag* in C is only a secondary form of *brtags*, the perfect of *rtog-pa*, while *bsten* in P is the future of *sten-pa*, which is also tenable here.

In closing it may be noted that this and the previous stanza, with some variant readings, are also met with in Car. IV 2.45 & 46.

— — —

K appends two verses (again in the Upajāti metre) of which the former is found in 10, the latter in 14, out of 15 manuscripts utilized. They recur at the end of As. I 5 and read as under:

*artheṣv alabhyeṣv akṛtaprayatnaṃ
kṛtādaraṃ nityam upāyaviṣu |
jñendriyaṃ nānupatanti rogāś
tatkalāyuktaṃ yadi nāsti daivam ||

phal((2))-cher phan dan gnod-pa yin ||

⁶ DNP; ⁷gyur C.

⁷ NP; ltos CD.

Ganges water falling from the sky gives (a man) life, makes (him) refreshed, meets his appetite, renders (him) satisfied and brilliant as to his intellect, and is thin, indistinct in its taste, savoury, cold, light, (and) nectar-like; having been touched by sun, moon, (and) wind (in falling), it is, with regard to place (and) time, usually (both) wholesome and harmful.

Remarks

The Tibetans have placed the first pāda of the second śloka in front of the first śloka since it contains the subject, thereby making it necessary to treat of both ślokas together. Apart from other transpositions (*bhraṣṭa*, *sprṣṭa*, *bhūyas*) dictated by the rules of syntax, there occurs one deviation from the original word-order that goes hand in hand with a change of phrase and construction; it concerns the locative *hitāhitatve*, which has been put at the end of the sentence and made its predicate (*phan dan gnod-pa yin*), with the attendant word-play abandoned, while the former verb (*apekṣate*) appears in the garb of a gerund (*bltos-nas*).

With regard to the diction, the predicate nouns of the first sentence have all been converted into full verbs. In some instances, the rendering is rather free; thus *hr̥dya* "pleasing the stomach" has been represented by *yi-gar oñ-ba* "to meet the appetite," *buddhiprabodhana* "stimulating the intellect" by *sems ni gsal byed-pa* "to render brilliant as to the intellect," and *avyaktarasa* "of indistinct taste" by *ro mi gsal-ba* "to be indistinct in taste." In nearly all cases, however, the views of the scholiasts seem to have been shared by the translators. A fine example is *mṛṣṭa*, usu. "clean," which has been interpreted to mean *śim* "savoury," in keeping with Aruṇadatta's statement that *mṛṣṭam śuddham iti na vyākhyeyam* "mṛṣṭa (is) not to be explained (here) as śuddha." (Aruṇadatta glosses, *āsvādasukha* "pleasant in taste"; Candranandana, *svādu* "sweet"; Indu, *svādutvādiguṇayukta* "connected with the qualities of sweetness etc.") The only exception is *hr̥dya*, which Indu and (after him) the Tibetans take in the sense of *hr̥dayasya priyam* "dear to the stomach [heart]," whereas Aruṇadatta holds that *hr̥dayāya hitam na tu hr̥dayasya priyam iti hr̥dyam iti vyākhyeyam* "hr̥dya (is) to be explained as wholesome to the stomach [heart] but not as dear to the stomach [heart]" and Candranandana admits both possibilities: *hr̥dayāya hitam hr̥dyam hr̥dayasya vā priyam* "hr̥dya (means) good for the stomach [heart] or dear to the stomach [heart]"; this conflict of opinions originates in the ambiguity of Pāṇ. IV 4.95, on which see Introd. p. 39 n. 1.

Three other peculiarities deserve special attention: *bhraṣṭa* "fallen" has been translated by *bab-pa* "falling," *ahita* "unwholesome" by *gnod-pa* "harmful," and *bhūyas* "largely" by *phal-cher* "usually," the latter, incidentally, being coupled not with *bltos-nas* but with *phan dan gnod-pa*. In rendering *apekṣ*, the Tibetans have restored the basic idea of "looking" (*ltos-pa*), which is almost lost in Sanskrit.

The term *gaṅgāmbu* "Ganges water" denotes pure rain-water such as falls in the month of *Āśvina* (from mid-September till mid-October), the mental connection being that Ganges water is to a Hindu the sum and substance of purity. HILGENBERG & KIRFEL erroneously take it for dew-water, which is incompatible with Suśr. I 45.7:

*tatrāntarikṣaṃ caturvidham / tad yathā—dhāraṃ kāraṃ tauṣāraṃ haimam iti /
teṣāṃ dhāraṃ pradhānaṃ laghutvāt / tat punar dvividham—gāṅgaṃ sāmudraṃ
ceti /*

“Atmospheric water, then, (is) fourfold, namely, coming down as rain, hail, dew, (and) snow. Of these, that coming down as rain (is) the best on account of its lightness. This, again, (is) twofold, Gangetic and oceanic.”

As to the variants, *gañ-gā* (for *gaṅgā*) in CD is a more Tibetanized spelling, while *thsim byed* (for *thsim-ñin*) in CD is a more concinnous rendering to be ascribed to a later redactor; *byed-pa* (for *byed-la*) in NP shows a certain laxity of syntactical connection, whereas *ltos-nas* (for *ltos-nas*) in CD reveals a slightly different approach to the time-element involved; *yiḍ-ga* (for *yi-ga*) in P, *slar-ba* (for *sla-ba*) in NP, and *gyur-pa* (for *gyur-pa*) in C, lastly, appear to be nothing but xylographical errors.

I 5. 3

Sanskrit Text

*yenābhivṛṣṭam amalāṃ śālyannaṃ rājatasthitaṃ /
aklinnam avivarṇaṃ ca tat peyaṃ gāṅgaṃ anyathā ||*

If, berained by it, stainless rice-pap kept in a silver bowl (remains) unputrid and undiscoloured, it (is) to be drunk as Gangetic (water). Otherwise,

Tibetan Version

*gañ-ñig¹ char 'bab dri-ma med /
'bras-chan² dñul-phor nañ (2) gnas-pa /
ma rul mdog kyañ ma gyur-pa /
gaṅgāi³ chu [[3]] de⁴ btuñ-bar bya ||*

¹ NP; *ñin* CD.

² DNP; *chen* C.

³ NP; *gañ-gāi* CD.

⁴ CD; *ste* NP.

If it falls as rain (and) stainless rice-pap kept in a silver bowl has become (through it) neither putrid nor discoloured, it may be drunk as Ganges water.

Remarks

abhivṛṣṭa “berained” has been converted into *char 'bab* “falling as rain,” with the hypothetical relative serving as subject.—*gañ-ñin* (for *gañ-ñig*) is obviously a blunder copied by C from D.

'bras-chan has been miscarved *'bras-chen* in C.

gāṅgaṃ (sc. *ambu*) “Gangetic water” has been placed at the head of the *pāda* and rendered by *gaṅgāi chu* “Ganges water” (again spelt *gañ-gāi chu* in CD), with the ellipsis duly completed. The following *de*, which reproduces *tat*, has been corrupted to *ste* in NP.

anyathā “otherwise” has been removed to the beginning of the next stanza.

I 5. 4

Sanskrit Text

*sāmudraṃ tan na pātavyaṃ māsād āśvayujād vinā /
aindraṃ ambu supātrastham aviṣṇaṃ sadā pibet ||*

(it is) oceanic (water); this (is) not to be drunk except in the month of Āśvayuja. Indric water placed in a beautiful cup (and remaining) unspoiled one may always drink.

Tibetan Version

gzan-du mthso-chu ston-zla ni |
'brin-po min-par btuñ mi bya |
 [6] *char-pai chu ni snod bzan bzag |*
 ((3)) *'gyur¹-ba med-pa² rtag-tu btuñ //*

¹ DNP; ² byur C. ² NP; par CD.

Otherwise, (it is) ocean-water; (this) shall not be drunk except in the month of Āśvayuja. Rain-water placed in a beautiful cup (and) remaining unspoiled one may always drink.

Remarks

sāṃudram (sc. *ambu*) "oceanic water" has been turned *mthso-chu* "ocean-water"; it is considered to be impure.—BHISHAGRATNA (Suśr. I 45.7) thinks that the terms "Gangetic" and "oceanic" water have been chosen according as the rain in question has evaporated from the Ganges or from the ocean; it is, however, highly improbable that the ancient Indians should have known the meteorological phenomenon of condensation.

tad has been omitted and *na pātavyaṃ* transferred to the end of the second hemistich.

āśvayuja (~ *ston-zla 'brin-po*) signifies the period from mid-September till mid-October.

aīndram ambu "Indric water" has been represented by *char-pai chu* "rain-water"; it is interchangeable with Gangetic water and supposed to be of celestial origin, Indra being the lord of heaven.

'byur-ba (for *'gyur-ba*) in C is a xylographical error.

Instead of *med-pa* CD read *med-par*, which (unless it is simply a mistake occasioned by the following *rtag-tu*) implies a somewhat different interpretation; *'gyur-ba med-par* would then be a supine phrase meaning "except if it is spoiled."

I 5. 5

Sanskrit Text

tadabhāve ca bhūyīṣṭham¹ āntarikṣānukāri yat |
śuciprthvasitaśvete² deśe 'rkapavanāhatam //

¹ B; *bhūmiṣṭham* K. ² B; *śveta*° K.

In case of its absence, however, (it is water springing) in a clean, vast, and black- or white(-soiled) region (and) hit by sun and wind that (is) most similar to atmospheric (water).

Tibetan Version

de med-na ni thañ-la gnas |
bar-snañ-ba dañ rjes (3) mthun yin |
 [[4]] *sa-phyogs dkar nag gtsaṇ-ñin yañs |*
ñi-od rlun-gis phog-pa bsnags //

If it is absent, terrestrial (water) is (most) similar to atmospheric (water); (that from) a white- (or) black(-soiled), clean, and vast region hit by sunlight (and) wind has been recommended (for such an eventuality).

Remarks

In their endeavour to preserve the original word-order just as faithfully as possible, the Tibetans have resorted to a drastic change of construction, omitting the relative *yad* and punctuating after *anukārin*. To continue the sentence, they have accordingly made the locative *deśe* their new subject, giving it a metonymical sense, and added *bsñags* as predicate. The attribute *arkapavanāhata*, lastly, they have coupled with *deśa*.

Turning to particulars, *tadabhāve* "in case of its absence" has been verbalized into *de med-na* "if it is absent"; *bhūyīṣṭham* "most" has been replaced by *than-la gnas*, lit. "to be found in the steppe," which proves beyond doubt that the basic text had *bhūmīṣṭham* "terrestrial" instead (thus also Candranandana, Hemādri, and Indu); *āntarikṣa* "atmospheric" has been metaphrased by *bar-snañ-ba*, prop. "visible in between"; *śuci* "clean" and *prthu* "vast" have been interchanged with *asitaśveta* "black- or white(-soiled)"; and *arka* "sun" has been translated by *ñi-od* "sunlight."

I 5. 6

Sanskrit Text

*na pibet pañkaśaivālatrṇaparnāvilāstrtam /
sūryendupavanādrṣṭam abhivṛṣṭam ghaṇaṃ guru //*

Not shall one drink (water that is) turbid and covered with mud, tape-grass, grass, and leaves, unseen by sun, moon, and wind, rained upon, thick, heavy,

Tibetan Version

*lteñ-ka 'dam-rdzab ña-lcibs [7] dan /
rtsva¹ dan lo-ma rñog-ma-can /
ñi zla rluñ-gis ((4)) ma phog-pa /
mñon-du 'bab dan chu gar² lci //*

¹ NP; *rtsa* CD.

² CD; *gañ* NP.

Pool(-water that is) turbid with mud, tape-grass, grass, and leaves, unhit by sun, moon, (and) wind, (and) rained upon; water (that is) thick, heavy,

Remarks

na pibet "one shall not drink" has been removed to the end of the sentence in pāda 8b and *lteñ-ka* "pool(-water)" supplied for the lacking object.

pañka "mud" has been translated tautologically by *'dam-rdzab*, that is, "mud & mire."

śaivāla "tape-grass" (*Vallisneria spiralis* L.) has been represented by *ña-lcibs*, which, according to Mvy. 3286, is the name of the serpent-demon *Śaivala*¹. In

¹ Thus MINAEV's edition, with v. l. *Śovala*; the Japanese edition prints *Śabala* and gives the Tibetan equivalent as *ñi-lcibs*.

current Tibetan, it denotes (a) mother of pearl, (b) fish-gills, and (c) a certain medicinal root curative of scalds and blisters; cf. DAS, Dict. p. 472.

For *rtsva* “grass” CD offer the frequent but inaccurate spelling *rtsa*, which gives rise to a confusion with the homonymous *rtsa* “vein” or *rtsa(-ba)* “root.”

āstrta “covered” has been disregarded.

adr̥ṣṭa “unseen” has been rendered by *ma phog-pa* “unhit,” the image being somewhat different.

Before *gar* “thick” (misspelt *gañ* in NP), *chu* “water” has been added as object.—There is a remote possibility that *lteñ-ka* in pāda a and *chu* in pāda d belong together and have been separated by tmesis, either component being followed by a series of adjuncts; in that case, *dan* in pāda d would be a pleonasm.

I 5. 7

Sanskrit Text

phenilam jantumāt taptam danta-grāhy atisaityataḥ |
anārtavaṃ ca yad divyam ārtavaṃ prathamam ca yat ||

foamy, infested with insects, warm, (and) injurious to the teeth because of excessive cold; nor celestial (water) that (is) unseasonable; nor (celestial water) that (is) seasonable (but) the first (of the season),

Tibetan Version

lbu¹-ba [[5]] srog-chags-can dan (4) dro |
grañ ches so-yis mi bzod-pa |
char gañ dus-su ma bab dan |
dus-kyi dan-por 'bab²-pa gañ ||

¹ NP; *dbu* CD.

² NP; *bab* CD.

possessed of foam (and) insects, warm, (and) unbearable for the teeth because of excessive cold; rain that has not fallen in the right season; and (rain) that falls in the beginning of the right season,

Remarks

phenila “foamy” and *jantumāt* “infested with insects” have been combined into a single phrase: *lbu-ba srog-chags-can* “possessed of foam (and) insects.”—The spellings *lbu-ba* in NP and *dbu-ba* in CD are interchangeable.

danta-grāhīn “injurious to the teeth” has been placed after *atisaityataḥ* and rendered by *so-yis mi bzod-pa* “not to be borne by, unbearable for, the teeth.”

divyam (sc. *ambu*) “celestial water” has been transferred to the beginning of the pāda and represented by *char* “rain,” which, like the previous *lteñ-ka*, stands metonymically for the water in question.

The clause *anārtavaṃ yad* “which (is) unseasonable” has been paraphrased by *gañ dus-su ma bab* “which has not fallen in the right season,” whereas the corresponding *ārtavaṃ prathamam yat* “which (is) seasonable (but) the first (of the season)” has been reproduced by *dus-kyi dan-por 'bab-pa gañ* “which falls in the beginning of the right season.” Instead of *'bab-pa* “falls” CD write *bab-pa* “has fallen,” apparently on grounds of concinnity, the secondary nature of this variant being quite obvious.

I 5. 8

Sanskrit Text

lūtāditantuviṇmūtraviṣasamśleṣadūṣitam |
paścimodadhigāḥ śighravahā yāś cāmalodakāḥ ||

(because it is) polluted by its mixture with the webs, feces, urine, and poison of spiders etc. Those rivers [*tā nadyo* 9a] which fall into the western ocean, flow rapidly, and hold no dirty water

Tibetan Version

srog-chags [24a1] *gdug dan-ba sog*¹ *'dres* |
*bśaṅ gci dug 'dres*² *gnod* ((5)) *mi btuṅ* |
 [[6]] *nub-phyogs-nas ni rgya-mthsor*³ *'bab*⁴ |
gaṅ yaṅ 'myur 'bab rdul (5) *med chu* ||

¹ NP; *stsogs* CD.

² DNP; *'dri* C.

³ DNP; *mthsar* C.

⁴ NP; *bab* CD.

doing harm through its being mixed with the webs etc. of venomous insects (and) mingled with feces, urine, (and) poison: (such water) one shall not drink. Those [*de-dag* 9a] rivers which fall into the western ocean, flow rapidly, (and) lack dirt

Remarks

lūtā "spider" has been generalized to *srog-chags gdug* "venomous insect" and *ādi* "etc." (which implies this generalization) connected with *tantu* "web" instead.

tantu "web" has been rendered by *dan-ba*, which is not attested in this meaning and is either a corruption or a secondary form of *dar* "silk"; cf. 3.13, where NP have *dan* but CD write *dar*.

saṁśleṣa "mixture" has been divided into two co-ordinate gerunds (both times *'dres* "mixed, mingled"—*'dri* in C being an error), which refer to *tantu* and *viṇmūtraviṣa* respectively.—*lūtā* the Tibetans have coupled with *tantu* only, while Arunadatta and Candranandana relate it with *viṇmūtraviṣa* as well.

dūṣita "polluted" has been commuted into *gnod* "doing harm."

paścima "western" has been translated by *nub-phyogs-nas*, lit. "from, in, the west," the ablative denoting the place of origin. The use here of the suffix *nas* is not unlike that of the Greek preposition *ἐκ* in phrases such as *οἱ ἐκ τῶν νήσων κλοῦργοι* "the robbers of the islands" (Th. 1.8), *τοὺς ἐκ τῆς ναυμαχίας* "those in the sea-fight" (Pl. Ap. 32b), *τοὺς ἐκ τῶν σκηπῶν* "those in the tents" (D.18.169) and *τὰ ἐκ τῶν οἰκῶν* "that in the houses, the household effects" (X. Cyr. 7.2.5). Cf. LIDDELL-SCOTT, Lexicon p. 499.

bab (for *'bab*) in CD and *rgya-mthsar* (for *rgya-mthsor*) in C appear to be mistakes. *amalodaka* "holding no dirty water" has been represented by *rdul med* "lacking dirt." The following *chu*, which seemingly corresponds to *udaka*, actually serves as the subject of the sentence, thus taking the role of *nadī* "river" in 9a, which has been dropped.

— — —

After pāda 8b, some manuscripts collated for K introduce the following line from As. I 6 (v. 22cd of our subsequent numeration):

tat kuryāt snānapānābhyaṃ tṛṣṇādhodarajvarān |

"By one's bathing (in it) and drinking (of it) it may produce thirst, heat, abdominal swellings, and fever."

I 5. 9—10

Sanskrit Text

pathyāḥ samāsāt tā nadyo viparītās tv ato¹ 'nyathā |
upalāsphālanākṣepavicchedaiḥ kheditodakāḥ ||
himavanmalayodbhūtāḥ pathyās tā eva ca sthirāḥ² |
kṛmīślipadahṛtkaṇṭhaśīrorogān prakurvate ||

¹ B; tato K.² B; tu sthitāḥ K.

(are), in brief, salutary; (those), however, (which do) the opposite (are) different from this. (Those) springing from the Himavat and the Malaya, which hold water retarded by its bounding against rocks and its (consequent) dashing down and bursting asunder, (are) salutary; those, however, (which are) stagnant produce worms, elephantiasis, and diseases of the stomach, throat, and head;

Tibetan Version

de-dag mdor-na dge-ba yin |
de-las bzlog-pa¹ bzañ ma yin |
rdo[2]-la śugs drag rdebs-pa-yis |
rgyun chad gyeñs-pai² chu-dag dañ ||
[[7]] gañs³-can ma-la-ya-las byuñ |

¹ NP; zlog-na CD.² CD; pa NP.³ CD; gañ NP.⁴ NP; ni CD.⁵ NP; bam CD.⁶ CD; rñiñ NP.⁷ CDN; skyems gyur P.

are, in brief, salutary; (those which) turn away from it are no good. Rivers (which have been) interrupted in their flow by being thrown down with great force against rocks (and have consequently been) tossed about as well as (those which have) sprung from the Himavat (and) the Malaya are salutary; if they are stagnant (and) sluggish, they will produce worms, elephantiasis, (and) diseases of the stomach, throat, (and) head;

Remarks

The Tibetan version of these two stanzas, in which pāda limits and punctuation do not always coincide (especially not in the middle portion), is a paraphrase rather than a translation of the original Sanskrit, though on the whole the sense has been faithfully reproduced. Therefore a close study of the translating-technique appears unfeasible. It may only be noted that the attributes in pādas 9 cd have been rendered independent, with *chu-dag* (the pendant of *udaka*) taking the function of a new subject.

Turning to the material aspect, "Himavat" is another name for the Himalayas, while "Malaya" denotes the Malabar Hills, which form the southern portion of the Western Ghats. By *hṛd* ought to be understood in this context the stomach rather than the heart.

A few words must be said about the variants. For *bzlog-pa* CD read, more elegantly, *zlog-na* "if they turn away"; for *gyeñs-pai* NP write, less correctly, *gyeñs-pa*; for *gañs-can* NP offer the unattested *gañ-can*; for *ñid*, which corresponds to *eva* in the basic text, CD have substituted the expletive *nā*; for *rkañ-'bam* CD use the alternative *rkañ-bam* (cf. Mvy. 8792); and for *sñiñ* NP give, erroneously, *rñiñ*¹.—*skyems gyur* in P, lastly, is a miscarving.

¹ The reverse phenomenon that *rñiñ* is confused with *sñiñ* occurs in vv. 23 & 65.

I 5. 11

¹ B; °vindhya**bhavāḥ** K.

(those) rising with the Prācyas, Avantis, and Aparāntas—hemorrhoids;
(those) coming from the Mahendra—abdominal swellings, elephantiasis,
and indisposition; (those) again springing from the Sahya and Vindhya—

Tibetan Version

śar daiñ nub-kyi mtha-las byuñ |
[3] *g'zaiñ-'brum skyed-do dbañ-chen 'bab |*
[8] *dmu-rdziñ rkañ-'bam¹ naḍ skyed 'gyur |*
sa-hya bindai² ri-las 'bab ||

¹ NP; *bam* CD.

² NP; *bin-dai* CD.

(those) rising on the eastern and the western frontier produce hemorrhoids; (those) coming from the Mahendra will produce abdominal swellings, elephantiasis, (and) indisposition; (by those) springing from the Sahya (and) Vindhya mountains

Remarks

Except for smaller matters such as the omission of *avanti* and *punar* and the addition of the lacking predicates, the Tibetan version conforms to the original Sanskrit word for word. This is all the more astonishing as the data here given cannot possibly have been of any practical value for the Lamaist physicians, even if they were familiar in theory with Indo-Buddhist geography¹. One would have expected the translators either to drop the whole paragraph or else to fit it for Tibetan conditions.

¹ The Prācyas, Avantis, and Aparāntas are either (according to the commentators) the peoples of Gaur, Malwa, and the Konkan or (according to Dowson, Dictionary s. vv.) the peoples east of the Ganges and those of Malwa and Malabar.

The Mahendra is the Orissa chain, which runs from Gondwana to Orissa and the Northern Circars.

The Sahya is the northern part of the Western Ghats, as distinguished from the Malaya or southern part of them.

The Vindhya is the eastern division of the Vindhya mountains, as against the Pāripātra or Pāriyātra, their northern and western division (see next stanza).

Going into details, *prācya* and *aparānta* have been taken, not for the names of peoples (as is done by the scholiasts), but for such of lands, with *anta* joined to *prācya* and *apara* alike.

durnāman "bad-named," a euphemism for *arśas* "hemorrhoids," has been rendered less sparingly by *gāṇ-’brum* "anal pocks."

On *rkañ-(’)bam* see v. 10.

ātāṅka signifies "disease" as well as "fever"; here it is used in the former sense.

vindhya has been Tibetanized as *binda*; CD write *bin-da*, breaking the ligature.

I 5. 12

Sanskrit Text

kusṭhapāṇḍuśīrorogān doṣaḡhnyāḥ pāriyātrajāḥ |
balapauruṣakāriṇyāḥ sāgarāmbhas tridoṣakṛt ||

leprosy, jaundice, and diseases of the head; (those) coming from the Pāriyātra (are) destructive of the (three) humours (and) promotive of strength and virility. Ocean-water (is) productive of the three humours.

Tibetan Version

mdze dan skya-rbab ((7)) klad-nad ’gyur |
pa-ri-ya-trai nad kun sel ||

are caused leprosy, jaundice, (and) diseases of the head; (those) from the Pāriyātra remove all diseases.

Remarks

In the first pāda, *’gyur* "are caused" has been added as predicate.

doṣaḡhna "destructive of the (three) humours" has been interchanged with *pāriyātraja* and paraphrased by *nad kun sel* "remove all diseases."

pāriyātraja "coming from the Pāriyātra" has been rendered by means of a possessive genitive: *pa-ri-ya-trai* "of, from, the Pāriyātra."

The last two hemistichs are wanting in Tibetan and in Aruṇadatta's commentary; they were, however, known to Candranandana, Hemādri, and Indu.

I 5. 13—14

pho-bai drod chuñ or-nad-can |
mi btuñ brnag dka ñuñ-zad btuñ |
 ((52 b1)) *ston-ka so-ga* (52 b1) *ma gtogs-par* |
nad med mis kyañ cuñ[[2]]-zad btuñ ||

¹ NP; *stsogs* CD.² CD; *la* NP.

As concerns water from wells, ponds, etc., one should know (if it comes) from jungle, swamp, (or) rock. (Those) having weak digestion (and) visceral induration (as well as those) suffering from jaundice, abdominal swellings, diarrhea, hemorrhoids, poor heat of the stomach, (and) cutaneous swellings shall not drink; (if this is) hard to bear, they shall drink (only) little. Except in autumn (and) summer, even an undiseased man shall drink (only) little.

Remarks

In accordance with the requirements of Tibetan grammar, *vidyāt*, *na peyam*, *aśaktyā svalpam*, and *pibet* have been transferred to the end of their respective sentences. Besides this, the metonymical expression *kūpataḍgāḍi* "wells, ponds, etc." has been expanded into *khron-pa rdziñ-la sogs-pai chu* "water from wells, ponds, etc." Moreover, the subject *ambu* in 13c has been omitted, with the instrumentals °*gulmibhiḥ* and °*śothibhiḥ* serving as agents in Tibetan.

For *brag-las*, which corresponds exactly to *śailataḥ*, NP read *brag-la*, replacing the ablative with a dative of sphere.

The instrumental absolute *aśaktyā* "in case of incapability" has been rendered by means of an elliptic gerundial clause, *brnag dka* standing, say, for *brnag-par dka-na* "if (this) is hard to bear."

The connective particle *vā* "or" has been disregarded and the verb (*btuñ*) repeated after *svalpa*.

The secondary suffix °*in* after *gulma* has been translated by means of the auxiliary *yod-pa*, with a possessive genitive or dative to be supplied; cf. JÄSCHKE, Dict. p. 515.

grahaṇīdoṣa "dysentery" [lit. "disturbance of the grahaṇī"] has been paraphrased by *pho-bai drod chuñ* "poor heat of the stomach."—The so-called grahaṇī is a certain organ at the entrance of the intestinal tract which contains the gastric fire, taking in the undigested food and putting out the digested one; if it is impaired by poor gastric fire, the food passes undigested, bringing about looseness of the bowels. Cf. Ah. II 3.49 sqq. HOERNLE (Bower MS. p. 268) identifies this organ as the duodenum.

svastha "healthy" has been turned *nad med* "undiseased," with *mi* "man" added to mark its substantive character.

— — —

After 13b the codex jha (Mooss' siglum) inserts 4¹/₂ ślokas which some other manuscripts append to v. 18 (v. inf.).

Having drunk water while, after, (and) before taking a meal, one gets normal, fat, (and) lean (respectively). Cold water removes [*sel byed yin* 16b] alcoholism, stupor, nausea, fatigue, spinning head,

Remarks

bhaktamadhyāntapṛathamāmbupa “drinking water during, after, and before meals” has been interchanged with *samasthūlakṛṣā* and translated by *zan zos-par mtha thog-mar chu 'thuñs* “having drunk water while, after, (and) before taking a meal.” The perfect infinitive *zos-pa* is meant to express the antecedence in time to the governing *'thuñs*.

glāni “lassitude” has been omitted.

bhrama “giddiness” has been paraphrased by *mgo 'khor* “spinning head”; cf. 4.11, 12, 17.

thirst, heat through hot (factors), hemorrhage, and poison. Hot (water is) promotive (and) causative of digestion, conducive to the throat, light (on the stomach, and) purgative of the bladder;

Tibetan Version

skom dan lus tsa mkhris-pa dan /
 ((2)) *khrag* (2) *brgyas*¹ [[3]] *dug ni sel byed yin /*
 [6] *chu tshan drod skyed zas 'ju-ñin /*
mgul bde lus yañ gcin-nad sel ||

¹ N; *rgyas* CDP.

thirst, hot body, profuse hemorrhage, (and) poison. Hot water produces (gastric) heat, digests food, is conducive to the throat (and) light on the body, (and) removes urinary diseases;

Remarks

dāha “heat” has been turned *lus thsa* “hot body,” while *uṣṇa* “hot (factor)” has been left untranslated; according to the scholiasts, such factors are climate, food, and the like.

pittāśra “bile-blood, hemorrhage” has been rendered *mkhriś-pa dan khrag brgyas* “profuse bile and blood, profuse hemorrhage.” Perhaps the basic text read *trṣṇoṣ-ñādhikapittāśra*°, in which case *uṣṇa* would correspond to *lus thsa* and *adhika* to *brgyas*. For *brgyas*, which recurs in Suv. p. 86.23 as the pendant of *pūrṇa* “replete,” CDP have substituted the commoner *rgyas*.

ambu has been transferred to the head of *pāda* 15c.

dīpana “promotive of digestion” has been paraphrased by *drod skyed* “produces (gastric) heat,” *pācana* “causative of digestion” by *zas ’ju* “digests food,” and *laghu* “light” by *lus yañ* “light on the body” [i.e. on the stomach].

To *thsan*, the equivalent of *uṣṇa*, another *chu* has been added as subject.

bastiśodhana “purgative of the bladder” has been represented by *gcin-nad sel* “removes urinary diseases,” just as *bastiśuddhikara* “bladder-cleansing” in 4.22 has been reproduced by *chu-soi nad bsal* “removing bladder-diseases.”

rims sar ’phral-du zlog byed-ciñ |
luḍ-pa cham sar dbugs mi bde |
[[4]] *rtsib logs zug-la* (3) *bsnags-pa yin*¹ ||

¹ CD; *chu thsan bsnags* NP.

it has been commended for hiccup, inflated belly, wind, phlegm, new fever, immediately expelling (feces), cough, raw catarrh, dyspnea, (and) pain in the costal region.

Remarks

ādhmāna “inflation” has been translated by *lto sbos* “inflated belly”; cf. 2.18.

Instead of *sadyaḥśuddha* “recently purged,” the Tibetans write *’phral-du zlog byed-ciñ* “immediately expelling (feces),” which makes it virtually certain that they had the variant *sadyaḥśuddhi* “immediate purgation” before them.

āma “rawness, indigestion” has been omitted and the following *pīnasa* “catarrh” represented by *cham sar* “new, raw, catarrh.” From this it would appear that the Tibetans, on the strength of Candranandana’s commentary, took *āmapīnasa* for one term—a possibility also conceded by Aruṇadatta: *kecī tv āmapīnasa iti pīnasa-*

viśeṣaṇam āmaśabdān āhuḥ “some say (that) in āmapīnasa the word āma (is) an attribute of pīnasa.” While Vāgbhaṭa does not mention any such disease in the relevant chapters (Ah. VI 19 & 20, As. VI 23 & 24)¹, Bhāvamīśra (Bhpr. II 4.18. 34) defines it as follows:

*śirogurutvam arucir nāsāsrāvas tanusvaraḥ /
kṣāmāḥ śthīvati cābhīkṣṇam āmapīnasalakṣaṇam //*

“Heaviness of the head, anorexia, running of the nose, low voice, (one is) weak and spits constantly—(that is) the syndrome of āmapīnasa.”

śasyate “is commended” has been put in the past tense: *bsnags-pa yin* “has been commended,” which comes to the same. NP read *chu thsan bsnags* instead, repeating the subject for clearness’ sake.

¹ Car. VI 26.104 *sqq.* and Suśr. VI 22—24 do not know it either.

I 5. 18

Sanskrit Text

*anabhiṣyandi laghu ca toyam kvathitaśītaḥ /
pittayukte hitam doṣe vyūṣitam¹ tat tridoṣakṛt //*

¹ B; ’*dhyūṣitam* K.

Not causing effluxions (of phlegm) and light (on the stomach is) water (that has) boiled and cooled down. In case a humour is combined with choler, (it is) wholesome; having passed (a day, however), it (is) productive of the three humours.

Tibetan Version

((3)) [7] *chu ni bskol-la¹ bsgrāns-pa²-dag /
bad-kan mi skyed lus yañ-ñiñ /
mkhris-pa-can-la³ phan-pa yin /
de ni žag lon ñes gsum bskyed⁴ //*

¹ NP; *ba* CD. ² NP; *grān-ba* CD. ³ NP; *la’añ* CD. ⁴ NP; *skyed* CD.

Water (that has) boiled and cooled down produces no phlegm, is light on the body, and is wholesome for (a person) affected with choler; having passed a day, (however), it produces the three humours.

Remarks

In the first part of the stanza, the pādas a and b have been transposed for syntactical reasons; in the second, *doṣe* has been omitted and its attribute *pittayukte* referred to a diseased person in general.

In other respects, *anabhiṣyandin* “not causing effluxions” has been paraphrased by *bad-kan mi skyed* “produces no phlegm” and *laghu* “light” by *lus yañ* “light on the body” [i.e. on the stomach; cf. v. 16].

Instead of *bskol-la bsgrāns-pa* CD write *bskol-ba grān-ba*, exchanging the participial for the gerundial suffix and substituting the common *grān-ba* for the rare *bsgrāns-pa* (which appears to be the perfect of *grāns-pa*, a secondary spelling of *grān-ba*). The following *dag* is striking in this context.

To *mkhris-pa-can-la* CD have added an emphatic ’añ.

vyuṣṭa, glossed by Candranandana and Indu as *vigatāhorātra* “having passed a day and night,” has accordingly been turned *zag lon* “having passed a (full) day.” For *bskyed* CD give, as usual, the alternative *skyed*.

— — —

After 18b, the codex ja (Mooss’ siglum) puts in an additional line from As. I 6 (46a b of our subsequent numbering):

saṃsarge pittakaphayoḥ saṃnipāte ca pūjitaṃ |

“(It is) advocated for the combination of choler and phlegm and for the conjunction (of all three humours).”—On the terms *saṃsarga* and *saṃnipāta* see 1.12.

After 18d, some manuscripts insert 4¹/₂ couplets from As. I 6 (26cd—27, 31, 28—29 of our subsequent numeration), the first 2¹/₂ of which are also known to, and commented upon by, Aruṇadatta:

*pāṇīyaṃ natu pāṇīyaṃ pāṇīye ’nyapradeśaje ||
ajirṇe kvathitaṃ cāme pakve jirṇe ’pi netarat |
śīte vidhir ayaṃ tapte tv ajirṇe śiśīraṃ tyajet ||
atijogena salilāṃ tṛṣyato ’pi prayojitaṃ |
prayāti śleṣmapittatvaṃ jvaritasya viśeṣataḥ ||
pāṇīyaṃ prāṇināṃ prāṇā viśvaṃ eva ca tanmayam |
ato ’tyantaniṣedhena na kvacid vāri vāryate ||
āsyasoṣaṅgasādādyā mṛtyur vā tadālābhataḥ |
na hi toyād vinā vṛttiḥ svasthasya vyādhitasya vā ||*

“(Any) water (is) not, however, to be drunk if water coming from another place (is still) undigested, and boiled (water not) if raw (water is still undigested), unboiled (water) not even if boiled (water is already) digested. This precept (applies only) to (boiled) cold (water); if, however, (boiled) hot (water is still) undigested, one shall eschew cold (water altogether). Consumed in excess, water leads to a phlegm and choler condition even with one who is thirsty, particularly when he is running a temperature. Water (is) the (spring of) life of (all) living beings, and everything (is) possessed of it; therefore water is in no case prohibited by (any) ever so incisive restriction (on food). Dryness of the mouth, languidness of the limbs etc., or (even) death (result) from its not being taken; for without water (there is) no function (of life either) in a healthy or in a diseased (person).”

I 5. 19

³ NP; *skyed* CD.

The rain-water (and) river-water of the rainy season are said to be (respectively) good and bad to the highest degree. (Such) is the section on water.—Milk is usually sweet in taste (and) digestion, unctuous, effects vitality, augments the elements,

Remarks

varṣāsu "in the rainy season" has been translated by means of a possessive genitive: *dyar-gyi* "of the rainy season."

divyanāḍe *toye* "celestial and fluvial water" has been represented by two separate nouns: *char-chu chu-boi chu* "rain-water (and) river-water."

varāvara "good and no good" has been turned *bzan dan nan-pa* "good and bad," with *bsad* "are said" added as predicate.

iti "such" has been dropped.

svādūpākārāsa “of sweet digestion and taste” has been reproduced by *ro žu mīnar* “sweet in taste (and) digestion,” with *pāka* and *rasa* transposed on grounds

of logic. — According to the Indian doctrine of flavours, substances do not necessarily retain their primary taste after digestion; for details, see I 9.20 *sq.*

žo (for *žu*) in P is a xylographical error.

ojasya “vitalizing” has been modified to *mdaṅs* (*b*)*skyed* “effects vitality” and *dhātuvardhana* “augmentative of the elements” to *lus-zuṅs* ‘*phel* “augments the elements.”

eliminates wind and choler, generates virility, produces phlegm, (and) is heavy (and) cooling. Cow’s milk is a vitalizer and elixir; it is wholesome [*phan* 22a] for pulmonary rupture and

Remarks

Owing to the peculiar divergence in 21bc between caesura and period, the usual congruence of stanzas between original and translation has been disturbed. While the Tibetans skilfully prefixed the overlapping *prāyaḥ payo* to 20c, they were evidently unable to fill the resulting gap in 21c. Although the adverb *atra* might have given them a chance to do so, they rather chose to drop it and turn to the next line for help, removing *kṣata* from the head of 22a to the end of 21d.

The habitual verbification of predicate nouns apart, it remains only to elaborate on the collocation *jīvanīyaṃ rasāyanam*. The Tibetans have translated it by ‘*thso byed-ciṅ bcud-kyis len* “vitalizer and elixir,” thus adopting Aruṇadatta’s view that *jīvanīya* entails the generation of vitality (*ojasyam*), while *rasāyana* serves as a means of gaining the best in chyle, strength, and digestion (*rasavīryavipākānāṃ śreṣṭhānāṃ lābhopāyaḥ*). Indu, on the other hand, thinks that *jīvanīya* is to be understood in the sense of *saumyadhātuvṛddhikara* “productive of an increase of the soma-like element [i.e. phlegm]”—thus also Candranandana—, whereas *rasāyana* should be adduced only by way of comparison (*iva*), and that “on account of its being a support of life and means of gaining the desired elements chyle etc.” (*prāṇasaṃdhārakatvāc chastarasādidhātulābhopāyatvāc ca*); cf. VI 39.1 *sq.*

¹ The Haridas Sanskrit Series edition lets the paragraph on milk open with the following couplet of unknown origin:

gavyaṃ māhiṣaṃ ājaṃ ca kārabhaṃ straiṇaṃ āvikaṃ |
aiḍhaṃ aikaśaphaṃ ceti kṣīraṃ aṣṭavidhaṃ matam ||

“Coming from a cow, buffalo, goat, camel, woman, sheep, elephant, and solid-hoofed animal: thus milk (is) held (to be) eightfold.”—Cf. Suśr. I 45.47.

I 5. 22

Sanskrit Text

kṣatakṣīṇahitaṃ medhyaṃ balyaṃ stanyaakaraṃ saram |
śramabhramamadālakṣmīśvāsakāśātīṛṭkṣudhaḥ ||

(it is) wholesome for pulmonary rupture and pulmonary consumption, intellectualizing, invigorative, productive of breast-milk, (and) purgative, (and) destroys [nāśayet 23 b] fatigue, giddiness, intoxication, unbeautifulness, dyspnea, cough, excessive thirst, hunger,

Tibetan Version

glo-gcoṅ-la phan yid [[7]] gzuṅs byed |
stobs skyed nu-ṣo skyed dan 'khrū |
nal dan mgo 'khor myos dpal ṅams |
[3] lud-pa dbugs mi bde bkres skom ||

pulmonary consumption, renders one's intellect keen, promotes vigour, produces breast-milk, purges, (and) removes [sel-ba yin 23 b] fatigue, spinning head, intoxication, impaired beauty, cough, dyspnea, hunger, thirst,

Remarks

On *kṣata* in the specific sense of "pulmonary rupture" (*urakṣata*) see 2.6.

medhya "intellectualizing" has been paraphrased by *yid gzuṅs byed* "renders one's intellect keen," *balya* "invigorative" by *stobs skyed* "promotes vigour," and *bhrama* "giddiness" (as in previous such cases) by *mgo 'khor* "spinning head."

alakṣmī "unbeautiffulness" has been represented by *dpal ṅams* "impaired beauty."

śvāsa "dyspnea" and *kāsa* "cough" have been transposed; maybe the basic text read *kāsaśvāsa* instead of *śvāsakāsa*, as found in codex na (Mooss' siglum).

atīṛṣ "excessive thirst" has been interchanged with *kṣudh* "hunger" and simplified to *skom* "thirst."

Tibetan Version

rims rñiñ¹ gcin (6) ni sri-ba dan |
khrag dan mkhris((6))-pa sel-ba yin |
ma-hei² [[8]] o-ma 'ju drags dan |
gñid med-la phan rab lei bsil ||

¹ CDP; *sñiñ* N.

² CD; *he* NP.

old fever, retaining urine, and hemorrhage. Buffalo's milk is wholesome for excessive digestion and insomnia, very heavy, (and) cooling.

Remarks

On the confusion of *rñiñ* and *sñiñ* see v. 10.

mūtrakṛcchra "strangury" has been translated by *gcin sri-ba* "retaining urine." *atyagni* and *anidrā*, which are used here as bahuvrīhi compounds ("stricken with excessive digestion and insomnia"), have been rendered simply by 'ju drags "excessive digestion" and *gñid med* "insomnia," with their possessive nature left unheeded.

gariyas, lit. "heavier," has been turned *rab lci* "very heavy," in keeping with Indu's explanation as *atiguru*. Aruṇadatta and Candranandana take it in the original sense of *gurutara*, with *gavyāt* or *anyebhyaḥ kṣīrebhyaḥ* to be added for the object of comparison.

māhiṣa "buffalo's milk" has been transferred to the head of the sentence and reproduced by *ma-hei o-ma*, for which NP have substituted the grammatically less correct *ma-he o-ma*. As *māhiṣa* has come to stand before *atyagnyanidra*, so has *hita* come to stand after it.

alpāmbupānavyāyāmakatutiktāsanair laghu |
ājāṃ śoṣajvaraśvāsaraktaṭṭāṭisārajit ||

Light by the drinking of (only) little water, by exertion, and by the eating of pungent and bitter (herbs), goat's milk (is) destructive of desiccation, fever, dyspnea, hemorrhage, and diarrhea.

Tibetan Version

ra ni chu ñwiñ 'thuñ zas rgod |
kha-ñiñ tsha-ba za-bas [4] yañ¹ |
skem² dan rims dan dbugs mi bde |
<25a7> *khrag dan mkhris-pa tshad-nad sel ||³*

¹ DNP; *ya C*.

² NP; *skems CD*.

³ The text portion starting with line 24d and ending with line 46d occurs twice in P. The dittograph reaches from folio 25a.7 to folio 26a.6. The variants found in it are marked P₂ (as against P₁) in what follows, and the numbers of the folios and lines given in pointed brackets. For details see Introd. § 21.

As goats drink (only) little water, move hither and thither in (seeking) food, (and) eat pungent and bitter (herbs, their milk) is light (and) removes desiccation, fever, dyspnea, hemorrhage, (and) diarrhea.

Remarks

The instrumental *°āsanaiḥ* has been represented by a causative clause (*za-bas*) and the word *ra* "goat" added for its subject, while the original *āja* "goat's milk" has been dropped and left to be guessed from the context.

The equivalent of *vyāyāma* "exertion," the phrase *zas rgod*, is rather obscure and its translation by "move hither and thither in (seeking) food" only tentative. The ordinary meaning of *rgod-pa* is "wild"; in Suv. p. 170.30 it corresponds to Skr. *lola* "unsteady." There is just an off chance that *zas rgod* is corrupt for *rgod zas*, in which case *rgod* alone would have to be equated to *vyāyāma* and *zas* interpreted as the object of *za-ba*.

ya (for *yañ*) in C is a xylographical error.

kaṭu "pungent" and *tikta* "bitter" have been translated by *kha(-ba)* and *thsa-ba* respectively, on which see 1.14.

For *skem* CD have substituted the equally correct alternative spelling *skems*.

I 5. 25

Sanskrit Text

iṣadrūkṣoṣṇalavaṇam auṣṭrakam dīpanam laghu |
śastaṃ vātakaphānāhakṛmīśophodarārsasām ||

Slightly rough, warming, and salt (is) camel's milk, (also) digestive (and) light; (it is) commended for wind, phlegm, constipation, worms, cutaneous and abdominal swellings, and hemorrhoids.

Tibetan Version

(7) *rñā-moi* [[24b1]] *o-ma cuñ rtsub dro |*
lan-thsva¹ bro-ñiñ ((7)) *drod che yañ |*
rluñ dañ bad-kan lto sbos srin |
or-nad dmu-rdziñ² gñāñ-nad sel ||

¹ CDP₂; *thsa* NP₁. ² CDP₂; *rdziñs* NP₁.

Camel's milk is slightly rough, warming, salt-tasting, rich in (digestive) heat, (and) light; it removes wind, phlegm, inflated belly, worms, cutaneous (and) abdominal swellings, (and) hemorrhoids.

Remarks

lavaṇa "salt" has been paraphrased by *lan-thsva bro-ba* "salt-tasting"; for *lan-thsva* NP₁ give the less satisfactory though also tenable spelling *lan-thsa* (cf. vv. 28 & 43).

auṣṭraka "camel's milk" has been transferred to the beginning of the sentence, as is required by Tibetan syntax.

dīpana "digestive" has been represented by *drod che* "rich in (digestive) heat."

śasta "commended" has been shifted to the end of the sentence and replaced by *sel* "removes."

ānāha "constipation" has been rendered by *lto sbos* "inflated belly," which usually corresponds to *ādhmāna* "inflation" (cf. 2.18, 4.9, 5.17); a similar case is found in v. 81, which see for further parallels.

Instead of *dmu-rdziñ*, which is the sole spelling of this term in practically all occurrences met with in the Sūtrasthāna (except vv. 67 & 70), NP₁ read here and in v. 34 *dmu-rdziñs*, which seems equally correct but has not been adopted for uniformity's sake.

¹ B; °*āścyotanair* K. ² B; *coṣṇam* K.

Human milk (is) destructive of eye-diseases (coming) of wind, choler, blood, and injury, (and that) in the form of refreshments and instillations (as well as) sternutatories. Unwholesome for the stomach, however, (and) warming is sheep's milk;

Tibetan Version

bud-med nu-žo rluñ [5] *mkhris khrag* |
 <8> *snad-pai mig¹-nad sel byed-de* |
thsim byed mig dan snar blugs [[2]] *phan* |
lug-gi o-ma sñiñ gnod (53a1) *thsa* ||

¹ CDP₁P₂; mi N.

A woman's breast-milk removes eye-diseases (coming) of wind, choler, blood, (and) injury, being wholesome as a refreshment (and) as an instillation into the eyes and the nose. Sheep's milk damages the stomach (and) warms;

Remarks

mānuṣa "human milk" has been paraphrased by *bud-med nu-žo* "a woman's breast-milk."

mi (for *mig*) in N is a carver's error.

²*jit* "destructive of" has been translated by *sel byed-de* "removes." Judging from the basic text, the affix *de* serves here to mark the following words as explicative. Without regard to the original, it would of course also be possible to take *sel byed-de* for an ordinary gerund and *phan* for the main verb.

āscotana "instillation" and *nasya* "sternutatory" have been combined into *mig dan snar blugs* "instillation into the eyes and the nose."

ahr̥dyā "unwholesome for the stomach" has been rendered by *sñiñ gnod* "damages the stomach"; as in vv. 1 & 10, *hr̥d* ought to be understood in the sense of "stomach" rather than "heart," which does not fit the context.

tu "however" has been dropped and *āvika* "sheep's milk" removed to the head of the sentence.

I 5. 27

Sanskrit Text

vātavyādhīharam hidhmāśvāsapittakaphapradam |
hastinyāḥ sthairyakṛd bādham uṣṇam tv aikāṣapham laghu ||

(it is) eliminative of wind-diseases (and) productive of hiccup, dyspnea, choler, and phlegm. (The milk) of a cow-elephant (is) strongly generative of firmness. Warming, however, (and) light (is) that of a solid-hoofed animal;

Tibetan Version

rluñ 'joms skyigs-bu dbugs mi bde |
mkhris((53a1))-pa bad-kan skyed-pa yin |
ban-glañ-mo-yis rab brtan byed |
 [6] <25b1> *rmig-pa-gcig-pai o-ma thsa* ||

it subdues wind (and) produces hiccup, dyspnea, choler, (and) phlegm. (The milk of) a cow-elephant makes very firm. The milk of a solid-hoofed animal warms,

Remarks

vātavyādhihara “eliminative of wind-diseases” has been simplified to *rluñ ’joms* “subdues wind.”

hastinyāḥ “of a cow-elephant,” to which *kṣīra* “milk” must be supplied from the context, has been made the agent in Tibetan (lit. “by a cow-elephant one is made very firm”), *ban-glañ-mo-yis* being of course a metonymy for *ban-glañ-moi o-mas*.

bādhām “strongly” Aruṇadatta refers not to *sthairyakṛt* but to *uṣṇa*; this is, however, less satisfactory in view of the pāda limit. Both Candranandana and Indu follow the above interpretation, which is also adopted by the Tibetans.

tu “however” and *laghu* “light” have been neglected, the latter apparently for lack of space, whereas *aikaśapha* has been given its appropriate place at the beginning of the new sentence.

I 5. 28

[[3]] *lan-thsva² bro-ziñ rmoñs-par byed |*
o rlon bad-kan skyed-ciñ lci |
(2) *rigs-pas³ bskol-bas⁴ de-las gzan ||*

¹ CNP₁P₂; *sal* D.

² CDP₂; *thsa* NP₁.

³ NP₁P₂; *par* CD.

⁴ CDP₂; *bsgol-ba* NP₁.

removes wind in the extremities, is slightly sour and salt-tasting, and makes numb. Raw milk produces phlegm and is heavy; when properly boiled, it is different from this;

Remarks

sal (for *sel*) in D is one of the very few mistakes found in this xylograph; perhaps the mātra has only broken or failed in the process of printing.

samlalavaṇa “slightly sour and salt” has been represented by *skyur bcas-śiñ lan-thsva bro-ziñ* “is slightly sour and salt-tasting.” For *lan-thsva* NP₁ have again substituted the less correct *lan-thsa*; cf. v. 25.

abhiṣyandin “causative of effluxions” has been translated by *bad-kan skyed-ciñ* “produces phlegm”; cf. v. 18.

āma “raw” has been placed right after its governing *payas*.

yuktyā "properly" has been metaphrased by *rīgs-pas*, which is a Sanskritism doubtless occasioned by the basic instrumental; hence it has been altered to *rīgs-par* in CD.

For *bskol-bas* NP₁ read *bsgol-ba*, which seems to be a corruption rather than a secondary form, the omission of the gerundial suffix being objectionable from the stylistic point of view.

I 5. 29

Sanskrit Text

bhaved gariyo 'tiśṛtaṃ dhāroṣṇam amṛtopamam |
amlapākarasaṃ grāhi gurūṣṇam dadhi vātajit ||

very heavy is (milk that has been) excessively boiled; (that which is still) warm from milking (is) nectar-like. Of sour digestion and taste, constipating, heavy, (and) warming (are) curds; (they are) destructive of wind

Tibetan Version

sin-tu ((2)) bskol¹-na 'ju <2> dka lci |
b'zos ma-thag² dro [7] bdud-rtsir³ mthsuñs |
zo ni ro dan' zu rjes skyur |
rtug skam⁴ [[4]] lci-la rluñ-nad sel ||

¹ CDP₁P₂; *bsko* N.

² NP₁; *thog* CDP₂.

³ CDP₂; *rtsi* NP₁.

⁴ CDP₂; *skyems* NP₁.

if excessively boiled, (milk) is hard to digest (and) heavy; immediately after milking, (when it is still) warm, it is nectar-like. Curds are sour in taste and after digestion, dry in (their action upon) the excrements, (and) heavy and remove wind-diseases,

Remarks

bhaved has been omitted since the copula is already implied by the elliptical forms *dka* and *lci*, which stand for *dka-ba dan' lci-bao* or *dka-ziñ lci-bao*.

gariyas, which Candranandana and Indu interpret to be an elative (*atiguru*) while Aruṇadatta takes it again (see v. 23) for a comparative proper (*gurutara*), has been paraphrased by 'ju *dka lci* "hard to digest (and) heavy."

atiśṛta "excessively boiled" has been interchanged with *gariyas* and, like the preceding *yuktyā śṛtam*, reproduced by a gerundial clause: *sin-tu bskol-na* "if excessively boiled."—*bsko* (for *bskol*) in N is a xylographical error.

dhāroṣṇa "warm from milking" has been translated somewhat differently by *b'zos ma-thag dro* "immediately after milking, (when it is still) warm." For *ma-thag* CDP₂ have substituted *ma-thog*, which (according to JÄSCHKE, Dict. p. 237) is a colloquialism.—*dhāra* properly denotes any jet of liquid, in the present case that drawn from the udder.

Instead of *bdud-rtsir mthsuñs* NP₁ write, less satisfactorily, *bdud-rtsi mthsuñs*; contrast v. 2.

amlapākarasa "of sour digestion and taste" has been represented by *ro dan' zu rjes skyur* "sour in taste and after digestion"; see v. 20.

grāhin "constipating" has been turned *rtug skam* "dry in (their action upon) the excrements." The term *grāhin* is ambiguous, signifying "astringent" as well (in

which sense it is understood by HILGENBERG & KIRFEL). — *skyems* in NP₁ is suspect and probably corrupt for *skems*; cf. 3.8 & 5.38.

dadhi “curds” has been removed to the beginning of the sentence on grounds of syntax.

vātajit “destructive of wind” has been expanded into *rlun-nad sel* “remove wind-diseases,” just the other way round than in v. 27.

² B; *raktapittāgni* K.

(and) generative of fat, sperm, strength, phlegm, hemorrhage, (gastric) fire, and cutaneous swellings. (As they are) appetizing, (they are) commended in anorexia, cold irregular fever,

Tibetan Version

thsil dañ khu-chu stobs bad-kan |
*khrag-mkhris drod skyed*¹ *or-nad skyed*¹ |
*yi*²-ga 'byed<3>-ciñ³ *kha-zas len* |
(3) *grañ-bai rims dañ mi sñoms* ((3)) *rims* ||

¹ CDNP₁; *bskyed* P₂.

² CDNP₁; *yid* P₂.

³ NP₁; 'bye-ziñ CDP₂.

generate fat, sperm, strength, phlegm, hemorrhage, (and gastric) fire, (and) produce cutaneous swellings. As they stimulate appetite and make (one) take food, they are wholesome [*phan* 31 b] in cold fever, irregular fever,

Remarks

śukra “sperm” has been represented by the tautologic *khu-chu*; cf. 1.13 & 5.61.

pittarakṭa “hemorrhage” has been turned *khrag-mkhris*, making it pretty certain that the basic text had *raktapitta* (as also found in K).

°kṛt “generative of” has been translated twice, after *agni* as well as after *śopha*, each time by *skyed* “generate, produce,” for which P₂ substitutes the secondary *bskyed*.

rociṣṇu “appetizing” has been reproduced by *yi-ga 'byed-ciñ* “opening, stimulating, appetite.” In CDP₂ the transitive 'byed-ciñ has been replaced by the intransitive 'bye-ziñ, which is just the opposite of what happened in 4.30, where NP read *yi-ga 'bye-ziñ* while CD write *yi-ga 'byed-ciñ*. — *yid* (for *yi*) in P₂ is a miscarving.

Instead of *arucau* the Tibetans apparently read something else. From 6.111 *rucyam* might be conjectured, which does not, however, fit the metre. In both cases the translation offers *kha-zas len*, which can only be understood from the context to mean “making (one) take food,” though a causative use of *len-pa* is not otherwise attested.

śītake viśamajvare “in cold irregular fever” has been rendered *grañ-bai rims dañ mi sñoms rims* “in cold fever and in irregular fever,” which plainly indicates a variant reading *śītake viśame jvare*. This is, however, incompatible with the explanation given by the commentators, who just as plainly consider *śītake* an attribute of *viśamajvare*.

I 5. 31

Sanskrit Text

pinase mūtrakṛcchre ca rūkṣaṃ tu grahaṇīgade |
naivādyān niśi naivoṣṇaṃ vasantoṣṇaśaratsu na ||

catarrh, and strangury; skimmed, however, in dysentery. Never shall one take them [*tan* 32b] at night, never warm, (and) not in spring, summer, and autumn;

Tibetan Version

[25a1] *cham-pa gcin 'gags gyur-pa dan |*
'khru-bai [[5]] nad-la rtsub-mo phan |
zo dron dpyid dan so-ga dan |
ston-dus mihsan-mo btuñ mi bya ||

catarrh, (and) confined urine and, (if) skimmed, in dysentery. One shall not take curds warm, in spring, summer, and the autumnal season, (and) at night;

Remarks

mūtrakṛcchra “strangury” has been rendered by *gcin 'gags gyur-pa* “confined urine.”

For *grahaṇīgada*, which has been interchanged with *rūkṣa*, compare remarks on v. 14.

tu “however” has been replaced by *dan* “and.”

In the second line, the somewhat rhetorical style, marked by the initial position of *adyāt* and the reiterative use of *naiva* and *na*, has been abandoned in favour of a less spectacular mode of expression, as it is typical of the Tibetan language. With regard to details, the subject *dadhi* has been repeated, while the predicate *adyāt* “one shall eat” has been idiomatically changed into *btuñ bya* “one shall drink” and placed at the end of the stanza, with *niśi* “at night” immediately preceding it; *śarad* “autumn,” lastly, has been turned *ston-dus* “autumnal season.”

I 5. 32

Sanskrit Text

nāmudgasūpaṃ nākṣaudraṃ tan nāghṛta¹ sitopalam |
na cānāmālakam nāpi nityaṃ nāmandam² anyathā ||

¹ B; *na cāghṛta* K. ² B; *no mandam* K.

¹ *anyartau* Aruṇadatta.

Tibetan Version

de ni <4> mudgai¹ sran² thsod dan |
sbran-rtsi mar dan śa-kha-ra³ |

¹ CDP₂; *mudga* NP₁. ² DNP₁P₂; *sran* C. ³ CDP₂; *kha-ra śa* NP₁.

skyu-ru-ra ni med mi [2] *btuñ*⁴ /
rtaḡ-tu ma yin ma lañs min //

⁴ CDP₂; **thuñ* NP₁.

(in any other season) one shall not take them without mung-bean soup, honey, ghee, sugar, (and) emblic myrobalans, neither continuously nor unfinished.

Remarks

While in Sanskrit the sentence starting with *naivādyāt* in 31c reaches as far as *āmandam*, in Tibetan it begins anew with *nāmudgasūpaṃ*, a second predicate (*btuñ*, v.l. **thuñ*) being proleptically added after *anāmalakam*; thereby the following *nāpi nityaṃ nāmandam* (v.l. *no mandam*) is given the role of a postscript. Here again the several negations have been reduced to a minimum, all negative particles (*na*) being represented by a single *mi* and all negative prefixes (*a*, *an*) by a single *med*.

mudgasūpa “mung-bean soup” has been translated by *mudgai sran thsod*, with *sran* “bean” (misspelt *srin* in C) constituting a pleonasm. NP₁ neglect the genitive termination.

Instead of *śa-kha-ra*, a Tibetanization of *śarkarā* here corresponding to *śitopala* “sugar-crystal, sugar,” NP₁ write *kha-ra śa* “sugar (and) meat,” which implies a (doubtless corrupt) variant *śitāpala*. The change is remarkable as it cannot possibly have been made without consulting a Sanskrit text.

For *btuñ* NP₁ have **thuñ*, which is incompatible with the necessitative mood here to be expected. On the anticipation of the principal verb and its resumption by an auxiliary, see Introd. § 27.

manda, explained by Candranandana as *mandajāta* “slowly developed” and by Indu as *ajāta* “undeveloped,” has been rendered by *ma lañs* “not having reached the final stage, unfinished.” Similarly, Aruṇadatta describes *mandaka* as “that which, after having passed the state of milk, has not yet reached the state of curds but is in between” (*dugdhāvasthām vyatītya dadhyavasthām asaṃprāptam antarāvartī*).—The prefix *ā* must be interpreted to mean “slightly” (*āñ īśadarthe* Pat. on Pāṇ. II 2.18 vārtt. 4). For *nāmandam* Candranandana and Indu read *no mandam* (a contraction of *na u mandam*), which does not only come closer to the Tibetan version but is also preferable from the stylistic point of view, since *no* winds up a tripartite series of composite negations (*na ca : nāpi : no*).

anyathā “otherwise” has been taken into the next stanza, where it belongs syntactically.

I 5. 33

Sanskrit Text

*jvarāśṛkṣpittaviśarpakuṣṭhapāṇḍubhrama*¹*pradam* /
takraṃ laghu kaṣāyāmlaṃ dīpanaṃ kaphavātajit //

¹ B; *pāṇḍvāmaya* K.

(they are) productive of fever, hemorrhage, erysipelas, leprosy, jaundice, and giddiness. Buttermilk (is) light, astringent, sour, (and) digestive; (it is) destructive of phlegm and wind

Tibetan Version

(4) ((4)) *gʻan-du rims khrag me*[[6]]-*dbal*¹ *dan* /
mdze dan skya-rbab mgo ²*ʻkhor skyed*² /
dar sar <5> *yañ-la bska-ziñ skyur* /
*drod skyed*² *bad-kan rluñ-dag sel* //

¹ NP₁; *me-dbal rims khrag* CDP₂.

² CDP₁; *bskyed* P₂.

Otherwise they produce fever, hemorrhage, erysipelas, leprosy, jaundice, (and) spinning head. Fresh buttermilk is light, astringent, and sour; it produces (gastric) heat, removes phlegm (and) wind,

Remarks

asrkpitta "blood-bile, hemorrhage" has been rendered simply by *khrag* "blood," obviously for lack of space, the sense being the same as that of *khrag-mkhris*.

visarpa "erysipelas" has been placed by CDP₂ before *jvara* "fever," probably on grounds of rhythm.

bhrama "giddiness" has, as elsewhere, been paraphrased by *mgo* ²*ʻkhor* "spinning head."

For *skyed* P₂ has both times substituted *bskyed*.

takra "buttermilk" has been translated by *dar sar* "fresh buttermilk", *sar* being a short form of *gsar*(-ba).

dīpana "digestive" has been turned *drod skyed* "produces (gastric) heat."

kaphavātajit "destructive of phlegm and wind" has been represented by *bad-kan rluñ-dag sel* "removes phlegm (and) wind," the affix *dag* being here expressive of the dual.

— — —

After pāda 33b the codex ja (Mooss' siglum) inserts two ślokas that do not even occur in the As. but show a great similarity to Suśr. I 45.68cd—70ab; they run as follows:

vipāke madhuraṃ snigdhaṃ raktapittapraṇāśanam /
balasaṃvardhanam vṛṣyaṃ viśeṣād dadhī māhiṣam //
ājāṃ tu kaphapittaghnaṃ kṣayarogavināśanam /
durnāmaśvāsakāśeṣu hitam agneś ca dīpanam //

"Sweet in their digestion, oily, annihilative of hemorrhage, augmentative of strength, (and) virilgenic to a particular degree (are) buffalo's curds. Goat's curds, however, (are) destructive of phlegm and choler, annihilative of consumption, wholesome in hemorrhoids, dyspnea, and cough, and incentive of (gastric) fire."

I 5. 34

Sanskrit Text

*śophodarārsograhaṇīdoṣamūtragrahāruciḥ*¹ /
*plīhagulma*² *ghṛtavīyūpadgarapāṇḍvūmayāñ jayet //*

¹ B; *mūtrakṛcchrajvarāruciḥ* K.

² B; *gulmaplīha* K.

(and) destroys cutaneous and abdominal swellings, hemorrhoids, dysentery, retention of urine, anorexia, splenomegaly, visceral induration, ghee(-caused) diseases, factitious poison, and jaundice.

Tibetan Version

skran-nad dmu-rdziñ¹ gžari-'brum dan |
 [3] *pho-nad chu sri² yi-ga 'chus |*
mcher-pa skran dan mar ma-žu |
 [[7]] *sbyar dug skya-rbab-nad((5))-rnams sel ||*

¹ CDP₂; rdziñs NP₁. ² CDP₁; bsri P₂.

(and) removes visceral induration, abdominal swellings, hemorrhoids, dysentery, retaining urine, disturbed appetite, splenomegaly, visceral induration, ghee(-caused) indigestion, factitious poison, (and) jaundice.

Remarks

Instead of *śopha* "cutaneous swelling" the Tibetan writes *skran-nad* "visceral induration," which appears to be an old corruption for *skrañ-nad*; for in 7.19, 12.53, 16.32 & 20.3 *śopha* has been turned *skrañ* while 26.6 even gives *skrañs-nad*, the simple *skrañs(-pa)* being in later chapters a frequent pendant of *śopha* (8.25, 12.46, 26.25 & 56, 28.1, 3, 8 & 31, 29.5, 32, 38 & 74) and its synonym *śvayathu* (4.18, 23.4 & 29.1).

On the spelling of *dmu-rdziñ(s)* see v. 25.

grahaṇīdoṣa "dysentery" [lit. "grahaṇī disturbance"] has been translated by *pho-nad*, which properly means "stomach trouble"; for details see v. 14.

mūtragraha "retention of urine" has been rendered *chu sri* "retaining urine"; cf. v. 23. For *sri* P₂ reads *bsri*.

aruci "anorexia" has, as previously, been paraphrased by *yi-ga 'chus* "disturbed appetite" and *ghṛtavāpāda* "ghee(-caused) disease" by *mar ma-žu* "ghee(-caused) indigestion."

pliha "splenomegaly" has been reproduced by *mcher-pa*, which is its usual correspondent, the equation in Mvy. 4020/21 of *yakṛt* "liver" with *mcher-pa* and of *pliha* "milt" with *mchin-pa* being due to a confusion.

pāṇḍvāmaya "jaundice" has been metaphrased by *skya-rbab-nad*, the following suffix *rnams* belonging to the several substantives *in toto*.

I 5. 35

Sanskrit Text

tadvan mastu saram srotasḥsodhi viṣṭambhajil laghu |
navanītaṃ navaṃ vṛṣyaṃ śītaṃ varṇabalāgnikṛt ||

Likewise, whey (is) purgative, purificatory of the vessels, destructive of constipation, (and) light. Fresh butter of the same day¹ (is) viriligenic, cooling, productive of colour, strength, and digestion,

¹ *sadyaska*, as opposed to that of long standing, *cirothita*, according to Sūsruta's terminology (I 45.92).

Tibetan Version

<6> *de (5) 'dra zo-kha¹-chu 'khru yañ |*
rtsa-sbubs sbyon-la rtug skam sel |
'phral-gyi² mar sar ro-tsa-ziñ |
bsil³-ziñ mdog [4] stobs drod skyed byed ||

¹ NP₁; ga CDP₂. ² CDP₁P₂; gyis N. ³ CDP₂; bsal NP₁.

Likewise, whey purges, is light, purifies the vessels, and removes dry excrements. Fresh butter of the same day virilifies, cools, produces colour, strength, (and gastric) heat,

Remarks

On *mastu* "whey" see 3.46; *zo-kha-chu* and *zo-ga-chu* are alternative spellings of equally frequent occurrence.

viṣṭambhajit "destructive of constipation" has been paraphrased by *rtug skam sel* "removes dry excrements."

laghu "light" has been placed after *sara* "purgative."

nava, explained by Indu as *sadya uddhrtam* "churned on the same day," has been translated by 'phral, a noun denoting immediate nearness either in space or in time. For 'phral-gyi N reads, less correctly, 'phral-gyis.

bsal (for *bsil*) in NP₁ appears to be a corruption.

I 5. 36

Sanskrit Text

saṃgrāhi vātapittāśṛkṣayārśorditakāśajit |
kṣīrodhbhaṃ tu saṃgrāhi¹ raktapittākṣīroga¹ ||

¹ B; *saṃgrāhi* K.

constipating, (and) destructive of wind, hemorrhage, consumption, hemorrhoids, hemiplegia of the face, and cough; (that) prepared from thickened milk, on the other hand, (is) constipating (and) destructive of hemorrhage and eye-diseases.

Tibetan Version

'khru gcod rluṃ mkhris-khrag gzan[[8]]-'brum |
glo-gcoṅ kha yon <7> lud-pa¹ sel ||

¹ CDP₁P₂; *ga* N.

stops diarrhea, (and) removes wind, hemorrhage, hemorrhoids, consumption, wry mouth, (and) cough.

Remarks

In the first half of the stanza, *saṃgrāhin* "constipating" has been paraphrased by 'khru gcod "stops diarrhea" (see v. 29), *kṣaya* "consumption" interchanged with *arśas* "hemorrhoids," and *ardita* "hemiplegia of the face" represented by *kha yon* "wry mouth" (see 2.3).—*lud-ga* (for *lud-pa*) in N is a mistake.

The second half of the stanza is missing in the Tibetan version and in Candranan-dana's commentary.—*kṣīra* must here be interpreted to mean, not "frische Milch" as is done by HILGENBERG & KIRFEL, but "thickened milk" or "what is formed after milk has been churned" (*yat kṣīram eva mathitvotpāditam* Indu).

— — —

After pāda 36b some manuscripts insert the following spurious line:

cakṣuṣyaṃ bālavṛddhānāṃ praśastam saukumāryakṛt |
" (it is) ophthalmic, commended for children and old people, (and) productive of great tenderness."

I 5. 37

Sanskrit Text

śastaṃ dhīsmṛtīmedhāgnibālāyuyūṣukra¹cakṣuṣām |
bālavyṛddhaprajākāntisaukumāryasvarārthinām ||

¹ B; śukla K.

Recommended for wit, memory, intellect, digestion, strength, longevity, sperm, eyes, children, old people, those desirous of offspring, beauty, great tenderness, and voice,

Tibetan Version

ñun mar blo rno dran gsal-ñiñ |
 ((6)) *yid gñuñs drod (6) skyed¹ stobs thse 'phel |*
miḡ dan byis rñan bu 'dod dan |
mñanṣ [5] bzan rab gñon skad sñan phan ||

¹ CDN_{P1}; bskyed P₂.

Melted butter produces sharp wit, bright memory, keen intellect, (and gastric) heat; it increases strength (and) lifetime; it is wholesome for eyes, children, old people, desiring a son, fair complexion, great youthfulness, (and) melodious voice;

Remarks

śasta "recommended" has been removed from the head of the sentence and its role as predicate noun assigned to four elliptical gerunds, of which only the last one is a proper equivalent while the others are substitutes: *skyed* "produces" in 37b (where P₂ reads *bskyed*), *'phel* "increases" in 37b, *phan* "is wholesome" in 37d, and *bsñags* "is recommended" in 38b. Its initial position has been taken by *ñun mar* "melted butter," the Tibetan paraphrase of *ghṛta* "ghee" to be found towards the end of verse 39, which has here been repeated for syntactical reasons.

dhī "wit," *smṛti* "memory," *medhā* "intellect," and—a little later—*svara* "voice" have been specified by suitable attributes: *blo rno* "sharp wit," *dran gsal* "bright memory," *yid gñuñs* "keen intellect," and *skad sñan* "melodious voice."

śukra "sperm" has been omitted.

prajā "offspring" has been translated by *bu* "son," *kānti* "beauty" by *mñanṣ* *bzan* "fair complexion," and *saukumārya* "great tenderness" by *rab gñon* "great youthfulness" (*gñon-pa* being so far attested only as an adjective). The following *arthin* "desirous of," which in Sanskrit belongs to *prajā*, *kānti*, *saukumārya*, and *svara* alike, has in Tibetan been confined to *prajā*.

I 5. 38

Sanskrit Text

kṣataḥkṣīṇaparīśarpaśastrāgniglapitātmanām |
vātapittaviṣṇomādaśoṣālakṣmīvarāpaham ||

(and) those exhausted from pulmonary rupture, pulmonary consumption, erysipelas, scalpel, and fire; dispersive of wind, cholera, poison, frenzy, desiccation, unbeautiffulness, and fever;

Tibetan Version

*glo-rdol*¹ *skems*² *dan gcon* [[25a1]] *dan* <8> 'bras /
*mthson smas mes thsig rmya*³-la'an bñags /
rluñ dan mkhris-pa dug dan smyo /
lus skems mdañs ñams ((7)) *rims*(7)-*rnams*⁴ *sel* ||

¹ CDP₁; *brdol* P₂.

² N; *skem* CDP₁P₂.

³ NP₁; *rma* CDP₂.

⁴ NP₁; *nad* CDP₂.

it is recommended for pulmonary rupture, desiccation, consumption, erysipelas, (and) exhaustion from having been wounded by scalpel and burnt with fire; it removes wind, choler, poison, frenzy, desiccated body, impaired complexion, (and) fever;

Remarks

After *glo-rdol* (spelt *brdol* in P₂), which corresponds to *kṣata* (see v. 22), *skems* (spelt *skem* in CDP₁P₂) has been added, which may conveniently be taken in the sense of *śoṣa* "desiccation" (see v. 24), a synonym of *kṣaya* "consumption" (cf. III 5.1). The contrast to the following *kṣiṇa* is not quite clear; perhaps *skems dan gcon* is meant to be a tautology.—The spelling *glo-brdol* recurs in 6.115 & 119, 7.58, 10.7, 14.8, 17.22.

parīsarpa "erysipelas" has been rendered by 'bras, which in 4.18 stands for *koṭha* "urticaria" and is ordinarily used in the general sense of "pimple" (*gaṇḍa* Mvy. 9487, *śrāvīkā* Mvy. 9488) or the like. Its proper equivalent would be *me-dbal* (cf. 1.42, 4.18, 5.33).

śastrāgniglapita "exhausted from scalpel and fire" [i.e. surgery and cauterization] has been translated by *mthson smas mes thsig rmya* "exhaustion from having been wounded by scalpel (and) burnt with fire." By the nominalization of *glapita* and the consequent omission of *ātman* (which serves merely as a device for forming the possessive compound), the preceding nouns have become immediately dependent upon *śasta*.—In CDP₂ *rmya* "exhaustion" has been replaced by *rma* "wound," which appears somewhat awkward beside *smas* "wounded." See v. 79, where *rmya* is the sole spelling of all xylographs.

śoṣa "desiccation" and *alakṣmī* "unbeautiffulness" have been paraphrased by *lus skems* "desiccated body" and *mdañs ñams* "impaired complexion."

The suffix *rnams* after *rims*, which again (see v. 34) belongs to the preceding substantives *in toto*, has in CDP₂ given way to *nad* "disease."

I 5. 39

Sanskrit Text

*snehānām uttamam śītam vayasah sthāpanam param*¹ /
*śahasravīryam vidhibhir ghṛtaṃ*² *karmasahasrakṛt* ||

¹ B; *ghṛtam* K.

² B; *vidhibhiḥ śṛtam* K.

foremost among fats, cooling, (and) a first-rate preservative of youth: ghee (is) possessed of a thousand powers (and), by its (many) ways of application, productive of a thousand effects.

Tibetan Version

snum¹-gyi nañ-na [6] *snum² mchog-ste* /
bsil-ñiñ na-thsod [[2]] *'jog<26 a 1>-pai mchog* /
ñun mar stobs ni stoñ ñañ ldan /
sbyor-bas³ las ni stoñ byed 'byuñ⁴ ||

¹ CDP₂; *sman* NP₁.

² CDP₁P₂; *snum* N.

³ CDP₂; *ba* NP₁.

⁴ NP₁; *'gyur* CDP₂.

it is the best fat among fats, cooling, and the best (means) of extending youth; melted butter possesses a thousand powers (and) by its being applied produces a thousand effects.

Remarks

snehānām uttamam "foremost among fats" has been rendered *snum-gyi nañ-na snum mchog* "the best fat among fats," for which NP₁ read *sman-gyi nañ-na snum mchog* "the best fat among medicines" (this being doubtless a redactional change).—The second *snum* is spelt *snum* in N; cf. Introd. p. 23 n. 6.

vayasah sthāpanam param "a first-rate preservative of youth," as this phrase must be understood according to the scholiasts [and not "für das Alter das vorzüglichste Stärkungsmittel," as HILGENBERG & KIRFEL put it], has been translated *na-thsod 'jog-pai mchog* "the best (means) of extending youth"; cf. Mvy. 7430, where *'jog-pa* is equated to *prabhāvayanti*.

vidhībhiḥ "by its (many) ways of application" has been turned *sbyor-bas* "by its being applied." NP₁ neglect the instrumental termination.

ghṛta "ghee" has been transferred to the beginning of pāda c and reproduced by *ñun mar* "melted butter"; cf. v. 37.

°kṛt "productive of" has been represented by *byed 'byuñ* "produces," *'byuñ* after a verbal root serving as an auxiliary (cf. JÄSCHKE, Dict. p. 397). In CDP₂ it has been modified to *byed 'gyur* "will produce."

— — —

Analogously to v. 33, the codex ja inserts after pāda 39b the following couplet (~ Suśr. I 45.99):

madhuraṃ raktapittaghnaṃ guru pāke kaphāpaham /
vātapittaprasamanaṃ suṣītaṃ māhiṣaṃ ghṛtaṃ ||

"Sweet, destructive of hemorrhage, heavy in its digestion, dispersive of phlegm, sedative of wind and cholera, (and) strongly cooling (is) buffalo's ghee."

Sanskrit Text

madāpasmāramūrchāyāñ chiraḥ¹ karṇākṣiyoniñjan /
purāṇaṃ jayati vyādhiṃ vṛṇāśodhanaropaṇam ||

¹ K; *mūrchāyāsiraḥ* B.

Frenzy, epilepsy, stupor, (and) diseases affecting the head, ears, eyes, and womb destroys old (ghee; it is) purificatory and curative of wounds.

Tibetan Version

mar rñiñ smyo dan brjed-byed brgyal /
 klad-nad rna¹ mig mñal-nad dan /
 rma-rnams sbyon²-ñiñ [7] <2> 'thso³ byed-pas /
 (53b1) ((53b1)) nad-las [[3]] rgyal byed dam-pa yin //

¹ CDNP₁; sna P₂. ² NP₁P₂; sbyaṅ CD. ³ CDP₂; 'thsob NP₁.

Old ghee cleans up and heals frenzy, epilepsy, stupor, head-diseases, ear-, eye-, (and) womb-diseases, and wounds; it is excellent for making (one) victorious over diseases.

Remarks

The phrase *śīraḥkarnākṣiyonijān . . . vyādhīn* "diseases affecting the head, ears, eyes, and womb" has been split into two parts: *klad-nad* "head-diseases" and *rna mig mñal-nad* "ear-, eye-, (and) womb-diseases." Instead of *rna* "ear" P₂ reads *sna* "nose."

purāṇam (sc. *ghṛtam*) "old ghee" has been removed to the head of the stanza and translated by *mar rñiñ*; although literally meaning "butter" (see v. 35), *mar* is often used in the sense of "ghee," e.g. 1.25, 3.50, 4.29, 5.32 & 34 (cf. Mvy. 5682). According to Aruṇadatta, ghee is regarded as old when it is of 15 and more years' standing (*pañcadaśādivarṣasthita*).

jayati "destroys" has been shifted to the end of the stanza, severed from the remaining sentence, and rendered loosely by *nad-las rgyal byed dam-pa yin* "is excellent for making (one) victorious over diseases." Its office has been taken jointly by *sodhana* and *ropaṇa*, which thus form a kind of tautology. For *sbyon* CD give the future *sbyaṅ*, which does not go with the following *'thso byed* (misspelt *'thsob byed* by NP₁) and is probably nothing but a xylographical error passed from D into C.

Invigorative (are) caseous milk, early beestings, condensed milk, late beestings, etc.; (they are) productive of sperm, sleep, and phlegm, constipating, heavy, and morbid.

Tibetan Version

phrum sar spri dan rgya phrum dan /
 chur¹-ba-la sogs stobs skyed²-ciñ /
 khu-ba³ gñid dan bad-kan 'phel /
 rtug skam byad⁴ lei ñes dan ldan⁵ //

¹ CDNP₁; phyur P₂. ² CDNP₁; bskyed P₂. ³ DNP₁P₂; bal C.
⁴ NP₁P₂; byed CD. ⁵ NP₁P₂; pa dan CD.

Early beestings, condensed milk, late beestings, caseous milk, etc. produce strength, increase sperm, sleep, and phlegm, make the excrements dry, are heavy, (and) contain morbid matter.

Remarks

The Tibetan version of this stanza is especially valuable because of the equivalents it gives for the terms *kilāṭa* (v.l. *kilāṭa*), *pīyūṣa*, *kūrcikā* (v.l. *kūcikā*), and *morāṇa* (v.l. *morāṭa*), affording as it does thereby a unique opportunity to modify or supplement the meanings offered for these equivalents in the existent dictionaries.

Thus *kilāṭa* "caseous milk," popularly known as *kṣīrāṃśu*, is "the viscid part of condensed milk" (*kūrcikībhūtakṣīrasya ghanabhāgaḥ*)¹. It corresponds to *chur-ba* (spelt *tsur-ba* in Mvy. 5691), which JÄSCHKE (Dict. p. 159) describes as a kind of vermicelli prepared from boiled buttermilk, while DAS (Dict. p. 423) rightly takes it for a sort of cheese (thus also the Dict. of the Fr. Cath. Miss. p. 327) or curds extracted from milk after boiling and evaporation.

pīyūṣa "early beestings" is "the milk of a cow having just calved up to seven days" (*sadyaḥprasūtāyā goḥ kṣīraṃ saptaḥaṃ yāvat*) as opposed to *morāṇa* "late beestings," which is "that after seven days as long as it does not pass into clearness" (*tad eva saptaḥāt parato yāvat prasannatām na gacchati tāvat*). By the "passing into clearness" must probably be understood the disappearance of the so-called colostrum globules or Donnè corpuscles, which takes place in the third week after parturition; HILGENBERG & KIRFEL, however, refer it to the cow's restitution to ritual purity. Although the Mvy. 5692 equates *pīyūṣa* to *spri-ma* (on which see below), it is apparent from the attributes *sar* "fresh, early" and *rgya* "fully developed, late" that the Tibetan term for "beestings" is *phrum*. JÄSCHKE (Dict. p. 355) records this word only in the sense of "cartilage, gristle," while DAS (Dict. p. 844) refrains from identifying it; the Dict. of the Fr. Cath. Miss., finally, does not mention it at all.

kūrcikā "condensed milk" is milk "whose constituent parts have turned viscid" (*ghanāvayavam*). For its pendant remains *spri*, which is unanimously defined as "cream." Since *pīyūṣa* can have the same meaning, the equation in Mvy. 5692 of *pīyūṣa* and *spri-ma* is still correct, all the more so because it is included there in a list of articles of food, in which *pīyūṣa* "beestings" would be quite out of place.

Little need be said about the translating-technique: *balya* "invigorative" (placed at the end of the clause) has been paraphrased by *stobs skyed-ciñ* "produce strength," *niṣṭambhin* "constipating" by *rtug skam byad* "make the excrements dry," and *doṣala* "morbific" by *ñes dan ldan* "contain morbid matter." For *kara* "productive of" has been substituted *phel* "increases."

As concerns the variant readings, *khu-bal* (for *khu-ba*) in C is a xylographical error; *phyur* (for *chur*) in P₂, *bskyed* (for *skyed*) in P₂, and *byed* (for *byad*) in CD are alternative forms; and *ñes-pa dan* (for *ñes dan ldan*) in CD is obviously a malcorrection.

¹ The definitions here quoted have been taken from Dalhaṇa's commentary on Suśr. I 45.90 sq.; they do not always agree with those given by our scholiasts.

I 5. 42

Sanskrit Text

gavye kṣīraghrte śreṣṭhe nindite cāvisambhave /
— iti kṣīravargaḥ ¹
ikṣo raso² guruh snigdho bṛṇhaṇaḥ kaphamūtrakṛt //

¹ Tail-piece missing in B.

² B; *ikṣoḥ saro* K.

cools, removes hemorrhage, and is sweet in taste and after digestion. That at the top is salt-tasting and, if pressed out with the teeth, sugar-like.

Remarks

svādupākaraśa "of sweet digestion and taste" has been rendered by *ro dan zu rjes mñar-ba* "sweet in taste and after digestion"; cf. vv. 20 & 29. For the following *yin* P_1 has substituted *dan*.

sara "purgative" has been translated by 'khru "purges" and put in front of *guru* "heavy." As the Kottayam edition reads *saro* in 42c and *rasaḥ* in 43b, it is practically certain that the Tibetans had this variant before them; the tmesis of *ikṣu* and *rasa* would have been abandoned anyway.

For *rtse*, which corresponds exactly to *agra* "top" but is found only in P_1 , all the other xylographs write *thse* "time." Perhaps *agre* has been misunderstood in a temporal sense.

salavaṇa "slightly salt" has been paraphrased by *lan-thsva bro-ñin* "salt-tasting"; cf. vv. 25 & 28. For *lan-thsva* CP_1 give the less correct spelling *lan-thsa*.

bcad (for *bcas*) in P_1 seems to be a redactional change: "having cut."

śarkarāsama "sugar-like" has been turned *kha-ra-dag dan 'dra*. The plural suffix is baffling; perhaps *dag* must be interpreted as *dag-pa* "pure."

I 5. 44

Sanskrit Text

mūlāgrajantujagdhādīpīdanān malasaṃkarāt |
kiṃcītkālaṃ vidhṛtyā¹ ca vikṛtiṃ yāti yāntrikaḥ ||

¹ B; *kiṃcītkālavidhṛtyā* K.

On account of the pressing of roots, tops, worm-eaten (parts), etc. (alike), the mixture with dirt, and the withholding (from use) for some time, mechanically extracted (sugar-cane juice) undergoes a change (in quality for the worse);

rtsa-ba rtse-mo 'bus¹ zos sogs² |
btsir dan dri-mas³ sbags⁴-pa dan |
dus ((3)) ni cuñ-zad lon-pa-las |
'khrul-'khor(3)<5>-can ni rnam 'gyur-te ||

¹ P_1 ; *dbus* $CDNP_2$. ² NP_1P_2 ; *stsogs* CD.

³ CDP_1 ; *ma* NP_2 .

⁴ P_1 ; *spags* CD; *pags* NP_2 .

Since roots, tops, worm-eaten (parts), etc. have been pressed (alike) and mixed with dirt, and a short time passes (until its use), mechanically extracted (sugar-cane juice) changes (in quality for the worse);

Remarks

The verbal nouns *pīdana* "pressing," *saṃkara* "mixture," and *vidhṛti* "withholding" and their adjuncts have been reproduced by means of a gerundial clause ending in *-las*, which must here be understood in a causative sense. This, by the

way, led to some minor changes of phrase, particularly as far as the words *kim-citkālaṃ vidhṛtyā* are concerned. In the last pāda, *vikṛtiṃ yāti* "undergoes a change" has been placed after *yāntrikāḥ* and simplified to *nam 'gyur-te* "changes."

With regard to the variant readings it may be noted that, just as in the case of *rtse* (in 43c), *P*₁ alone has handed down (or rather restored) the original text, *dbus zos* (for 'bus zos) as well as *dri-ma(s)* (*s*)*pag*s (for *dri-mas sbags*) in CDNP₂ being corrupt.

thereby it (becomes) burning, heavy, and constipating. Among the (sugar-cane juices), that made of puṇḍra (is) the best because of its coolness, clearness, and sweetness. Next to it (is) that made of vāṃśa.

Tibetan Version

thsa-ñin lci-la mkhregs-par 'gyur |
de-la kha-ra [[6]] dkar-poi śin |
[3] bsil dan mñar-bas¹ mchog yin-la |
de-yi og-ma sbubs-can yin ||

¹ CDNP₂; *ba P*₁.

it becomes burning, heavy, and constipating. Among the (sugar-canes) the white sugar-cane is the best because it is cooling and sweet; and next to it is the hollowed one.

Remarks

viṣṭambhin "constipating" has been translated by *mkhregs-pa*, a word known so far only in the sense of "hard" or the like; see JÄSCHKE, Dict. p. 55, and DAS, Dict. p. 186.

tena "thereby" and *asau* "it" have been omitted and replaced by *'gyur* "it becomes."

paunḍraka as well as the following *vāṃśika*, *śataparvaka*, *kāntāra*, and *naipāla* are secondary formations susceptible of two different interpretations, either signifying various kinds of sugar-cane or denoting the juice extracted from these. In the former case, they must be understood as "Puṇḍra-grown" (Puṇḍra being the modern Bengal and Bihar), "cane-like," "hundred-knotted," "wood-grown," and "Nepal-grown"; in the latter, as "made of puṇḍra," "made of vāṃśa," etc. While Aruṇadatta and Indu decided in favour of this last possibility, paraphrasing *tatra* by *teṣu raseṣu madhye* and *ikṣuraseṣu madhye* respectively, the translators gave preference to the other alternative. This is evident from their rendering *paunḍraka* by *kha-ra dkar-poi śin* "white sugar-cane," the Puṇḍra-grown species being indeed of a pale, straw-like colour. Except for *kāntāra*, which has been transliterated, all terms appear in a Tibetan garb. Instead of *vāṃśika*, the basic text probably read *kośaka* (cf. Bhpr. I 2.13.4) or *kośika*, *sbubs* (sometimes spelt *spubs*) being the pendant of *kośa* (cf. Mvy. 5537 & 6963); this is yet another variety of sugar-cane also

known as *kośakṛt* (cf. Suśr. I 45.150) and *kośakāra* (cf. Suśr. I 45.155 & Bhpr. I 2.13.6).

śāityaprasādamādhuryaiḥ "because of its coolness, clearness, and sweetness" has been represented by *bsil dan mñar-bas* "because it is cooling and sweet," with *prasāda* "clearness" missing; apparently *dan* is an old corruption of *dag* "clear." For *mñar-bas* P_1 reads *mñar-ba*, thus effacing the gerundial nature of the clause.

I 5. 46

Sanskrit Text

śātaparvakakāntāranaiḥpālādyās tataḥ kramāt |
sakṣārāḥ sakaṣāyās ca soṣṇāḥ¹ kiṃcidvidāhinaḥ ||

¹ B; *koṣṇāḥ* K.

drod⁵ bcas cuñ-zad [[7]] thsa-ba (4) bskyed⁶ ||⁷

¹ CDP₁; *ka-ta* NP₂. ² CDNP₂; *skye* P₁. ³ NP₁P₂; *sisogs* CD. ⁴ CDNP₂; *rem* P₁.

⁵ CDNP₂; *dro* P₁. ⁶ NP₂; *skyed* CDP₁. ⁷ End of dittograph.

The hundred-knotted one, the kāntāra, the Nepal-grown one, etc. thereupon (follow) in succession; they taste slightly pungent, are a trifle astringent and warming, (and) produce a slight burning.

Remarks

For *kanta-ra* NP₂ offer the less correct spelling *ka-ta-ra*, the long vowels being disregarded in either case.

skye (for *skyes*) and *rem* (for *rim*) in P₁ are xylographical errors, while *dro* (for *drod*) in P₁ may pass for a secondary form (cf. JÄSCHKE, Dict. p. 264).

sakṣāra "slightly pungent" has been translated by *cuñ-zad thsa bro* "taste slightly pungent," apparently in order to contrast it with the later *kiṃcidvidāhin* "a trifle burning," which has been rendered by *cuñ-zad thsa-ba (b)skyed* "produce a slight burning."

I 5. 47

Sanskrit Text

phāṇitaṃ gurv abhiṣyandi cayaḥkrn mūtraśodhanam |
nātiśleṣmakaro dhautāḥ sṛṣṭamūtraśakṛd guḍaḥ ||

Syrup (is) heavy, causative of effluxions, productive of accumulation (of humours, and) purificatory of urine. Cleaned molasses (is) not productive of excessive phlegm, letting (one) pass urine and feces.

Tibetan Version

[[26a6]] *lbu¹-ba-can lci bad-kan* [4] *bskyed²* /
sogs byed gcin ni sbyoñ byed yin /
dkar-po bad-kan [[7]] *cher mi bskyed²* /
bśaṅ dañ gci-ba bde-bar 'byin //

¹ N; *dbu* CD; *sbu* P. ² NP; *skyed* CD.

Syrup is heavy, produces phlegm, makes (the humours) accumulate, (and) purifies urine. White (molasses does) not excessively produce phlegm (and) lets (one) easily pass feces and urine.

Remarks

phañita, a term for the thickened juice of sugar-cane and other plants conveniently to be reproduced by “syrup,” grammatically speaking, derives from the root *phañ*, of which it is the causative past participle: “skimmed off.” The Tibetans erroneously consider it a formation of *phaṇa* “scum” (cf. TBr. III 10.1.4) and the possessive suffix *-ita* (cf. WHITNEY, Skr. Gr. § 1176b), which would of course be *phañita*, and consequently render it by *lbu-ba-can* “scummy.”—*dbu-ba* in CD and *sbu-ba* in P are frequent alternative spellings of *lbu-ba*; cf. v. 7, where N as well as P read *lbu-ba*, while CD have again *dbu-ba*.

abhiśyandin “causative of effluxions” has been paraphrased by *bad-kan* (*b*)*skyed* “produces phlegm”; cf. vv. 18 & 28.

cayakṛt “productive of accumulation (of humours)” has been translated by *sogs byed* “makes (the humours) accumulate,” *mūtraśodhana* “purificatory of urine” by *gcin ni sbyoñ byed* “purifies urine,” and *nāśiśleṣmakara* “not productive of excessive phlegm” by *bad-kan cher mi* (*b*)*skyed* “does not excessively produce phlegm.”

dhāuta “cleaned” has been interpreted as *dkar-po* “white” and transferred to the beginning of the sentence, while the governing *gūḍa* “molasses” has been omitted, the syntactical relation of *dkar-po* as well as of the following *dmār-nag* (48a), *rñin-pa* (48c), and *sar-pa* (48d) thus becoming obscure; maybe they are meant to be connected with *lbu-ba-can*.

sr̥ṣṭamūtraśakṛt “letting (one) pass urine and feces” has been represented by *bśaṅ dañ gci-ba bde-bar 'byin* “lets (one) easily pass feces and urine,” with *mūtra* and *śakṛt* being transposed. How *bde-bar* entered the picture is not quite clear; there is just an off chance that the basic text read *sr̥ṣṭamūtraśakṛtsukhaḥ* (“pleasant in that it lets one pass urine and feces”), which would account for the occurrence of *bde-bar* as well as for the omission of *gūḍa*, to be sure, but would deprive the whole paragraph of its catchword.

I 5. 48

Sanskrit Text

prabhūtakṛmimajjāsṛṇmedomāṇsakapho¹ 'paraḥ /
hr̥dyāḥ purāṇaḥ pathyaś ca navaḥ śleṣmāgnisādakṛt //

¹ B; *karo* K.

Excessive(ly productive of) worms, marrow, blood, fat, flesh, and phlegm (is) other (molasses). Old (molasses is) cardiac and salutary, fresh one productive of phlegm and weakness of digestion.

Tibetan Version

*dmar-nag phal*¹-*cher srin-bu khrag* |
rkañ thsil ((5)) *śa dan bad-kan bskyed*² |
rñin-pa yid on phan-pa yin |
sar-pa drod [5] *'bri bad-kan bskyed*² ||

¹ DNP; *lal* C.

² NP; *skyed* CD.

Reddish black (molasses) usually produces worms, blood, marrow, fat, flesh, and phlegm. Old (molasses) suits one's mind (and) is salutary; fresh one produces weakening (digestive) heat (and) phlegm.

Remarks

prabhūta^o "excessive(ly productive of)" has been translated by *phal-cher* (*b*)*skyed* "usually produces." The meanings of *prabhūta* and *phal-cher* (for which C has a miscarved *lal-cher*) can hardly be made to fit each other, the proper correspondent of *prabhūta* being *cher* or *che-bar*.

majjā "marrow" and *asrj* "blood" have been transposed.

apara "different, other" [i.e. uncleaned] has been interpreted as *dmar-nag* "reddish black" and transferred to the head of the stanza.

hṛdya "cardiac," glossed by Aruṇadatta as *hṛdayāya hita* "good for the heart," has been placed after *purāṇa* and turned *yid on* "suits one's mind." On the different ways chosen in rendering *hṛdya*, see Introd. § 27.

śleṣmāgnisādakṛt "productive of phlegm and weakness of digestion" has been represented by *drod 'bri bad-kan* (*b*)*skyed* "produces weakening (digestive) heat (and) phlegm," with *śleṣman* and *agnisāda* taking each other's place.

² B; *guṇavattarāḥ* K.

Viriligenic, wholesome for pulmonary rupture and pulmonary consumption, (and) dispersive of hemorrhage and wind (are) crude sugar, candied sugar, and white sugar; (they are) in succession possessed of the best qualities.

Tibetan Version

[[8]] *hvags* (5) *dan khaṇḍa ka-ra dkar* |
rim-gyis yon-tan che-ba-ste |
*ro-tsa glo*¹-*gcoṅ glo*¹-*rdol dan* |
khrag dan mkhris-pa rluṅ sel yin ||

¹ CDP; *blo* N.

Crude sugar, candied sugar, (and) white sugar are in succession the best in quality; they virilify (and) remove pulmonary consumption, pulmonary rupture, hemorrhage, (and) wind.

Remarks

The Tibetan version of this stanza is very much like the original Sanskrit, except that its two halves have been transposed on grounds of syntax.

vr̥ṣya “viriligenic” has been rendered by *ro-tsa* (prop. “carnal desire”), without a following (b)*skyed* “produces” (2.15), *byed* “generates” (5.21), or *’phel* “increases” (5.42). Similar cases are met with in 5.19 (CD only) and 5.35. In all three instances, the context leaves no choice but to suppose a verb *ro-tsa-ba* “to provoke carnal desire, virilify” not listed in the dictionaries.

kṣataksṣīṇahita “wholesome for pulmonary rupture and pulmonary consumption” and *raktapittānilāpaka* “dispersive of hemorrhage and wind” have been combined into a single clause: *glo-gcoñ glo-rdol dan khrag dan mkhris-pa rluñ sel yin* “remove pulmonary consumption, pulmonary rupture, hemorrhage, (and) wind,” with *kṣata* and *kṣīṇa* appearing in reverse order; as this is also the case in K, there can be no doubt but that the basic text read *kṣīṇakṣatahitā*.—*blo* (for *glo*) in N is a rare secondary spelling recurring in 2.6 and 5.67.

matṣyaṇḍikā “crude sugar” has been translated by *hvags*, which in Mvy. 5838 is the equivalent of *khaṇḍa* “candied sugar.”

guṇavattama “possessed of the best qualities” has been turned *yon-tan che-ba* “best in quality.”

I 5. 50

Sanskrit Text

taḍguṇā tiktamadhurā kaṣāyā¹ yāsaśarkarā |
dāhatṛichardimūrchāsṛkṣipittaghnyāḥ sarvaśarkarāḥ ||

¹ B; *madhurakaṣāyā* K.

Of the same qualities, bitter and sweet, (and) astringent (is) camel’s-thorn sugar. Destructive of heat, thirst, nausea, stupor, and hemorrhage (are) all sugars.

Tibetan Version

ya-ba kha-ra thsa-ziñ mñar |
bska-ste yon-tan de ((6)) dan ’dra |
kha-ra[[26 b1]]-kar kun¹ [6] thsa dan skom |
skyug-bro² brgyal dan khrag-mkhris sel ||

¹ CDP; *ku* N.

² CD; *skyu-dro* NP.

Camel’s-thorn sugar is bitter and sweet, astringent, and like these in quality. All sugars remove heat, thirst, nausea, stupor, and hemorrhage.

Remarks

taḍguṇa “of the same qualities” has been paraphrased by *yon-tan de dan ’dra* “like these in quality” and interchanged with *yāsaśarkarā* “camel’s-thorn sugar.”

For the equation of *tikta* and *thsa*, see remarks on 1.14.

yāsa “camel’s thorn” [Alhagi maurorum DESV.] is a contraction of *yavāsa*; hence its Tibetanization as *ya-ba*.

skyu-dro (for *skyug-bro*) in NP seems to be corrupt.

sarvaśarkarāḥ “all sugars” has been translated by *kha-ra-kar kun* and, like *yāsaśarkarā*, removed to the beginning of the sentence. A word *kha-ra-kar* (for the ordinary *kha-ra* or *ka-ra*) is not otherwise attested.—*ku* in N is a carver’s error.

I 5. 51

Sanskrit Text

śarkarekṣuvikārāṇāṃ phāṇitaṃ ca varāvare |
cakṣuṣyaṃ chedī tṛṣṇeṣamaviśahidhmāsrāpittanūt ||

Of the sugar-cane products, sugar and syrup (are) the best and worst (respectively). Ophthalmic, dissolvent (of lumps), expulsive of thirst, phlegm, poison, hiccup, and hemorrhage,

Tibetan Version

bu-ram-śiñ bsdus¹ kha-ra (6) dañ |
dbu-ba-can mchog tha-ma yin |
sbran-rtsi mig phan² gcod skom³ dañ |
bañ-kan skyigs-bu khrag-mkhris 'joms ||

¹ NP; *gdus* CD.

² CD; *phran* NP.

³ CD; *sgom* NP.

Of the sugar-cane products, sugar and syrup are the best (and) worst (respectively). Honey is wholesome for the eyes, dissolves (lumps), subdues thirst, phlegm, hiccup, (and) hemorrhage,

Remarks

ikṣuvikāra "sugar-cane product" has been interchanged with *śarkarā* "sugar" and translated by *bu-ram-śiñ bsdus* in NP and *bu-ram-śiñ gdus* in CD; both readings amount to the same, *bsdus* being originally the perfect stem of *śrud-pa* and *gdus* that of the cognate *gdu-ba*. The partitive genitive has been replaced by a modal accusative.

On *phāṇita* and its equivalent *dbu-ba-can* see v. 47.

cakṣuṣya "ophthalmic" has been paraphrased by *mig phan* "wholesome for the eyes"; *phran* (for *phan*) in NP is suspect.

chedin "dissolvent" (metaphrased by *gcod*) denotes, according to Indu, that "which on account of its fierceness dissolves, disperses, lump-shaped formations in the body" (*yat taikṣṇyād dehe piṇḍībhūtān bhāvān chinatti vijahati*).

sgom (for *skom*) in NP looks like a carver's error passed from N into P.

viṣa "poison" has been dropped.

I 5. 52

Sanskrit Text

mehakuṣṭha¹ krmicchardīśvāsakāsātisāranūt |
vraṇaśodhanasamdhānaropaṇaṃ vātalaṃ madhu ||

¹ B; *kuṣṭhameha* K.

expulsive of diabetes, leprosy, worms, nausea, dyspnea, cough, and diarrhea, purificatory, cicatrizant, and curative of wounds, (and) productive of wind (is) honey;

Tibetan Version

[[2]] tshil che¹ mdze-nad gcin-nad skyug |
((7)) lud-pa dbug [7] mi bde tshad sel |
rma sbyoñ rma 'tsho chag-drug² sbyor |
rluñ ni skyed-par byed-pa yin ||

¹ NP; *chen* CD.

² NP; *grugs* CD.

removes excessive fat, leprosy, urinary diseases, nausea, cough, dyspnea, (and) diarrhea, cleans wounds, heals wounds, joins fractures, (and) produces wind;

Remarks

Instead of *meḥa* "diabetes" the Tibetan has *thsil che(n)* "excessive fat," which makes it fairly certain that the original read *medaḥ* or even *meda* (cf. R. IV 44.65) "fat," all the more so as Suśr. I 45.132 mentions *medas* in the same connection along with *meḥa*. A similar case is found in 19.7.

For *kṛmī* "worm" the translation has *gcin-nad* "urinary disease." It would of course only be natural to suppose a change in word-order and equate *gcin-nad* to *meḥa*, were it not that *thsil che* would then be unaccounted for. Perhaps the basic text had *kṛcchra*, which according to Rājan. XX 19 (cf. pw II 90) may stand for *mūtrakṛcchra*; but in that case the fifth syllable of the pāda would be long instead of short, as required by the rules of prosody.

śvāsa "dyspnea" and *kāsa* "cough" have been transposed; see the same phenomenon in v. 22, where the codex na reads *kāsaśvāsa*.

vraṇa, which in Sanskrit belongs to *śodhana*, *saṃdhāna*, and *ropaṇa* alike, has in Tibetan been connected with *śodhana* and *ropaṇa* only, while *saṃdhāna* "cicatrizant" has been severed from the compound and rendered more generally by *chag-drug* [-grugs] *sbyor* "joins fractures."—Both *chag-drug* and *chag-grugs* are hendiadyses properly meaning "breaking & crumbling"; cf. 4.32.

madhu "honey" has been transferred to its appropriate place at the beginning of the sentence in pāda 51c.

I 5. 53

Sanskrit Text

rūkṣaṃ kaṣāyamadhuraṃ tattulyā madhuśarkarā |
uṣṇam uṣṇārtam uṣṇe ca yuktaṃ coṣṇair niḥanti tat ||

(it is) rough (as well as) astringent and sweet, similar to it (is) honey-sugar. Taken hot, at a hot (time and place), and together with hot (food etc.), it kills one who is afflicted with heat;

Tibetan Version

rtsub-ciñ (7) *bska-la mñar-ba-ste |*
sbrañ-rtsi¹ khaṇḍa de dan 'dra² |
thsa-ziñ thsas [[3]] gduñs thsa-bar ldan |
thsa-ba des³ ni gsod-par 'gyur ||

¹ CD; *rtsi* NP.

² NP; *'drao* CD.

³ CDP; *de* N.

it is rough as well as astringent and sweet, and honey-candy is similar to it. Him who is hot and afflicted with heat, having heat (and) being hot (itself), it will kill;

Remarks

madhuśarkarā "honey-sugar" has been placed before *tattulyā* and rendered by *sbrañ-rtsi(i)* *khaṇḍa* "honey-candy," a term that is closer to the facts, honey-sugar being according to Ḍaḥaṇa's definition (on Suśr. I 45.166) "honey the constituent

parts of which have turned solid on account of boiling or on account of drying up after a certain space of time" (*pākāt kālāntaraśoṣaṇād vā ghanībhūtāvayavaṃ madhu*).

After 'dra CD add a final o.

In the second half of the stanza, no attempt has been made to bring the Tibetan version into harmony with the Sanskrit text. While carefully retaining the original word-order, the translators seem widely to differ from the customary interpretation, which Arunadatta puts as follows:

*tan madhu uṣṇam upayuktaṃ saṃnihanti mārayati | tathhoṣṇārtam prataptaṃ
puruṣaṃ nihanti | uṣṇe ca kālā deśe copayuktaṃ uṣṇair āhārādibhiḥ ca yuktaṃ
saṃnihanti |*

It [the honey] slays [kills] when taken hot; similarly, it slays a man affected with heat [heated]; and it slays when taken at a hot time and place, and when taken together with hot food etc.

For *des* N is the only xylograph to read *de*, which is grammatically less satisfactory.

I 5. 54

Sanskrit Text

*pracchardane nirūhe ca madhūṣṇam na nivāryate |
alabdhapākam āśv eva tayor yasmān nivartate ||
— itikṣuvargaḥ ||¹*

¹ Tail-piece missing in B.

in the form of a nauseant and a purgative enema, (however), hot honey is not prohibited, because it quickly turns out again in either case without having undergone digestion. Such (is) the section on sugar-cane.

Tibetan Version

*skyug¹-sman sman-mar mas-btañ²-la |
sbrañ[26a1]-rtsi ((54a1)) dro-ba'am bkag-pa med ||
— bu-ram-śiñ-gi sde-thsan-no ||³*

¹ CDP; *skyugs* N.

² NP; *gtoñ* CD.

³ Second double śad wanting in P.

in the form of a nauseant (and) a medicinal oil (administered) as an enema, (however), even hot honey is not prohibited. (Such) is the section on sugar-cane.

Remarks

pracchardana "nauseant" has been rendered *skyug-sman*, a phrase that literally means "vomiting medicine"; cf. 1.44 & 3.19. The spelling *skyugs-sman* given by N is suspect, although it recurs in 26.39.

nirūha "purgative enema" has been translated *sman-mar mas-btañ* [-*gtoñ*] "medicinal oil (administered) as an enema," which would rather correspond to what is technically known as a "lubricant enema" (*anuvāsana, āsthāpana, snaiḥika*); cf. 4.6.

The second line, which is known to all scholiasts, has got no counterpart in Tibetan.

I 5. 55

Sanskrit Text

*tailaṃ svayonivat tatra mukhyaṃ tīkṣṇaṃ vyavāyi ca |
tvagdoṣakṛd acakṣuṣyaṃ sūkṣmoṣṇaṃ kaphakṛn na ca ||*

(Any) oil (is) like its own raw material. Among the (oils, that extracted from sesame is) the best.¹ (It is) violent, penetrating, productive of skin-diseases, not ophthalmic, subtle, warming, not productive of phlegm,

Tibetan Version

*'bru-mar rañ gnas lta-bu yin |
(54a1) de-la til-mar til dañ [[4]] mthsuñs |
gtso-bo rno-ñiñ khyab-pa yin |
pags-pai ñes sel mig-la gnod |
thsa-ñiñ [2] rno¹-la bad-kan ((2)) sel² ||*

¹ CD; *ron* NP.

² CD; *bskyed* NP.

Seed-oil is like its own raw material. Among the (seed-oils), sesame-oil is similar to sesame. It is the best (of its kind), violent, and penetrating; it removes skin-diseases, harms the eyes, is warming and subtle, removes phlegm,

Remarks

taila "oil" has been translated by *'bru-mar* "seed-oil" in order to stress its vegetable nature. The following ellipsis has been completed by adding the words *til-mar til dañ mthsuñs* "sesame-oil is similar to sesame," as a result of which the Tibetan has got one supernumerary line.

Instead of *tvagdoṣakṛt* "productive of skin-diseases" the basic text apparently read *tvagdoṣahṛt* "eliminative of skin-diseases," as may be inferred from the Tibetan *pags-pai ñes sel*. Compared with parallel passages in other medical works, this is decidedly the better reading: in Car. I 27.287 sesame-oil is stated to be *tvacya* "conducive to the skin," and in Suśr. I 45.112 it is said to be *tvakprasādhana* "purificatory of the skin."

acakṣuṣya "not ophthalmic" has been turned *mig-la gnod* "harms the eyes."

sūkṣma "subtle" has been interchanged with *uṣṇa* "warming" and reproduced by *rno* in CD and *ron* in NP. While the latter is not otherwise known, the former usually means "violent." One is inclined to assume a variant reading *tīkṣṇa*, but in v. 64 *sūkṣma* has again been rendered by *rno* (spelt *sno* in NP).

bad-kan bskyed "produces phlegm," as NP write instead of *bad-kan sel* "removes phlegm," is due either to an oversight on the part of the translators (omission of *na*) or else to a variant in the original (*kaphakṛn na*); there is no way of telling definitely to which.

¹ Paraphrase according to the scholiasts. The denseness of expression is rendered possible by the double meaning of *taila*, which signifies both oil in general and sesame-oil in particular.

I 5. 56

Sanskrit Text

*kṛśānām bṛṃhaṇāyālaṃ sthūlānām karśanāya ca /
baddhaviṭkaṃ kṛmighnaṃ ca saṃskārāt sarvadoṣa¹jīti //*

¹ B; roga K.

suitable for the nourishing of the lean and thinning of the fat, generative of hardened stool, destructive of worms, (and)—in combination (with drugs)—curative of all diseases.

Tibetan Version

*skem-po-dag ni śa bskyed¹-ciñ /
sbom-poi śa 'bri mkhregs²-par oñ /
rtug 'gags³ srin⁴-bu 'joms-pa (2) [[5]] dan /
sbyar-bas nad-rnams thams-cad sel //*

¹ NP; *skyed* CD.

² DN; *mkhris* C; *mkhriḡs* P.

³ NP; *skam* CD.

⁴ DNP; *srid* C.

produces flesh with the lean, the flesh of the fat decreases (and) becomes firm, the stool is obstructed, it destroys worms and, when combined (with drugs), removes all diseases.

Remarks

The greater part of this stanza has been handled very freely as far as the wording is concerned. Thus the predicate noun *alam* "suitable" has been dropped, while the dative objects *bṛṃhaṇāya* "for the nourishing" and *karśanāya* "for the thinning" (along with their genitive attributes *kṛśānām* "of the lean" and *sthūlānām* "of the fat") have been converted into gerundial clauses: *skem-po-dag ni śa (b)skyed-ciñ sbom-poi śa 'bri mkhregs-par oñ* "produces flesh with the lean and the flesh of the fat decreases (and) becomes firm." What is particularly noteworthy is the change from a transitive to an intransitive verb and the addition of *mkhregs-par oñ* "becomes firm," which has no counterpart in the original. The forms *mkhris* in C and *mkhriḡs* in P are no doubt xylographical errors.

baddhaviṭka "generative of hardened stool" [lit. "one by which stool is hardened"] has been rendered *rtug 'gags* "the stool is obstructed," for which CD write *rtug skam* "the stool is dry." Here again a change of subject has taken place.

srid (for *srin*) in C is obviously a mistake, though it recurs in vv. 71 & 76.

saṃskārāt "in combination (with drugs)" has been put verbally: *sbyar-bas* "when combined (with drugs)."

I 5. 57

Sanskrit Text

*satiktoṣaṇam airaṇḍaṃ tailaṃ svādu saraṃ guru /
vardhmaḡulmānilakaphān udaraṃ viṣamajvaram //*

Castor oil (is) slightly bitter and pungent, sweet, purgative, (and) heavy; it cures [*jayet* 58 b] testicular swellings, abdominal swellings, wind, phlegm, visceral induration, (and) irregular fever

Tibetan Version

*e-raṇḍa mar*¹ *thsa-žin kha* |
*žu rjes mñar lci*² *khru-ba yin* |
*rlig*³[3]-*rlugs skran*³ *rluñ bad-kan dan* |
lto-nad ((3)) *lđan dub rims-nad sel* ||

¹ CD; *dkar* NP.² D; *rlu*^g C; *brlig* NP.³ NP; *skran* CD.

Castor oil is bitter, pungent, sweet after digestion, heavy, (and) purgative; it removes testicular swellings, abdominal swellings, wind, phlegm, fatigue arising from abdominal diseases, (and) pyrexial diseases

Remarks

satiktoṣaṇa “slightly bitter and pungent” has been placed after *airaṇḍam tailam* “castor oil” and rendered simply by *thsa-žin kha* “bitter and pungent,” with *sa* “slightly” left untranslated. An inversion of *tikta* and *uṣaṇa* need not, however, be assumed; cf. 1.14.

For *e-raṇḍa mar* “castor oil” NP have substituted the elliptical *e-raṇḍa dkar* “(oil of the) white castor-oil plant,” which is meant to contrast with *e-raṇḍa ni dmar-poi mar* “oil of the red castor-oil plant” in the next stanza. The redactional nature of this change is quite obvious.

svādu “sweet” has been paraphrased by *žu rjes mñar* “sweet after digestion,” although *Indu* explains it as *rasena madhuram* “sweet in taste.”

vardhma(n)—like the cognate *vradhna*, *bradhna*, and *bradhma*—may be interpreted to signify testicular swellings as well as hernia, the symptoms of both diseases passing into one another with Indian physicians; cf. JOLLY, *Medicin* p. 104. Arunadatta considers it identical with *vṛddhi* (~ *phel*), the proper term for testicular swellings, for which it often occurs as a variant reading, e.g. in 4.21. Accordingly, the Tibetan has *rlig-rlugs*, which Mvy. 8869 equates to *vātāṇḍa* “testicular swelling.”—The form *brlig* (for *rlig*), as found in NP, is not otherwise attested. In C *rlig* has been miscarved *rlu*^g, with a superfluous u-sign below the initial ligature.

Instead of *skran*, the common equivalent of *gulma* “abdominal swelling,” CD read *skran*, which corresponds to *śopha* or *śvayathru* “cutaneous swelling”; cf. v. 34.

In the last hemistich, the Tibetan version does not agree with the Sanskrit text as handed down to us: *lto-nad lđan dub rims-nad* “fatigue, arising from abdominal diseases, (and) pyrexial diseases” being altogether different from *udaram viśama-jvaram* “visceral induration (and) irregular fever.” The translators must have read something like *udarajam śramam jvaram*, although nothing definite can be told. Anyway, *udara* “visceral induration” has been represented by *lto-nad* “abdominal disease” as against *dmu-rdzin(s)* in all other cases (see v. 25), while *jvara* “fever” has been expanded into *rims-nad* “pyrexial disease.”

After *rims-nad, sel* “removes” has been added in anticipation of the predicate *jayet* “cures,” which stands in the next verse and has there been resumed in the modified form *phan* “is wholesome.”

I 5. 58

Sanskrit Text

ruksophau ca kaṭiguhyakoṣṭhapṛsthāśrayau jayet |
tīkṣṇoṣṇam picchilam viśram raktairanḍodbhavam tv ati ||

as well as pain and cutaneous swellings situated in the hip, pudenda, viscera, and back. Violent, pungent, slimy, (and) musty, however, to an exceedingly high degree (is the oil) extracted from the red castor-oil plant.

Tibetan Version

or-nad rked-pa gsañ-bai nad |
 [[6]] *lto-ba ro-rgyab nad-la phan |*
e-rañḍa ni dmar-poi mar |
 (3) *rno tsa dri ña rab 'byil-'dred ||*

(and) is wholesome for cutaneous swellings, diseases of the hip (and) pudenda, (and) diseases of the abdomen (and) back. The oil of the red castor-oil plant is violent, pungent, bad in its smell, (and) exceedingly slimy.

Remarks

ruj "pain" has evidently been omitted since *or-nad* only corresponds to *śopha* "cutaneous swelling"; cf. 1.42, 4.20, 5.14, 25, 30. There is a remote chance that the word has been put in the preceding stanza and turned *nad*, so that *rims nad* would then have to be taken for two different terms.

kaṭīḡhyakoṣṭhaprṣṭhāśraya "situated in the hip, pudenda, viscera, and back" has been represented by *rked-pa gsañ-bai nad lto-ba ro-rgyab nad* "diseases of the hip (and) pudenda (and) diseases of the abdomen (and) back," with the final *āśraya* neglected and the syntactical relation to *ruksopha* severed. Considering the repeated use of *nad* "disease," it is not unlikely that instead of *āśraya* the translators had a variant *āmayāñ* before them; this would at least account for their divergent rendering.—On *jayet* see previous stanza.

picchila "slimy" has been interchanged with *visra* "musty" and reproduced by *'byil-'dred*, which appears to be a tautology: *'byil-ba* recurs in I 26.36 as the sole equivalent of *picchila* but is not otherwise attested, while *'dred-pa* is current in the sense of "to slide" or the like.

visra "musty" has been paraphrased by *dri ña(-ba)* "bad in its smell."

raktairañḍodbhava "extracted from the red castor-oil plant," to which *taila* "oil" must be supplied from the previous stanza, has been shifted to the head of the sentence and rendered by *e-rañḍa ni dmar-poi mar* "oil of the red castor-oil plant," with *udbhava* being represented by a possessive genitive. The distinction between a white (grey) and red castor-oil plant refers to the colour of the seed; cf. NADKARNI, *Materia* I p. 1065 sq. If the oil extracted from the red variety is identical with the Turkey-red oil of commerce (that is, sulphated or hydrochlorinated castor oil) is an open question.

tu "however" (like *ca* "as well as" in 58a) has been omitted and *ati* "exceedingly" connected with *picchila* only, whereas in Sanskrit it belongs to all predicate nouns alike.

I 5. 59

Sanskrit Text

kaṭuṣṇaṃ sārsapaṃ tikṣṇaṃ kaphaśukrāṇilāpahaṃ¹ |
laghu pittāsrakṛt koṭhakuṣṭhārsōvraṇajantujit ||

¹ B; *kaphaśuklāṇilāpahaṃ* K.

Mustard oil (is) pungent, warming, violent, dispersive of phlegm, sperm, and wind, light, productive of hemorrhage, (and) curative of urticaria, leprosy, hemorrhoids, and wound-worms [wounds and worms].

Tibetan Version

yuñs-mar t̥hsa dro rno-ba dan̥ /
bad-kan rluñ sel khu¹-ba [4] 'bri /
yañ-žin khrag-mkhris skyed byed-la /
śa bkra mdze ((4)) 'brum rma-'bu² sel //

¹ DNP; *du* C.

² P; *rmen-bu* CD; *rma-bu* N.

Mustard oil is pungent, warming, (and) violent, removes phlegm (and) wind, sperm decreases, it is light, produces hemorrhage, and removes urticaria, leprosy, hemorrhoids, (and) wound-worms [wounds and worms].

Remarks

sārṣapa “mustard oil” has been shifted to the head of the sentence.

kaphaśukrānilāpaha “dispersive of phlegm, sperm, and wind” has been split into two separate clauses: *bad-kan rluñ sel* “removes phlegm (and) wind” and *khu-ba 'bri* “sperm decreases,” *du* (for *khu*) in C being a xylographical error. The change of subject is noteworthy.

On *koṭha* “urticaria” see 4.18. The present Tibetan equivalent *śa bkra* (“motley flesh”) usually corresponds to *kilāsa* (6.109; cf. Mvy. 9493) or *śvitra* (1.43, 5.81 [v.l. *śa skra*], 14.28, 15.20, 30.3), both of which signify “white leprosy”; it may also be equated to *sikhman* “pityriasis” (Mvy. 9544).

'brum “pock” is a short form of *gzañ-'brum* “anal pocks, hemorrhoids.”

vraṇajantu (~ *rma 'bu*) may be interpreted to mean “wound-worm” as well as “wound and worm.” While Arunadatta and Indu are silent on the point, Candranandana decides in favour of the first possibility; cf. VI 25.19 *sqq.*: *kṛmibhākṣaṇāt... vraṇo naiva sādhyo 'pi rohati* “not even a curable wound heals when eaten by worms.”—For *rma-'bu* CD have substituted *rmen-bu*, which corresponds either to *arbuda* “tumour” (11.10) or, more frequently, to *granthi* “node” (16.8, 17.27 [v.l. *smen-bu*], 20.3, 30.42 [v.l. *smen-bu*]); the dictionaries list it as “wen.” The spelling *rma-bu* (for *rma-'bu*) in N is suspect.

I 5. 60

Sanskrit Text

ākṣaṃ svādu himaṃ keśyaṃ guru pittānilāpaham |
nātyuṣṇaṃ nimbaṃ tiktam kṛmikuṣṭhakaphapraṇut //

(The oil) got from belleric myrobalans (is) sweet, cooling, conducive to the hair, heavy, (and) dispersive of cholera and wind. That got from chinaberries (is) not too warming (but) bitter (and) expulsive of worms, leprosy, and phlegm.

Tibetan Version

ba-ru[[7]]-rai mar m̥iar bsil lei /
skra¹ skyed² rluñ dan̥ mkhris-pa sel /

¹ NP; *skran* CD.

² N; *skye* CD; *bskyed* P.

nim-dmar rab-tu thsa min kha |
 (4) *lto³-srin mkhris-pa bad-kan sel ||*

³ CD; *lta* NP.

The oil of belleric myrobalans is sweet, cooling, (and) heavy, produces hair, (and) removes wind and choler. The oil of chinaberries is not much warming (but) bitter (and) removes intestinal worms, choler, (and) phlegm.

Remarks

ākṣam (sc. *tailam*) "oil got from belleric myrobalans [*Terminalia bellerica* Roxb.]" has been rendered by *ba-ru-rai mar* "oil of belleric myrobalans," with the taddhita suffix *aṅ* (± — a) corresponding to a genitive.

keśya "conducive to the hair" has been interchanged with *guru* "heavy" and translated by *skra* (b) *skyed* "produces hair." In CD this has been corrupted to *skran skye* "abdominal swellings are produced."

pitta "choler" and *anila* "wind" have been transposed, probably on grounds of rhythm.

nimbajam (sc. *tailam*) "oil got from chinaberries [*Melia azadirachta* L.]" has been moved to the beginning of the sentence and turned *nim-dmar* "oil of chinaberries," with the root-suffix *ja* neglected.—*dmar*, which is not otherwise attested, appears to be a secondary form of *mar*.

kṛmi "worm" has been paraphrased by *lto-srin* "intestinal worm," *lta-srin* in NP being suspect.

Instead of *kuṣṭha* "leprosy" the Tibetan has *mkhris-pa* "choler"; the basic text must have read *pitta*.

I 5. 61

Sanskrit Text

umākusumbhajam coṣṇam tvagdoṣakaphapittakṛt |
vasā majjā ca vātaghnau balapittakaphapradau ||

That got from linseed and safflower (is) warming (and) productive of skin-diseases, phlegm, and choler. Lard and marrow (are) destructive of wind, generative of strength, choler, and phlegm,

Tibetan Version

zar-ma le-brgan rtsi-yi mar |
 [5] *dro-ñin pags-nad bad mkhris bskyed¹ |*
ḡag dan rkañ ni rluñ [[8]] 'joms-ñin |
 ((5)) *stobs dan khu-chru bad-kan bskyed¹ ||*

¹ NP; *skyed* CD.

The oil of linseed (and) safflower-juice is warming and produces skin-diseases, phlegm, (and) choler. Lard and marrow subdue wind, produce strength, sperm, (and) phlegm,

Remarks

umākusumbhajam (sc. *tailam*) "oil got from linseed [*Linum usitatissimum* L.] and safflower [*Carthamus tinctorius* L.]" has been translated by *zar-ma le-brgan*

has been paraphrased by *drod 'bar* "(digestive) heat is kindled," *rocana* "appetizing" by *yi-ga 'byed* "stimulates appetite," *uṣṇa* "warming" by *drod (b)skyed* "produces warmth," and *tuṣṭipuṣṭida* "generative of satisfaction and plumpness" by *khon brta dga* "one grows plump in stature (and) gets satisfied," with *tuṣṭi* and *puṣṭi* transposed on grounds of rhythm. While *rita* in NP appears to be a secondary (though unattested) spelling of *brta*, *khon-pa* properly denotes the interior of a thing; in a more general usage, however, it may signify any state of affairs, either mental or physical, and must then be translated according to circumstances.

I 5. 63

Sanskrit Text

sasvādutiktakaṭukam amlapākarasaṃ saram |
sakaśāyaṃ svarārogyapratibhāvarṇakṛt laghu ||

slightly sweet, bitter, and pungent, of sour digestion and taste, purgative, slightly astringent, productive of voice, freedom from disease, boldness, and colour, light,

Tibetan Version

mñar bcas kha-ñin thsa-ba dan |
žu rjes skyur-ñin cuñ-zad ((6)) 'khru |
bska bcas gdañs sñan nad-med dan |
spobs bskyed mdog 'gyur khon yañ-ñin¹ ||

¹ NP; *yuñs-ñin* C; *yañs-ñin* D.

it is slightly sweet, bitter, pungent, sour after digestion, a little purging, (and) slightly astringent, produces a melodious tone (of the voice), freedom from disease, and boldness, colour arises, it is light in weight and

Remarks

The prefix *sa*, which doubtless belongs to *svādu*, *tikta*, and *kaṭuka* alike, has been connected with *svādu* only: *mñar bcas* "slightly sweet."

amlapākarasa "of sour digestion and taste" has been rendered *žu rjes skyur* "sour after digestion," with *rasa* neglected, while the following *sara* "purgative" has been translated *cuñ-zad 'khru* "a little purging." It strongly looks as if the Tibetans read something like *amlapāka* and *sasara*, though it is difficult to bring this into harmony with the metre.

The compound *svārārogyapratibhāvarṇakṛt* "productive of voice, freedom from disease, boldness, and colour" has been resolved into two gerundial clauses: (1) *gdañs sñan nad-med dan spobs bskyed* "produces a melodious tone (of the voice), freedom from disease, and boldness" and (2) *mdog 'gyur* "colour arises," with an intransitive verb taking the place of a transitive one.

laghu "light" has been turned *khon yañ* "light in weight"; on the meaning of *khon-pa* see previous stanza.—For *yañ-ñin* D gives a probably corrupt *yañs-ñin* (lit. "wide" but perhaps to be connected with *gyeñ-ba* "to disturb mentally"), which C has further corrupted to *yuñs-ñin*; or is *yañs-pa* just a rare secondary spelling of *yañ-ba*?

I 5. 64

Sanskrit Text

naṣṭanidrātinidrebhyaḥ hitaṃ pittāśradūṣaṇam |
krśasthūlahitaṃ rūkṣaṃ sūkṣmaṃ srotoviśodhanaṃ ||

wholesome for those suffering from insomnia and hypersomnia, vitiative of choler and blood, wholesome for the lean and fat, rough, subtle, purificatory of the vessels,

Tibetan Version

gñid med-pa dan [7] *gñid* (6) *che-la* |
phan-ziñ [[2]] *khraḡ dan mkhris-pa bskyed*¹ |
rigs 'thuñs skem dan sbom phan-ziñ |

¹ NP; *skyed* CD.

² CD; *sno* NP.

wholesome for those lacking sleep and those abounding in sleep, and it produces hemorrhage. Drunk moderately, it is wholesome for the lean and fat, rough, (and) subtle, penetrates and purifies the apertures of the body,

Remarks

The words *naṣṭanidrātinidrebhyaḥ hitaṃ* “wholesome for those suffering from insomnia and hypersomnia” have been represented by *gñid med-pa dan gñid che-la phan-ziñ*, which admits of two different interpretations: (1) “wholesome for those being without [lacking] sleep and those being great [abounding] in sleep” and (2) “wholesome for non-existent sleep [insomnia] and great sleep [hypersomnia]”; as the former comes closer to the original, it deserves preference here.

pittāśradūṣaṇa may be rendered “vitiative of choler and blood” as well as “counteractive to bile-blood [hemorrhage].” Neither the commentaries nor the parallel passages Suśr. I 45.170 sq. and Car. I 27.178 provide a clue. The Tibetans, however, have decided in favour of the first possibility (*khraḡ dan mkhris-pa (b)skyed* “produces blood and bile [hemorrhage]”), the vitiation of choler and blood in fact provoking hemorrhage; cf. III 3.1 sqq.

rigs 'thuñs corresponds to *yuktyā pītam* “if drunk moderately” in the next stanza. By placing this clause before *krśasthūlahita*, the Tibetans have confined its reach to the latter part of the sentence, though it no doubt belongs to the preceding portion as well.

sūkṣma “subtle” has again been turned *rno*, which usually means “violent”; cf. v. 55. The spelling *sno* found in NP is not otherwise known.

srotoviśodhana is ambiguous; it may be translated by “purificatory of the vessels” and by “purificatory of the apertures,” *srotas* having both meanings. Again neither the commentaries nor the parallel passages throw any light on the problem. The Tibetans, while in v. 35 reproducing the synonymous *srotāśśodhin* by *rtsa-sbubs sbyoñ* “purifies the vessels,” have here chosen the other alternative: *lus-sgo khyab-ciñ sbyoñ* “penetrates and purifies the apertures of the body.”

I 5. 65

Sanskrit Text

*vātasleṣmaharaṃ yuktyā pītaṃ viṣavad anyathā |
guru tri¹doṣajananaṃ navaṃ jīrṇaṃ ato 'nyathā ||*

¹ B; *tad* K.

(and) eliminative of wind and phlegm—if drunk moderately; otherwise, (it is) like poison. Fresh (it is) heavy (and) causative of the three humours; old (it is) different from this.

Tibetan Version

*rluñ dan bad-kan sel-ba yin |
(7) gzan-du brten¹-na dug dan mthsuñs |
chan gsar² lei-ñiñ ñes bskyed³ [26 b 1] yin |
chan [[3]] rñiñ⁴ de-las gzan-du byed ||*

¹ NP; *bsten* CD.

² NP; *sar* CD.

³ NP; *skyed* CD.

⁴ CDP; *sñiñ* N.

(and) removes wind and phlegm; if one partakes (of it) otherwise, it is like poison. Fresh alcohol is heavy and produces humours; old alcohol acts different from this.

Remarks

On *yuktyā pītaṃ* see preceding verse.

anyathā “otherwise” has been placed before *viṣavat* and expanded into a conditional clause: *gzan-du brten-na* “if one partakes (of it) otherwise.” Instead of *brten* CD read *bsten*; the verbs *rtan-pa* and *sten-pa* are almost identical in meaning but different in construction—the former usually taking the dative, the latter the accusative.

tridoṣajanana “causative of the three humours” has been simplified to *ñes* (*b*)*skyed* “produces humours,” with *tri* “three” neglected; as this is also missing in K, it is likely to be a later emendation.

nava “fresh” has been put before *guru* and, like *jīrṇa* “old,” given a governing noun of its own. For *gsar* CD offer the alternative spelling *sar*; for *rñiñ* N writes *sñiñ* (as in v. 23; cf. note on v. 10).

After *gzan-du* the translators have added *byed* “acts” as predicate.

I 5. 66

Sanskrit Text

*peyaṃ noṣṇopacāreṇa na viriktakṣudhāturaiḥ |
nātyarthatikṣṇamṛdvalpasaṃbhāraṃ kaluṣaṃ na ca ||*

(It is) to be drunk neither by one who is engaged in warming activities¹, nor by those who have been purged and who are pained with hunger, nor (when it is) exceedingly fierce and mild and made of inferior material, nor (when it is) turbid.

¹ Such as walking (*vihāra*), eating (*āhāra*) etc.—Aruṇadatta.

Tibetan Version

thsa-bai (7) *spyod-par*¹ *ldan mi btuñ* |
sun-ciñ bkres ñen nad-pas min |
śin-tu rno min sar-pa dan |
*legs-par ma bslanś rñog-can min*² ||

¹ CD; *pas* NP.² NP; *yin* CD.

It shall not be drunk by one who is engaged in warming activities, nor by one who is tired and pained & diseased with hunger, nor (when it is) exceedingly fierce, nor (when it is) fresh, not properly prepared, (and) turbid.

Remarks

The present stanza forms a quadripartite negative sentence, with the predicate (*peya*) standing at the head and each member beginning, or ending, with a negative particle (*na*). In Tibetan, the fourfold division has been retained (for a difference in relation, *v. inf.*), but the principal verb (*btuñ*) has been included in the first clause and resumed by an auxiliary (*min*) in each consecutive clause, while the negation has been referred to the verbs instead of the nouns.

uśnopacāra "engaged in warming activities" has been translated by *thsa-bai spyod-par* *ldan* in CD and by *thsa-bai spyod-pas* *ldan* in NP. As *ldan-pa* invariably requires the terminative or the postposition *dan*, the instrumental in NP is very strange; it seems to have been caused by the instrumental in Sanskrit.

virīkṭakṣudhātura "purged and pained with hunger" has been rendered by *sun-ciñ bkres ñen nad-pa* "tired and pained & diseased with hunger." The phrase *ñen nad-pa* must be understood as a hendiadys: "painfully diseased with hunger." For *virīkṭa* "purged" the basic text appears to have read *khedīta* "tired" or the like.

After *atyarthatikṣṇa* a break has been made and the following *mṛdvalpasam-bhāra* joined to *kaluṣa*, so that the third and the fourth clause do not fully agree with their Sanskrit counterparts.

Instead of *mṛdu* "mild" the Tibetans seem again to have read something else, possibly *nava* (which does not, however, suit the metre).

alpasambhāra "made of inferior material" has been paraphrased by *legs-par ma bslanś* "not properly prepared."

The final *min* has been corrupted in CD to *yin*.

I 5. 67

Sanskrit Text

gulmodarārśograhaṇīśoṣahr̥t snehanī guruh |
surāṇīlaghnī medosṛkṣṭanyamūtrakaphāvahā ||

Arrack (is) eliminative of abdominal swellings, visceral induration, hemorrhoids, dysentery, and desiccation, lubricant, heavy, destructive of wind, (and) generative of fat, blood, breast-milk, urine, and phlegm.

Tibetan Version

'bru-chañ skran dan dmu((54b1))-*rdzin*¹ *dan* |
*rtug skem glo*²-*gcoñ* [[4]] *sel-ba dan* |
 [2] *rtuñ 'joms thsil dan khrag bskyed*³-*ciñ* |
gcin bder 'byin(54b1)-*zin*⁴ *bad-kan bskyed*³ ||

¹ CDP; *rdziñs* N.² CD; *blo* NP.³ NP; *skyed* CD.⁴ CD; *ciñ* NP.

Arrack removes abdominal swellings, visceral induration, dry excrements, (and) pulmonary consumption, destroys wind, produces fat and blood, lets (one) easily pass urine, and produces phlegm.

Remarks

On the spelling of *dmu-rdzin(s)* see v. 25.

arśas "hemorrhoids" as well as (a little later) *snehana* "lubricant," *guru* "heavy," and *stanya* "breast-milk" have been omitted, apparently for lack of space.

grahanī, which usually denotes the *grahanī* organ or its morbid affection (~ *grahanigada* or *grahanidoṣa* "dysentery"; cf. v. 14), has here been translated by *rtug skem* (also written *rtug skam* or *rtug sk[y]ems*) "dry excrements," an oft-recurring paraphrase for costiveness (cf. 4.2 & 5.29). This rendering goes back to an eccentric interpretation also found in Nilakaṇṭha's commentary on MBh. III 209.16, where *grahanidoṣa* is explained as *viṣṭambhāroga* "constipation." It may be remembered that the cognate *grāhin* is frequently used in the sense of "constipating" (cf. vv. 29 & 36).

śoṣa "desiccation" [Tib. *skem(s)*] has been replaced by the synonymous *glo-gcoñ* "pulmonary consumption" [Skr. *kṣaya*]; cf. III 5. For *glo* NP read *blo* again; cf. 2.6 & 5.49.

surā "arrack" has been transferred to the beginning of the sentence and reproduced by 'bru-*chan* ['brui *chan* Mvy. 5719], which literally means "corn spirits," as against simple *chan* "spirits" in 3.12. The English term "arrack" must of course be viewed with caution as it is only approximate, *surā* being an intoxicating drink made of barley or rice and sometimes of wheat; cf. OM PRAKASH, Food p. 300.

The compound *medosṛkstanīyamūtrakaphāva* "generative of fat, blood, breast-milk, urine, and phlegm" has been resolved into three clauses: (1) *thsil dan khrag* (*b*)*skyed-ciñ* "produces fat and blood," (2) *gcin bder* 'byin-*ziñ* "lets (one) easily pass urine" (v. 5.47), and (3) *bad-kan* (*b*)*skyed* "produces phlegm." For 'byin-*ziñ* NP write, less correctly, 'byin-*ciñ*.

I 5. 68

Sanskrit Text

tadguṇā vāruṇī hṛdyā laghutikṣṇā¹ nihanti ca |
śūlakāsavamiśvāsavibandhādhmānapinasān ||

¹ B; *laghus tikṣṇā* K.

Toddy (is) of the same qualities, cardiac, light, (and) violent and destroys twinge, cough, nausea, dyspnea, constipation, inflation, and catarrh.

Tibetan Version

chan danṣ yon-tan de 'dra-las |
gid oñ yañ-ziñ rno-ba dan |
gzer dan lud-pa dbugs mi bde |
skyug-bro bśaṅ [[5]] 'gags ((2)) sbos cham 'joms ||

Toddy resembles it in quality, suits one's mind, is light and violent, and destroys twinge, cough, dyspnea, nausea, confined stool, inflation, (and) catarrh.

Remarks

tadguṇa "of the same qualities" has been placed after *vāruṇī* and paraphrased by *yon-tan de 'dra-las* "resembles it in quality."

vāruṇī "toddy" has been translated by *chan danś* (thus also in 7.41), which literally means "clear spirits" and in 3.12 corresponds to *acchāsura* "barm" (~ *surāmaṇḍa* Sch.).

hṛdya "cardiac" has been interpreted as *yid on* "suits one's mind," which is at variance with the explanations offered by Aruṇadatta and Candranandana (*hṛdayā hitā*); see Introd. § 27.

vibandha "constipation" has been rendered by *bśan 'gags* "confined stool."

I 5. 69

Sanskrit Text

nātitivramadā laghvī pathyā baibhītakī surā |
vraṇe pāṇḍvāmāye kuṣṭhe na cātyarthaṃ virudhyate ||

Spirits made of belleric myrobalans (are) generative of not too strong an intoxication, light, (and) salutary, and are not altogether forbidden in wounds, jaundice, (and) leprosy.

Tibetan Version

ba-ru¹-ra chan yañ-ziñ phan |
[3] śin-tu ra-ror mi 'gyur-ziñ |
rma dan skya-rbab mdze-nad-la |
ha-can gnod-par mi (2) 'gyur-ziñ ||

¹ CD; *tu* NP.

Spirits of belleric myrobalans are light and salutary, one does not get too intoxicated (by them), and they do not get very harmful in wounds, jaundice, (and) leprosy.

Remarks

nātitivramadā "generative of not too strong an intoxication" has been interchanged with *baibhītakī surā* and reproduced by a gerundial clause: *śin-tu ra-ror mi 'gyur-ziñ* "one does not get too intoxicated."

baibhītaka "made of belleric myrobalans [Terminalia bellerica Roxb.]" has been rendered simply by the attributively used *ba-ru-ra* "belleric myrobalan," for which NP give a doubtless corrupt *ba-tu-ra*; cf. 5.60 and Mvy. 5797.

na cātyarthaṃ virudhyate "and are not altogether forbidden" has been paraphrased by *ha-can gnod-par mi 'gyur-ziñ* "do not get very harmful," with the attendant locatives changed into datives of sphere.

I 5. 70

Sanskrit Text

yathādravyaguno 'riṣṭaḥ sarvamadyaguṇādhikaḥ |
grahāṇīpāṇḍukruṣṭhārśaḥśophaśoṣodara¹jvarān ||

¹ B; *śośaśophodara* K.

Liqueur (is) possessed of the qualities of the corresponding raw materials (and) superior to all the qualities of alcohol; it destroys [hanti 71a] dysentery, jaundice, leprosy, hemorrhoids, cutaneous swellings, desiccation, visceral induration, fever,

Tibetan Version

rdzas bžin yon-tan rjes mthun chañ |
 chañ-gi yon-tan kun-las [[6]] lhaq |
 pho-nad skya-rbab mdze gžañ²-brum |
 lus ((3)) skem skrañ-or dmu¹-rdziñ rims //

¹ CD; smu NP.

Agreeing with the qualities of the corresponding raw materials, liqueur is superior to all the qualities of alcohol; it removes [sel 71a] dysentery, jaundice, leprosy, hemorrhoids, desiccated body, cutaneous swellings, visceral induration, fever,

Remarks

yathādravyaguṇa “possessed of the qualities of the corresponding raw materials” has been rendered by means of a participial clause: *rdzas bžin yon-tan rjes mthun* “agreeing with the qualities of the corresponding raw materials.” By making this participial clause an attribute of *chañ*, the Tibetans could preserve the original hyperbaton.

ariṣṭa “liqueur” has been represented simply by *chañ*. This is all the more astonishing as the following *madya* “alcohol” has been translated the same way, so that the antithesis of these terms gets effaced. It looks as if the Tibetans had no suitable equivalent for *ariṣṭa* on hand; in two other cases (3.22 & 45) they have dropped it altogether.—For the preparation of *ariṣṭa*, see remarks on 3.22.

grahaṇī “dysentery” has been paraphrased by *pho-nad*, which literally means “stomach-disease”; for the several other ways taken in Tibetanizing this term, see Introd. § 27.

śoṣa “cutaneous swelling” has been interchanged with *śoṣa* “desiccation” (the basic text appears to have read *śoṣaśophodara*, as found in K) and reproduced tautologically by *skrañ-or*, either component being elsewhere used in the same sense: for *or(-nad)* see 1.42, 4.20, 5.14, 25, 30 & 58; for *skrañ(s-pa)* see the references given at 5.34.

śoṣa “desiccation” has been turned *lus skem* “desiccated body.”

Instead of *dmu-rdziñ* NP write *smu-rdziñ*, which is not attested so far; cf. v. 25.

I 5. 71

Sanskrit Text

hanti gulmakṛmīplihān kaṣāya¹kaṭuvātalaḥ |
 mārḍvikam lekhanam hṛdyam nātyuṣṇam madhuraṁ saram //

¹ B; °plihnaḥ kaṣāyaḥ K.

abdominal swellings, worms, and splenopathy, (and is) astringent, pungent, and productive of wind. Wine (is) stimulative, cardiac, not too warming, sweet, purgative,

Tibetan Version

[4] *skran dañ srin*¹-*bu mcher-nad sel* /
*ro ni bska-ñin thsa rluñ bskyed*² /
rgun-chañ nad sbyoñ sñin-la phan /
šin-tu dro min (3) *mñar-ñin khru* //

¹ DNP; *srid* C.

² NP; *skyed* CD.

abdominal swellings, worms, (and) splenopathy, is astringent and pungent in taste, (and) produces wind. Wine cures diseases, is wholesome for the heart, not too warming, sweet, and purging,

Remarks

srid-bu (for *srin-bu*) in C appears to be a xylographical error; cf. v. 56.

kaṣṣyakatu "astringent and pungent" has been translated by *ro ni bska-ñin thsa* "astringent and pungent in taste."

For *bskyed* CD write *skyed* again.

mārdvika "wine" (from *mṛdvikā* "vine") has been represented by *rgun-chañ*, which properly means "grape spirits."

lekhaṇa "stimulative" has been interpreted as *nad sbyoñ* "cures diseases." This is in keeping with Candranandana's paraphrase *vikarṣaṇa* "drawing apart, destroying," but does not quite agree with Aruṇadatta's definition (from which Indu differs only in wordage): *vilikhaty atitaikṣṇyād yad dhātūṃs tal lekhaṇaṃ matam* "that which because of its excessive violence stimulates the elements (is) considered lekhaṇa." Cf. 4.11, where *pravartayet* "one shall stimulate" has been turned *bsal bya-ñin* "one shall remedy."—HILGENBERG & KIRFEL render "skarifizierend"; but how can wine possibly be scarifying?

hṛdya "cardiac" has been reproduced by *sñin-la phan* "wholesome for the heart," although Candranandana glosses *hṛdayāya priyam* "dear to the heart"; cf. *Introd.* § 27.

I 5. 72

Sanskrit Text

alpapittānilaṃ pāṇḍumehārśaḥkrmināśanam /
asmād alpāntaraḡaṇaṃ khārjūraṃ vātalaṃ guru //

possessed of little choler and wind, (and) annihilative of jaundice, diabetes, hemorrhoids, and worms. Wild-date spirits (are) of qualities a little different from this, productive of wind, (and) heavy.

Tibetan Version

mkhriś rluñ [[7]] *cun-zad bskyed*¹ *skya-rbab* /
gcin-nad gñan-brum srin-nad sel //

¹ NP; *skyed* CD.

produces little choler (and) wind, (and) removes jaundice, urinary diseases, hemorrhoids, (and) worm-diseases.

Remarks

alpapittānila "possessed of little choler and wind," as this compound must be analysed according to Aruṇadatta and Candranandana (*alpaṃ pittānilau yasya tat*),

has been interpreted in a slightly different way: *mkhris rluñ cuñ-zad* (*b*)*skyed* “produces little choler (and) wind.”

meha “diabetes” has been paraphrased by *gcin-nad* “urinary disease” and *kṛmi* “worm” by *srin-nad* “worm-disease.”

The second half of the stanza appears to be an interpolation; it is not only missing in Tibetan but also unknown to Candranandana and Hemādri.—The wild date mentioned here goes by the botanical name of *Phoenix sylvestris* Roxb.

I 5. 73

Sanskrit Text

śārkaraḥ surabhīḥ svāduhr̥dyo¹ nātimado laghuḥ |
sr̥ṣṭamūtraśakṛdvāto gaūḍas tarpaṇadīpanaḥ ||

¹ B; *svādur madyo* K.

Sugar spirits (are) fragrant, sweet, cardiac, not too intoxicant, (and) light. Letting (one) pass urine, feces, and wind, rum (is) satiating and digestive.

Tibetan Version

bu-ram-chañ ni gcin rtug ((4)) [5] *’gags |*
’byin-ñiñ noms-la drod bskyed¹ yin ||

¹ NP; *skyed* CD.

Rum lets (one) pass confined urine (and) feces, satiates, and produces (digestive) heat.

Remarks

The first two hemistichs are missing again in Tibetan as well as in Candranandana’s and Hemādri’s commentaries, and hence are likely to be spurious.

sr̥ṣṭamūtraśakṛdvāta “letting (one) pass urine, feces, and wind” has been paraphrased by *gcin rtug ’gags ’byin-ñiñ* “lets (one) pass confined urine (and) feces,” with *vāta* “wind” neglected.

gaūḍa “rum” has been placed at the head of the line and translated by *bu-ram-chañ*, which properly means “molasses spirits.”

dīpana “digestive” has been rendered by *drod* (*b*)*skyed* “produces (digestive) heat.”

I 5. 74

Sanskrit Text

vātapittakaraḥ sīdhūḥ¹ snehaśleṣmarīkārāḥ |
medaḥśophodarārśoghnaś tatra pakvaraso varāḥ ||

¹ B; *sīthūḥ* K.

Sugar-cane spirits (are) productive of wind and choler (and) destructive of oil- and phlegm-(caused) diseases; among the (two kinds of sugar-cane spirits), that made of boiled (sugar-cane) juice (is) the best, destructive (as it is) of fat, cutaneous swellings, visceral induration, and hemorrhoids.

Tibetan Version

*bu-ram-śiñ-chañ rluñ mkhris bskyed*¹ |
snum dañ bad-kan-las byuñ 'joms |
 [[8]] *thsil or dmu-rdziñ (4) gžañ-'brum sel* |
de-bas khu-ba bskol mchog yin ||

¹ NP; *skyed* CD.

Sugar-cane spirits produce wind (and) choler, destroy oil- and phlegm-caused (diseases, and) remove fat, cutaneous swellings, visceral induration, (and) hemorrhoids; among the (two kinds of sugar-cane spirits, that made of) boiled (sugar-cane) juice is the best.

Remarks

śidhu (v.l. *śithu*), which the scholiasts state to be spirits made either of unboiled or of boiled sugar-cane sap (*apakveṣṭurasakṛtaḥ pakveṣṭurasakṛtāś ca Aruṇadatta*), has accordingly been turned *bu-ram-śiñ-chañ* "sugar-cane spirits" and moved to the beginning of the sentence.

snehaśleṣmarvikāraha "destructive of oil- and phlegm-(caused) diseases" has been translated *snum dañ bad-kan-las byuñ 'joms* "destroy oil- and phlegm-caused (diseases)," with *vikāra* replaced by *byuñ* and the consequent ellipsis to be completed from the context.

madaḥśophodarārsoghna "destructive of fat, cutaneous swellings, visceral induration, and hemorrhoids" has been joined, not to what follows as done by the commentators, but to what precedes as suggested by the word-order, with the ordinary *or-nad* shortened to *or* for lack of space.

pakvarasa "made of boiled (sugar-cane) juice" has been handled as if it were not a possessive but an appositional compound: *khu-ba bskol* "boiled (sugar-cane) juice."

I 5. 75

Sanskrit Text

chedī madhvāsavaś tikṣṇo mehapīnasakāśajit |
raktapittakaphotkledī śulṭaṃ vātānulomanam ||

Mead (is) dissolvent (of lumps), violent, (and) curative of diabetes, catarrh, and cough. Verjuice (is) humidific of blood, choler, and phlegm, regulative of wind,

Tibetan Version

*sbran-chañ 'grib byed rno-ba yin*¹ |
 [6] *gcin-nad cham-pa lud-pa sel* |
 ((5)) *thsa ni khrag mkhris bad-kan-dag* |
'ju-ziñ rluñ ni sñoms byed-la ||

¹ NP; *ste* CD.

Mead reduces (lumps), is violent, (and) removes urinary diseases, catarrh, (and) cough. Verjuice digests blood, choler, (and) phlegm, regulates wind,

Remarks

chedin "dissolvent (of lumps)," as Indu explains the word at v. 51, has been translated by 'griḥ byed "makes (lumps) grow less, reduces (lumps)." An allusion seems to be made here to the reduction of fat depots.

madhvasava, which (according to the commentators) is synonymous with *mādhava* "mead," has been interchanged with *chedin* and rendered by *sbrañ-chañ*, lit. "bees' spirits."

For *rno-ba yin* CD have substituted *rno-ba-ste*.

meha "diabetes" has been reproduced more generally by *gcin-nad* "urinary disease."

°utkkledin "humidific" has been turned 'ju-ziñ "digests" and the compound placed after *śukta*.

śukta, which properly means "turned sour" and then denotes any sour drink, in especial an alcoholic one, has been represented by *thsa*, lit. "hot, pungent"; thus also in 5.77, 8.40, 17.9, 22.4, 28.42. Strange though this equation may seem, we are given no choice but to take cognizance of it.

I 5. 76

Sanskrit Text

bhr̥soṣṇatīkṣṇarūkṣāmla¹hṛdyam rucikaram saram |
dīpanam śīśirasparśam pāṇḍurkṛmīnāśanam ||

¹ B; *rūkṣāmlam* K.

excessively warming, violent, rough, sour, and cardiac, generative of appetite, purgative, digestive, cool in touch, (and) annihilative of jaundice, vision, and worms.

Tibetan Version

rab-tu thsa-ziñ [[27 b 1]] *rno rtsub skyur |*
yid on yi-ga 'bye-ziñ 'khru |
drod bskyed¹ reg-na (5) bsil-ba dan |
skya-rbab srin² sel mig-la gnod ||

¹ NP; *skyed* CD.

² DNP; *srid* C.

is excessively warming, violent, rough, (and) sour, suits one's mind, appetite arises, it purges, produces (digestive) heat, is cool when touched, removes jaundice (and) worms, (and) harms the eyes.

Remarks

hṛdya "cardiac" has again been rendered by *yid on* "suits one's mind," while the scholiasts do not elaborate; for details, see Introd. § 27.

rucikara "generative of appetite" has been translated by *yi-ga 'bye-ziñ* "appetite opens, arises." In all similar occurrences except 5.62, the transitive *yi-ga 'byed(-cin)* has been substituted by either CD or NP; cf. 4.30, 5.30, 5.79.

dīpana "digestive" has again been represented by *drod (b)skyed* "produces (digestive) heat."

śīśirasparśa "cool in touch" has been put verbally: *reg-na bsil-ba* "cool when touched."

The compound *pāṇḍurḍḍḥkṛmināśana* “annihilative of jaundice, vision, and worms” has been split into two separate clauses: *skya-rbab srin sel* “removes jaundice (and) worms” and *mig-la gnod* “harms the eyes.”—The form *srid* (for *srin*), although recurring in vv. 56 & 71, appears to be a xylographical error rather than a secondary spelling.

I 5. 77

Sanskrit Text

guḍekṣumadyamārdvīkaśuktaṃ laghu yathottaram |
kandamūlaphalādyaṃ ca tadvat vidyāt tadāsutam ||

Verjuice of molasses, sugar-cane, spirits, and wine (is) light in the sequence (of its raw material). And then one shall know squash of bulbs, roots, fruits, etc. (to be also) like this.

Tibetan Version

bu[7]-ram bur¹-śiñ rgun-chañ dan |
thsa ni phyi-ma phyi-ma yañ |
sdoñ-bu rtsa-ba 'bras ((6)) sog²-las |
mnan-byas [[2]] de dan 'drar śes bya ||

¹ CD; *bu* NP.

² NP; *stsogs* CD.

Verjuice of molasses, sugar-cane, (and) wine is light in the sequence (of its raw material). Squash of stalks, roots, fruits, etc. one shall know to be (also) like this.

Remarks

ikṣu “sugar-cane” has been rendered by *bur-śiñ* (less correctly spelt *bu-śiñ* in NP), which is a contraction of *bu-ram-śiñ*.

madya “spirits” appears to have been omitted. It is possible, however, that *rgun* is short for *rgun-chañ* and represents *mārdvīka* while *chañ* corresponds to *madya*, or that the following *dan* (which has no conceivable office anyway) is an old corruption of *chañ*.

kanda “bulb” has been replaced by *sdoñ-bu* “stalk.” Apparently the basic text read *kāṇḍa*.

The particles *ca* and *tadā* have been dropped.

āsuta “squash” has been placed before *tadvat* and translated by *mnan-byas*; as *āsuta* is properly the passive past participle of *āsu* “to press,” so is *mnan byas* the perfect of its equivalent (*g*)*non-pa*, with *byas* added pleonastically.

dhānyāmlaṃ bhedi tikṣṇoṣṇam pittakṛt sparśasītalam ||

¹ B; *cāṇḍāki* K.

Śāṇḍāki as well as other squash (turned) sour in the course of time (are) appetizing (and) light. Rice-made acid (is) cathartic, violent, warming, generative of choler, cool in touch,

Tibetan Version

rdo-gu-la sogs b'zur¹-ba g'zan /
dus-kyi skyur-po yañ zas len /
'bras-khui² (6) rañ-skyur 'khru rno t'hsa /
mkhris[27a1]-pa bskyed³ byed bskus-na bsil //

¹ CD; *b'zur* NP.

² CDP; *bui* N.

³ N; *skyed* CDP.

Śāṇḍākī [?] etc. (as well as) other squash [?] (turned) sour in the course of time are light (and) seize food. Rice-water acid purges, is violent (and) warming, produces choler, is cool when smeared (on the body),

Remarks

In the first pāda, we have good reason to believe that *śāṇḍākī* (v.l. *cāṇḍākī*) and *āsuta* correspond to *rdo-gu* and *b'zur-ba* (v.l. *b'sur-ba*), although there is no internal evidence to corroborate this assumption: *rdo-gu* and *b'zur-ba* are known only in the meaning of "small stone" and "to shear, strain," while *b'sur-ba* derives from *sur-ba* "to singe, cut off." What renders the above equation slightly dubious is the addition in Tibetan of *-la sogs* "etc."; maybe *rdo-gu* denotes one of the ingredients of *śāṇḍākī*, though it could not be identified as one of those mentioned by Aruṇadatta: *mūlakasarṣapāsākāni kvathitāsutāni kālajīrakarājīkāsu bhāvitāny amlatikṣṇāni śāṇḍākīśabdenocyante /*

"Raddish, black mustard, and potherbs (that have been) boiled, pressed out, (and) soaked in (an infusion of) black cummin and brown mustard (are) sour and violent (and) are denoted by the term śāṇḍākī."

kālāmla "(turned) sour in the course of time" has been translated *dus-kyi skyur-po*; judging from the explanation given by the commentators (*kālenāmla*), *dus-kyi* seems to stand for *dus-kyis* (see note on 2.30).

rocana "appetizing" has been interchanged with *laghu* "light" and paraphrased by *zas len* "seize food," an expression recurring in 6.65 & 11.3 for *ruci*, in 6.80 for *rucya*, and in 6.116 again for *rocana*.

dhānyāmla "rice-made acid," by which a sort of sour rice-gruel must be understood, has been rendered by *'bras-khui rañ-skyur* "rice-water acid"; the synonymous *kāñjika* has been reproduced in 30.31 by *rañ-skyur* alone and in 8.48 by *rtsabs-mo* (cf. Mvy. 5722)¹.—Like the nominal *amla*, *rañ-skyur* properly denotes acid in the non-chemical sense of the word, but not vinegar, as CSOMA has it, which is unknown in Tibet. The term as such may conveniently be interpreted as something that is "sour by itself." For *'bras-khui rañ-skyur* N reads *'bras-bui rañ-skyur*, which seems to be a mistake, the letters *kha* and *ba* being easily confusable.

sparsaśīṭala "cool in touch" has been represented by *bskus-na bsil* "cool when smeared (on the body)" as against *reg-na bsil-ba* "cool when touched" in v. 76. There is no conceivable reason for this change in phrase.

¹ In this last case, the preceding *rañ-skyur* corresponds to *amla* and together with *rtsabs-mo* constitutes a tautology.

eliminative of fatigue and weariness, appetizing, digestive, expulsive of twinge in the bladder, recommended for a lubricant enema, cardiac, light, (and) destructive of wind and phlegm. Such (is) the section on alcohol.

Tibetan Version

nal dan rmya sel yi-ga 'byed¹ |
drod bskyed² chu[[3]]-soi nad sel yin |
((7)) mas-btan³-la phan yid-du on |
yan-ziñ rluñ dan bad-kan 'joms ||

¹ CD; 'bye NP.

² NP; *skyed* CD.

³ NP; *gton* CD.

removes fatigue and exhaustion, stimulates appetite, produces (digestive) heat, removes diseases of the bladder, is useful for an enema, suits one's mind, is light, and destroys wind and phlegm.

Remarks

klama usually signifies "weariness" as distinguished from *śrama* "fatigue," involving no physical exertion; cf. Suśr. III 4.51. Here and in 6.137, however, it has been reproduced by *rmya* (-ba), a term elsewhere corresponding to *glāni* (14.30 with v.l. *gña*; cf. 5.38), *tandrā* (7.64), or *saṃnyāsa* (Mvy. 9553 with v.l. *rme-bya*), which all mean "exhaustion."

On *yi-ga 'bye(d)* see v. 76.

dīpana "digestive" has again been translated by *drod (b)skyed* "produces (digestive) heat."

bastiśūlanut "expulsive of twinge in the bladder" has been put more generally: *chu-soi nad sel yin* "removes diseases of the bladder."

śasta "recommended" has been placed after *āsthāpana* "lubricant enema" and turned *phan* "is useful." For *mas-btan* CD have substituted *mas-gton* (as in all previous occurrences).

On *yid-du on* see Intro. § 27.

glañ-po rta boñ rña[2]-moi gcin |
mkhris bskyed¹ rtsub-ciñ (7) rno-la thsa |
'thuñs rjes [[4]] thsa bro² ro thsa-ste ||

¹ NP; *skyed* CD.

² CD; *dro* NP.

Cow's urine (as well as) goat's, sheep's, buffalo's, elephant's, horse's, donkey's, (and) camel's urine produce choler, are rough, violent, and warming, taste salt after being drunk, are pungent in flavour, and

Remarks

mūtra "urine" has been translated twice, after *go* "cow" and after *uṣṭra* "camel" (which has been interchanged with *khara* "donkey"), while *udbhava* "coming from" has been reproduced by means of a possessive genitive. The distinction between male and female urine, which is also observed in Suśr. I 45.217 *sqq.*, has been disregarded.

lavaṇāmurasa "of salt after-taste" has been rendered by *'thuñs rjes tḥsa bro* "taste salt after being drunk." In NP this has been corrupted to *'thuñs rjes tḥsa-dro*, which may be understood as "pungent after being drunk."

kaṭu "pungent" has been paraphrased by *ro tḥsa* "pungent in flavour."

Tibetan Version

srin-nad or¹-nad dmu-rdziñ sbos |
gzer dan skya-rbab bad-kan rluñ |
dug skran śa bkra² ((55a1)) yi-ga 'chus |
mdze dan gzañ-'brum myur-du 'joms ||

¹ DNP; *oñ* C.

² CD; *skra* NP.

quickly destroy worm-diseases, cutaneous swellings, visceral induration, inflation, twinge, jaundice, phlegm, wind, poison, abdominal swellings, white leprosy, disturbed appetite, black leprosy, and hemorrhoids.

Remarks

kṛmi "worm" has been expanded into *srin-nad* "worm-disease"; cf. v. 72.

oñ-nad (for *or-nad*) in C is a xylographical error.

ānāha "constipation" has been represented by *sbos* "inflation," which is a sequela of constipation; see v. 25, which gives *lto sbos* "inflated belly" instead. Other such instances are found in 6.89, 145, 148, 154, 165, 11.6, 16.32 & 19.2.

aruci "anorexia" has been placed after *śvitra* and rendered by *yi-ga 'chus* "disturbed appetite"; cf. 4.9, 12, 14, 17 & 5.34.

viṣa "poison" has been put in front of *gulma* "abdominal swelling."

śvitra "white leprosy" has been translated *śa bkra* (misspelt *śa skra* in NP), which properly means "motley flesh" and in v. 59 loosely stands for *koṭha* "urticaria."

laghu has been taken for an adverb belonging to *jayet*. Judging from its position, this interpretation is decidedly more satisfactory than the one offered by the scholiasts, who consider it yet another predicate noun.

I 5. 82

Sanskrit Text

*toyakṣīrekṣutailānāṃ vargair madyasya ca kramāt /
iti dravaikadeśo 'yaṃ yathāsthūlam udāhṛtaḥ ||*

By the sections on water, milk, sugar-cane, and oil as well as (that) on alcohol in a row, this one portion of liquids (has) thus (been) described in the rough.

Tibetan Version

*de-ltar [3] chu bo bu-ram-sin /
til-mar chan-gi [[5]] sde-thsoms¹ rim /
gser-bai rdzas (55a1) phyogs gcig-pa 'di /
rags² rim ji-bzin bstan-pa yin ||*

¹ NP; *thsogs* CD.

² DNP; *rigs* C.

Thus, by the sections on water, milk, sugar-cane, oil, (and) alcohol in a row, this one portion of liquid substances has been described in a rough way.

Remarks

kṣīra "milk" has been translated by *bo*, a word not otherwise attested and probably standing for *o(-ma)*, which is colloquially pronounced *wo-ma* (Das, Dict. p. 1116). Maybe this form was chosen in order to avoid the hiatus *chu o*.

varga "section" has been reproduced by *sde-thsoms* (v.l. *sde-thsogs*) as against *sde-thesan* in the previous cases; both expressions are tautologic.

madya "alcohol" has been freed from its isolation and joined to the other genitive attributes, while *iti* "thus" has been placed at the head of the stanza.

drava "liquid" has been paraphrased by *gser-bai rdzas* "liquid substance."

yathāsthūlam "in the rough" has been turned *rags rim ji-bzin* "in a rough way." — *rigs* (for *rags*) in C is a mistake.

In conclusion it may be noted that the present summary makes no mention of the section on urine (v. 80 sq.). There can be little doubt but that the two stanzas concerned are an early interpolation made before the Tibetan version and the commentaries were written. Cf. Introd. § 25.

Kalpa- sthāna 12.86sqq.

Note: For the preceding table have been used KUNTE's edition of the *Aṣṭāṅga-hṛdayasamhitā* [Ah], TARTE's edition of the *Aṣṭāṅgasamgraha* [As], and PABE's edition of the *Carakasamhitā* [Ca]. Though TARTE's edition of the *Aṣṭāṅgasamgraha* does not number its verses, those stanzas which agree either in wording or in

substance with the Aṣṭāṅgahrdayasaṃhitā have been given similar numbers, with the latter put in round brackets (...), whereas those stanzas which are not found in the Aṣṭāṅgahrdayasaṃhitā have been given separate numbers and put in square brackets [...]. Occasionally, round and square brackets have also been used, *mutatis mutandis*, for the Aṣṭāṅgahrdayasaṃhitā and the Carakasamhitā.

**Comparison of Select Prose Portions of the Aṣṭāṅgasamgraha
with their Metrical Counterparts in the Aṣṭāṅgahrdayasaṃhitā**
